IMPROVED QUICK CUT BALL BEARING STEEL FRAME GRINDSTONE.

$3.15

No. 9H58760 Big and excellent value in a mounted grindstone, fully equal to the $4.00 to $4.50 kind sold by others. Every farmer, mechanic or blacksmith, every workman in any line who uses edge tools, should have one of these mounted grindstones. Runs so light the strength of a small boy will easily operate it and grind perfectly the hardest tools. Frame is made of angle steel, firmly braced, is strong and rigid; axle is cold rolled steel, perfectly true and runs on steel ball bearings.

OUR IMPROVED QUICK CUT GRINDSTONE HAS FOUR BALL BEARINGS. The balls used are finest die steel, properly tempered, and run in hardened steel races. It has an adjustable steel seat, double pedals, water cup and guard to protect the operator. The stone is the best Berea grit, 20 to 22 inches diameter and 2 to 2½ inches thick. Just the right size, true and perfect. Shipped knocked down with face of stone protected, and we guarantee safe delivery. Weight of stone, about 60 pounds. Shipping weight, about 85 pounds.

Price, complete, as illustrated.....$3.15

IMPROVED RAPID BALL BEARING GRINDSTONE.

$3.10

No. 9H58764 An extra heavy first quality grindstone that cuts fast, turns easily and is properly mounted. The best grindstone on the market for blacksmiths, machinists, carpenters, farmers and general use. Stone being extra heavy, it runs on a dry wheel and makes turning easy; being extra large, it will do your work for years before it wears out, and being a selected first quality Berea stone, the grit is sharp, it will cut fast and never wear glossy. Our Improved Rapid Grindstones have first quality tempered steel ball bearings, cold rolled steel axles, braced steel legs and hardwood cross pieces and treadle. Machine has crank on one side and foot treadle on other and can be operated by either. Stones are large size and machine is furnished with drip cup. Weight, crated for shipment, about 130 lbs.

Price, complete, as illustrated.....$3.10

Kenwood Combined Sickle and Tool Grinder

FITTED WITH ALUNDUM GRINDING WHEELS. POSITIVELY WILL NOT DRAW THE TEMPER.

Our Kenwood Combination Grinder is the best sickle and tool grinder made. Does the work of two different machines. Grinder holds the sickle knife in a vertical position and provides for the grinding of four sections at one setting. Machine is fitted with patent alundum grinding wheels, which cut very fast, do not draw the temper and have proven very satisfactory in use. The sickle grinder is entirely automatic in its grinding movements. The bevel stone moves up and down against the sections and does not grind at any point long enough to heat or draw the temper. Can be adjusted to grind from point to heel or to grind only down to the knife head. When used as a tool grinder the arm which holds the arbor is raised to a horizontal position where it is held firmly and the bolt rest enables you to do perfect grinding. Price includes one bevel alundum sickle stone, one alundum tool stone, one tool rest, one wheel clamp and one wrench. Arbor for tool stone can be used on any stone not over 4¼ inches diameter or 1¼-inch face with ⅝-inch hole.

EVERY FARMER SHOULD HAVE THIS COMBINATION TOOL OUTFIT

Vise, Anvil, Forge, With Blower, Emery Grinder and Drill Attachments ALL IN ONE.

Our Special Price, $12.50 Complete with Attachments.

A combination of five tools in one. Always ready for use "High Power" Tool Grinder. This Combination Tool Outfit is made especially for farmers, repairmen, small shops, etc. It does the work satisfactorily of five separate tools, vise, anvil, forge and drill and "High Power" Tool Grinder. Simple in construction, no complicated parts to get out of order and the changing from one attachment to another can be done in an instant. Every farmer should have one of these Combination Tool Outfits, and at the low price we quote, it is an excellent bargain. Combination Tool Outfit is strong and durable and nicely finished. It is practical and constructed on scientific principles. The foot power mechanism is so constructed that enough power for forge is obtained with very little exertion.

Height over all is 41 inches. The vise has crucible tool steel jaws 3½ inches wide and opens 10 inches. Vise screw is cold rolled steel. Anvil is 12 inches long over all and is made of semi-steel, which is tough and durable. Hardie is included as illustrated. Forge pan is 12x15 inches and has a strong blower and tuyere. Fly wheel is 11 inches in diameter and has a 1-inch leather belt. "High Power" Tool Grinder has a 5x1-inch corundum wheel. Outfit weighs about 160 pounds. Shipping weight about 180 lbs.

No. 9H3450 Combination Tool Outfit, complete as illustrated. Price.....$12.50

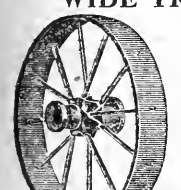
WIDE TREAD METAL WAGON WHEELS

SAVE TIME, LABOR AND MONEY. WIDE TREAD. PULL EASY. SAVE ON REPAIRS, WILL OUTLAST SEVERAL SETS OF WOODEN WHEELS.



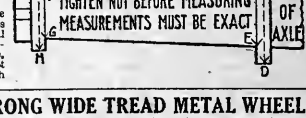
Regular Wide Tread Metal Wheel.

Especially desirable for farm use on plowed ground. They have cast iron hubs, oval wrought steel spokes and wrought steel tires. Spokes are securely fastened and vary in number according to size of wheel. **Made to order only** and we require about fifteen days to make shipment. **We cannot take back wheels that have been sent as ordered.** Be careful in measuring. **Shipped direct from factory in Central Illinois.**

DIRECTIONS FOR ORDERING.

Be sure to give correct catalog number and height of wheels wanted. Also measure your axle or skein as per diagram, giving us length of spindle A to B; diameter of collar C to D; diameter of spindle (next to collar) B to E; diameter of spindle (next to nut) F to G; diameter of nut A to H.

To fill your order we must have the diameter of the axle or skein, not the distance around it. Use a pair of calipers or cut slots in a piece of cardboard as shown in small illustration, to fit snugly over the different points, then measure across the slots. Measure axle or skein from **side to side,** not from top to bottom. **Give exact measurements;** do not allow for play as we will make this allowance. Measure both front and hind skeins as they are not always the same size.



Extra Strong Tread Metal

REGULAR WIDE TREAD METAL WHEELS

made to fit any size axle or skein. Guaranteed to carry 4,000 pounds per set. Amply strong enough for ordinary farm use. **Price quoted is for one wheel. Don't fail to give full measurements.**

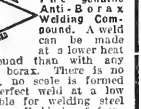
36o ANTI-BORAX WELDING COMPOUND.

No. 9H31118 The genuine Anti-Borax Welding Compound. A weld can be made at a lower heat with Anti-Borax Compound than with any compound that contains borax. There is no sloughing or boiling off, no scale is formed and you get a clean, perfect weld at a low heat. Especially desirable for welding steel to steel, also for welding all kinds of iron.

Price, per 5-pound box.....36c

BORAX-ETTE WELDING COMPOUND. 38c



No. 9H31121 It is far superior to common borax and is especially adapted for welding toe calks. It is used the same as borax and does not have to be applied between the lap like other compounds.

Price, per 5-pound box.....38c

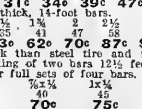
CHERRY HEAT WELDING COMPOUND.

No. 9H31115 Oldest and best known compound on the market. Every weld made with Cherry Heat is stronger than it would be possible to make at any heat without it or with borax. A positive protection to steel from any degree of heat obtainable in a smith's forge. Broken castings can be united at a low heat with the compound, and cast iron firmly united to either wrought iron or steel.



5-pound boxes, per box, **53c**; 1-pound boxes, per box..12c

"SURE-FOOT" HORSESHOE SCREW CALKS.

SAVE YOUR ANIMALS, SAVE YOUR MONEY.

"Sure-Foot" Calks prevent horses from slipping and falling on the ice and sleet. They have a hardened crucible tool steel center with a tough soft steel outside. The crucible steel center is welded in, runs the entire length of the calk and turns some out. (See illustration on the right.) Have deep, well cut threads which will fit any standard calk tap. "Sure-Foot" Calks have square shanks, can be screwed in and taken out with an ordinary wrench or pliers. We guarantee these calks to be equal in quality to any of the standard brands sold for much higher prices than we quote. We do not sell less than fifty calks of a size.

SAVES HEAT. $1.25

Combination Floor and Ceiling Register and Ventilator.

No. 9H23316 Makes one stove do the work of two. Keeps that cold room upstairs warm and comfortable with the heat that is ordinarily wasted near the ceiling of the room below. Consists of a sheet iron register with valves, a white ceiling plate and an adjustable sheet metal box connecting the two. Easily and quickly put into position; just cut the holes in floor and ceiling, place the register and ceiling plate in position and hook the two coil springs that bind them together. Adjustable to fit any floor or ceiling from 7 to 12 inches apart.

Size opening, inches	8x10	10x12	12x15
Price, each	$1.25	$1.65	$2.80

"DOMES OF SILENCE."

CASTERS WITHOUT WHEELS.

Noiseless, Easily Attached.

No. 9H48246 Set consists of four round steel plates with prongs, to be attached to bottoms of chair legs, tables or other furniture. Allow furniture to slide easily and silently over floors or rugs. Save wear and tear on carpets. "Domes of Silence" are the original and only perfect casters without wheels. Beware of cheap, worthless imitations.

Fulton Circular Cordwood Saws.

$2.28 $8.02

These Cordwood Saws can only be furnished as listed below. If you must have a saw in any way different write for special price, giving full specifications

We will not furnish saws larger than 26 inches in diameter with holes smaller than 1¼ inches, as it is not safe to run larger saws on smaller mandrels.

Low speed first quality saws for use on cordwood and pole sawing machines. The special tooth with deep round gullet gives plenty of room to chamber the sawdust and prevents cracking the saw. Made of best saw steel.

Saws as listed below carried in stock in Chicago.

NOTE: State whether 1⅜ or 1½-inch arbor hole is wa
on 28 and 30-inch saws.

Saws 28 to 36 inches not furnished with holes smaller than 1¼ inches, as they are not safe when run on smaller mandrels.

Note All Cut-Off, Cordwood and Rip Saws quoted above are carried in stock in Chicago in the sizes and specifications as listed and can be shipped immediately with other goods if desired upon receipt of your order. If saws are wanted in any way different from the above we ca make them to order quicker than any other firm. Give us full specifications of saws wanted and we will quote low prices at once.

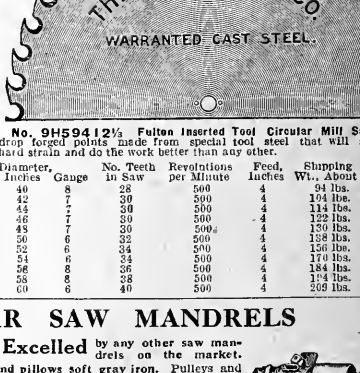
FULTON CIRCULAR MILL SAWS

SOLID TOOTH, 40 TO 60 INCHES.

$13.00 to $52.00

INSERTED TOOT 40 TO 60 INCH

$28.00 $82.



All saws 40 inches and larger, both with solid teeth and inserted teeth, are made to order only, and in ordering be sure to give us all specifications as below so we can make the saw to suit you without the delay that must occur if we have to write you for additional information. We carry plates 40 to 60 inches in diameter in stock at factory in Southeastern Michigan ready to finish on receipt of order and we make shipment of large saws more promptly than any other firm. All saws 40 inches and larger should have 2-inch mandrel holes, with two ¾-inch pin holes, spaced 3 inches center to center. In ordering be sure to give all specifications as follows: Number of teeth wanted in saw, gauge at rim, gauge at center, whether spring or swage set, temper, speed, feed, whether to cut hard or soft wood, right or left hand, size of mandrel hole, size and distance center to center of pin holes.

No. 9H59406½ Fulton Solid Tooth Mill Saws have a reputation for quality second to none and we absolutely guarantee them equal to any saw made, regardless of price.

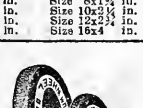
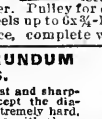
HOWARD CORUNDUM WHEELS.





Corundum is the hardest and sharpest substance known except the diamond. It is not only extremely hard, but is very tough and breaks with sharp jagged edges, making it especially suited for fast grinding. Howard grinding wheels are made of pure corundum of the very best grade, unadulterated with flint, garnet, emery or other inferior substances. Howard Corundum Wheels are made of different sizes of grain and degrees of hardness to suit all classes of grinding.

TABLE showing number of revolutions per minute at which Howard Corundum Wheels give best results.

Diam. Wheel, In.	2	3	4	5	6	8	10	12	14	16	18
Rev. per minute	10,000	7,000	5,300	4,200	3,500	2,600	2,100	1,750	1,500	1,300	1,150

NOTE—No matter what purpose you want a grinding wheel for, we can furnish it. If you require a different size or shape, or a special wheel of any kind, write us, giving full description, and we will quote a low price at once.

HOWARD CORUNDUM TOOL GRINDING WHEELS.

For grinding all kinds of carpenters' and woodworkers' tools, drills, lathe and planer tools, planing mill and paper cutting knives, and for general machine shop use. Can be used wet or dry. When ordering state our catalog number, diameter and thickness of wheel, size of hole in center, and the kind of work wheel is to be used for.

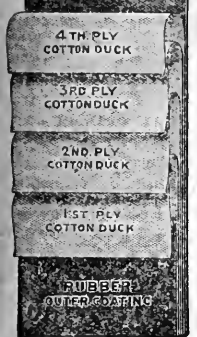
Foot Wheel.

GUARANTEED RUBBER BELTING.



Made throughout of the very best materials, both cotton and rubber belng carefully selected. Our rubber belting stretches less than any on the market, which prevents slipping and makes the belt deliver full power. We do not recommend rubber belts for use on threshers, as canvas belting is superior for such use. Be careful in making orders for belt, for if belt is ordered it cannot be taken back or exchanged. If belts are wanted made endless allow the price of 3 feet of belt for lap and labor of splicing.

2-PLY BANNER BRAND RUBBER BELTING.

Has rubber outer coatings and two cotton duck plies. Banner Belting is the best two-ply belting sold by anyone. Recommended for light work, hand power machines, farm machinery, etc. Equal to belting offered by others at 25 to 50 per cent more than our prices.

No. 9H38902½ Banner 2-Ply Rubber Belting.

For shaft, in.	¾	1	1¼	1½	1¾	2
Price, each	$1.35	$1.50	$1.65	$1.65	$2.10	$2.45

ENDLESS CANVAS BELTS.

Made of our regular stitched canvas belting, spliced in such a manner that they are no thicker and are just as strong and flexible at point of splicing as at any other part of belt. Made of new strong duck or canvas, closely stitched, evenly stretched and filled with a special oil which keeps them flexible and waterproof. They are then paluted with a first quality red paint which causes them to take hold of the pulley and prevents slipping. Do not become soft in cold weather. Best belts made for threshing outfits, quarries, brick machines, saw mills, etc. We carry in stock the belts listed below and can ship any size promptly. Actual lengths of endless belts are 3 feet less than stated, as it requires the price of 3 feet for lap and labor of making belts endless.

POWER HACK SAW.

A first quality machine. Has a capacity sufficient to cut bars up to 4 inches square and is provided with gravity feed. It will cut all kinds of materials, flats, squares and rounds; the wide range of feed enabling even hard steel to be cut off square. The machine is especially suitable for cutting off shafting, light architectural iron, pipe, etc., up to its capacity. Stroke of saw blade, 8 inches; length, 12 inches. Size of pulley, 12¾ x 2½ inches. Speed of pulley, sixty revolutions per minute. Price includes six 12-inch blades. Weight, about 138 pounds.

OUR PRICE. $16.50

Usual price if bought elsewhere, $25.00.

No. 9H4744 Price, without blades **$16.50**

No. 9H4746 Genuine Starrett's Power Hack Saw Blades. Length, 12 inches, 14 teeth to inch, ¾-inch wide.
Price, per dozen 76c

HIGH GRADE BABBITT METAL.

Made from new high grade anti-friction metals, thoroughly refined and properly mixed to give the best results. All of it is entirely dependable and will give good service if used for the purposes for which we recommend it.

7c PER BAR
No. 4 BABBITT METAL.
No. 9H36450 Standard quality, the usual 10 cents per pound kind. A fair grade metal, suitable for use on low speed machinery.
Bars of about 1 pound, price, per bar 7c

10c PER BAR
No. 2 BABBITT METAL.
No. 9H36451 A good general purpose metal. Gives good service on all ordinary machinery running at average speed. Excellent value at our price.
Bars of about 1 pound, price, per bar 10c

13c PER BAR
No. 1 BABBITT METAL.
No. 9H36454 A high quality metal. Fully equal to the best grades generally offered by others. Suitable for high speeds and heavy loads.
Bars of about 1 pound, price, per bar 13c

16c PER BAR
LUBRICATING GRADE BABBITT METAL.
No. 9H36456 An extra high quality copper mixed metal. Regularly sold at 22 to 25 cents per pound. Will stand more and outlast any metal on the market at less than 22 cents.
Bars of about 1 pound, price, per bar 16c

49c PER BAR. OLD HICKORY BABBITT METAL IN ABOUT 2½-POUND BARS.
No. 9H36461 A well known metal of extra high grade. Old Hickory is preferred by many high class mill men, and it always gives good service. Especially recommended for engines and fine high speed machinery. Made in round bars about 2½ pounds each, one side cone shaped to fit bottom of melting ladle. We do not sell less than a 2½-pound bar.
Price, per bar 49c

MACHINERY

WE ISSUE A SPECIAL CATALOG OF LATHES, DRILLS, SHAFTING, PULLEYS AND SHOP TOOLS. Write for It. IT IS FREE

Our "Expert" Lathes are unsurpassed in material and workmanship. Heavy, rigid, powerful and accurate. All cylindrical parts are ground, insuring accuracy. All sliding and fitting surfaces are hand scraped to a master surface plate. The bearings of the head spindle are of the best phosphor bronze metal, large and heavy. The lead screw is cut on a special milling machine which mills the thread; this develops a screw having an accurate pitch, deep in thread, large in diameter and should last a lifetime.

Lathes are indexed to cut standard threads from 4 to 40, as follows: 4, 5, 6, 7, 8, 9, 10, 11, 11½ (pipe thread), 12, 13, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 36, and 40. All the above threads may be cut without compounding gears.

Every part of the "Expert" Lathes is inspected by test gauges having a limit of accuracy of one-thousandth of an inch. Each lathe when finished and assembled complete is operated and tested before leaving the factory.

FULTON DROP FORGED SQUARE SHANK SCREWDRIVER.

OUR PRICE. 14c USUAL 25-CENT VALUE.

No. 9H55806 A strong, substantial screwdriver of highest possible quality, made for machinists, carpenters, electricians and others whose work requires the very best tools. Shank is square, for use with a wrench on heavy work. The blade, shank and head are forged from one solid piece of steel. Shank extends entirely through handle, is flattened on top and it cannot turn, and handle cannot come off. Shanks are made of refined crucible steel, carefully forged, properly tempered and well finished. Handles are hardwood, finished in black. Ferrules are polished steel, immovably shrunk on.

Samson Strong Solid Bench Vises

$2.50

Strong, durable and substantial, built for heavy every day shop use. We do not fit extra wide jaws on small size vises in order to quote a lower price. Our 3½-inch vise weighs as much as 4-inch vises offered by other concerns; and so with every size. This extra weight is distributed at points of greatest strain, making our Samson the strongest vises on the market. Samson Bench Vises have cold rolled steel screws and handles, tempered tool steel jaws and every one is warranted perfect. Drill black finish. Polished jaws, knobs and handles.

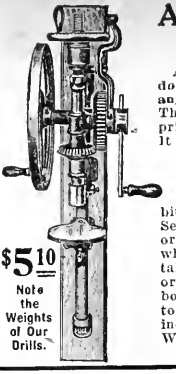
Blacksmiths' Hand Feed Post Drill

$3.60

A good, well made substantial drill at a price so low as to be within reach of everyone. If this drill saved you but one cent each day, it would pay for itself in less than one year. If you have even a small amount of drilling to do and have been using a brace or a bench drill it will save you far more than its cost in a short time. It is the same grade usually sold for $5.00 to $6.00 at retail. Upright column and feed screw are made of steel. Has long bearings, which insure easy running and prevent springing. Crank is adjustable to long or short turn as desired. Drill table can be raised or lowered, swung around out of the way, or removed so that fork can be used as a wheel holder. Drills holes up to ¾ inch and to center of 12-inch circle. Drill spindle is made of 1-inch steel, bored for ½-inch round shank drill bits and has up and down run of 3 inches. Weight, crated, about 58 pounds.

No. 9H3806 Price.....$3.60



$5.10

Note the Weights of Our Drills.

Acme Two-Speed Self Fee Post Drill

At $5.10 this drill represents more real value, do more work with less labor and last longer t any drill you can buy elsewhere for less than $7 This is a strictly high grade self feed drill at a lo price than is usually charged for a hand feed d It is made of the best material, is strong, substan and durable, and fully capable of meeting requirements of the average blacksmith. steel upright column, shaft and feed scre Bearings are all bored true to size and not b bitted, which makes the drill much more service Self feed attachment can be set to fast or slow sp or thrown out entirely. Has steel extension cra which can be adjusted to long or short turn. D table can be raised, lowered, turned out of the or removed entirely when drill is to be used boring holes for tire bolts. Drills ¾-inch holes to center of 12-inch circle. Spindle has run inches and is bored for ½-inch round shank dr Weight, crated, about 81 pounds.

No. 9H3807 Price.....$5.

Acme Special Self Feed Blacksmiths' Post Drill.

$6.40

The largest, heaviest, strongest, highest class drill ever offered at anything like our price. Has steel upright column, drill spindle and feed screw, four long and perfectly straight bearings that cannot spring or get out of line, automatic self feeding device located behind the spindle and out of the way of the operator. Self feed can be set fast or slow, or thrown out entirely and drill changed to hand feed. Steel crank, adjustable to long or short turn as desired. Fast or slow speed instantly obtained by changing crank from one shaft to another on same side of drill. Table can be raised, lowered, turned aside or taken off entirely and fork used as a wheel holder. Spindle has run of 3 inches and is bored to take ½-inch round shank drills. Drills up to 1¼-inch holes and to center of 15-inch circle. Weight, crated, about 120 pounds

No. 9H3816 Price.....$6.40

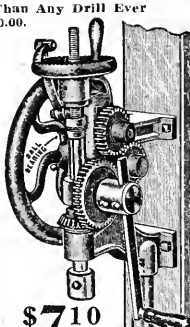
Acme Ball Bearing Self Feed Third Gear Blacksmiths' Post Drill

Drills Faster, Runs Easier, Is Better Constructed, of Higher Grade Material and Has More Good Features Than Any Drill Ever Offered for Less Than $10.00.



$7.10

BUILT AFTER OUR OWN DESIGN, made extra strong at points of greatest strain and combines all the good features of the different drills of this pattern now being sold, together with our improved third gear and other points which no other drills possess. Adapted to all kinds of work and especially recommended for general blacksmith and repair shops.

THE BALL BEARINGS, which are made of the best die steel, are placed between the chuck and headpiece of spindle, receive all the pressure and reduce the friction to almost nothing. The running of the drill is made a great deal easier and its life is more than doubled by these ball bearings.

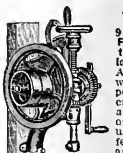
THE SELF FEED ATTACHMENT can be set to a fast or slow speed as the nature of the work requires, or the dog can be thrown back and the drill fed by hand. Gives almost a continuous feed, thus preventing the drill bit from jamming into the work.

OUR IMPROVED THIRD GEAR enables the operator to change from fast to slow speed by simply changing the crank from one shaft to another on the same side of the machine. There is no left handed cranking. The gear also straddles the drill, an advantage when accurate work is to be done.

DRILL TABLE IS EXTRA HEAVY, can be raised or lowered, swung around out of the way or removed entirely so that fork can be used as a wheel holder. Has a strong steel crank, adjustable to long or short turn. Shaft and spindle are made of high grade steel. Spindle turns one and one-half times to each turn of crank on high speed; crank turns one and one-half times to each turn of spindle on low speed. Drills up to 1¼-inch holes and to center of 15-inch circle. Has up and down run of 3½ inches and is bored for ½-inch round shank drills. Weight, crated, about 112 pounds.

No. 9H3812 Price.....$7.10

ACME SPECIAL DRI



$8.40

The same as our 9H3816 Acme Special Feed Post Drill describ the left but with tight pulleys. 182 In An ideal tool for all kin work in shops provided power. HOT FORGED BIT STOCK DRILLS.

No. 9H56720 These drills fit any bit brace and will drill steel, iron or other metals. Will bore any kind of wood without splitting and are not injured by contact with screws or nails. Our drills are hot forged and are tougher and stronger than milled drills as the best part of the steel is not cut away. All drills are accurately ground to micrometer gauge and sizes are exact. All our drills 3-32 an 1 larger have solid forged steel shanks, thereby giving increased strength. Points of drills should be kept well oiled when drilling metal.

FORGES—EXCELLENT VALUES

Invincible Forge

$3.98

Compare this forge with others offered at the same price. Others would ask $5.00 to $8.00 for a forge not as good. A neat, compact light running agricultural forge. Strongly built, and all parts well fitted. This Invincible Forge has lever motion and well braced U shaped steel legs; castings are heavy and gears are properly fitted to assure easy running. Has hardwood handle and oak tanned leather belt.

DIMENSIONS: Forge stands 30 inches high, has 18-inch fire pan, 8-inch fan case. Weight, crated, about 83 pounds.

No. 9H31006 Price, with shield, as illustrated $3.98

No. 9H31013 Same as above, except has full enclosed hood, made of heavy sheet steel and with two sliding doors. Weight, crated, about 90 pounds.

Price $6.47

Whirlwind Forge

$5.13

Generates more blast with less label and is the largest, heaviest and best constructed forge ever sold at anything like our price.

Not to be compared with the cheap light weight forges of similar design offered by others. No other forge at this price or near it will equal it for durability, quality and capacity.

WORKING PARTS. Made of highest grade material and fully warranted. Has self acting ratchet (no springs to get out of order). Handle made of varnished hardwood, belt of oak tanned leather.

HEARTH. Made of heavy cast iron, 21 inches in diameter, and fitted with first class tuyere.

LEGS. Mounted on three 1¼-inch U shaped steel legs, firmly braced, making it convenient to use on uneven foundations. These legs are very stiff and rigid and have spread enough to prevent tipping.

DIMENSIONS: Height, 30 inches; hearth, 21 inches in diameter; fan case, 8½ inches in diameter. Weight, crated, about 94 pounds.

No. 9H31008 Price.....$5.13

Direct Blast Forge

$8.25

Especially adapted for the larger fa contractors, bridge builders, repair sh and anywhere a high grade, medium pr forge is required. Has our new inter gear, which reverses the motion of the f giving a direct blast up through the fo instead of down and then up, as in m forges. Made of high grade mate throughout. Has very heavy hearth, s and center blast tuyere ball, extra la fly wheel and U shaped steel legs, stron braced.

DIMENSIONS: Height, 30 inches; di ter of hearth, 21 inches; dimeter of case, 9½ inches. Weight, crated, about pounds.

No. 9H31011 Price, with half ho as illustrated.....$8.

No. 9H31010 Price, with shield 7.

Improved Vulcan Forge

REGULAR $15.00 VALUE.

$10.40

No. 9H31019 TANK.

Heavy, strong and durable; built for everyday shop use. Especially recommended for blacksmiths, machinists, miners, contractors and others who require a good, strong, dependable fire.

OUR VULCAN FORGES HAVE

Extra heavy castings
Friction clutch gears.
Tempered steel ratchets.
Perfect anti-clinker tuyeres.
Varnished hardwood handles and oak tanned leather belts.
Each one is warranted perfect and guaranteed satisfactory.

A SIMILAR FORGE if bought elsewhere would cost you not less than $15.00.

A HIGHER PRICE doesn't mean greater value. A better forge for medium and light work cannot be made.

DIMENSIONS: Height, 30 inches; hearth, 35¼x24½ in.; fan case, 12 inches in diameter. Weight, crated, about 180 pounds.

No. 9H31017 Price, with shield.....$ 9.50

No. 9H31018 Price, with half hood, as illustrated..... 10.40

No. 9H31019 Extra for water tank, to fit either of the above forges..... .90

Acme Combination Forg

$18.00

REGULAR $25.00 VALUE.

Especially designed for use in large blacksm shops, plow or railroad shops, or anywhere t heavy work is done and a strictly first class fo is required. In this machine we have combi our Tiger Steel Blower and our Coal Saver Tuy with a high grade cast forge, which combinat gives the blacksmith the very best results. T Tiger Blower has straight cut gears, steel shafts composition bearings, made and assembled perfec it can be turned forward or backward and p duces a powerful blast. Our Coal Saver Tuy does not get clogged with clinkers and combin as it does a center and side blast, will get more h out of the coal than any other and save you ma dollars in cost of coal alone. The forge is heav made of cast iron and should last a lifetime. T blower is extra large and the blast is direct from to fire, easy to operate, and the after blast is str and lasting.

DIMENSIONS: Size of hearth, 45½x31½ inch diameter of fan case, 11 inches; height, 30 inch length over all, 53 inches. Weight, crated, about pounds. Shipped direct from factory near Chica

No. 9H31025½ Acme Combination Cra Forge. Price, with coal box, as illustrated, and ex water tank.....$20.

OUR TIGER BLOWER

10 92

For the up to date blacksmith who builds his own forge of brick, clay or stone. For those who require a strong, steady, even blast there is no better blower made at anything like our price. It will easily take care of any work that comes to the ordinary blacksmith shop.

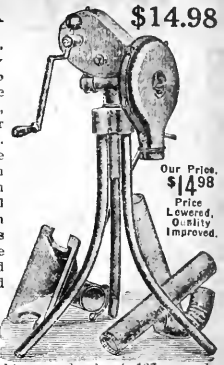
OUR TIGER BLOWER has flat, straight cut gears, steel shafts and composition bearings, properly assembled and geared up so that a strong, powerful blast is furnished with but little labor and almost no noise. Gear case is oildight and dustproof, permitting gears to run in continuous bath of oil. Blower case can be raised or lowered. Crank turns forward or backward.

DIMENSIONS: Height, 43 inches; fan case, 11 inches in diameter; fan, 9¾ inches in diameter. Weight, crated, about 115 pounds.

No. 9H3926 Price, complete with piping and heavy anti-clinker tuyere, as shown **$10.92**

NIAGARA SPIRAL GEARED BALL BEARING BLOWER

$14.98



The best hand blower made. Runs easier, develops more blast and is better in every way than the blower which was heretofore thought the best. Constructed on exactly the same principles as other spiral geared blowers, but there is a more liberal use of phosphor bronze and Swiss steel than in other makes. Has cut spur and spiral gearing and gears are so arranged that bronze comes in contact with steel, which makes them last longer and run smoother than steel against steel. Shafts, ball bearings and gears run in a continuous bath of oil, which prevents heating and greatly adds to the life of the blower. Fan case can be raised, lowered or turned in any direction, and the crank can be turned forward or backward as best suits the operator.

DIMENSIONS: Tuyere is extra large, size 10x8¾x4½ inches (inside measurement). Blower has 12-inch fan case and can be adjusted from 44 to 48 inches in height. Weight, crated, about 137 pounds.

No. 9H3935 Price, complete with piping and tuyere, as shown **$14.98**

BLACKSMITHS' HOOPED BELLOWS

3 98

The leather on most bellows is nailed to the wood, with nothing between the nail heads and the leather. Our bellows are all hooped, then nailed, which prevents the nail heads from pulling through the leather. In making our bellows we use only the best specially prepared cowhide leather and thoroughly seasoned white-wood, basswood and pine. There are no better bellows made.

OUR PIPE FRAME LEVER BLOWER

Turns easily, generates big blast. A strongly made, well constructed lever blower, and a bargain at our price. Our Pipe Frame Blower has heavy cast iron base, upright columns are made of iron pipe, has oak tanned leather belt and varnished hardwood handle. Blower is well put together, strongly braced and nicely painted.

DIMENSIONS: Diameter of fly wheel, 27 inches; fan case, 14½ inches. Weight, crated, about 70 pounds.

No. 9H3931 Price, complete with heavy anti-clinker tuyere iron, piping and elbow, as shown, **$8.96**

Invincible Adjustable Die Screw Plates.

Made of high grade material by the largest manufacturer of screw plates in the United States. This identical line of screw plates is made under the manufacturer's brand through regular stores at one-third to one-half more than our prices. All the difference is in the name; the quality is exactly the same. The dies are cut through on one side, as shown in illustration, and a screw inserted in the opening. By simply turning the screw the dies are opened or closed. **All Invincible Sets** seat 1-32 over size V thread, which fits regular carriage and machine bolts.

ACME AMERICAN WROUGHT ANVILS

Superior in design, material and finish to any other wrought anvils on the market. Made especially for us and sold only by us under our own guarantee. Our Acme anvils at prices quoted below represent more real value than you can possibly secure elsewhere.

Our ACME ANVILS are made of two pieces of tough wrought iron welded at waist. The face is made of a single piece of tool steel securely welded to the body and warranted not to come loose.

ONLY 8½c A POUND

Price, elsewhere, a 12c pound

The face, tened by a special machine so there are no hollow or uneven places, is perfectly tempered, making it hard without being brittle, and tough without being soft. Has long, perfectly shaped horn and heel and the base has sufficient spread to insure stability and prevent tipping.

To prove that our Acme is the best wrought anvil ever offered, we sell it under our guarantee to take any one of them back at our expense within thirty days after you receive same if it is not equal to or better than any anvil you ever used.

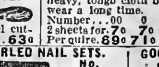
Usual $1.25 Value.

OUR ECONOMY FLOOR SCRAPER. $11.50

Does the work of three men with hand scrapers; saves time and labor; leaves the floor smooth and level; does away with the hard back breaking job of scraping floors by hand. As operator draws scraper toward him, the blade works upon the floor similar to the action of a hand scraper, the weight of the machine giving force to the cut. This scraper does as fine work as any similar tool on the market, no matter what price may be asked for it.



Blades are 6 in. wide, made of best refined crucible steel, tempered very tough and hard. Wheels are rubber tired to prevent scarring floor. Entire tool is neatly finished. Shipping wt., about 125 lbs. Price includes one extra blade.

Starrett's LEVELING INSTRUMENT

$9.63 OUR PRICE Others ask $12.50 for this same level.

Invaluable for leveling foundations and walls, setting machinery, floor timbers and sills, running lines, ditches and drains, grading roads or hillsides. Instrument complete consists of upper plate with graduated arc divided by degrees, tripod, tripod head, plumb bob and line. Tripod is made of iron, japanned, improved extension legs are separate from tripod. With this improvement over the old style you can make the height from 2 feet 6 inches to 4 feet 6 inches. Sight tube, 12 inches long, is brass, nickel plated, with small eye opening at one end and usual cross wires at other. Level case and graduated arc are also nickel plated and the other parts are nicely japanned. No magnetic needle or complicated mechanism about this instrument and, with the complete directions we furnish with each one, anyone can use it and get perfect results.

BIT BRACES

GUARANTEED GOOD

The Improved Fulton Special Ratchet Bit Braces

$1.30 AND UP

FRICTIONLESS ROLLER BEARINGS
Heavily nickel plated and nicely finished throughout. For beauty, strength and workmanship there are no superior braces made.

GUARANTEE—Order one of these braces, give it a fair trial. If you are not satisfied in every way, return it to us and your money will be returned to you.

SWEEP—Special high grade steel, 15-32 inch in diameter. Will not bend or give way under heaviest pressure.

HEAD—Polished cocobolo, nicely finished and steel clad to protect it from boring split or bruised. It is attached to the sweep by means of a steel quill that revolves on roller bearings. The rollers revolve between hardened steel washers which prevents any friction or wear.

HANDLE—Cocobolo, with brass bushings inserted in the ends to prevent it from splitting. It revolves on patent adjustable tapered steel collars and bearings. By means of set screws, any looseness from wear may be instantly taken up. The ends of the handles bear on the tapered shoulders of these adjustable collars and not on the sweep. This is the latest improved and finest working handle made.

Sectional view of handle, showing adjustable collar and bearings.

Sectional view of head, showing roller bearings.

10-Inch, $1.45 EQUALS ANY $2.50 BRACE.

CHUCK—Has forged steel jaws, which open automatically to receive the shank of the bit. Takes regular square shank bits, and round shank bits up to ⅜ inch in diameter. Will take a large size expansive bit.

FINISH—All metal parts are highly polished and nickel plated. Head and handle are natural finish, nicely polished.

No.	Sweep	Price
9H56034	8 inches	$1.30
	10 inches	1.45
	12 inches	1.60
	14 inches	1.75

RATCHET—Simple in construction, easily operated, strong and durable. The ratchet teeth are cut on the end of the steel body that revolves in the socket attached to the sweep and are concealed and protected by this socket. The ratchet pawls are solid blocks of steel fitting squarely into the teeth of the ratchet. (The hook pawl openers is shown in illustration.)

SLEEVE—Made of malleable iron, octagonal pattern. Nickel plated and highly polished. Handsome in appearance.

No. 9H56062 A practical brace for ordinary boring. Excellent value at our low price. Stained hardwood head and handle, 7-16-inch cold drawn steel sweep; metal parts polished. The very brace for work about the house.

HERCULES DOUBLE BALL BEARING RATCHET BIT BRACES.

$1.77

Most ball bearing braces have ball bearings in head only, but our Hercules has steel ball bearings in both head and chuck. Ball bearings in head make this brace run with almost no friction, while ball bearings in chuck enable jaws to be clamped on to a bit or drill with a never slip grip. Our Hercules brace has heavy cold rolled steel sweep and polished cocobolo head and handle. Metal parts nickel plated, chuck knurled full length. Has forged steel alligator jaws, holds either round or square shank bits or drills.

No. 9H56042 Sweep.	10 in.	12 in.	14 in.
Price	$1.77	$1.88	$1.99

FULTON SPECIAL SINGLE TWIST EXTENSION LIP AUGER BITS.

The best bits made for every kind of boring. Tested in all kinds of wood and for all kinds of work, and never fail to please. Endorsed by thousands of mechanics, millwrights, wheelwrights and expert woodworkers who will use no other. Fulton Special Auger Bits lead into any kind of wood without pressure, even against a slight pull. If you work pine, oak, hickory or even the imported hardwoods; if your work calls for end boring, boring through knots or just the ordinary kind of boring, Fulton Special Bits are the ones to buy. They are made open in the twist, allowing ample room for chips to come out and positively will not choke up in any kind of wood. State size wanted.

66c Fulton Special Nail Hammers

Solid tool steel, full nickel plated, black enameled handles; the best and handsomest hammers possible to produce. Fulton Special Hammers are forged from best refined crucible cast steel. Faces and claws are tempered just right, heads are so proportioned as to give them the proper hang. Claws are split to such a fine point they will draw the smallest nail without injury. Handles are made of selected second growth white hickory put in with iron wedges, so they will not become loose. We could not sell you a better hammer if we asked twice our price; a better hammer cannot be made at any price.

53c Fulton Utility Nail Hammer

A high grade combination nail hammer, nail puller, wrench and staple puller.

REFINED CRUCIBLE CAST STEEL SECOND GROWTH HICKORY HANDLE

Our Fulton Utility Hammers are forged from best refined crucible cast steel with faces and claws tempered tough and hard. Heads are properly shaped, are carefully split and handles are selected second growth white hickory tightly wedged. The right claw is made longer than the left and shaped so as to go under and draw any ordinary staple. Under side of claws is notched to form a wrench which takes and turns nuts on all size bolts from ¼ to ½ inch. Head is full polished, and handle is smoothly finished. Weight, including handle, slightly over 1 pound.

No. 9H57716 Fulton Utility Hammer. Price.....53c

Fulton Nail Cutter Saw

$1.40

No. 9H59036 Mechanics, don't spoil your high grade saws on repair work, housewrecking or second hand lumber, BUY ONE OF OUR NAIL CUTTER SAWS. They are especially suited for carpenters, plumbers, electricians, tinners or any one who requires a saw that will cut right through wood, nails, sheet metal, wire, gas pipe, etc., quickly and without injury to the saw. Like our other Fulton Saws, this Fulton Nail Cutter Saw is made of the very best crucible saw steel, hand made, hand filed and tempered by a special process which makes it exceedingly hard but very tough. Not brittle, like most of the metal cutting saws sold elsewhere. The Fulton Nail Cutter Saws can be filed when they become dull, but do not require setting, being taper concave ground. Made in one size only, with 18-inch blade. Price..... **$1.40**

FULTON SPECIAL BUCK SAW.

Cuts fast and easy, runs a long time without filing and setting and is equal in every way to saws sold by others for $1.00 and up. Blade is extra thin and narrow, offers but little resistance to the wood and cuts well without bearing down on frame, making our Fulton Special a great favorite with professional wood sawyers, but it is equally as well suited for farm and home use. Anyone who wants a strictly high grade buck saw will do well to order our Fulton Special. Frame is made of carefully selected hardwood, with double riveted braces, is smoothly sandpapered all over, then varnished two coats. Has loop pattern rod, heavily tinned with japanned turnbuckle. Blade is best clock spring steel, tempered and hardened, and fully warranted. Teeth are V shaped, five points to the inch, full bevel, hand filed and hand set. Blade is 1½ inches wide, blued finish and handsomely etched, the one we recommend for general use.

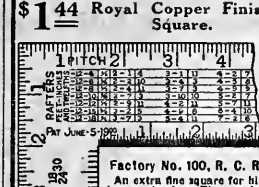
CARPENTERS' STEEL SQUARES

Well made, nicely finished, accurate and give satisfaction. Every steel square is guaranteed as to quality, finish, and warranted true.

$1.44 Royal Copper Finish Square.



Factory No. 100, R. C. R.

An extra fine square for high class mechanics. The very best in quality and the handsomest finished steel square made. Heavily copper plated and is as nearly rustproof as a steel square can be made. Has deep, clear figures and graduations filled with white enamel, which makes them easy to read. Body, 24x2 inches; 16-inch tongue. Marked on face 1-16, ⅛ and ¼-inch spaces; on back, 1-32, 1-12 and 1-10-inch spaces. In addition it has brace measure, eight square and patent rafter table, as shown in illustration, which gives the measure of rafter for any of seven pitches of roof.

No. 9H57324 Price, including full directions for using.....$1.44

JENNINGS TAKE OOWN STEEL SQUARES.

The first really successful take down square ever brought out and the greatest improvement ever made in steel squares. Easy to take apart and put together, absolutely accurate. Spring takes up wear and keeps square tight and rigid as when new. Goes into space 4x24 inches, has canvas bag to protect square from rust and damage. Unlike other folding and take down squares, there are no screws or bolts to get loose and there is absolutely no play, the solid shoulder insuring accuracy. Guaranteed satisfactory or money returned. Has 16-inch tongue and 24-inch body. Spaced on front in 1-16 and ¼-inch spaces; on back in ⅛ and ¼-inch spaces. In addition it has brace measure and Essex board measure tables. Marks are deep and plain, figures clear and distinct. Full directions with each square. Illustrations show manner of putting square together and canvas bag for carrying.

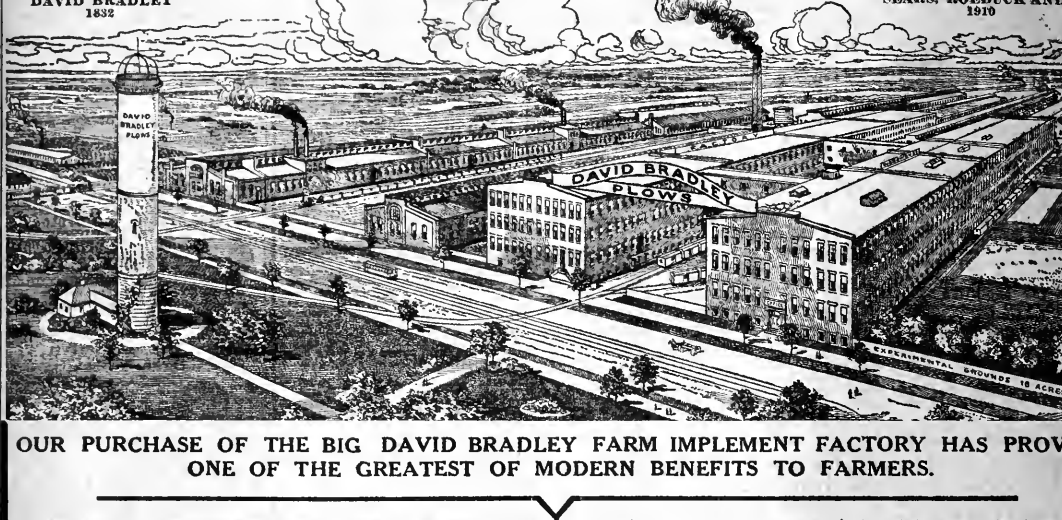
DAVID BRADLEY FARM IMPLEMENT

The Only Line of High Quality Standard Farm Implements Sold Direct From Factory to U

We own and operate the big eighty-year old David Bradley factory. We have eliminated all the profits of middlemen. The farmer now buys these famous farm tools direct from the makers at factory cost with but one profit added. Such incomparable quality and values as you will throughout our line of David Bradley implements, backed by the abs protection of our **unlimited guarantee**, certainly merit your orders.



OUR PURCHASE OF THE BIG DAVID BRADLEY FARM IMPLEMENT FACTORY HAS PROVE ONE OF THE GREATEST OF MODERN BENEFITS TO FARMERS.

We have made possible to them a yearly saving of millions of dollars. No longer are they required to pay the exorbitant profits of middlemen in order to obtain high quality, standard farm implements; nor need they content themselves with obsolete or inferior makes of goods, to which a dealer's limited stock may be confined.

The success which has attended our efforts to give our customers quality, value and service in Bradley goods, such as no other implement manufacturer or dealer had ever given, has greatly exceeded even our own expectations. From every section of the country comes a constant flow of orders and every mail brings us expressions of satisfaction from our customers, telling of the superiority of Bradley quality, the surprising savings in price we have made them, and congratulating us upon the efficiency of our service. Read some of them on the following page.

No one else is so well qualified to serve your needs in farm implements. We have the best equipped factory and most competent implement manufacturing organization in the world at our command. Our prices speak for themselves, and need but a comparison with those of others to prove the money we can save you.

We promise your order the consideration and intelligent handling it deserves, while the Bradley reputation for quality, backed by our guarantee of absolute satisfaction or your money back, insures you against any possible loss or disappointment.

The big David Bradley factory is the oldest plow and implement factory in America. It was founded by David Bradley, America's pioneer plow maker, in 1832 (eighty years ago), and in all this time its product has been confined entirely to farm tools of the very highest class. This big plant covers nearly forty acres of ground and there is not a more perfectly equipped factory of its kind in existence. Our purchase included not only the grounds and buildings shown in the illustration, but all machinery, dies, patterns, etc., designed especially for producing David Bradley goods, together with the many valuable patents which cover them and prevent their manufacture by others. We retain in our employ the complete organization of expert plow makers and other mechanics, most of whom have worked a lifetime in this big plant. Every one of these men knows the high standard of quality demanded in David Bradley goods and with their faithful co-operation we not only continue to make David Bradley plows and implements just as good as David Bradley ever made them, but we are striving to better them wherever such a thing is possible. The David Bradley factory is located 54 miles south of Chicago and freight rates from there are the same as from Chicago. This central location is favorable to everyone. It not only means a low rate of freight to all our customers, but it means a low rate of freight to us on all raw materials, which assists us greatly in economical manufacture. This you get the full benefit of in our low prices.

For Eighty Years David Bradley Implements Have Been the Accepted Standard.

Other implement manufacturers have endeavored to copy them, and while they might to a certain extent copy the design, they cannot copy Bradley quality. No other factory can lay claim to such far reaching experience in designing and building farm implements, and it is just as impossible for less experienced manufacturers to duplicate the quality of a Bradley implement as it is for them to duplicate the low prices we name.

On our 18-acre experimental farm we thoroughly test out and perfect David Bradley implements. No improvement is adopted, no change made, and no new tool is offered our customers until it is thoroughly tried out, not only in our own experimental grounds, but in different sections of the country, so that we know it suits all soil conditions and the purpose for which it is intended. David Bradley ne experimented at the expense of his customers, neither do we. When y buy a David Bradley tool from us, you can rest assured that its co struction has been thoroughly tested and tried out, not only in t factory for quality of materials, etc., but in the field for working a wearing qualities, and proven absolutely perfect.

Our guarantee affords you greater protection than that of any oth manufacturer or dealer. Most makers agree to replace defective mater within a year; so do we. And, moreover, we pay the transportati charges on parts sent to replace any proving defective in material workmanship. But we guarantee more than this. We guarantee to **your order correctly,** and hold ourselves responsible for all mistakes. carefully do our implement men supervise the orders that it is alm impossible for a shipment to go out wrong, even should our custom make a mistake. We guarantee to **fill your order promptly,** because t big David Bradley factory carries tremendous stocks of everything ne there. We guarantee every implement shipped you to be new and brig fresh from factory. We guarantee that the shipment will **reach** y **promptly and in perfect order without loss or damage.** If by any chan your shipment should go wrong or any part of it be damaged, we w replace it free of all charge to you. Such protection is worth a gr deal to you and is something to consider when buying implements. Y run absolutely no risk when buying implements from us. We assume full responsibility for making every transaction with you a satisfacto one. No farmer acting in his own interests can afford to place a dolla worth of his implement business elsewhere.

Try Any David Bradley Plow or Implement Our Risk.

We accept your order with the understanding that you are to take any David Brad plow or other implement purchased from us and try it out thoroughly in your own fi and under any conditions that one could impose upon a tool of its kind. Try it 30t alo side of any similar tool of other make. Give it every test you can possibly think of, and the David Bradley tool does not satisfy you absolutely and convince you beyond all do that it is in every way the superior tool we claim, and as good a tool as you can possi buy elsewhere at any price, we expect you to send it back to us at our expense and we w return to you the full price you paid for it and freight charges.

REPAIRS: HOW TO ORDER

You are always sure of repairs when you use David Bradley Impl ments and you are sure of getting them quickly. We have patterns f every David Bradley implement ever made and can **always** supply a repair, no matter when the tool was made or where you bought it. David Bradley user need ever worry about repairs. We sell repairs a bout half what a dealer charges, so you save money on extra parts ju as you do on complete David Bradley implements. Our factory alwa has a complete stock of repairs so we can serve you quicker than a loc dealer, who seldom, if ever, has the particular part you need. You ne not waste time writing for repair prices; if you do not know our pri for the part wanted just write and tell us the name of the implem give name or description of part and all numbers, letters or other mar appearing on the old part and enclose an amount of money which y think will cover the cost. We will immediately ship the part to you n return any difference in your favor. If you are in urgent need of repa you may **telegraph us,** being careful to state names and numbers just completely as you would in a letter, and we will make immediate shi ment. Address all such orders, telegrams and correspondence to

SEARS, ROEBUCK AND CO., DEPARTMENT 32, CHICAGO, ILLINO

When We Bought the David Bradley Factory We Promised Quality, Value and Service in Farm Implements, Such as No Farmer Had Ever Known

ave We Made Good Our Promise? We will let you draw your own conclusions. Read these letters, they are but a few the thousands we have received from satisfied purchasers of David Bradley Implements. We regard them as the most nvincing argument we can offer, or that anyone can expect. If you are not a user of David Bradley Implements, start th us now. We promise you the same perfect satisfaction experienced by the farmers who have written these letters to us.

udson Kyser, Sugar Grove, Ill., says—I n the first prize in the boys' class with one your David Bradley X-Ray Sulky Plows the Big Rock plowing match this year. ber and I consider it the easiest handled l lightest draft plow we have had on the It runs as steady that I did not have trouble in keeping the furrow lines straight l the foot lift cannot be beat by any plow.

. B. Forrest, Glenavon, Ill., says—The dley Sulky and Gang Plows purchased of give perfect satisfaction. They are as d as I could buy anywhere and I saved at t $18.00 by ordering from you.

. A. Leopold, Warren, Ill., says—I would part with my David Bradley Harrow for e the price if I could not get another like They are the best harrows I ever used. I have used quite a number of different ds.

arrison Tuttle, Wahoka, Ill., says—I re- ved my Bradley Disc Harrows and High- l Cultivators O. K. and was more than ased with them, and as for quick ship- nt, only one week from the day I sent order.

ewar Marts, Tuscola, Ill., says—I have five vid Bradley Tu-Ro Cultivators. My farm l will say they do better work with less rk for the man than any double row plow have ever seen. I purchased two of the m from our retail implement dealer and ee of them from you since you purchased David Bradley factory, and find the ones ade under your management just as good to be the same high grade quality, but you have ade improvements on them. Your four- se hitch for Tu-Ro Cultivators not only re- ces the load to a great extent per horse, l does away with all neck weight, and its rk with the Tu-Ro Cultivator is perfect.

Frank Hartung, Kankakee, Ill., says—The tle Jap is as good a corn cultivator as any ve seen to put to the field. My men nk the Little Jap can't be beat. It gets weeds if anything will get them. I have en farming all my life and haven't found a ldfellow to beat it. Easy to handle and sy to ride.

C. H. Tanner, Hillsdale, Ill., says—I have Bradley Walking Plow which can't be beat good work, and I have a Bradley Force op Corn Planter, and right here let me say, team never took a better planter into a ld. No planter can beat it for correct pping.

Bart Howard, Atchison, Kan., says—I like ur David Bradley Implements fine. There none that please me better than yours, d I would have to pay about one-third more ould have to pay cash for one like a vid Bradley Plow and I will know I can to the field and won't have to come back account of a break down.

W. H. Tufts, Edgemont, S. Oak., says—Everything received in all right. I think your vid Bradley Garden City Clipper is the best w I ever saw. My plow cost $8.73 and I uld have to pay $15.00 for one not as good.

. C. Beats, Vermilion, Ill., says—I received r David Bradley Manure Spreader all in d shape. It went together nicely. Will y I am well pleased as I saved from $40.00 $50.00 on the machine. Will be glad to ow it to anyone desiring to investigate this.

Leonard Trainar, Springfield, Ill. says—The tle Jap beats anything I ever had in my d. Does better work, easier to handle and hter on team than any cultivator I have r seen.

. R. Basse, Dalton, Minn., says—The vid Bradley Harrow Cart arrived. It is e. I do not see how you can sell such a for such a small amount. It is worth 100 more than the harrow cart I could nd here. It has the Bradley quality in it.

. W. Nye, Dudley, Iowa, says—I like my w splendid. We have tried it in sod, bble and cornstalk ground, and it does the k all ground. My 11-year old boy runs it t of the time.

. A. Anderson, Balfour, N. Dak., says—e David Bradley Steel Lever Harrow and e bought three. They were received in good order, ur tongue trucks are dandies and your steel er harrows are good.

COMPLETE DIRECTIONS ARE SENT WITH DAVID BRADLEY IMPLEMENTS.

We prepare every shipment in such a manner that setting up is a simple matter for even the most inexperienced. Every part is fitted at the factory, and with the aid of the illustrated directions we furnish, you cannot experience the slightest difficulty either in setting up or operating. We also furnish complete repair lists, which enable you to readily identify every part of the implement, and tell you exactly what to order and how to order any part which might ever be needed.

WRITE US—Our Implement Experts Are at Your Service

We have in our employ several of the best informed farm implement specialists in America. It is their pleasure to answer inquiries and give advice to our customers. If you are in doubt as to the exact plow or implement you should buy, do not hesitate to write us, giving us complete information regarding the kind of work you wish to do, soil conditions, etc. We will gladly favor you with our experts' advice.

SAVED 30 PER CENT. RECEIVED BETTER GOODS AND BETTER SERVICE.

Thompson, Iowa.

Sears, Roebuck and Co., Chicago, Ill.

Having thoroughly tried out the Bradley implements bought of you this spring, I wish to say that every one is satisfactory and cannot be excelled. Before placing my order with you I examined and priced similar goods in all nearby towns and found dealers' prices as follows:

For a 16-inch sulky plow, with 4-horse eveners, $47.00; tongueless cultivator, $15.00; two-row cultivator arranged to work three horses, $55.00.

I could not see where any of them were better in any way than the Bradley goods, so I placed my order with you. Your Bradley sulky plow with 4-horse eveners and attachment cost me $33.40. Your tongueless cultivator $9.93, and your Tu-Ro Cultivator with 4 and 5-horse attachment, $43.86. The freight on the three implements was $4.91 and my postage expense was 9 cents, making a total of $91.19, a saving of $26.81 on three ordinary farm implements, or about 30 per cent on the investment.

But this is not all. I have tried other makes and have the first one to find that I would think of trading for. I have now broken over 125 acres of tame sod with the Bradley sulky plow, some of it in extremely bad shape, much of it so rough that it looked foolish to try to turn it over, and I have not had to stop a minute to fix anything or tighten a bolt. Part of the time I use three ordinary farm horses and part of the time four very light ones, but it moves right along at the rate of about three acres per day of nine hours. I have done a perfect job in every way and can throw the plow in or out of the ground while moving a distance of one foot. The levers are so handily arranged that it is a pleasure to work with it and the draft is 25 per cent lighter than any 16-inch sulky I have ever run. I am now running the Bradley Common Sense Cultivator with a pair of ponies whose combined weight is 1,800 pounds and a fourteen-year old boy is handling it. I put him in a field of exactly 30 acres, so badly infested with quack grass that it looked hopeless. He cross plowed this field with this light team, very soddy ground and hard plowing, in three days and the quack grass will be whipped by one more such plowing. The boy will use no other cultivator, although I have two other good ones with tongues. For a perfect corn plow give me the Bradley Common Sense.

We are using the Bradley Tu-Ro Cultivator with three colts, weighing less than 1,300 pounds each, and my son, who uses it, declares they furnish all the power needed, but owing to our ground being new sod, I am inclined to think four horses would be better. No one-row riding cultivator can do better work or be handled easier than a Bradley Tu-Ro. I have had all kinds of objections offered by local dealers to buying out of town goods, principally that it is impossible to get repairs, but I have dealt with Sears, Roebuck and Co. for fifteen years and have found it much easier and far cheaper and quicker to get repairs from you than from any local dealer I ever bought of.

Your method of doing business is only one of the evolutions of time and saves the purchaser an average of 30 per cent on his goods. The Bradley goods are unexcelled; in fact, the world's standard, and the saving to the farmers by your purchase of this factory cannot be computed. Wishing you success, I remain,

Yours very truly,
R. F. ORR.

THE FINEST IMPLEMENT HE EVER USED.

Hebbronville, Texas.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I received the Little Jap Cultivator in good condition. I had been waiting for a little rain so I could give it a good test, but got tired waiting. Our last rain was nearly two months ago, so I gave the cultivator a trial today in perfectly hard dry ground. I tried it in clean dry soil, very grassy, and I want to tell you that the Little Jap is the finest implement I ever used. Both the shovels and the Gopher blades do fine work. What will it do in soil in good condition? I have used several standard makes of cultivators, but none of them will at all compare with the Little Jap. The pivot arrangement of the gauges and seat is fine. The whole machine is substantial, strong and well finished. I have three other riding cultivators which weigh 360 pounds each, and I thought they were the lightest draft that could be made. Imagine my surprise when my team walked off with the 460-pound Little Jap with hardly any effort. It is the lightest draft cultivator I ever used. I want to congratulate you for putting out such a fine implement. No other on the market today will approach it. I ordered the Little Jap to test out before the approach of the New Year, as I wanted several new cultivators in the spring. You will certainly receive my order. I wish every farmer in the country could see the Little Jap work.

Yours truly,
A. J. AYRES.

HIS NEIGHBORS ALL WANT A BRADLEY TU-RO.

R. F. D. No. 4, Box 82, Blissfield, Mich.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I want to say that the David Bradley Tu-Ro Cultivator I bought of you is the most satisfactory cultivator I ever owned. No more single row cultivators for me. I hitched three horses to the Tu-Ro, one an unbroken colt, and started in to work. My boy learned to operate it in no time and the work he did with the machine was an eye opener to my neighbors. At least twenty-five farmers have been over to see my Tu-Ro work, and I think nearly every one of them will get one. If anyone wants to know how good a machine your Tu-Ro is, tell him to write to me.

Yours truly,
A. J. SELL.

WHAT AN EXPERIENCED FARMER SAYS.

R. F. D. No. 1, Mt. Vernon, Iowa.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I am fifty-two years old and did my first plowing with a single shovel plow, then the double shovel, next the walking cultivator and then the sulky plow. Have used more different kinds of cultivators than most men, and think I can plow corn as good as any man living, and I must say that the Little Jap is the best I ever used for good work and easy running, both on man and team. It is the only cultivator for the hired man. You regulate it and send him into the field and he has simply got to plow corn.

Yours truly,
A. H. KNAPP.

Edwin Spindel, Edinburg, Ill., says—I have a Bradley Planter that I have used for fifteen years and it does the work as good as ever.

J. M. Arnold, Iuka, Ark., says—Your Bradley Stalk Cutter reached me in perfect order and works perfectly, and I do not see how it could be any better. I would have to pay one-fourth more at home than you ask for your cutter.

Marion Allen, Caddoo, Col., says—I like your David Bradley Reversible Disc Harrow for this country. It can be used for so many things. It makes a good lister, harrow or plow and you can make small ditches with it to water your crops.

Wm. Green, White Rocks, Utah, says—The David Bradley XX-Rays Plow I bought from you gives the best of satisfaction. I have broken up 50 acres of new ground and it does as good work as any plow you would have to pay $63.00 for here. I shall recommend the David Bradley Plow to all in my part of the country.

Jas. Davison, Opal, Wyo., says—The Bradley Prairie Breaking Plow came all right. I don't know of any better.

Axel Nelson, Hebo, Ore., says—Your David Bradley Plow arrived in good order and I am well satisfied with it.

J. A. Harding, Oroville, Wash., says—The shipment came in good condition and everything very satisfactory. I know of no cultivator adapted to my use that I like as well as the Bradley Ten-Shovel Cultivator, and I have used it near all kinds made. I saved at least $10.00 or $15.00 on the cultivator.

L. Fashewer, Santa Cruz, Cal., says—The David Bradley Reversible Disc Harrow reached me in good order. We are always well pleased with your goods and they always have as good, if not better, than others at sometimes double the price you ask.

O. Cronk, Litchfield, Mich., says—We have tried out the David Bradley Spreader we purchased from you and are very much pleased with it. Think the David Bradley Spreader quite an improvement over other spreaders.

A. W. Eager, New York City, N. Y., says—We are very much pleased with the David Bradley Spreader, and cannot say but it does as good work as a $100.00 machine of other make. You can refer to us at any time you wish, if you have any inquiries as to the work it gives.

Wm. Krumrei, Bangor, Me., says—The David Bradley Plow and Harrow reached me in fine condition. They are far better than all other goods that are sold here.

F. M. Johnson, Bowersville, Ga., says—The David Bradley Cultivator reached me on time and in good shape. I know of none that is near as good. My 16-year old son set it up and experienced no trouble whatever. I think the Little Jap will easily monopolize the trade in this section.

A. T. Brodaux, Gallion, La., says—Your David Bradley Stalk Cutter has given good satisfaction. The Little Jap I ordered is cheap in price. I paid you $19.90, and would have to pay from $30.00 to $35.00 to local dealers.

W. H. Joseph, Tuscola, Ill., says—I want to thank you for your prompt shipment of the repair for my cultivator. I received it the next day after ordering it by mail.

W. J. Odom, Eldorado, Okla., says—Received my shipment in good order and the David Bradley Cultivator was perfectly satisfactory. I know of no other implements that are equal to the Bradley and they are well adapted to the soil of this country. Other cultivators are selling for $37.50 and I paid you only $25.95 for mine.

R. P. Allison, Loving, N. Mex., says—The David Bradley Planter reached me all O. K. and everything was satisfactory. I don't believe it could be improved on, as everything works to perfection. I have seen several different makes, but they don't suit me half as well as yours.

John Grantner, Clyde, Ohio, says—Received David Bradley Spreader all O. K. Have set it up and tried it. It works fine and I would not take double the price I paid for it if I couldn't get another like it. I have saved just $35.00 through this deal.

BRADLEY REPAIRS SHIPPED THE DAY WE GET THE ORDER.

It is the duty of our Bradley Repair Department to ship every order the day it is received. No one else can serve you so promptly or furnish repairs at such low prices as we do. Read "How to Order Repairs," on opposite page.

DAVID BRADLEY
GARDEN CITY CLIPPER PLOWS
FOR 80 YEARS THE STANDARD PLOW OF AMERICA

Direct From Factory to User
Prices Lower Than Dealers Paid

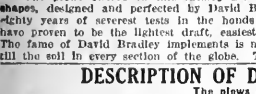
DAVID BRADLEY,
America's Pioneer Plow Maker.

The David Bradley Trade Mark
The Honor Mark of Quality.

The plows offered in this catalog are the original David Bradley Garden City Clipper shapes, designed and perfected by David Bradley, America's pioneer plow maker. Through eighty years of severest tests in the hands of farmers throughout the civilized world, they have proven to be the lightest draft, easiest scouring and most perfect working plows made. The fame of David Bradley implements is not confined to any state or to any country, they fill the soil in every section of the globe. They have time and again carried off first honors at the greatest of world's fairs, among them the Centennial Exposition, 1876, The World's Columbian Exposition, 1893, The Pan-American Exposition, 1901, and others too numerous to mention. No matter what section of the country you live in, no matter how diversified your soil or what kind of plow you need, you will, among our line of David Bradley plows, find the exact plow for your requirements; the plow which will serve you best and a saving of from one-third to one-half, compared with the price you would have to pay for any other standard make of plow.

DESCRIPTION OF DAVID BRADLEY GARDEN CITY CLIPPER STUBBLE AND STUBBLE AND SOD PLOWS.

The plows shown on this page are without doubt the most popular walking plows in America, and a careful comparison of them with other makes will convince you that their quality cannot be surpassed. Every David Bradley plow is sold subject to a fair test in your own **field** and with the understandiog that it must please you perfectly, that it must satisfy you better than any other make of plow you can buy at any price, or we expect you to return it to us at our expense and we will return to you the full purchase price, together with the freight charges you paid.



Bottom Construction.

MOLDBOARDS, SHARES AND LANDSIDES are made of the very best hard tempered soft center steel. SHARES are 5-16 inch thick, and have reinforced points, insuring long wear.

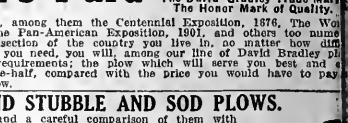
MOLDBOARDS are double shinned, that is, an extra thickness of hard steel is welded on top of the front of the moldboard, the point where the wear is greatest. This insures double the wearing qualities obtained by placing the shin underneath, as most makers do.

LANDSIDES are medium high, as shown in illustration, and are of double thickness at the heel, where the wear is greatest. They are reinforced to an inner steel landside bar, which is securely welded to the steel frog underneath the moldboard and share.

TEMPERING: Moldboard, share and landside are all uniformly hard tempered by the David Bradley secret process, insuring the best wearing and easiest scouring qualities. They are carefully ground and highly polished, the grinding of the plow bottom being done in the same direction as the land or furrow slice follows the mold. That is one reason why David Bradley plows scour quicker and better than others. The entire bottom is strongly braced, as shown in illustration.

STEEL BEAMS are made of the very best double beaded high carbon steel. They are heavy enough to insure ample strength and are formed with high arch so as to clear trashy land. Clevises are malleable iron, broad and adjustable in all directions.

HANDLES are first quality steam bent oak, securely attached and braced to the beam with flat steel braces. The plows are finished in the standard David Bradley colors of bright red, yellow and black. Not only the highest grade, but the best finished and most attractive in appearance of any plows made. Aside from the shapes of the moldboards and shares the bottom construction of the four styles of plows shown on this page is identical.



David Bradley Garden City Clipper. Right Hand. Steel Beam. Stubble Plow. $8.23

These plows are intended for use in old stubble ground. They have a bluff or short turn moldboard which pulverizes the soil, turns under stubble, weeds and corn stalks more thoroughly than any other shape. We recommend this shape for all old ground which has been highly cultivated. It will scour in black, sticky or clay soil. We do not recommend this shape for sod plowing.

This plow is made of the very best material. A complete description of the construction is given above. Cast or chilled shares can also be used on this plow, as the heavy steel frog reinforces the share point.

Prices are for the plows complete with soft center steel moldboard, landside and share. Shipped from the big David Bradley factory at Bradley, Ill.

PRICES OF DAVID BRADLEY RIGHT HAND STUBBLE PLOWS.

Our Catalog No.	Bradley's No.	Size, Inches	Weight, Pounds	Price	Extra Shares. Price, Each		
					Soft Center Steel	Crucible Steel	Chilled
32H101	L533	12	99	$ 8.23	$1.80	$1.40	53c
32H102	L545	14	112	9.48	2.00	1.60	60c
32H103	L570	16	117	10.73	2.20	1.80	67c

David Bradley Garden City Clipper. Left Hand. Steel Beam. Stubble and Sod Plow. $8.78

While right hand plows are almost universally used, some sections of the country still demand the left hand shape, and to accommodate such customers we furnish this shape of plow in left hand. These plows are the same shape as our right hand stubble and sod plows described above, except that they turn the furrow to the left or just opposite from the right hand plow. They are intended for use in heavy stubble, clover, timothy or blue grass sod and for deep stubble plowing. A complete description of the construction of these plows is given above. Cast or chilled shares can also be used on this plow, as the steel frog reinforces the share point.

Prices are for the plows complete with soft center steel moldboard, landside and share. Shipped from the big David Bradley factory at Bradley, Ill.

PRICES OF DAVID BRADLEY LEFT HAND STUBBLE AND SOD PLOWS.

Our Catalog No.	Bradley's No.	Size, Inches	Weight, Pounds	Price	Extra Shares. Price, Each		
					Soft Center Steel	Crucible Steel	Chilled
32H110	L510½	12	100	$ 8.78	$1.83	$1.43	56c
32H111	L521	14	115	10.03	2.03	1.63	63c
32H112	L577	16	125	11.28	2.23	1.83	70c

Crucible steel shares are best for stony and stumpy ground, especially in the Northwest, as they have a mild, natural temper, and while they will not wear as long as the hard tempered soft center steel share, they are not as liable to break should the plow strike an obstruction.

David Bradley Garden City Clipper Right Hand. Steel Beam. Stubble and Sod Plow. $8.7

This shape of plow is also known as the Turf and Stubble or General Purpose shape. It differs from the stubble plow by having a longer turn moldboard which turns the furrow slice clear over. We recommend this shape for turning under very weedy ground, clover, timothy or blue grass sod and for deep stubble plowing. It is not intended for the average stubble or old ground, unless the soil is not difficult to turn, as the moldboard is long and in wet or sticky stubble ground will not do as satisfactory work as the regular stubble shape. Cast or chilled shares can also be used on this plow as the heavy steel frog reinforces the share point. A complete description of the construction of these plows given above.

Prices are for the plows complete with soft center steel moldboard, landside and share. Shipped from the big David Bradley factory at Bradley, Ill.

32H107	L577	16	120	11.23	2.22	1.82	69c

David Bradley Garden City Clipper. Right Hand. Wood Beam. Stubble and Sod Plow. $9.23

These plows are of the same shape and construction as the steel beam stubble and sod plows described above, except that they have wooden beams. While steel beam plows are generally used, there are still some sections where wood beam plows are preferred, and to meet such demand we make this plow with wood beam. It is intended for use in heavy stubble, clover, timothy or blue grass sod and for deep stubble plowing. It has a long easy turning moldboard, which turns the furrow slice clear over. Beams are made of first quality oak. They are rigidly braced, as shown in illustrations, and are adjustable to cut more or less land. Cast or chilled shares can also be used on this plow, as the heavy steel frog reinforces the share point.

Prices are for the plows complete with soft center steel moldboard, landside and share. Complete description given above. Shipped from the big Bradley factory at Bradley, Ill.

David Bradley Royal Blue Plows.

el Beam. Right Hand Only.

$7.46

This plow is a great favorite in all sections, especially in mixed land country. Does fine in stubble or tame sod, and, as the moldboard, landside and share are crucible steel, mild or natural temper it gives splendid service in stony land. The bottom construction ble plow is one of its special features, the moldboard, share and landside being securely ed to a steel frog, and outer landside secured to a cast inner landside which has an stable slip heel. Bottoms are perfectly ground and highly polished. Moldboards are shinned on top, insuring great wearing qualities. Beam is heavy double beaded forged highly arched, so as not to foul in trashy land. Handles are of first quality oak, well ed to beam by flat steel braces. Clevis is malleable, broad and adjustable. Price is for plow complete with one extra share. Shipped from the big David Bradley factory at ley, Ill.

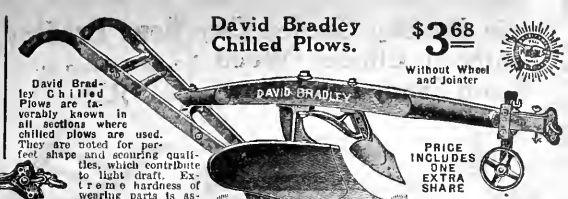
David Bradley Chilled Plows.

$3.68

Without Wheel and Jointer



David Bradley Chilled Plows are favorably known in all sections where chilled plows are used. They are noted for perfect shape and scouring qualities, which contribute to light draft. Extreme hardness of wearing parts is assured by the special process employed in their manufacture. The share and shin (sometimes called cutter shares) are in one piece, so in renewing one you renew the other. Materials used in the bottoms are a special mixture of metals of extreme hardness, yet possessed of strength and toughness. That is why David Bradley chilled plows will stand double the wear of others. Beam is first quality oak, thoroughly seasoned and bolted to slotted braces on the handles, making it adjustable for more or less land. Handles are thoroughly seasoned oak, braced by heavy rounds and a steel stay rod. A jointer should be used with No. D19 and larger plows when plowing trashy ground. Nos. D19, D20 and D40 are made with either wood or steel beam; other sizes wood beam only. NOTICE—Chilled plows are intended for use in sand or gravel soil and only under such conditions are they to be preferred to a steel bottom plow. They should never be used in black or sticky soils. This type of plow is always made with standing landside, and is measured by all manufacturers from the top of moldboard to outer end of share. The bottom of share measures about 2 inches less than the full cut of plow. Price is for plow with one extra share, wrench and adjustable malleable clevis. Jointer and gauge wheel are extra. Shipped from Bradley, Ill.

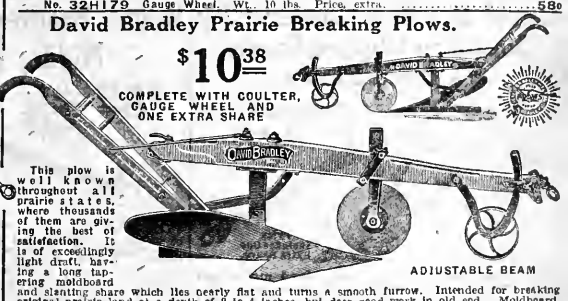
David Bradley Prairie Breaking Plows.

$10.38



This plow is well known throughout all prairie states, where thousands of them are giving the best of satisfaction. It is of exceedingly light draft, having a long tapering moldboard and standing share which lies nearly flat and turns a smooth furrow. Intended for breaking original prairie land at a depth of 2 to 4 inches, but does good work in old sod. Moldboard, share and long bar landside are crucible steel, natural tempered; share is left soft enough to sharpen with a file. Standard and standard cap are steel and the entire bottom well braced throughout. A special feature is the flat bar steel brace running from beam to standard and bolted to the inside handle. This insures great rigidity and makes the David Bradley the most strongly braced prairie breaker made. Beam is extra heavy seasoned oak with convenient adjustment to make plow cut more or less land. Handles are selected seasoned oak, well braced and bolted to bottom and beam. Price is for the plow complete with rolling coulter, gauge wheel and one extra share. Shipped from the big David Bradley factory at Bradley, Ill.

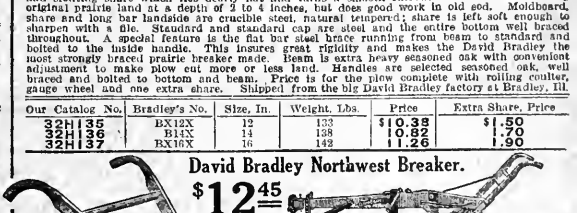
David Bradley Northwest Breaker.

$12.45

COMPLETE



An exceptionally strong and well braced plow, designed for a heavier class of work than the standard type of prairie breaker. A splendid plow for heavy prairie sod and brush work, also extensively used for road making and grading purposes. Beam is extra heavy and made of selected oak. Standard is extra heavy steel, solidly braced. Moldboard, share and long bar landside are of crucible steel, with natural temper. The heavy steel coulter is made with a shoe at the point, into which the point of the share is inserted, making it absolutely solid. Rolling coulter cannot be used. Gauge wheel is adjustable up and down and back and forth on the beam. Handles are steam bent selected oak, extra heavy, strongly braced. Price is for the plow complete with wheel and coulter. Shipped from the David Bradley factory at Bradley, Ill.

David Bradley New Ground Plow.

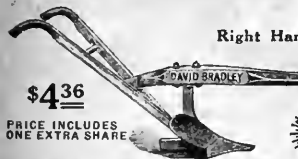
$7.42

Designed especially for use in new ground where stumps and roots are too plentiful to permit the use of the regular type of breaking plow. It is not intended to serve the purpose of a regular moldboard plow. Jumping coulter either severs the root or carries the plow over it, after which the plow immediately enters the ground. Moldboard and share are in one piece and are mild or crucible steel with natural temper. Carefully ground and highly polished. The moldboard is welded to a narrow steel landside which is bolted to the beam, the lower end of which curves to conform to the shape of the mainframe. Heel is heavy forged steel, highly arched. Shipped from Bradley, Ill.

No. 32H168 9-inch New Ground Plow. Weight, 100 pounds. Price.....$7.42

David Bradley Garden City Southern Clipper Wood Beam Sandy Land Plow

Right Hand Only.



$4.36

PRICE INCLUDES ONE EXTRA SHARE

For use in sandy or loamy soils of the South, but used in black land with good results. They are also well adapted for garden use or, in fact, any place where a small light plow is required. Beam is selected oak and adjustable on standard cap for more or less land. Moldboard is hard tempered soft center steel. Slip share and low landside are of crucible steel, natural temper, all carefully ground and highly polished. Depth of furrow can be gauged from 3 to 7 inches. Standard is heavy steel. 1-horse clevis furnished with 7-inch plow. 2-horse clevis with other sizes. Shipped from the big David Bradley factory at Bradley, Ill.

New Bradley Riding Attachment for Walking Plow

Price Reduced to

$8.72

A Great Time and Labor Saver.

Can Also Be Used as a Riding Harrow Cart.

Price Does Not Include Plow.

This attachment will make a class frameless sulky plow out of wood beam, steel beam right or left hand plow, or middle br you may have. It will make plow run steadily and without draft, provide a comfortable sea you and without making the wo bit harder on your team. It will square corners either way with in the ground, and can be set any depth of furrow. Levers within easy reach of driver and ate easily. Can be readily atta to any ordinary wood or steel plow without fitting, and if plow should have an extra wood beam, it will only be neces to bore one or two holes to m the bolt holes in the beam cli It can be quickly changed from plow to another, by placing attachment back of a drag ha and connecting to the harrow bar by a long pole or 2x4-inch ti placed between the beam cla on the attachment you have a splendid harrow cart, saving you many a hard day's tramp. The attachment is n entirely of malleable iron and steel. There is no wear out to it. Wheels are the regular type of riding plow wheels with oval tires and dustproof hubs. No farmer having a walking plow can afford to do without this valuable attachment. attachment is not intended for use on smaller than 10-inch plows and cannot be used on rod breakers upon which beams are too low. Price is for the complete attachment, consisting of frame, two levers and ratchets, two wheels and a seat post and seat; everything shown in the illustration, excepting the plow. Shipped from the big David Bradley factory Bradley, Ill.

No. 32H192 New Bradley Riding Attachment. Wt., 154 lbs. Price.....$8.

David Bradley Garden City Southern Clipper Sandy Land Plows

Right Hand Only.

$5.73

Price Includes One Extra Share.

Has a quick turning or sandy land moldboard with a point and landside of the black land pattern. Beam is highly arched double beaded forged steel, securely braced to bottom and handles. Moldboard is of hard tempered soft center plow steel. Landside and share are crucible steel with natural temper, all carefully ground and highly polished. Handles perfectly formed of steam bent oak. Especially designed for use in sandy or loamy soils of the South, but also gives good satisfaction in black land. Price is for plow complete with one extra share. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley Steel Beam Middle Breaker

$8.53

These plows have the celebrated Garden City Clipper Middle Breaker Bottom, acknowledged to be the most perfectly shaped bottom of its class. Thousands used throughout the cotton country; everyone considers them the best. Used for breaking or bursting cotton ridges, also for opening furrows in which to plant corn, potatoes, etc. Moldboards are hard tempered, soft center plow steel and share is crucible steel with mild or natural temper, all carefully ground and highly polished. Beam is highly arched double beaded forged steel, bent to follow the moldboard nearly to the heel, to which a steel frog is attached and moldboard bolted thereto, the most rigid construction possible. A curved steel rudder back of the moldboard steadies the plow and makes it run straight. This is adjustable up and down and regulates depth. Handles are flat steel, with malleable hand pieces and securely braced to the beam. Price is for the plow complete with steel rudder and malleable clevis. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley Rod Breaker

$5.98

COMPLETE WITH GAUGE SHOE, FIN CUTTER AND ONE EXTRA SHARE.

The best plow of this class made. For use in shallow plowing of original prairie sod, tough enough to hold together while turning. Works best where there are no stones or roots and should not be used for heavy work for which a regular moldboard breaker is required. Curved spring steel rods take the place of a moldboard and contribute to light draft. Share and landside are crucible steel, with mild or natural temper. Beam is heavy double beaded forged steel, solidly braced. Handles are oak, steam bent. Price is for the plow complete with fin cutter, gauge shoe, malleable clevis and one extra share. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley Walkin Vineyard Gan Plow

$17.95

These are also knowns as pony gang or orchard gang plows. They do splendid work in all kinds of shallow plowing, but were designed especially for use in vineyards, hop fields and orchards. They can be used close up to trees or vines without injury roots. In many sections they are also used in plowing stub fields, corn fields, summer fallow, and for putting in sm grain, etc. Plow has three bottoms, each bottom cuts a f row 8 inches wide and is intended to plow from 2 to 4 inc deep. The rear bottom or gang can be detached, leaving two-furrow plow if desired. This does not interfere in any w with the other mechanism of the plow. By setting the p bottom nearest the vine to cut shallow, while the others deeper, the plow can be adjusted to throw the dirt away fr or toward the vines. The plow is furnished with meldbo and share of mild or crucible steel with natural temper, ca fully ground and polished, or with crucible steel moldboa and cast shares of the same metal used in David Brad chilled plows. Handles are flat bar steel with malleable h hand pieces. The entire plow is well braced and all lev are positive and easily operated. Wheels are 16 inches h and have half oval tires. Price is for the plow complete illustrated. Three extra cast shares are furnished with 32H188. Shipped from the big David Bradley factory Bradley, Ill.

David Bradley Garden City Southern Clipper Black Land Plows

STEEL BEAM. RIGHT HAND ONLY.

$7.23

David Bradley designed this plow especially for use in the black lands of Texas and other states of similar soil conditions. The moldboard has a rather abrupt turn, raising the dirt quicker and carrying it higher and further over than the sandy land plow. Moldboard is of hard tempered soft center plow steel. Landside and share are crucible steel with natural temper, all carefully ground and highly polished. Beam is highly arched double beaded forged steel. Handles are steam bent selected oak, securely braced to beam. Clevis is malleable iron. Price is for the plow complete with one extra share. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY DISC PLOWS

29.85 AND UP

WONDERS IN HARD GROUND.

WHEEL CANNOT SWING INTO DISC.

Wherever disc plows are known the David Bradley ranks first. They are absolutely high in every way and should not be confused with light weight, cheaply made disc plows. Frames are extra heavy bar steel throughout, having practically no cast parts excepting heavy cast wheels and their attachments. The steel beam to which the evener attaches is one steel plate which yields vertically when the discs meet with unusual resistance. Wheel hubs can be attached to wheels for plowing extra hard ground. The discs are of finely tempered steel, 24 inches in diameter, and the disc journals turn in ball bearing boxes. The spaces or grooves are chilled and are practically wearproof. Our No. 9 plow handles nicely with three horses, the No. 10 with four and the No. 11 with six horses. The plows make short turns either way and there is absolutely no side draft, either with horses abreast or tandem hitch. These plows are more specially adapted for use in soils where the ground becomes hard or hard that it is impossible for a moldboard plow to enter the ground. They do good work in heavy weeds, but are not recommended for turning sod. The discs of the Bradley Disc Plow are set farther apart than on ordinary disc plows, which makes them clean better in heavy weeds and trash. The width of the furrow depends on the depth at which the plow is set. Cutting 6 to 8 inches deep, the No. 9 plow will cut a furrow about 19 to 20 inches wide, the No. 10 from 20 to 24 inches wide, and the No. 11 from 30 to 36 inches wide. Prices are for the plow complete with equalizers. Shipped from the big David Bradley factory, Bradley, Ill.

No. 32H210	No. 9 Single Disc Plow, with 3-horse equalizer. Wt., 735 lbs. Price	$29.85
No. 32H211	No. 10 Double Disc Plow, with 4-horse equalizer. Wt., 1,042 lbs. Price	44.40

No. 32H213	Extra Discs. Wt., 20 lbs. Price, each	3.00

DAVID BRADLEY PERFECTION SULKY PLOWS

$22.95

HAND LIFT.

This is the best frameless Sulky Plow you can buy. It cannot be excelled for a light, medium high lift plow, and possesses more good features than can be found on other plows of the kind. All parts subject to strain are made of steel or malleable iron, relieving any possibility of breakage. The beam is of heavy first quality high carbon steel with high arch and ample clearance. Bottoms are the famous Gardea City Clipper shapes, the same as used on our other David Bradley sulky plows. Levers are within convenient reach of the operator and have such leverage that they can be easily operated by a boy. Rear wheel is connected to beam by two heavy steel plates, securely bolted and extremely strong. The rear wheel casters and locks in line with the plow after turning corners. Rear wheel lock casting is adjusted by two set screws, enabling operator to set plow to carry the landside away from the land, relieving friction and insuring light draft. The hand lever on top of front furrow axle is for adjusting the front furrow wheel and the plow can be successfully guided for mare or less land. The operator can do this from the seat while plow is in motion; a convenience not found on any other frameless plow. Wheels have staggered spokes and are very strong. Land wheel is 30 inches in diameter, rear and front furrow wheels are 20 inches in diameter. Wheel boxings are dustproof with 7¼-inch wearing surface and so constructed that it is only necessary to occasionally fill the cups with hard oil to insure proper lubrication. The rolling coulter permits of any adjustment desired. The blade is of high carbon steel that will hold an edge. It turns on a chilled cone dustproof bearing. Clevis is made of steel and malleable iron, of simple and strong design. By loosening one bolt it can be quickly changed for two, three or four horses. The nine-hole drop clevis permits any adjustment that may be required. The plow is furnished with three-horse evener, coulter, wrench and weed hook, but without a pole, although you can easily attach one if wanted. Jointer will be furnished in place of coulter, if so ordered. Shipped from the big David Bradley factory at Bradley, Ill.

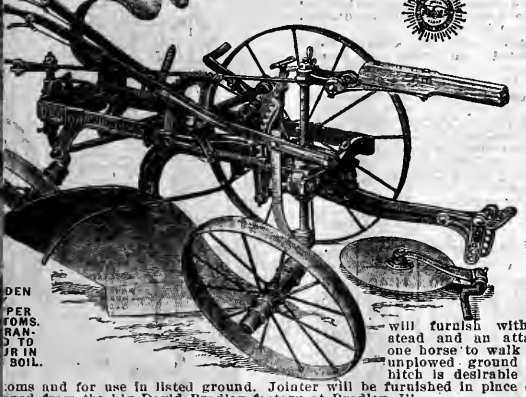
DAVID BRADLEY No. 7 SULKY PLOWS

$27.85

BEAM HITCH—FOOT LIFT.



To anyone preferring a beam hitch sulky plow, we recommend this as the best plow of its type that money can buy. It is a great favorite in all sections, and will be found equal in every way and superior in many ways to any of the standard riding plows of other makes. The frame is exceedingly strong, being formed from one solid bar of heavy steel ⅝ inch thick. It has no chance to become loose. It will not sag, and insures proper working position of the plow at all times. Frame is up 23 inches from plow bottom, affording ample clearance for trash. The beam is unusually heavy and is suspended from the frame by two heavy steel bails, which hold the plow rigidly in place. The adjustable foot lift lever responds readily to the slightest tread and plow can be raised or lowered with ease. Lift is 5½ inches from ground. The beam can be locked so that bottom is held firmly in the ground, it can't jump out. Tension on the lifting spring can be relieved and the plow left to float in stony ground. All levers are conveniently located near the seat. The depth regulating lever is at the right and keeps the bottom level at any depth plowed. The cushion spring on the land lever insures a smooth furrow, even on rough ground. A connecting rod governs rear wheel. It is connected with the pole plate and in such a manner that plow can be turned or backed up in the shortest possible circle. Operator can adjust pole plate to shift tongue to any desired position while team is moving. Wheels are steel with wide oval tires. Land wheel is 34 inches in diameter, and rear wheel is 20 inches in diameter. Furrow wheel is 24 inches in diameter. Wheels are all steel with heavy oval tires and staggered spokes, and all hubs have the Bradley patent oildight dustproof bearings, the best on earth. Price is for the plow complete with pole, three-horse eveuer, neckyoke, weed hook, wreuch and rolling coulter. We will furnish with four-horse hitch instead and an attachment which permits one horse to walk in furrow and three on unplowed ground for $1.15 extra. This hitch is desirable for plows with breaker coms and for use in listed ground. Jointer will be furnished in place of coulter if so ordered.

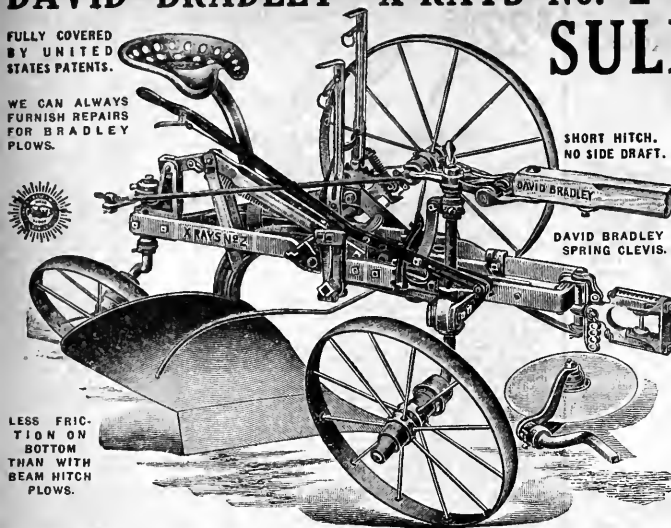
DAVID BRADLEY X-RAYS No. 2 FRAME HITCH SULKY PLOW $29.75

FULLY COVERED BY UNITED STATES PATENTS.

WE CAN ALWAYS FURNISH REPAIRS FOR BRADLEY PLOWS.



THE HIGHEST LIFT, EASIEST HANDLED LIGHTEST DRAFT AND THE MOST DURABLE RIDING PLOW IN THE WORLD

THE X-RAYS No. 2 is a fitting example of the h degree of perfection attained in Da Bradley plows. It contains every good feature a rid plow could possibly have and many distinctive Brad features all covered by United States patents which prev their use on any other plow. Year by year this plow been perfected until in its present form there seems to absolutely no room for improvement.

THE FRAME is wide with plenty of room for coulter a is made of extra heavy high carbon st ¾-inch thick, securely bolted and rigidly braced. Wheels high, giving a clearance to the frame of 23 inches from bottom of the plow and point of plow lifts 7 inches from ground. This plow differs from all others inasmuch as beam is contained entirely within the frame, the hitch be made from a forward point on the frame directly in l with the point of the plow beam, thus affording any adv tage which could possibly be found in a beam hitch pl but at the same time relieving the plow bottom of the wei of heavy eveners. Just so much less weight for the rider lift, one reason why this plow can be easily raised from ground by the slight foot pressure of a small boy or g As an illustration of the ease with which the X-Rays t lever operates, a 200-pound man can stand on the wing of moldboard when the plow is in the ground and, with bu slight pressure on the foot lever, the driver can easily plow, man and all with horses at a standstill. We defy other plow maker in the world to produce a foot lift p which will accomplish this.

WHEN THE PLOW BOTTOM IS LOWERED into the ground the point of the beam rests against a patent stop inside the frame which locks t plow in the ground. There is absolutely no side motion to the beam, it being held firmly in pl by a heavy bail with wide bearings and is unaffected by position of the hitch. The frame and wheels carry the entire load; the plow itself accomplished easily with team either at a standstill or in motion, and when plow is lifted while in motion it can be returned to the ground wit but a few inches of travel, making it one of the greatest stone dodgers on earth. The land wheel is 34 inches in diameter; the front furrow whe 24 inches; and the rear furrow wheel, 20 inches in diameter. Wheels are all steel, with ovai tires and heavy round steel staggered spokes, soli welded into the Bradley patent long distance grease retaining dustproof hubs; absolutely the best and most lasting hubs made. The bearings are inches long. When they are properly oiled, one oiling is sufficient to plow a 40-acre field. Boxes are removable and easily and cheaply replaced. T plow enters the ground point first, and raises in immediate response to the slightest pressure on the foot lever, this being accomplished by heavy coiled lifting spring and compound arrangement of levers, constituting the foot lift.

LEVERS ARE CONVENIENTLY LOCATED so as to operate easily from the seat. The land lever controls the position of the plow bottom and keeps it running level. The front furrow lever regulates the depth. The lifting lever locks the plow in the ground and if desired can be used in connection with the foot lift. A noteworthy feature of this plow is the shortness of hitch. This couples plow and team up close, does away with side draft, and makes the handling of the X-Rays No. 2 an easy matter for man and team even under the most unfavorable conditions. A pole plate adjuster enables the driver to adjust pole from the seat with team in motion.

DAVID BRADLEY'S CELEBRATED PATENT SPRING CLEVIS is furnished with the X-Rays No. 2 when fitted with three-horse evener.

This is a very desirable feature. It often prevents breakage of shares, lightens the jar in event of plow striking obstructions, makes work easy on your horses' shoulders and it is also a good indicator of land draft.

PLOW BOTTOMS FURNISHED with David Bradley riding plows are all of the celebrated Garden City Clipper shape, the most perfectly formed plow shapes known. They meet the various conditions of soils throughout the entire country, and from the bottoms shown below you can select the exact shape of bottom you require. Prices are for the plows complete with three-horse hitch, spring clevis, pole, neckyoke, rolling coulter, weed hook and wrench. Jointer will be furnished in place of coulter if so ordered. We will furnish instead with four-horse hitch an attachment which permits one horse to walk in the furrow and three on unplowed ground for $1.15 extra. This hitch is desirable for plows with breaker bottoms and for work in fleted ground. When four-horse evener is furnished we do not supply the spring clevis. Many purchasa a stubble or stubble and sod plow and in addition order a prairie breaker bottom. This gives them practically two complete plows by merely switching bottoms and for a very small outlay. For the convenience of those wishing such a combination we list extra breaker bottoms below. An extra share free with all prairie breaker bottoms. Shipped from the big David Bradley factory at Bradley, Ill.

SEND FOR OUR BOOK OF DAVID BRADLEY PLOWS if you want more complete information, contains colored illustrations and pictures of Bra plows at work in the field, tells how they are m and what users think of them.

DAVID BRADLEY GARDEN CITY CLIPPER BOTTOMS

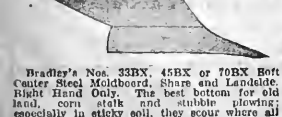
FURNISHED WITH DAVID BRADLEY SULKY AND GANG PLOWS. SHARES 5-16 INCH THICK.

We show below the shapes of plow bottoms furnished on the David Bradley Sulky and Gang Plows shown on pages 1093, 1094 and 1095. They are the celebrated Garden City Clipper bottoms, designed and perfected by David Bradley, the pioneer plow maker of America. These shapes have been used for years by farmers in all sections of the country and with the greatest success. A farmer once using a David Bradley plow is never satisfied with any other.

Underneath each bottom illustrated we show Bradley's catalog number, and by referrin the price lines of the David Bradley sulky and gang plows you will readily find these n bers and determine the plow to order. See page 1090 for details of construction. They made the same as the bottoms described there, excepting that malleable frogs are use the construction of David Bradley riding plow bottoms.

Stubble Shape.

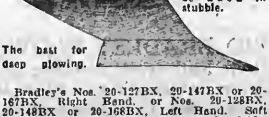
The best for stubble plowing and in sticky soils.



Bradley's Nos. 33BX, 45BX or 70BX Soft Center Steel Moldboard, Share and Landside. Right Hand Only. The best bottom for old land, corn stalk and stubble plowing; especially in sticky soil, they scour where all others fail.

Stubble and Sod or General Purpose Shape.

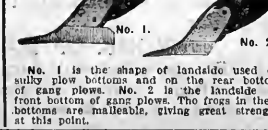
For clover, timothy and tame sod plowing. Can also be used in stubble.



The best for deep plowing.

Bradley's Nos. 20-127BX, 20-147BX or 20-167BX, Right Hand, or Nos. 20-128BX, 20-148BX or 20-168BX, Left Hand. Soft Center Steel Moldboard, Share and Landside.

Style of Landsides on Plow Bottoms Shown to the Left.



No. 1 is the shape of landside used on sulky plow bottoms and on the rear bottom of gang plows. No. 2 is the landside on front bottom of gang plows. The frogs in these bottoms are malleable, giving great strength at this point.

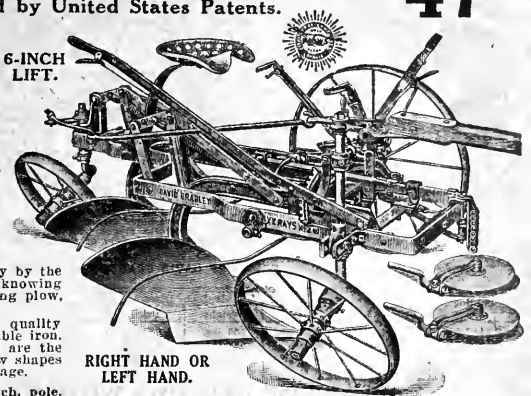
Prairie Breaker Shape.

Bradley's Nos. B12X, B14X or B16X. cible Steel Moldboard, Share and Land Mild, or natural temper. Right Hand One extra share furnished with each bre bottom.

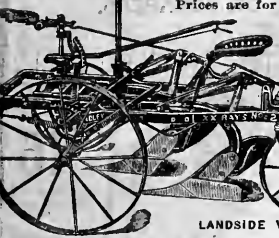
David Bradley XX-Rays No. 2 Frame Hitch Gang Plows $47.50

High Lift. Foot Lift. Hand Lift. Fully Covered by United States Patents.

This plow is a favorite in many sections and has all of the superior features assessed by the X-Rays No. 2 Sulky Plow, described on the previous page. It fers only by having two bottoms and a frame which is necessarily wider and ayier. This plow is of exceedingly light draft and the ease with which it be operated is surprising to all who use it. It requires little exertion on part of the operator to raise or lower the bottoms, this being accomplished slight pressure on the foot lift lever, which is assisted by a powerful lifting ring. The forward motion of the team also contributes toward the lift. Being frame hitch plow the weight of the bottoms is carried on the frame and eels, which contribute to steady running and light draft. Both plows enter ground together, point first. The lift can be made while the plow is in tion and the bottoms will again take the ground within a few inches of vel. Frame is made of high carbon bar steel, 2¼ inches wide by ⅝ inch ck. Wheels are of the same dimensions and construction as those on the Rays No. 2 Sulky Plow, bringing the frames high up from the ground, ording ample clearance in trashy patches. Points of plows lift 6 inches from ground. The plow is provided with a hand lift lever to assist the foot lift en not in motion. This plow is easy on operator and team. No jolting or ring, turns square corners either way, and as the frame supports the plow ttoms independent of the eveners, the operator does not have to lift them en raising the plow from the ground. Neither is the team affected in any way by the vement of the bottoms. We recommend this plow for the most difficult work, knowing will do perfect work and give as good satisfaction as any other make of gang plow, gardless of price.



Bradley Patent Hubs.



The construction of the XX-Rays is of the highest quality throughout. It is made of the very best steel and malleable iron. Every part designed for strength and service. Bottoms are the famous Garden City Clipper shapes, the most perfect plow shapes known. You will find them fully described on previous page.

Prices are for the plows complete with four-horse hitch, pole, neckyoke, two rolling coulters, two weed hooks and wrench. Jointers will be furnished in place of coulters, if so ordered. We will furnish four-horse string-out hitch instead, if wanted; or a five-horse string-out hitch instead for $1.50 extra. Shipped from the big David Bradley factory at Bradley, Ill.

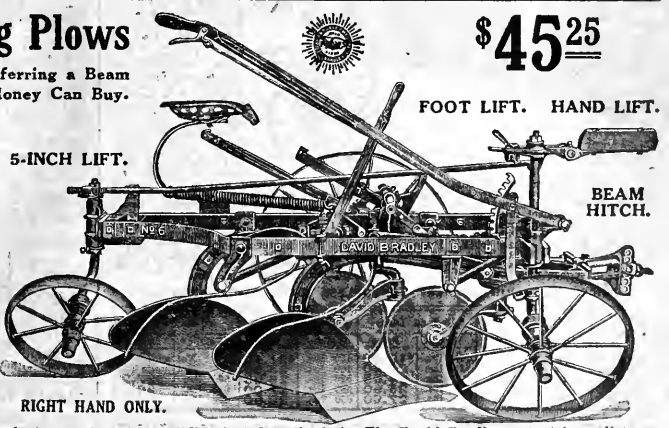
David Bradley No. 6 Gang Plows $45.25

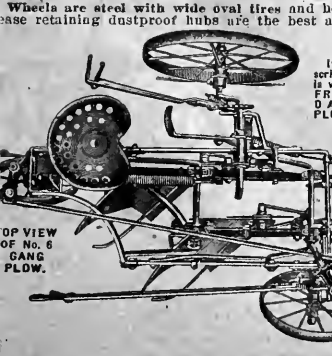
Popular Type of Gang Plow and to the Farmer Preferring a Beam tch Plow, We Recommend It as the Best That Money Can Buy.

This plow is constructed on correct principles. Weight plow and furrow slice is carried on frame and through frame onto the wheels, relieving friction from bottom. ams are connected to plow frame by two heavy bails. hen bottoms are lowered into the ground beams rest on ir stops attached to plow frame and are held there by foot lift lock.

Frame is made of extra heavy high carbon bar steel, inches wide by ⅝ inch thick, securely bolted and rigly braced. All parts subject to strain are made of steel tough malleable iron, relieving the possibility of breake. Beams are of heavy first quality high carbon steel th high arch, affording ample clearance in trashy ground, vers are very effective and within convenient reach of the erator. The patented foot lift is by far superior to that nd on any other make of gang plow. It has such leverge that the bottoms can be easily handled by a boy while e plow is at a standstill or in motion. Points of plows 5 inches from the ground. When lowered, plow bottoms ter the ground immediately. There is absolutely no side aft. A pole adjusting lever is provided so that operator a shift pole and front furrow wheel to any desired posin while plow is in motion.



Wheels are steel with wide oval tires and heavy round steel staggered spokes, solidly riveted to the hub. The David Bradley patent long distance ease retaining dustproof hubs are the best and longest lasting bearings made. Bearings are 9 inches long and when properly oiled, one oiling is sufficient for plowing 40 acres. Bearings are removable and easily and cheaply replaced. Land wheel is 34 inches in diameter. Rear wheel is 20 inches in diameter. Front furrow wheel is 24 inches in diameter. Bottoms are of the David Bradley Garden City Clipper shape, acknowledged by all to be the most perfectly formed and satisfactory working plow bottoms made. A heavy malleable frog is used, giving plenty of bearing to share point for protection in stony ground. Front plow bottoms have short handside and rear bottoms have medium landside, as shown in illustration of the XX-Rays No. 2 Gang Plow above.



Prices are for the plows complete with four-horse evener, neckyoke, two rolling coulters, two weed hooks and wrench. We will furnish a four-horse string-out hitch instead, if wanted; or a five-horse string-out hitch instead for $1.50 extra. Will furnish jointers in place of coulters if so ordered.

Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY IDEAL DISC HARROWS

The perfected result of eighty years' experience in designing and building farm implements. They possess every known improvement in disc harrow construction, many of which are found in no other harrow. When you buy the David Bradley Ideal you have the very best tool of its class on the market. The frame is made of heavy steel throughout. It is rigidly braced in all directions. The gangs are operated by independent levers; either can be set at any angle without interfering with the work of the other. Levers are conveniently placed in front of the seat within easy reach of the driver. The steel bars connecting the levers with the disc sections are placed under a heavy steel yoke, which is adjustable up and down on the frame. This holds the discs level, keeping them from buckling up at the middle and makes them cut a uniform depth. Hitch is low, relieving horses of neck weight, and the pull is direct from the gang bearings. The harrow is of perfect balance, which insures unusually satisfactory work. Weight boxes are pressed from a single sheet of heavy steel. Scrapers are the very best steel, carefully tempered and highly polished. Spools are solid iron. Bearings run in oil soaked maple boxes, and are provided with oil tubes extending up through the weight boxes. These tubes are closed at the top by a spring cotter. Bearings are absolutely dustproof. Axles are steel, 1¼ inch square. The oscillating spring steel scrapers are operated by slight foot pressure on a foot lever at each side of seat post. They are also provided with a throw-off lever at the rear, so that the operator can free the scrapers from the discs at any time. This feature not only saves wear on scrapers and discs, but lightens the draft when the use of the scrapers is not required. The spring seat post is fully covered by Bradley patents. It can be used on no other disc harrow. This feature, together with the large roomy seat, makes the David Bradley Ideal the easiest riding disc harrow made. Prices are for the harrow complete as illustrated, including tongue and weight boxes, a two-horse evener with harrows having eight or ten discs; a three-horse evener with set over pole and irons with harrows having twelve discs, and a four-horse evener with harrows having fourteen or sixteen discs. Shipped from the big David Bradley factory at Bradley, Ill.

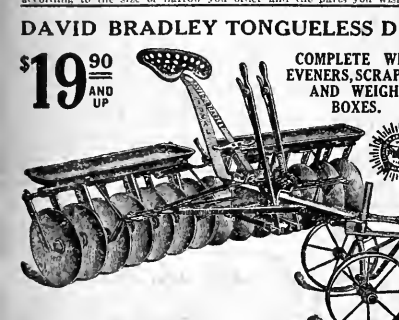
DAVID BRADLEY TONGUELESS DISC HARROWS.

$19.90 AND UP

COMPLETE WITH EVENERS, SCRAPERS AND WEIGHT BOXES.



These harrows are of the same construction throughout as the Ideal harrows with tongue described above, excepting that they have no forward pole or tongue, but have a David Bradley adjustable oscillating tongue truck, secured to the pole tongue. The advantages of a tongueless disc harrow are so readily appreciated by farmers that it is coming into almost universal use.

We recommend by all means that you purchase this harrow. You will then have the most satisfactory and up to date disc harrow made, a machine which does the most uniform work, relieves your horses of worry and neck weight, and makes it possible for you to work clear out to the edge of plowed ground, close to fences, and to turn corners easily. The tongue truck can be easily detached and used on numerous other implements. A forward pole can be used on the truck if desired. This will add no neck weight, merely serve to better control the team, and if you wish us to furnish a pole with the harrow we will do so for $1.00 extra. If you intend to use a forward pole, you should order extra either our No. 32H348 Pole Plate, or No. 32H349 Offset Pole Attachment, listed below with the David Bradley tongue truck. Prices are for the disc harrows complete with tongue truck. We furnish a two-horse hitch with harrows having eight and ten discs, a three-horse hitch with harrows having twelve discs, and a four-horse hitch with harrows having fourteen or sixteen discs. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY REVERSIBLE DISC HARROW AND CULTIVATOR

REDUCED TO $13.35

One of the handiest implements on the farm and is becoming more popular every year. Designed for gardeners and small farmers, but it is useful on even very large farms. It serves the purpose of a disc harrow or a disc cultivator. The discs can be set at any angle desired and can be reversed to throw the dirt in or out. Can be set close together for harrowing or separated so as to straddle the row. Distance between gangs adjustable up to 18 inches. When discs are close together the six-disc machine cuts about 3, and the eight-disc machine about 4 feet. Discs are 16 inches in diameter, made of the very best steel and finely tempered and polished. Aside from cultivating grain, hilling potatoes, cultivating tobacco, etc., this tool can be used to run between rows of berries, grapes, etc., for which work the ordinary disc harrow is too wide. Discs can be tilted at either end to run on an incline, so as to hill or trench. They have oil soaked maple bearings and scrapers. Neckyoke and two-horse hitch furnished. Shipped from the big David Bradley factory, Bradley, Ill.

DAVID BRADLEY IDEAL CUT OUT DISC HARR

FURNISHED WITH TONGUE OR TONGUELESS.

$16

COMPLETE WITH SCRAPERS AND BOXES.

The general construction of these harrows is identical with the David Bradley Ideal Disc Harrows, described above, the only difference being the shape of the discs. This type of harrow is preferred in many sections of the country. They are desirable for use in wet or sticky soil, as the discs do not clog or foul so quickly as the full round disc. They are also extensively used in soft ground to prepare for cultivation without plowing. Discs are made of the very best steel, carefully tempered and highly polished. The spring steel scrapers clean the disc perfectly and at a point just above the ground so that dirt and trash are not carried above and over the bar to fill up the discs before they again enter the ground. The eveners furnished with these harrows are the same as furnished with the corresponding sizes of David Bradley Ideal Disc Harrows described above. We can also furnish as tongueless disc harrows fitted with a David Bradley adjustable oscillating tongue truck instead of a pole or tongue for $3.95 in addition to prices quoted below. Shipped from the big David Bradley factory at Bradley, Ill.

David Bradley Adjustable Oscillating Tongue Tru

$4

For use with disc harrows, mowers, grain and corn binders, seeders, land rollers, etc. The same truck furnished with the David Bradley Tongueless Disc Harrow. Can be used to advantage on almost every farm implement. Relieves the team of neck weight, and does away with the constant worry of an unwieldly tongue. Simple construction, nothing to break or get out of order, and it contains many features superior to any other tongue truck made. Wheels are dustproof, and have wide oil retaining hubs. Furnished with steel wheels with 2¼-inch half or oval tires, as shown in illustration, or with cast wheels with flanged tires for use with binders or other machines with side draft. Distance between wheels is 24 inches. The high arch steel axle allows the wheels to pass clear under the tongue, permitting short turns either way. The casting which attaches to the stub pole is adjustable up or down on the standard, so as to accommodate all heights of hitches and insure direct draft. The construction of this casting is such as to permit the wheels to oscillate and adjust themselves to uneven ground. Each wheel carries its own load and either can be run over an obstruction several inches high without disturbing the position of the tongue or pole with three or five-horse hitch. The truck is easily attached to any imple It is only necessary to saw off all but about 4 feet of the tongue and bolt the truck stub with bolts we furnish. DAVID BRADLEY GUARDED END STEEL LEVER HARROWS.

$4.43 AND UP PER SECTION.

FLEXIBLE TOOTH BARS. RUNNER TEETH AT EACH CORNER.

Popular in timber countries and for use in new or stumpy ground. The sides and front end of the harrow are protected by a heavy steel I beam which forms the frame. The steel tooth bars are fastened to this frame at each end, making a very rigid construction. This outer frame serves to prevent the harrow from catching on trees, stumps, stones, or other obstructions. It prevents breakage of the harrow itself and also damage to horses, which so often occur with ordinary harrows. The spring lever connection makes the teeth flexible, so that they will pass over obstructions without damage. This also eliminates strain on the harrow frame. The teeth are triangular in shape. They are 7 inches long and connected to the bars with the celebrated Bradley steel tooth clip, the same as used on the Bradley U-bar harrow. This clip enables one to place the teeth as far apart as desired, or to use as many teeth on a bar as wanted. Teeth are sweedged to prevent falling out should they become loose. Made in sections, having either 25 or 30 teeth; each section has five tooth bars and a runner tooth at each corner. The 25-tooth sections cut 4 feet 3 inches and the 30-tooth sections 5 feet wide. Illustration shows a 60-tooth two-section harrow. Levers are conveniently located and provide for all needed adjustment of teeth. Wood drawbar and draw irons furnished with all sizes. Shipped from the big David Bradley factory at Bradley, Ill.

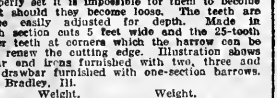
DAVID BRADLEY BOSS HARROWS. $5.19 AND UP

SEASONED HARDWOOD FRAMES, RIVETED AT EACH TOOTH



Positively the strongest and best finished wood frame harrows made. Frames are made of the best quality seasoned hardwood, strongly riveted at each tooth and firmly braced. All wood parts are well painted with a first quality oil paint, which serves as a great protection against action of the weather and increases the life of the harrow. Others offer harrows made of cheap grades of lumber, painted with low grade mineral paint, and in many other ways inferior. Do not be misled; insist upon getting a harrow of quality equal to the Bradley; one made of the best quality of timber. Teeth are ½ inch square. Sections are independently connected to drawbar with drop link clevises, allowing flexibility. The 80-tooth harrow cuts 10½ feet, has one center and two side sections and a two-horse drawbar; the 78-tooth harrow cuts 13 feet, has one center and two narrow side sections, and a two-horse drawbar; the 102-tooth harrow cuts 16½ feet, has one center and two wide side sections, and a three-horse drawbar; the 150-tooth harrow cuts 26 feet, has one center, two wide and two narrow side sections, and a four-horse drawbar which is fitted with a sheave pulley and roller chain draft equalizer. If you purchase a 150-tooth harrow, you can use it as a 78-tooth or as a 102-tooth harrow by separating the sections and using a shorter drawbar. AVID BRADLEY ALL STEEL HARROW CART.

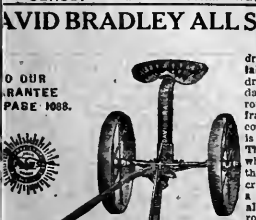
O OUR RANTEE PAGE 1068.



$4.95

Any farmer who has ever walked behind a drag harrow all day can appreciate this Bradley labor saver. Can be attached to any style of drag harrow, and will save many a hard day's tramp. The Bradley is the only harrow cart made with axle pivoted to the frame. It is strongly built and simple in construction, no wear out to it. The driver is always in line with and facing his team. The seat is mounted on a steel seat spring which is attached to the frame and axle. As the axle is pivoted to the frame, there is no crampfor straining in turning. By tripping a foot lever when turning, the axle pivots, to allow the cart to follow around after the harrow, and when straightened it automatically locks itself. The cart rides steadily and does not drift on side hill work. Furnished with either 24 or 42-inch wheels with 3-inch oval tires. The 42-inch wheels are preferred by many as they bring the rider well up out of the dust. The shafts or connecting bars are heavy angle iron attaching to the harrow evener by means of steel clamps. Distance between wheels of 24-inch cart is 29½ inches and on the 42-inch cart, 43 inches. Shipped from the big David Bradley factory at Bradley, Ill.

ALFALFA CULTIVATOR OR RENOVATOR

Designed Especially for Work in Hard, Baked Soil.

$34.50

This is a splendid tool to use in the alfalfa field after cutting your crop. Without cutting the roots like a disc, its many sharp teeth cultivate them thoroughly without injury. It will stir up the hard soil as nothing else will do. Discs merely cut the hard earth but the spiked teeth break up every foot of soil thoroughly. This renovator will rid your fields of weeds; it will quickly kill out crab grass and exterminate gophers. It is constructed on the lines of a disc harrow, the only difference being the spiked wheels. They are heavy castings, each having eighteen teeth, ⅝ inch square, cast solid in the wheels and extending 4½ inches out from the wheel. Gangs are independently operated by two levers conveniently located in front, always to easy reach of the driver. One gang may be shifted without any effect on the work of the other. Gangs and levers are connected by steel bars under a heavy adjustable yoke. This construction holds wheels in alignment and insures uniform depth of cut. Low hitch, no neck weight, draft direct on four bearings running in hard maple boiled in oil, and dustproof boxes. Oil cup on each bearing. Solid iron spools separate the wheels. Weight boxes are pressed steel made from single sheets. Nicely striped and finished. Prices include four-horse evener and neckyoke. Shipped from factory in Western Missouri.

$22.85 Without Check Rower.

Fully Covered by United States Patents.

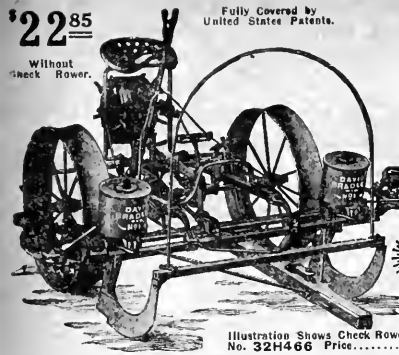

Illustration Shows Check Rower Planter. No. 32H466 Price.....$28.25

Adjustable for rows 3 feet 4 inches, 3 feet 6 inches, or 3 feet 8 inches apart. Can furnish check rower wire with buttons 3 feet, 3 feet 4 inches, 3 feet 6 inches, 3 feet 8 inches, 3 feet 10 inches, or 4 feet apart. When ordering state distance at which you wish the planter set and the distance between buttons on check rower wire.

At extra price quoted we furnish a steel fertilizer attachment which attaches to the rear frame between seed boxes and wheels. When used with check rower planter this attachment drops the fertilizer 2 inches to the rear of the hill and when used with the drill planter it drills the fertilizer continuously in the rows. The most approved method.

Prices are for complete planters, including pole, disc marker and arch for marker rope to pass over. Neckyoke and evener not furnished. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY No. 1 FLAT DROP FORCE DROP CORN PLANTE

TILTING SEED BOXES

A SURE DR NO SCATTER

David Bradley Planters Are the Only Force Drop Planters Made.

The plates deposit the corn into the boots, where it is held by valves until the check is made, then the plunger forces the lower valves open and deposits the corn in the furrow without scattering.

An absolutely reliable two-horse flat drop corn planter which we recommend to the farmer who does not make a ctice of carefully sorting and grading his seed corn. For use with all kinds and sizes of seed it cannot be excelled. oughly tried out and perfected through years of severest tests. You cannot buy a better planter at any price. It strong and rigid construction, yet light enough to be easily handled by any ordinary team. Simplicity of mechanism, of adjustment and uniformity of drop are its striking features. The frame is made of heavy square iron pipe; all nections are steel or malleable iron, a positive guarantee against breakage. The runners are larger and stronger found in ordinary planters. They are strongly connected and their depth can be regulated independ Seed boxes are hinged and tilt forward, making it an easy matter to change plates. Wheels are ste strong construction. The planter is regularly furnished with 30-inch wheels with concave tires, as show illustration. Will furnish with open wheels for 75 cents extra, and with 38-inch wheels for $1.75 extra other than the regular style of wheel is wanted, be sure to so order. An automatic axle clutch shifter the planting device when the front frame is raised, and when the frame is again lowered the sprocket wh automatically thrown in and the planting mechanism again operates. The planter fitted for drilling only does not have check rower and its attachments. It is furnished with four plates to drill one kernel of corn 12 14, 17 or 28 inches apart, and one blank plate. The Check Rower Planter is complete with 80 rods of wire, automatic reel, which distributes the wire evenly, so that it never catches in unwinding, anchor stakes, and seven plates, to drill one kernel of corn 12, 14, 17 or 28 inches apart, and to drop two, three and four small or medium kernels; and one blank plate, which can be drilled as desired. Special plates can be furnished if you will send samples of your seed. (See description of No. 15 Planter.)

No. 1 Check Rower Planter, with open tire wheels fertilizer attachment. The same style of fertilizer attach is also furnished for the No. 15 planter listed below.

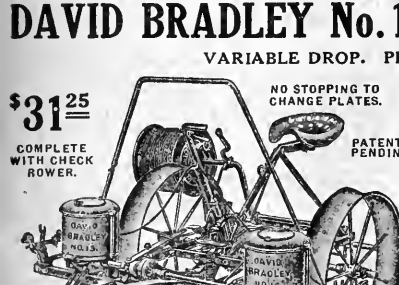
DAVID BRADLEY No. 15 Edge Drop Force Drop CORN PLANTE

VARIABLE DROP. PLANTS EITHER TWO OR THREE KERNELS TO THE HILL.

$31.25 COMPLETE WITH CHECK ROWER.

NO STOPPING TO CHANGE PLATES.

PATENTS PENDING.



Be sure to state width at which you want planter set and distance between buttons on check rower wire.

This is the most steadily accurate and reliable planter ever produced by any maker, and to the farmer who exercise care in selecting his seed, using nothing but corn of a uniform size and which has been well graded, we ommend it in preference to the flat drop planter. No edge drop plaoter will do good work with other than care graded seed. Butts and tips or large and small kernels cannot be handled together and unless you intend to use ing but carefully sorted and graded seed, we recommend that you buy our David Bradley No. 1 Flat Drop Pl No. 32H466, Illustrated and described above.

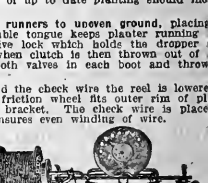
The greatest advantage of the No. 15 planter over all others is its wonderful accuracy. One kernel of corn time is arranged edgewise into the plate cells in the rim of the plate and is carried forward to the cut-off, with the assistance of a spring knocker, passes one kernel at a time to the valves in the boots which hold them the check is made at each second or third kernel, according to the wishes of the operator; then the plungers force lower valves open and the entire accumulation is dropped into the hill without scattering. Mud cannot clog up boots. Hopper tilts forward for changing or examining plates and is very large around, so as to take large pl which give more time for the corn to work down into the cells, assuring a perfect drop.

VARIABLE DROP. The strength of the soil varies in the different parts of every field, and seed should dropped accordingly. The variable drop feature of the No. 15 planter enables the ope to change the number of kernels to the hill while the planter is in motion by shifting a lever, which changes number of kernels dropped to either two or three kernels to the hill and without changing plates. We also furnish each planter a special plate for dropping four kernels to the hill. This method of up to date planting should ino your corn yield sufficiently the first year to pay for the plaoter.

THE FRONT FRAME is flexible and permits the self adjustment of runners to uneven ground, placing corn always at a uniform depth. The adjustable tongue keeps planter running no matter what height the team may be. The three-piece clutch has a positive lock which holds the dropper after it has made a revolution until corn is again dropped by the check wire, when clutch is then thrown out of No tools are needed to change from check drop to drill, simply fasten open both valves in each boot and throw the clutch stop with the small lever on under side of axle.

THE AUTOMATIC REEL is operated by friction. To wind or unwind the check wire the reel is lowere an easily reached foot lever, so that the friction wheel fits outer rim of pl wheel, which revolves it. An anchor stake is placed through the eye on seat bracket. The check wire is place the hook on end of anchor stake and the stake shifted back and forth, which insures even winding of wire.

PLATES. Regularly furnished with each check rower planter are a pair for small seeds, a pair for medium and a pair for large size kernels. In order to get good results the plates must fit the corn you are to plant. Should none of these plates fill your particular need, we can furnish, upon receipt of a sample of your corn, plates that will drop it accurately. Can furnish the following special plates for kaffir corn, shoe peg, yellow dent, popcorn and special plates for Maryland, Kentucky and Tennessee corn.



TOP VIE

WHEELS regularly furnished 30 inches high with concave tires, as shown in illustration, but we will furnish the planter with open tire wheels for 75 cents extra. If other than regular style wheels are wanted be sure to so order. Wheels and runners are adjustable for rows 3 feet 4 inches, 3 feet 6 inches, or 3 feet 8 inches apart. Can furnish check rower wire with buttons 3 feet, 3 feet 4 inches, 3 feet 6 inches, 3 feet 8 inches, 3 feet 10 inches, or 4 feet apart. When ordering state distance at which you wish the planter set and the distance between buttons on check rower wire.

FERTILIZER ATTACHMENT is furnished with this planter only when ordered extra. It is a profitable attachment to own and we recommend its use to every farmer. This attachment drops the fertilizer 2 inches to the rear of the hill, the most successful way. Hand drop is furnished only as an extra, as the foot drop shipped regularly is most generally used. Price is for the complete planter, including pole, disc marker and marker arch. Neckyoke and evener are not furnished. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY No. 1 CORN DRILL.

For simple and substantial construction this drill cannot be excelled. It is made entirely of the very best iron and steel and possesses more convenient features than any other drill of its class. It has the popular Bradley force feed drop, which insures positive work. It is furnished with three plates, dropping one kernel of corn 12, 14 or 16 inches apart, and a blank plate which may be drilled to plant cane seed, peas, beans or other seed. Holes in the plate are larger at the bottom than at the top. This prevents the corn lodging when being carried to the opening of the boot. A brush and metal cut-off are provided in the steel hopper; either can be used when wanted, change being made by the lever while machine is in motion; the same lever also throws the drill in and out of gear. Handles are flat steel with malleable band pieces. Shipped from the big David Bradley factory, Bradley, Ill.

$6.98

No. 32H460 No. 1 Corn Drill, Weight, 100 pounds. Price....$6.98

DAVID BRADLEY Nos. 2 AND 3 PRESSER WHEEL ONE-HORSE CORN DRILLS.

The most complete and satisfactory corn drill made. A high grade machi every respect. Meets all requirements. This machine has the celebrated Bradley r force feed dropping device, which is controlled by sprockets made to drop one kern corn 10, 15, 20 or 26 inches apart. We furnish four sprockets, two plates, suitable for dropping large or small corn and blank plate which can be drilled to plant peas, beans, cane or other seed. An opening in the boot enables the operator to see the corn at all times as it leaves the hopper. By means of a slip clutch the drill can be backed without throwing out of gear. The wide presser wheel is provided with a steel scraper. It properly covers every hill. No. 2 drill is shown in left hand illustration. The No. 3 drill is the same, except that it is provided with a fertilizer attachment. It sows any quantity of fertilizer desired. Machine is strongly made of the very best iron and steel. Handles are wood.

$22.50 DAVID BRADLEY NEW No. 12X RIDING COTTON AND CORN PLANTER.

This is a two-horse single row riding planter which furrows, plants and covers at one operation. It will plant cotton or corn in bedded or surface soil. It has Bradley's celebrated Champion force feed which is positive, cannot clog, and will not crack the seed. Distributes seed evenly in drills directly back of the opening shovels and it is at once covered with moist soil. Drop is set at all times in view of the operator. A slide in bottom of seed box regulates the amount of seed dropped. Plants cotton seed just as it comes from the gin. No preparation necessary. For corn planting we furnish two plates, to plant one kernel 17 or 26 inches apart, also one sorghum plate. The Bradley rotary force feed, the same as used in the Bradley No. 1 Corn Drill, is used. Has chain drive. Main sweep standard is adjustable forward and backward to give the middle marker the desired pitch. Planter is provided with two levers, one for regulating the depth of rear covering shovels and the other for raising or lowering the main standard by a movement of a hand lever in easy reach of operator. Planter is provided with two levers, one for regulating the depth of rear covering shovels and the other for raising or lowering the main standard by a movement of a hand lever in easy reach of operator. Planter is provided with two levers, one for regulating the depth of rear covering shovels and the other for raising and lowering the planter, the other for regulating the depth of rear covering shovels and the other for raising or lowering the main standard by a movement of a hand lever in easy reach of operator. Wheels are steel, 36 inches in diameter and are adjustable on heavy axles. Beam and frame are steel; hopper is steel and very large; middle breaker bottom is double steel with high natural temper, ground and polished. Quickly changed from a bottom to a corn planter by following directions which accompany the machine. Price is for planter complete with tongue, but does not include eveners and neckyoke. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H480 No. 12X Riding Cotton and Corn Planter. Wt., 485 lbs. Price...$22.50

DAVID BRADLEY No. 1 CHAMPION FORCE FEED COTTON PLANTER. $4.97

WOOD FRAME.

This machine has always been a great favorite throughout the cotton States. It has the celebrated Bradley Champion force feed which is positive, cannot clog, and does not injure the seed. Plants seed as it comes from the gin without previous preparation and distributes it evenly in the drill, no bunching whatever. Drop can be regulated to plant from 1 peck to 2 bushels of cotton seed per acre, and no plates are necessary. One man with one horse will plant from 7 to 8 acres a day and finish the work as he goes along. Seed is dropped directly back of the opening shovels and immediately covered with moist soil. We also furnish this machine with corn planting attachment, enabling one to plant either cotton or corn with the same machine. With the machine with corn planting attachment and you will have two machines in one for less than you will regularly pay for a cotton planter alone. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H455 No. 1 Cotton Planter only. Weight, 68 pounds. Price.....$4.97
No. 32H457 No. 1 Cotton Planter with Corn Planting Attachmeat. Weight, 87 pounds. Price.....$6.48

DAVID BRADLEY No. 2 TWO-WHEEL SULKY LISTER. $28.60

One of David Bradley's most successful products and positively the best machine of its kind made. The illustration gives a splendid idea of its construction. The 14-inch bottom is of the famous Garden City Clipper lister shape, made of the very best cast steel, scientifically hardened by David Bradley's own secret process. Moldboards where others fail. It is made with detached moldboards fastened together with a wrought iron frog well bolted and secured at each joint, a much stronger connection than is possible with a cast frog. The roller and seed spout can be operated, raised or lowered independently. The dropping mechanism is positive in its action and is driven by a gear attached to one of the wheels, thrown out of gear automatically when plow is raised by the lever. Three plates are furnished to drop one kernel of corn 12, 15 or 18 inches apart, also one blank plate which can be drilled to suit. The disc coverers are adjustable up and down and permit planting at various depths. Wheels are steel, 36 inches high. Three or four horses may be used.

For 75 cents extra we will furnish David Bradley's celebrated spring clevis with this machine. It reduces the force of any shock received by the plow striking fixed obstructions, and prevents breakage. Price is for the machine complete with coverers, one blank coulter, pole, four-horse evener and neckyoke. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H417 No. 2 Two-Wheel Sulky Lister. Weight, 425 pounds. Price..$28.60

DAVID BRADLEY No. 4 FOUR-WHEEL SULKY LISTER. $33.90

SPRING CLEVIS, 75 CENTS EXTRA.

All that is said of the David Bradley Two-Wheel Sulky Lister applies to this machine, and it has several other attractive features. It has adjustable pressure wheels at the rear and seat is placed where operator can see the corn drop. Keep tab on amount in the hopper and save many hills. Draft of team counterbalanced in front of machine. It is used with four horses, turns easily, will not tip over. When working, rear wheel standard is locked, preventing the plow from steadying and in hillside work holding the machine from tipping or working down hill. Raising plow with the lever automatically relieves pressure on wheels and stops drilling until plow is again lowered.

Rear wheels can be adjusted for wide or narrow tread, scrapers conform to adjustment of wheels. Front wheels are 36 inches high, rear wheels 18 inches. Large wheels can be set in or out on axle to tread 3 feet 4 inches or 3 feet 8 inches apart. The famous 14-inch Garden City Clipper lister bottom is furnished with this machine. More or less suction can be given the lever by shortening or lengthening connection between large and small bail, or front bail can be removed and machine used as a single-bail lister. The drill mechanism is chain driven. Otherwise it is practically the same as on the two-wheel sulky lister. Three plates furnished drop one kernel of corn 12, 14 or 10 inches apart and one blank plate which can be drilled to suit. Price is for the machine complete, with disc coverers, 14-inch coulter, pole, four-horse evener and neckyoke. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H419 No. 4 Four-Wheel Sulky Lister. Weight, 542 pounds. Price....$33.90
Extra share for No. 2 or No. 4 Sulky Lister (Bradley's No. 14-D.S.). Price.....2.58

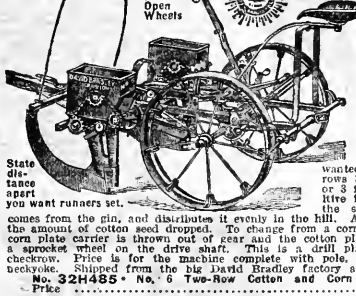
DAVID BRADLEY No. 3 CHAMPION COMBINED COTTON AND CORN PLANTER. $7.46

STEEL FRAME.

The only absolutely satisfactory combination cotton and corn planter made. It has the celebrated Bradley Champion force feed which has made David Bradley cotton planters the most successful of all. A slide in the bottom of cotton box regulates the amount of cotton seed dropped. Machine can be regulated to plant from 1 peck to 2 bushels of cotton seed to the acre. Cannot clog, does not injure or bunch the seed, and plants it as it comes from the gin, without any previous preparation. For planting corn, the same seed box is used and we furnish plates for drilling one kernel of corn 17 or 25 inches apart, and a blank plate which you can drill for small seed or grain to suit. The change from a cotton to a corn planter is quickly made. Shovel shanks have a reflection break, and a depth gauge runner is at the rear of each shovel. The machine is made of the very best iron and steel, excepting handles which are oak, well formed and securely attached to the frame. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H459 No. 3 Combined Cotton and Corn Planter. Weight, 83 pounds. Price.....$7.46

$27.95 DAVID BRADLEY No. 6 TWO-ROW CHAMPION COTTON AND CORN PLANTER.



38-inch Open Wheels

State distance apart you want runners set.

For many years this machine has been a great favorite among Southern planters. It is a two-row combination cotton and corn planter of the same general construction as the David Bradley No. 1 Corn Planter. Wheels are 38 inches in diameter, with 6-inch open tires. Seed boxes are steel. The corn plate carrier and cotton planting mechanism are contained in the same box. Four plates are furnished to drop one kernel of corn, 14, 17, 21 or 28 inches apart. Also one sorghum plate and one blank plate which can be drilled to plant other seeds as wanted. Frame is adjustable to plant rows 3 feet 4 inches, 3 feet 6 inches, or 3 feet 8 inches apart. It is a positive force feed, cannot clog or injure the seed. Plants cotton just as it comes from the gin, and distributes it evenly in the hill. A slide in bottom of box regulates the amount of cotton seed dropped. To change from a corn planter to a cotton planter, the corn plate carrier is thrown out of gear and the cotton planting mechanism connected with a sprocket wheel on the drive shaft. This is a drill planter only, never furnished with checkrow. Price is for the machine complete with pole, but does not include eveners or neckyoke. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H485 No. 6 Two-Row Cotton and Corn Planter. Weight, 410 pounds. Price.....$27.95

DAVID BRADLEY COMBINED LISTER AND DRILL.

Adjustable for Deep or Shallow Planting —Does Not Break Seed; Can't Clog

$16.95 COMPLETE

Shipped from the big David Bradley factory at Bradley, Ill.

A combination of three complete and practical tools in one. Can be used without the drill attachment and subsoiler for hilling up potatoes and similar work and is splendid for such purposes. Also used as a combined lister and drill, as shown in illustration, and as such constitutes the most perfect and efficient tool of its kind. By detaching drill parts from lister and attaching extra pair of wood handles and front gauge wheel parts you have a first class one-horse corn drill. Frequently the lister plow alone is used and followed with the corn drill. Ten or more acres per day have been planted in this manner, using three horses and two men. Price is for the complete combined lister, and drill consists of a steel beam single lister plow with 14-inch Garden City Clipper steel lister bottom. A drill attachment, the main shaft of which is propelled by fluted steel drive wheels with notched edges. A subsoiler attachment forms part of the equipment, and a pair of perfect working shovel coverers serve to replace earth after corn is dropped, also wooden handles and front gauge wheel attachment for separable one-horse corn drill. Three plates are furnished to drop one kernel 12, 14 or 19 inches apart; also a blank plate which can be drilled to suit small seeds. Lister plow handles are steel with malleable hand pieces.

No. 32H415 Combination Lister and Drill. Weight, 188 pounds. Price....$16.95
Extra share for above (Bradley's No. 14-6). Price.....2.48

DAVID BRADLEY COTTON AND CORN STALK CUTTERS. $18.95

STEEL DECK.

The highest grade stalk cutter made. Does perfect work under all conditions, and on account of its staunch construction will give long and satisfactory service. In fact, it will outlast two ordinary cutters. The diameter of the cylinder heads is larger than usually found in other cutters and as no center shaft runs through the cylinder, the cleaning space is great, and clogging next to impossible, even in heaviest work. The cylinder revolves easily and the blow which cuts the stalks is accelerated by two spiral springs which can be compressed or adjusted to suit the work. A lever operates the crank. When pushed back it forces down the rods around which the springs are coiled. This compresses the springs and gives a heavy or light stroke as required. When lever is thrown forward, frame and cylinder are raised from the ground. A ratchet holds lever in position to give downward pressure to cylinder, or to hold it from the ground when going to and from the field. Drag hooks raise automatically with the cylinder. They can also be raised by hand. Knives of the 6-knife cutter are 13 inches apart and on the 7-knife cutter, 11 inches apart. Wheels are steel, 36 inches high, strongly built, with 2-inch tires. Price includes pole, but not neckyoke or evener. Shipped from the big David Bradley factory at Bradley, Ill.

DAVID BRADLEY WOOD BEAM POTATO HILLER AND DIGGER.

$5.42

A practical hiller and digger and wing shovel plow combined. A splendid combination tool and one that every farmer or gardener should own. The variety of uses to which it can be put makes it one of the most useful and profitable implements you can buy. Has heavy oak beam and standard. Handles are well formed and braced. Equipped with adjustable gauge wheel and rear depth shoe. The adjustable wing shovel blade leaves the soil loose and destroys the weeds, providing perfect cultivation. The digger works perfectly, leaving the potatoes in excellent condition on top of the soil and runs as steadily as a plow. Either blade can be attached or detached easily. One of the very best potato tools on the market. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H428 Potato Hiller and Digger. Weight, 68 pounds. Price.....$5.42

DAVID BRADLEY SHAKER POTATO DIGGE

The most satisfactory walking potato digger made. It brings potatoes out clean and whole on top of the ground. The rolling weed fender parts the weeds and vines, leaving the way clear for the blade. Blade is solid hardened polished steel and will scour in any soil. It is flat in shape, 17 inches wide and 15 inches long. The rod platform which hinges to the blade is operated by a trip shaker wheel movement, which travels on the ground and gives an up and down shaking motion which shakes the dirt from the potatoes, cleaning them as they are dug. The rods on the shaker platform are malleable, 20 inches long and will not clog. Clevis is adjustable. Handles are first quality oak with adjustable braces. We furnish this digger with an adjustable double gauge wheel tr shown in illustration. The truck straddles the row and holds the digger at a uniform It is very desirable in hard ground. We recommend that you buy digger complete truck. Shipped from the big David Bradley factory at Bradley, Ill.

SCHOFIELD POTATO PLANTERS AND DIGGERS.

$19.85 Very Latest Model.

SEE THE NEW SPRING PRESSURE DEVICE.

The Schofield is the most reliable and satisfactory combination potato planter and digger on the market. These are the very latest models. They contain every modern improvement and are stronger, better and more perfect working than ever. The dropper is fed by hand, is automatic and insures more perfect work than can be done with a self drop planter. Axle is tubular and spindles can be set so the wheels will run any distance apart from 29 to 42 inches. Distance between the wheels determines the distance between rows, as one horse follows the last wheel track. The driver walks and consequently is better able to keep the horses on the wheel track. Will plant 13, 16 or 19 inches apart at any depth from 3 to 6 inches. When used as a digger the driver rides and has perfect control over both team and machine. The digger can be set to run any desired depth and will not run too deep or too shallow. The separator bars are of tempered steel, set edgewise. These machines are well known and are used in every section of the country. They have earned the reputation of being the only successful combined planter and digger made. We recommend that you buy the combined machine, for you get two perfect machines in one for the price usually paid for one, and it stands to reason that if you have use for one of the machines you will have use for the other. The machine is constructed entirely of steel and iron (except pole), is very substantial, cannot easily get out of order and with fair usage will last for years. Shipped from factory in Northern Illinois.

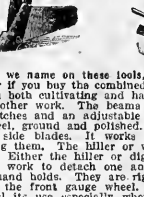
DAVID BRADLEY STEEL BEAM POTATO HILLERS AND DIGGERS.

$4.45 Without Front Wheel.

$4.70



At the low prices we name on these tools, either will pay for itself several times ov even a small patch, or if you buy the combined hiller and digger, you will have a combin tool that will serve in both cultivating and harvesting your potato crop and can also be as a shovel plow in other work. The beams are made of best forged steel with high to clear in trashy patches and an adjustable rear gauge wheel regulates the depth. B are made of finest steel, ground and polished. The digger blade has six round steel ro addition to the flat side blades. It works with light draft and throws potatoes ou ground without cutting them. The hiller or wing shovel blade has hinged wings, whic adjustable for width. Either the hiller or digger blade can be used on the same beam It is but a moment's work to detach one and replace it with the other. The handles steel with malleable hand holds. They are rigidly braced and adjustable for height. W not regularly furnish the front gauge wheel. If wanted, it must be ordered and paid extra. We recommend its use especially when the tool is used in hard ground. Buy combined hiller and digger, every farmer has need for both and the combination will as both and for less than you ordinarily pay for one. Shipped from the big David Bra factory at Bradley, Ill.

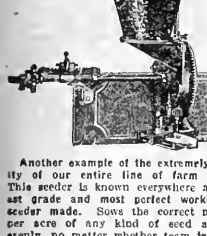
THE GENUINE DITTO FORCE FEED ENDGATE SEEDER.

$8.95



STATE WHETHER WANTED FOR WIDE OR NARROW TRACK WAGON.

Another example of the extremely high quality of our entire line of farm implements. This seeder is known everywhere as the highest grade and most perfect working endgate seeder made. Sows the correct measurement per acre of any kind of seed and sows it evenly, no matter whether team is driven fast or slow or over rough or smooth ground. Feed can be regulated to sow almost any desired quantity per acre from 15 to 40 feet width, depending upon kind of seed. Can be successfully used in much stronger winds than others, as the distributor is at the bottom of the endgate, distributing the cast near the ground, where the wind is the least liable to affect it. Can be set so that the seed will be delivered on only one side of the distributer, either right or left, enabling you to sow full or half width. No other seeder possesses this advantage. Furnished either with or without grass seed attachment, but recommend that seeder with grass seed attachment be ordered. Hopper is made of heavy galvanized sheet steel, unlike the flimsy, light weight hoppers on other seeders. Workmanship is of the highest class and every machine is tested before shipping. Price includes endgate, chain, sprocket wheel and clips for attaching to wagon wheel. State whether wanted for wide track or narrow track wagon. Shipped from factory in Northern Illinois.

DISC DRILL WITH FERTILIZER ATTACHMENT.

PLAIN HOE DRILL.

Used principally for sowing grain between rows of standing corn. They have the well known fluted feed and will sow any small grain, wheat, oats, flax, barley or peas in drills 7 inches apart, but are not suitable for sowing corn, cow peas or other large seed. The feed is driven by a chain from axle on front wheel and amount sown is indicated on a gauge, which can be changed with drill in motion. Drill is thrown out of gear by a hand lever at rear. Frame is seasoned hardwood strongly braced. Lighter than steel, always in line, and operator and one horse handle it easily. Handles have guards to protect knuckles from rubbing against corn stalks.

The Hoe Drills has adjustable frame which by a convenient lever can be adjusted from 31 to 40 inches in width, and while in motion. Hoes are 7 inches apart. Boots are hinged to frame and have wood break pins, making this the best drill for stony or sticky soil.

The Disc Drills have five high quality steel discs with hard chilled dustproof bearings, and runners have ample clearance, allowing discs to readily clean themselves. Oil tubes insure perfect lubrication. Outside discs are mounted on self adjusting wings, springs of which hold them out to cut extreme width. When they come in contact with corn rows they swing in and immediately return to natural position. Width of cut is 38 inches.

The Fertilizer Drills are the same as the plain drills, excepting that they have fertilizer attachment. The fertilizer feed can be regulated to sow all kinds of commercial fertilizer from 50 to 300 pounds per acre. It drills grain and fertilizer together through the same tubes and can be thrown in or out of gear independent of the grain feed. Revolving agitator keeps fertilizer from sticking to sides of hopper. Shipped from factory in Central Indiana.

E NEW BRADLEY WALKING CULTIVATOR.

$11.87

Of more simple and less expensive construction than the Highball Cultivator. Designed to meet the demand for a medium weight cultivator to be used with the lighter styles of gangs. It has many splendid features and gives the best of satisfaction.

The arch is cosslinouns and of solid steel, its ends forming the axles. It is fastened and braced to the pole, making a very strong and substantial frame. Tension can be quickly increased or decreased at the top of the lifting springs, while at the bottom the leverage can be

d to suit the gang in use. Action of these springs is perfect, no jerking as with an retched spiral spring, but an easy continuous lift that makes its use easy for even a boy.

epth of cultivation can be conveniently regulated by adjustment of the spring, by raising wering the front ends of the beams on the coupling sleeve and by setting the shovels. **Wheels are of steel, 30 inches high. Straight spokes and 1¼-inch flat tires.** Price r the cultivator complete with shovels, fenders, pole, baudles, hang up hooks, whiffletrees neckyoke. Illustration shows cultivator with No. 8½ four-shovel gangs. Shipped direct the big David Bradley factory at Bradley, Ill.

AVID BRADLEY COMBINED LAND ROLLER, PULVERIZER, CRUSHER AND PACKER.

atented.

$32.50 AND UP

For thorough preparation of seed bed and pulverizing and packing the soil about the roots of growing

s this machine is without an equal. The heavy cast iron discs turn independently 1½-inch steel shaft, which runs in hard wood boxes. Discs are 18 inches in diameter, hes wide and have crushing lugs, as shown in illustration. These catch and pulverize eclods instead of pushing them along. Run the smooth face of the lugs forward you have an ideal smoothing roller. Transfer the pole to other side and run in ite direction and the machine acts as a pulverizer and sub-surface packer. Works the down and leaves small loose ridges on the surface so rain can soak away. Instead arying a cruet to be harrowed, as do smooth rollers. For rolling young corn, wheat, r and meadow in the spring, preparing seed bed for wheat in the fall, and for use in ted hand and alfalfa culture, it is indispensable and will often pay for itself in a single s. 50-acre crop, because ground will hold moisture better and cause grain to germi- and mature earlier. Frame is heavy bar steel to which are attached end and center ers through which shaft runs. By removing some of the discs and using a pair of rs furnished, operator can shorten length of roller and straddle rows as desired. Price not include eveners and neckyoke. Shipped from Bradley, Ill.

DAVID BRADLEY HIGHBALL WALKING CULTIVATOR.

BALANCE FRAME.

$12.98 AND UP

Illustration shows Cultivator No. 32H627. Price.$14.33

The strongest and best walking cultivator made. On account of its large coil lifting springs it works as well with heavy as with light weight gangs and it stands up under the most difficult kind of work. It is strictly a balance frame cultivator. This is accomplished by giving the axle a sufficient rearward bend to set the wheels well to the rear, thus bringing them underneath the central balancing point.

The steel arch is in two sections, the top ends fitting a sleeve casting underneath the pole, permitting adjustment of distance between wheels of from 31 to 46 inches. The arch sections are amply strong and will not become loose or get out of position, and there is no danger of lifting spring raising gang from the ground, the method of attaching avoiding this difficulty. **Wheels are of steel,** 30 inches high with 2-inch flat tires, staggered spokes and dustproof oiltight hubs. The evener is a wood bar with pendant steel bars. Price is for the cultivator complete with shovels, fenders, pole, baudles, hang up hooks, whiffletrees and neckyoke. For illustration of gangs see following page. Shipped from factory, Bradley, Ill.

DAVID BRADLEY CRICKET LISTED CORN CULTIVATOR.

$9.58

For years this tool has been a great favorite throughout the listed corn country where thousands are in use. The discs are adjustable in or out on the arch to vary the distance from the corn. Inner discs are 10 inches; center discs, 11 inches, and outer discs, 12 inches in diameter; made of finely tempered polished steel. They are securely mounted on the axles and have chilled bearings of extreme hardness which insure splendid wearing qualities. The discs are controlled by a lever by which they can be easily raised to clear trash and at the end of rows. The

shields raise automatically with the discs. The arches are high enough to permit the working of corn of good height. This cultivator is strongly built of the best of materials, and light draft. Runners are wood, 3½ feet long and shod with heavy steel plates. This is positively the best tool of its class made. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H600 Cricket Listed Corn Cultivator. Weight., 197 pounds. Price.....$9.58

DAVID BRADLEY STEEL FRAME WEEDER AND SURFACE CULTIVATOR.

A wonderful improvement over the old style square or round tooth weeders, and a tool that is growing in popularity every year. The flat oval spring steel teeth possess greater elasticity than any other form; create a finer mulch and do not injure crops. The frame is made of heavy angle steel and is strongly braced. Weeder has thirty-nine teeth, held firmly by individual fastenings. Teeth can be removed as desired to straddle rows. Adapted for use in any soil. Shipped from the big David Bradley factory at Bradley, Ill.

Adjustable Handles and Shafts. Cuts 7½ Feet.

KENWOOD STEEL LAND ROLLERS.

OIL SOAKED HARDWOOD BOXES.

$16.75 AND UP

Illustration Shows Roller With Steel Heads.

The strongest and best rollers made. Drums are 24 inches in diameter, made of 12-gauge high carbon steel. Frame is made of heavy steel angles and arranged so that a bottom can be placed inside and the roller weighted as desired. Frame ends are heavy castings with lugs into which the steel hangers are securely bolted. Steel hangers are as stiff and rigid as any cast hanger, and are far stronger and also unbreakable. Drums turn independently on heavy steel shaft and shaft turns in the wooden boxes. **Boxes are oil soaked hardwood and will outwear any cast or steel box.** Draft is right at the hitch being under the tongue. Seat post is strongly braced. **We furnish these rollers with cast iron spider drum heads, or with pressed steel heads like a steam boiler.** We recommend the pressed steel heads as they are stronger and less liable to break than cast heads, and besides are lighter, thus saving a trifle in freight charges. You can weight the roller as desired by loading into the platform frame. Shipped from factory in Western Ohio.

David Bradley Little Jap Riding Cultivato

PRICES REDUCED

$20.75 AND UP

Another big saving to farmers; the result of increased demand and our successful operation of the big David Bradley factory.

PATENTED.

COMBINED RAISING AND BALANCING LEVER.

BALANCE FRAME.

IN STRAIGHT OR CROOI ROWS IT BEATS THE ALL. A WONDER AT HILLSIDE WORK.

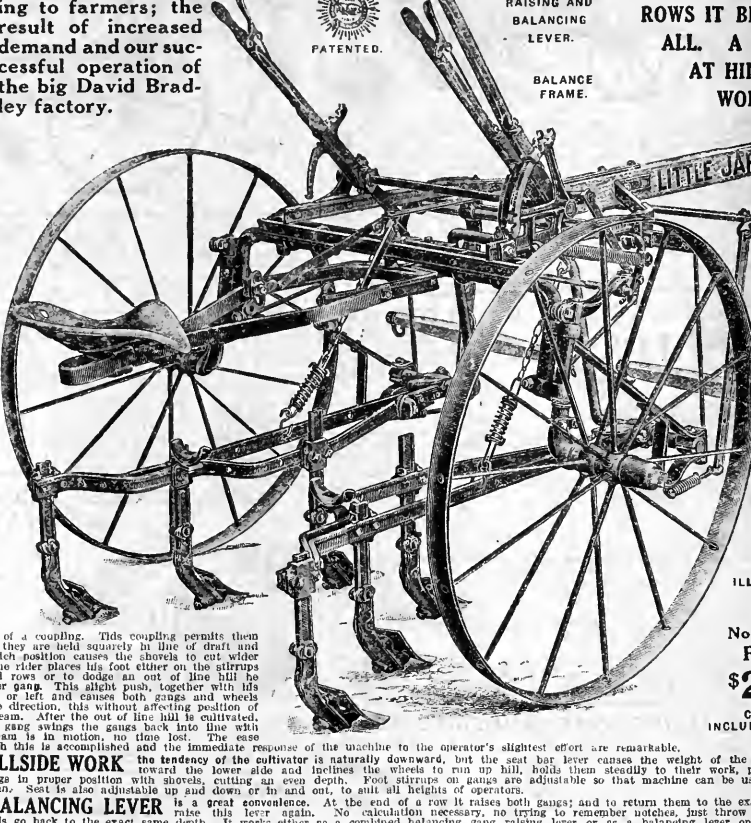

ILLUSTRATION SH CULTIVATOR.

No. 32H666
PRICE,
$21.75
COMPLETE, INCLUDING FENDERS.

MONEY CAN'T BUY ITS EQUAL is the verdict of every farmer who sees the Little Jap work. It accomplishes many things impossible with other cultivators; cultivates crooked rows as easily as straight ones, having the easiest dodge, the quickest dodge and farthest dodge of all. It saves nearly every out of line hill; almost no effort required of the driver and is so simple that any boy or girl old enough to drive can easily handle it. It does the best of work on hillside or in any kind of work and sends operator and team home fresh at night. There is no other cultivator made like it and it is just as superior to other cultivators as it is different. It has created a sensation everywhere. Farmers are enthusiastic over it and other manufacturers are doing their best to copy it, but without success, because the easy working, quick dodging features of the Little Jap are fully covered by United States patents and will be found in the Little Jap alone.

TRY THE LITTLE JAP AT OUR RISK, take it into the field and try it out under all conditions, favorable or unfavorable. Try it out alongside of any other cultivator made and if the Little Jap does not prove to your entire satisfaction that it is the strongest, simplest and best of all cultivators, return it to us at our expense and we will return to you every cent you paid for it, and freight charges.

THE SEAT BAR DODGING LEVER places the Little Jap in a class by itself. The axles are pivoted, working in malleable sockets which are part of the frame. They are connected with and operated by the seat bar, which is also pivoted and swings laterally. To the front end of the seat bar is connected the arch, to which the gangs are attached by means of a coupling. This coupling permits them to raise or lower at their rear end, and they are held squarely in line of draft and kept at right angles with the frame, which position causes the shovels to cut wider and do the best work. **TO OPERATE,** the rider places his foot either on the stirrups or on the gangs; and to follow crooked rows or to dodge an out of line hill he merely pushes with his foot against either gang. This slight push, together with his weight, shifts the seat bar to the right or left and causes both gangs and wheels to move at the same time in the opposite direction, this without affecting position of cultivator or changing the course of the team. After the out of line hill is cultivated, another slight push against the opposite gang swings the gangs back into line with the straight row; all done while the team is in motion, no time lost. The ease with which this is accomplished and the immediate response of the machine to the operator's slightest effort are remarkable.

GANGS FURNISHED ON BRADLEY CULTIVATORS

ON HILLSIDE WORK the tendency of the cultivator is naturally downward, but the seat bar lever causes the weight of the operator to gravi toward the lower side and inclines the wheels to run up hill, holds them steadily to their work, prevents drifting, keeps gangs in proper position with shovels, cutting an even depth. Foot stirrups on gangs are adjustable so that machine can be used either by a s boy or man. Seat is also adjustable up and down or in and out, to suit all heights of operators.

THE BALANCING LEVER is a great convenience. At the end of a row it raises both gangs; and to return them to the exact depth, you re raise this lever again. No calculation necessary, no trying to remember notches, just throw up the balance l and shovels go back to the exact same depth. It works either as a combined balancing gang raising lever or as a balancing lever only, leaving the o levers to raise and lower the gangs independently. When the gangs are lifted by the balancing lever the frame is balanced, pole does not rise up u horses' necks, and the arch is automatically locked so gangs cannot swing. **All levers are conveniently reached from the seat** and operate easily.

THE HITCH is the shortest in use on any cultivator and is always in direct line of draft, making the Little Jap not only easy on the r but also on the team. The draft of the team helps lift the gangs and the draft springs hold them in the ground, but the gangs guided independently of the horses.

THE BEST OF MATERIALS are used in the Little Jap Cultivator. All parts, except tongue and hitches, are steel and malleable i Every part designed for convenience, strength and service, and guaranteed to do absolutely satisfactory work all conditions of soil and in all classes of cultivating. Every detail of the machine has been thoroughly tested out and its construction proven absolu perfect. **Wheels** are made entirely of steel, 42 inches high, with 2½-inch tires and heavy staggered spokes. Hubs have long bearings fitted with dustp cups and are oilless. Distance between wheels is adjustable from 44 to 52 inches. Tires regularly furnished are concave, as shown in illustration, when so ordered we will furnish flat tires with half oval back. Shovels are finely tempered, soft center steel, carefully ground and polished. The Li Jap is finished in the standard David Bradley colors, bright red, yellow and black. Complete directions for putting together and operating accompany cultivators. These are hardly necessary, because the simplicity of the Little Jap is one of its striking features. It is prepared for shipment in such a mar as to make it an easy matter to put together, and its operation can be learned in half the time it would take to become familiar with the ordinary of riding cultivator. Illustration shows cultivator with No. 124 6-shovel gangs. **Prices are for the cultivators complete with pole, neckyoke, whiffletrees, ga shovels and fenders.** Shipped from the big David Bradley factory at Bradley, Ill.

REDUCED PRICES OF DAVID BRADLEY LITTLE JAP CULTIVATORS.

"THE LITTLE JAP IS FAR AHEAD OF ALL OTHERS."

R. F. D. No. 6, Box 2, Milford, Ill.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—My Little Jap Cultivator purchased from you is far ahead of any other cultivator I have ever seen. The seat bar guiding motion is the best thing out, and the advantage of being able to raise and lower the gangs with the balancing lever after having set them to exact depth with the raising levers makes it superior to all other makes. That is saying a good deal, but it's true. The good features of the Little Jap make me feel like striking out with it and working in fields along the road, so as to convince people of the superiority of the Little Jap over all other makes of cultivators.

Yours truly,
CHARLES TANSEL.

HIS FIFTEEN-YEAR OLD BOY RUNS IT.

R. F. D. No. 3, Beardstown, Ill.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The Little Jap Cultivator you shipped me came in good order. I must say that I never saw anything like it. My fifteen-year old boy handles it easily. I want another one just like it next year. I have tried it in sand, ou black ground and on hillsides. It works to perfection. Everybody I have showed my Little Jap to says they never saw anything like it. There are a lot of farmers around here who are going to buy one next year.

Yours truly,
W. F. BROWN.

THE GANGS illustrated on this pa show the many combin tions in which the Little Jap can be furnish There is no cultivator made upon which it possible to use such a great variety of gan On the following page we show the Little J as a disc cultivator, as a surface cultivator, as a spring tooth cultivator. If you order Little Jap Cultivator from this page, and addition order a pair or more of the extra gan listed with the Little Jap Cultivators on the fo lowing page, you have one cultivator which c be used for several different classes of wor Aside from the gangs, all Little Jap Cultivato are of the same construction.

9-INCH SURFACE BLADE AT TACHMENT.

NONE AS GOOD AT ANY PRICE.

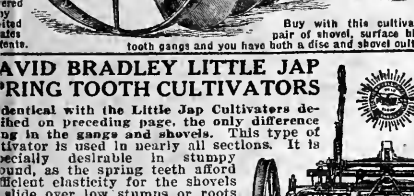
DAVID BRADLEY LITTLE JAP DISC CULTIVATORS

PIVOT AXLES. - SEAT BAR DODGING LEVER. BALANCE FRAME.

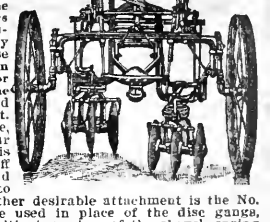
IPLETE WITH SCRAPERS, DERS, WHIFFLETREES AND NECKYOKE —

Aside from the gangs, this cultivator is of exactly the same construction as the Little Jap Shovel Cultivators described on previous page. It is the most easily handled and best working disc cultivator made and the only cultivator upon which it is possible to successfully use either disc or shovel gangs. It has a flexible arch, as shown in illustration, which permits either gang to work high places or to pass over obstructions without affecting the work of the other. Gangs are adjustable sideways to many angles and swivel in either direction so as to throw the dirt in or out.

We furnish, at extra prices quoted, blade, rake and rotary levelers to attach to the rear of the gangs. These level the soil after it is disced. We also furnish a barring off attachment for use in young corn and which also converts the cultivator into a perfect working disc harrow. Another desirable attachment is the No. 150 spring tooth gang, which can be used in place of the disc gangs, constituting a perfect spring tooth cultivator. Any of the shovel, spring tooth or surface gangs listed with Little Jap Cultivators on this or the preceding page, can be used on this cultivator by simply removing the disc gangs and bolting the others in place. Order a pair or more of extra gangs with the cultivator and you will have both a shovel and disc cultivator in one. Prices are for the cultivators complete with pole, neckyoke, whiffletrees, gauges, scrapers and fenders. Made with either 14 or 16-inch discs, but 14-inch discs are most generally preferred. Shipped from the big David Bradley factory at Bradley, Ill.



Buy with this cultivator an extra pair of shovel, surface blade or spring tooth gangs and you have both a disc and shovel cultivator in one.



Patented flexible arch.

WOULDN'T DO WITHOUT IT.

R. F. D. No. 2, Owaneco, Ill.

Gentlemen:—I have owned five other cultivators, but I think my Little Jap is the best all. I recommend it as the best and easiest handling cultivator made. It beats them all clean the weeds out of corn. The pivot axles and balance lever make it a model plow. I uld not exchange it for any other surface cultivator I ever saw; in fact, I would not do thout the Little Jap.

Yours truly,

JOSEPH MINKS.

DAVID BRADLEY LITTLE JAP SURFACE CULTIVATOR.

Of exactly the same construction as the Little Jap Shovel Cultivators described on previous page, excepting that it is furnished with gopher or surface blade gangs and with the flexible arch described above in connection with the Little Jap Disc Cultivator. Illustration shows gangs fitted with flat blades, but we can also furnish with concave blades. Blades are of very best steel, 3 inches wide and 20 inches long. We furnish at extra price quoted a pair of blade levelers to attach to rear of gangs. These level the soil after it is worked. If you select one of the Little Jap Shovel Cultivators from previous page or one of the Little Jap Disc Cultivators described above, and extra pair of No. 69 gangs, as listed below, you can make one machine serve the purpose of two by merely changing gangs. Prices are for the cultivators complete with pole, whiffletrees, neckyoke, gangs and fenders. Flat blade levelers and rake levelers listed above with Little Jap Disc Cultivators can be used with these cultivators. Shipped from the big David Bradley factory at Bradley, Ill.

FLEXIBLE GANG COUPLINGS.

DAVID BRADLEY SENTINEL BALANCE FRAME COMBINED RIDING AND WALKING CULTIVATORS.

To those who prefer a combined riding and walking cultivator, we cannot too strongly recommend the David Bradley Sentinel. It is a rigid and substantial balance frame cultivator which excels all other cultivators of this type in strength, convenience and ease of handling. It will stand up under the severest strain and never fails to satisfy where this style of cultivator is the choice of the user. Wheels are steel with staggered spokes; they are 42 inches high with 2½-inch concave tires and are fitted with dustproof, oilright bearings. Adjustable to a distance of 40 to 54 inches between the wheels. The open seat and frame allow a clear view of the row all the while. Seat is adjustable in and out and up and down, to suit operators of various heights, and when the operator wishes to walk, seat can be folded forward without obstructing view of row. Always well balanced whether operator is heavy or light weight. Every lever is effective and works freely. Illustration shows the Sentinel fitted with No. 123 4-shovel gangs. Prices are for the cultivators complete, including whiffletrees, pole, neckyoke, handles to attach to gangs, hobble or spreaders, and fenders. Shipped from the big David Bradley factory at Bradley, Ill.

SEE PRECEDING PAGE FOR ILLUSTRATIONS AND PRICES OF GANGS AND SHOVELS. WHEN YOU ORDER EXTRA GANGS FOR A BRADLEY CULTIVATOR WHICH YOU HAVE BE SURE TO TELL US NAME OF CULTIVATOR.

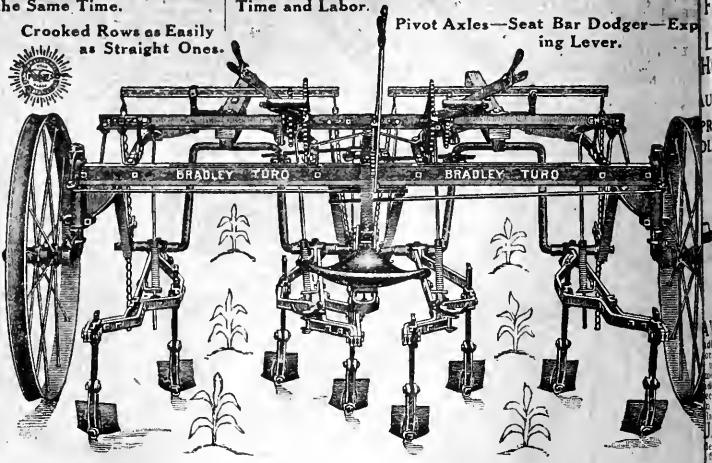
$41.00 David Bradley Tu-Ro Riding Cultivat

The Only Successful TWO-ROW Cultivator Made. Cultivates Two Rows at the Same Time.

A Great Economizer of Horse Flesh, Time and Labor.

Crooked Rows as Easily as Straight Ones.

Pivot Axles—Seat Bar Dodger—Exp ing Lever.



With one David Bradley Tu-Ro Riding Cultivator, one man or a boy and three horses can do the work of two single row cultivators, two drivers and four horses. This means a saving of one horse and the wages of one man. To the farmer whose crop is big enough for two single-row cultivators we recommend the Tu-Ro. It will pay for itself the first season.

The David Bradley Tu-Ro Cultivator is not only the simplest but it is the most practical and durable, and when once any man or boy becomes familiar with working the two rows at a time he will find it easier to operate than any other two-row cultivator made, and easier than many single row cultivators for that matter. We have yet to see the purchaser of a David Bradley Tu-Ro who would exchange it for any other single or double row cultivator made. Send us your order and test the Tu-Ro to your own satisfaction. We guarantee it to be all we claim or you may return it to us at our expense and we will gladly return your money, together with the freight charges you paid.

THE SEAT BAR DODGING FEATURE

and pivotal axle feature of the David Bradley Little Jap and Tu-Ro Cultivators are practically the same. In fact, both cultivators operate on the same principle. The Tu-Ro is simply the Little Jap in an enlarged form. With his feet on the gangs, in the loops or out, as he may prefer, the operator gives a slight push, just enough to start the side motion of the seat bar with the weight of his body, and the seat bar, being pivoted at its center and connected by means of steel straps with the malleable sockets which connect the pivot axles to the frame, also connected at the front end with the two arches, instantly shifts the gangs sideways to pass the out of line hill. This moves the wheels slightly out of their regular course as well as changes the position of the cultivators, but does not affect the travel of the team either as to gait or direction. When the out of line hill has been cultivated the operator straightens up and the seat bar is instantly swung again into line with the pole, the time consumed being scarcely noticeable. The Tu-Ro works as well on hillside cultivation as on level ground, no drifting, as the operator's weight gravitates to the lowest side of the cultivator and makes the wheels run uphill at the proper angle to keep the machine working right. No other two-row cultivator will do as good work on a side. The gangs are parallel at whatever position the cultivator works, and shovels always cut a uniform depth.

THE EXPANDING LEVER

regulates the distance between gangs for rows of varying distances. It is located directly in front of the driver's seat, both operators easily reached, and by moving it back and forth the distance between gangs can be increased or decreased, as desired. This is a splendid feature, and one you will not find on other two-row cultivators.

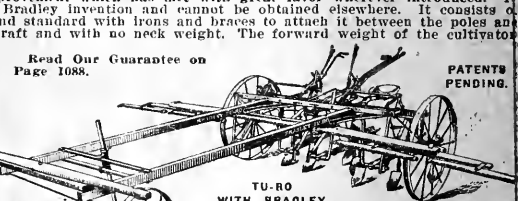
HITCHES.

Unless otherwise ordered, we furnish the Tu-Ro with three-horse hitch, as shown in illustration. In light soils three horses handle the machine with ease, but in difficult soils and particularly on large Western farms, four or five horses are generally used. The size of hitch you order depends upon the nature of your soil. **The five-horse hitch** is accomplished by adding a long draw bar with singletrees on each end. This fastens underneath the double tongue and brings another horse on each side of the three-horse hitch shown in illustration. **The four-horse hitch** is the same as the five-horse hitch, excepting that the center singletree of the three-horse hitch is not used.

OUR NEW BRADLEY FOUR-HORSE BALANCE HITCH

is an improvement which has met with great favor wherever introduced. It is purely a Bradley invention and cannot be obtained elsewhere. It consists of a 10½-foot evener with two-horse whiffletrees at each end, a steel caster wheel and standard with irons and braces to attach it between the poles and 7½-foot neckyoke. With this hitch the horses always pull by straight line of draft and with no neck weight. The forward weight of the cultivator and horse is entirely by the caster wheel, which also makes the machine work steadily and gangs are not affected by up and down motion of poles over rough ground. This type of hitch can be furnished only for four horses.

Read Our Guarantee on Page 1088.



TU-RO WITH BRADLEY 4-HORSE BALANCE HITCH.

THE TU-RO IS THE STRONGEST

and best built of all cultivators. It is made to stand up under the hardest kind of work and we guarantee every part of it to give the best of service. It is made throughout of the very best steel and malleable iron. We couldn't make it any better if we got double the price. Wheels are of steel, strongly made, 42 inches high, with staggered spokes and have 3-inch concave tires. They have dustproof, oillight, long distance bearings which will work through a season with but occasional lubrication. Illustration shows the cultivator fitted with No. 123 8-shovel gangs. **Prices are for the cultivators complete with shovels, fenders, double tongue, three-horse hitch and neckyoke.** Shipped from the big David Bradley factory at Bradley, Ill.

READ WHAT TU-RO USERS SAY.

R. F. D. No. 22, Burnetts Creek, Ind.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—Am glad to know you are handling David Bradley implements. The David Bradley Tu-Ro is not new to me. I bought one four years ago, the first one bought at this place. I want to say it is the best implement I ever bought and easiest operated. Yours truly,
WILLARD MILLION.

R. F. D. No. 1, Terril, Iowa.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—My David Bradley Tu-Ro Cultivator was a great surprise to me and my neighbors said there was not a better put up cultivator in this country. Everyone be interested in it. Mr. ———— says he is going to send you an order for a Tu-Ro just like mine. Yours truly,
HARRY GREENE.

Bridgeport, Ill.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—The Bradley Tu-Ro Cultivator I got from you last year is the best cultivator I ever saw, regardless of price or make, and I would not take $100.00 for it and do without it. Yours respectfully,
FELIX C. VANCE.

Tunnelton, Ind.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—The David Bradley Tu-Ro is a dandy. It is the only two-row I ever saw that will plow checked corn the crooked way. I plowed alongside of two one-row cultivators in the same field and did as much plowing as both of them, and just as easy on me and team. Three horses are all that are needed. Yours truly,
CHAS. E. ALLEN.

R. F. D. No. 4, Box 41, Marion, Iowa.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—Am well pleased with my Tu-Ro Cultivator. I plowed 8 acres the first half day, the first time over the corn, it does not cover up any more than a single row. I can always see both rows.
Truly yours, LEWIS WEIS.

Tuscola, Ill.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—I don't use anything but Bradley Tu-Ros. In fact, would not have a one-row cultivator on my farm. A man or fourteen-year old boy can do better work with the Tu-Ro than they can with a one-row, and do as much again. Some say you cannot raise as much corn with a two-row, but our one-row neighbors don't raise any more corn per acre than I do. In 1909 I raised 21,000 bushels of 360 acres and in 1910 I got 18,000 off 266 acres.
Respectfully, A. L. MARIS.

Tuscola, Ill.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—I have five David Bradley Tu-Ro Cultivators on my farm and can say they do better work with less work for the man than any double row plow we have ever seen. I purchased two of the plows from our local retail implement dealer and three of them from you since you purchased the David Bradley Implement factory, and find the ones you have made under your management not only to be of the same high grade quality, but you have made improvements on them.
Your Bradley four-horse balance hitch not only reduces the load to a great extent per horse, but does away with all neck weight, and its work with the Tu-Ro cultivator is perfect. Yours respectfully,
OSCAR T. MARIS.

Price.

$135.75 AND UP

Complete With Whipping Attachment and Lifting Jack.

Dealers Asked $200.00 to $250.00 for This Same Press.

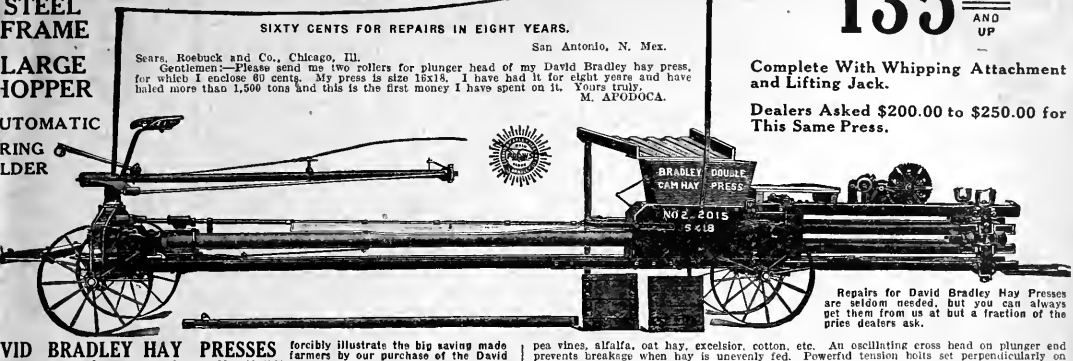
SIXTY CENTS FOR REPAIRS IN EIGHT YEARS.

Sears, Roebuck and Co., Chicago, Ill.

San Antonio, N. Mex.

Gentlemen:—Please send me two rollers for plunger head of my David Bradley hay press, for which I enclose 60 cents. My press is size 16x18. I have had it for eight years and have baled more than 1,500 tons and this is the first money I have spent on it. Yours truly,

M. APODOCA.



Repairs for David Bradley Hay Presses are seldom needed, but you can always get them from us at but a fraction of the price dealers ask.

VID BRADLEY HAY PRESSES forcibly illustrate the big saving made farmers by our purchase of the David

ley factory. Take, for example, the No. 32H930 press, which we list here at $135.75. to our purchase of the factory dealers paid $167.00 for this same press and sold it to ser at from $200.00 to $250.00. This is but one example of the money we save the er, and we effect for him a corresponding saving throughout, not only the line of David ley hay presses, but the entire line of David Bradley implements. We offer them all ct to the user for less than dealers paid. There is no better line of hay presses made h David Bradley presses and thousands of satisfied users throughout the world re there are none so good.

ARANTEE Our confidence in these presses is evidenced by the guarantee under which we sell them. We offer you a David Bradley press with the rstanding that you are to take it into your own field and try it out in any way you it. Try it alongside of any other press of its type made. No matter if the other press sell for from $100.00 to $150.00 more, and if after such trial you feel that you would r have the other press, or if the David Bradley press does not satisfy you in every way convince you that it is the best press for you to buy, send it back to us at our ose and we will return you the full price you paid us for it and also the money you for freight charges. We have sold hundreds of these presses on these liberal terms ng the past season and we have yet to hear from the first dissatisfied customer.

E EXTREME SIMPLICITY of the David Bradley double cam press places it in a class by itself. It is strongly made,

ely of steel. Working parts consist of but a plunger, a double cam, and plunger draw-chains or cogs, nothing to break, and repairs seldom necessary. Takes two feeds to round. Team travels in continuous circle. One horse can operate it and it is very work for two. Automatic plunger draw is operated by the cam and is positive. ver rebounds quickly and comes up slow, allowing plenty of time to place large feeds. s perfectly under all conditions regardless of expansive force in material pressed and utomatic spring folder makes a smooth bale. Bales hay, straw, hair, shredded fodder, pea vines, alfalfa, oat hay, excelsior, cotton, etc. An oscillating cross head on plunger end prevents breakage when hay is unevenly fed. Powerful tension bolts set perpendicularly on side of bale chamber. They conform to compression on top and bottom and prevent bulging at sides. Follower boards are reinforced by steel strips on one side, as shown in illustration. It is a low down press, easily fed and convenient for tying the bale. An alarm bell automatically rings as a signal for placing the follower board and can be set for any desired length of bale. The press lies perfectly flat when wheels are removed.

THE WHIPPING ATTACHMENT enables the feeder to whip up the team at any point in the circle and often saves expense of a driver. The Lifting Jack is simple and powerful. With it one man can lift or lower the press. Having a worm gear, you can't let the press fall.

Wheels are steel, 30 inches high, 4-inch tires. Press can be drawn by two horses on ordinary roads. Price is for the press complete with trucks, lifting jack, two bridges, three follower boards, whipping attachment, gvener, neckyoke, tongue, feeding fork and wrenches.

CAPACITY of the 14x18-inch press is 8 to 10 tons; 16x18-inch press, 10 to 12 tons; 17x22-inch press, 12 to 14 tons of hay per day, depending on kind of hay and skill of operators. Shipped from the big David Bradley factory at Bradley, Ill.

No. 32H930 Double Cam Hay Press, with 14x18-inch bale chamber. Weight, 2,975 pounds. Price.....$135.75

No. 32H931 Double Cam Hay Press, with 16x18-inch bale chamber. Weight, 3,015 pounds. Price.....$143.50

No. 32H932 Double Cam Hay Press, with 17x22-inch bale chamber. Weight, 3,250 pounds. Price.....$152.25

No. 32H943 Tie Making Machine for making bale ties for any press. Weight, 45 pounds. Price.....$3.70

No. 32H945 Extra Following Boards or Blocks. (Will fit any Bradley press of corresponding size.) Price, 14x18-inch size, 96c; 16x18-inch size, $1.05; 17x22-inch size, $1.17.

DAVID BRADLEY ONE-HORSE FULL CIRCLE HAY PRESS

Just the press thousands of farmers have been waiting for. A high quality one-horse, man press of good capacity which, at a very low price, perfectly meets the requirements of the individual farmer who does not wish to do custom work and has only a limited amount of baling of his own to do. This press is not intended to take the place of our larger all steel full circle presses where a large amount of baling is to be done, but for the average farmer's requirements the one-horse press will serve every purpose and will do his day pay for itself in the saving of straw, fodder and other odds and ends which would otherwise be wasted.

$62.50 COMPLETE WITH LIFTING JACK.

This press is constructed and operates on the same principles as our two-horse all steel full circle press, but framework is of wood, strongly bolted together. Plunger is wood, steel faced, is operated by a double cam with roller bearings and makes two strokes to every third of the horse. Plunger head pivots at end of beam, allowing plunger to work squarely in the bale chamber without side strain. Plunger rebounds quickly, but comes up slow enough to allow plenty of time for placing a large feed. Rebound spring assists action of plunger and insures perfect work when baling damp material. An automatic folder makes smooth bales. Tension is regulated by a hand screw crank within easy reach of feeder. Hopper is 36 inches square. Baling chamber is 6 feet long. Total length of press, 19 feet. Press is mounted on strong steel wheels and axles. Wheels are 26 inches high with 3-inch tires. Capacity depends on operator's ability to keep the horse moving and a good size feed for every 3 strokes of the plunger. With a little experience a good operator should be able to bale with the 14x18-inch press from 3 to 7 tons and with the 16x18-inch press from 6 to 10 tons per day. Can make bales weighing up to 100 pounds, depending upon kind of material and size of horse.

Price is for press complete with trucks, lifting jack, feed fork, wrench, feed table, hay hook, combination pole and shafts, singletree and two follower blocks. Shipped from the big David Bradley factory at Bradley, Ill.

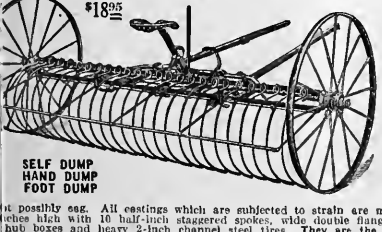
No. 32H950 One-Horse Hay Press with 14x18-inch bale chamber. Weight, 1,165 pounds. Price.....$62.50

No. 32H952 One-Horse Hay Press with 16x18-inch bale chamber. Weight, 1,175 pounds. Price.....$67.50

DAVID BRADLEY ENGINE POWER HAY PRESSES.

We also manufacture David Bradley Engine Power Presses. These are fully described in our Special Hay Press Circular which we will mail free upon request. These are the same fine big shippers use. Capacity, 25 to 35 tons of hay per day. Our prices range from $284.50 up. Dealers sold at from $400.00 to $500.00. You cannot buy a better engine power press than the David Bradley. Send for our descriptive circular and learn all about our liberal proposition. Write for our price list of bale ties.

AVID BRADLEY ALL STEEL SELF DUMP RAKE.



$18.95

SELF DUMP
HAND DUMP
FOOT DUMP

A fine example of David Bradley quality. The strongest and easiest working hay rake ever built. Will do perfect work in either heavy, light or tangled hay, alfalfa or clover, and will do as good work in cornstalks as any rake on the market. The head, axle, cleaner head and platform are high carbon steel. The head is strengthened with a truss rod so that head

it possibly can. All castings which are subjected to strain are malleable. Wheels are inches high with 10 half-inch staggered spokes, wide double flanged hubs with removable hub boxes and heavy 1-inch channel steel tires. They are the strongest rake wheels Hitchets are protected by dump shields, preventing hay from catching and binding. are high carbon spring steel tempered in oil, and are fastened to rake head with tooth holders. Teeth cannot work loose. Cleaner is steel and so constructed as to be flexible or rigid as desired. Large comfortable seat has strong but easy seat spring.

These are the easiest dumping hay rakes made. The driver simply presses the foot lever causes the dump rod to drop the dogs into the ratchet, and the forward movement of wheels dumps the hay, the wheels doing all the work. The teeth return to the ground ptly, easily and without jar. Can also be used as a hand dump rake. The 8-foot rake wenty-one teeth; the 10-foot rake has twenty-six teeth. Rakes have combination wood and thills so that either one or two horses can be used. Shipped from the big David ey factory at Bradley, Ill.

No. 32H1202 8-Foot Self Dump Rake. Weight, 420 pounds. Price.....$18.95

No. 32H1203 10-Foot Self Dump Rake. Weight, 460 pounds. Price..... 21.00

KENWOOD IMPROVED HAY LOADER.

$43.50

The Most Successful Loader on the Market.

Made by old and experienced manufacturers who in this machine have produced one of the simplest and most efficient loaders made. Loads from the swath all kinds of hay except very heavy marsh hay or very short hay, and does good work on short hay if raked into light windrows. Rakes a swath 8 feet wide. Operated with a crank shaft driven direct from the sprockets, which are attached to the wheels. Attached to the crank shaft are fork or rake arms, at the lower end of which rakes, each with six tines, are attached. Along the under side of the arms there are small carrying forks which carry the hay to the top, from which it is delivered to the wagon. Levers attached to each end of the crank shaft raise and lower the rake arms so that they may be operated at any desired height. Wheels are wood with iron hubs and have steel tires with projections which assure positive motion. Easy to set up and operate, and guaranteed to give satisfaction under all reasonable conditions. Shipped from factory in Southeastern Wisconsin.

No. 32H1215 Hay Loader. Weight, 800 pounds. Price.....$43.50

KENWOOD WHEELBARROW GRASS SEEDER.

$4.88

FAVORITES IN ALFALFA COUNTRY.

For sowing small seeds broadcast. Made with hoppers 12, 14 or 16 feet long. Runs easily and sows evenly, even in windy weather. The wheel governs the feed and the index plate and the speed of operator govern the quantity sown. Have iron wheel and force feed which can be accurately adjusted. Instantly thrown out of gear by lifting a rod from the index plate. Does not injure or bunch the seed. The single hopper seeder is for sowing smooth seeds only, such as clover, timothy, alfalfa, millet, flax, etc. The double hopper seeder will sow all kinds of smooth seeds and also light or chaffy seeds, such as red top, orchard grass, blue grass, etc. Weight, from 45 to 65 pounds, according to size. Shipped from factory in Southern Michigan.

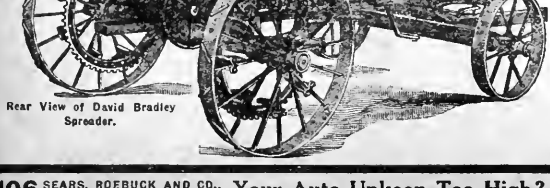
Light Draft. Two Horses Do the Work of Three

THE DAVID BRADLEY SPREADER is made by the most expert designers and manufacturers of farm implements in America. Such an experienced organization of implement specialists can be found in no other factory. Experience brings success and the excellence of the Bradley Spreader is possible only by reason of the eighty years' experience of the Bradley factory. No other factory can lay claim to such a proud record. No other factory possesses so complete a knowledge of the materials and other qualifications necessary to a perfect spreader, and for this reason the high quality of the Bradley Spreader is impossible with less experienced manufacturers. You take no chances when you buy a David Bradley. There is not a single feature about it which is in any way experimental. From start to finish it is a demonstrated success and so pronounced, not only by the most competent implement builders in America, but by the thousands of farmers who are using them to their great profit and satisfaction.

FOR HIGH QUALITY, dependable construction, simplicity, ease and convenience of handling, and for all around satisfactory working qualities, no manure spreader of any make or price can excel the David Bradley. It is the **one best** spreader for any farmer to buy. It is the machine which pays for itself the quickest and costs the least to keep. With it two horses do the work of three and a boy in the seat does the work for which other spreaders require a man, and does it better. The David Bradley Spreader is truly a 20th century economizer. It saves time, labor, money and horse flesh. It is the spreader which will serve you faithfully day in and day out, rain or shine, winter or summer, over rough ground or smooth, and always do uniform and satisfactory work with any kind of manure. It not only does the work quicker and better, but unlike the heavy, cumbersome, complicated machines, it is easy to load and hitch on a light team and do your spreading every day, preserving and utilizing all the valuable fertilizing properties of the manure before the sun and rain drains the stack.

FEATURES OF EXCELLENCE not found in any other are embodied in the David Bradley Spreader, and so positive are we of its superiority that we place our unlimited guarantee on every machine. This we could not do did we not know that it was absolutely the best. Nor could we afford to send it to you to use, test and try under any and all conditions, with the understanding that it must prove to be the strongest, best spreading, nicest handling and easiest draft of all spreaders, regardless of cost, or you may send it back to us at our expense and we will return the money you paid for it and freight charges. Since our purchase of the Big Bradley factory, we have sold thousands under this same broad, sweeping guarantee and as evidence of the satisfaction the machines have given, we refer you to the letters printed herewith. We have scores of others which we will be glad to send you if you will write for our Booklet of David Bradley Manure Spreader Testimonials.



Rear View of David Bradley Spreader.

HIGH QUALITY MATERIALS AND CONSTRUCTION.

The working parts, in fact, every part of the Bradley Spreader which could be subje to strain or breakage, is made from high grade malleable iron (iron which has be annealed so it will not break.) This construction costs about twice as much as the comm cast iron used by ordinary spreader manufacturers, and while perhaps cast iron wou serve the purpose under ordinary conditions, our aim is to make the Bradley an everlasti machine, one which will serve the user without delay through breakage, cause him expense for repairs and at all times safely carry the unlimited guarantee we place upon To insure this we use only the best materials obtainable, regardless of their cost, and th wisdom of our policy is reflected in the expression of satisfaction we daily receive fro Bradley users.

The box of the David Bradley Spreader is strongly made of first quality smooth dresse yellow pine, carefully selected and seasoned for months before using. The top edges of t box are protected by heavy strips of iron so they cannot become split or splintered by knoc from fork or shovel. The box bottom is made watertight so that the liquid part of th manure is preserved and carried to the field instead of being allowed to leak out alo the way. This saving of the most valuable quality of the fertilizer will more than pay f the machine itself within a short time on even a farm of moderate size.

SIMPLICITY.

This feature has played an important part in the success of the David Bradley Spreade Its mechaqism has the fewest parts of any spreader, yet it is by far the most accurate a effective. The machine is absolutely free from complication. The most inexperienced c master its operation in half the time it would take an expert to become familiar with a ordinary spreader, and a boy can handle the machine as safely and easily as can a man.

LIGHT DRAFT.

To the farmer who has had experience with the hard pulling, cumbersome three or fou horse spreaders, the David Bradley is a revelation. The advantage of being able to opera the machine with a light team in almost any kind of work appeals to all, and the unex prising farmer has but to witness the operation of a two-horse Bradley to be convinced its desirability over all others.

READ WHAT BRADLEY USERS SAY.

Dido, Va.

Sears, Roebuck and Co., Chicago, Ill.
Dear Sirs:—I have given my David Bradley Manure Spreader a fair test. I have nev had anything please me as much in the shape of machinery. I was in the market for t years and corresponded with a good many spreader companies. I saw your advertiseme in the Breeders' Gazette but doubted it because your price was so low. A friend visiti me advised me to buy the Bradley, as he had had two years' experience with the highe priced spreader made, but he liked yours very much better. Two 900-pound horses or mul will work it perfectly. I would not give it up for any other spreader made that I ha ever seen, and no amount of money would take it off my farm and make me sign a co tract for one like another. My friend's spreader costs $48.00 more than mine. I have se it work and it does not compare with mine. The David Bradley has less machinery and the simplest I have ever seen. No farmer who ever bought and tried one would be witho it if he kept more than four horses and four cows.
Yours, respectfully,
JAMES A. ARNOLD.

Fayette, Iowa.

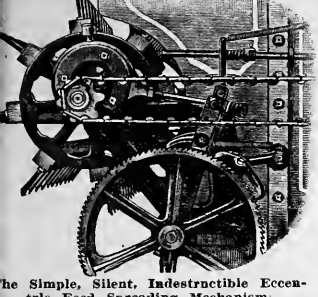
Sears, Roebuck and Co., Chicago, Ill
Dear Sirs:—I received the Bradley Manure Spreader, got it set up and it works a O. K. The spreader is fully all you claim and I would not be without it as it is the be machine I've got on the farm. I like it because there's no gears to wear out or any box to cut out. I only need one team to handle it. It runs easy and handles any kind manure, wet or dry, light or heavy, coarse or fine, and it's built good and stout. I ha seen lots of other makes of spreaders, but I like yours the best. Not only this, but I sav $20.00, and will do all I can for you.
Yours very truly,
JOSEPH RAU.

Mallard, Ill.

Sears, Roebuck and Co., Chicago, Ill.
Dear Sirs:—Your $69.50 Bradley Manure Spreader at hand all right, nothing los nothing broken. Put up and tried and works like a charm.
Yours, truly,
O. F. JENIFER.

ESCRIPTION OF THE DAVID BRADLEY SPREADER

rfect Spreading, Easy Handling, Long Wear Guaranteed. No Better Spreader at Any Price.



The Simple, Silent, Indestructible Eccentric Feed Spreading Mechanism.

In reading the following description of the David Bradley Spreader note the exceptionally high quality of material used throughout. The simplicity of its construction and operation, the absolute freedom from complication, which practically does away with all danger of breakage, protecting the user against delays and expense of repairs. You can safely trust the operation of a David Bradley Spreader to the most inexperienced farm hand or to any boy old enough to drive.

BODY. The stanchest construction to stand hard use. The bottom is built on two heavy hard pine sills running full length of box, held together by four hard pine girts mortised into them. In addition two

l angles run the entire length of sills for reinforcement. The frame is olid that hardly any collision could affect it. The box is 10 feet long ls higher at the front than rear, which helps the feed and greatly tens draft. Sides are carefully graded smooth lumber and reach 17 ies above upper surface of box bottom. They are bolted firmly to box eight posts, which are bolted to the sides. **Extra strength** is given s by a heavy iron brace bolted to middle of each side and the extended s of center girt. It positively prevents bulging. The box is 2 inches er at the beater end than at the front. This taper nits load to travel back freely without binding.

edges of sides are iron bonnd to protect from cks of fork or shovel.

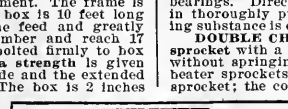
The most approved type of steel implement seat, ny and comfortable, is mounted on a spring standwhich folds down forward when loading. The t board is reinforced to sustain the driver's weight. footboards are simply strong foot any weight, supted by double irons.

BOTTOM. This is made of matched flooring for e reasons: It makes it very strong, it forms a oth surface not susceptible to wear and splintering, it makes a **watertight box.** It is a great advantage preserve the liquid part of the lond and get it on field.

be lengthened out in case you wish to use truck for some other purpe requiring long wheel base. Wheels are practically unbreakable; it 28 inches and rear 40 inches diameter. Tires ⅝ inch thick and 4 nes wide. **Permanent mud lugs** or traction cleats are riveted to rear eels, insuring positive traction. The bearings are 11 inches long, hubs remely heavy cast, and the wide oval spokes are let into and upset in s. Front and rear wheels track; don't necessary tracks in r field. The wood wheel truck is substantially the same as the steel el truck, excepting that it has 30-inch front and 42-inch rear wood eels, and mud lugs are clamped on instead of riveted.

ALL STEEL APRON. An endless apron of steel; not a piece of wood it. No "follower board," no "force feed," nothing to set or adjust, hing needed to help it out, because it is correct in principle. It is made wo endless malleable chains connected at short intervals by steel angle ss pieces which pull the load toward the beater evenly. When the beater has gone through the last of the load the box bottom is cleared of all manure. Holding apron snugly on bottom are front and rear steel shafts with four sprockets over which chains travel. **Chains are protected** when running under box bottom by steel angles. Apron is easily adjusted by turning bolts in the heavy corner castings at front of box. Consult illustration for this feature. Note the big solid casting bolted to front post and distributing pull of apron; on other spreaders this strain is usually permitted to fall on one sawed out spot in box side. Note also the steel angles, heavy chain and matched, tongued and grooved box bottom boards.

nt Corner of Box.



Bottom of David Bradley Spreader. Showing endless steel apron, and angle steel protecting tracks underneath. Note the watertight floor and heavy side sills.

ECCENTRIC FEED. This feature has put the David Bradley Spreader in a distinct class. It simply wipes out feed troubles. When set in motion by the hand lever, the beater shaft turns the heavy malleable eccentric which pulls the pawl against the large ratchet wheel, causing it to advance the apron. It gives it a barely perceptible movement or pulls it along several inches, spreading from a thin dressing up to a heavy coat of manure, as operator wishes. The stop pawl prevents apron "edging back" any of the distance gained. That is all there is to the feed mechanism. It is simplicity itself, and yet it distributes far more uniformly than complicated devices. It works the same up or down hill, on rough ground or smooth. It cannot feed unless beater is revolving. No cramming load against an idle beater by forgetting feed lever. Set it once and pay no further attention to it.

Positive Chain Lock.

BEATER. Here is the "business" part of a spreader. We have made it the strongest we know how. Eight oak crossbars are bolted into heavy **malleable** spiders. **Steel** teeth, ⅝ inch round and shear pointed, are set into these oak cross pieces, which are cross riveted to prevent splitting. Teeth do not track, but are so arranged that every bit of manure must be torn to shreds as it passes between them. Beater revolves in high carbon bearings. Directly above is suspended a **spring trip rake,** which assists in thoroughly pulverizing manure. It automatically trips if any unyielding substance is encountered and permits it to pass without injury to beater.

DOUBLE CHAIN DRIVE. Each rear wheel carries a large, heavy iron sprocket with a 1½-inch flange to enable it to be drawn up tight to wheels without springing. Over these run No. 62 malleable drive chains, between beater sprockets and wheel sprockets. Idlers engage seven teeth of each large sprocket; the construction of ordinary spreaders allows but three teeth to pull. Beater sprockets are not fast to shaft, but are held in mesh with the **equalizer clutches** which are tight on shaft. Consult illustration of this important detail. This prevents any strain when one wheel revolves faster than another, as in turning a corner. It also permits backing spreader in gear, as the clutches simply disengage from the sprockets. These clutches, like the idler arms, are adjustable in and out.

POSITIVE CHAIN LOCK. An exclusive David Bradley feature; its importance cannot be overestimated. It makes chain troubles **impossible.** Study the illustration and you will see why. When the control lever engages drive chains the heavy malleable idler arms are automatically followed down by wrought iron lock arms that bear **directly on a dead center,** completely preventing those arms rising up. The shaft holding idler arms is steel and 1¼ inches square, on which arms are **adjustable** in and out to insure perfect chain and sprocket alignment. The chains cannot lift the arms; no sudden jolt can move them; they are positively **locked** into position. This prevents sprockets skipping a single link of either chain; the chains cannot jump the sprockets. It takes the strain off lever, rod and rack. Contrast it with the drives in which the tightness of the chain depends upon a long springy rod. Control levers, well formed of iron, nicely finished and having grip latches on each, are conveniently located for the driver. The spreading lever, being used to **engage** the drive chains and not to **hold** them in gear, is very easily thrown in and out. The rack has several notches so that just the proper set is possible. The feed lever has four different positions in feed; the first will spread a barely noticeable coat, and from that up to a heavy 2 or 3-inch coat is possible. The idler arm levers are adjusted by three holes. This provides a simple, quick means of adjustment if chain slack needs taking up. No need of shortening chains. Either lever on a David Bradley Spreader may be thrown in or out of gear with team on the go; no delicate parts to break.

GREASE CUPS. In several places we have supplanted oil holes with large grease cups. They require but occasional filling and insure perfect lubrication, whereas an oil hole takes but a limited supply of oil and by filling up with foreign substances is often neglected.

CAPACITY. We plainly state the capacity of each David Bradley Spreader and assure the purchaser that he can load as much or more ordinary manure as stated. As a matter of fact, our 55-bushel box will hold as much as many so called 60-bushel machines of other makes and our 65-bushel box as much as many 70-bushel machines.

FINISH. The standard Bradley colors, red, yellow and black, make the David Bradley handsome in appearance. The body is red with yellow striping, gear yellow, and iron parts black. **Three coats** are used: Primer, the best wagon red, varnish and stripe.

Equalizer Clutch and Sprocket.

$42.50 DAVID BRADLEY MANURE SPREADER BOX $47.50

55-BUSHEL SIZE. **CAN BE USED ON ANY ORDINARY FARM TRUCK.** **65-BUSHEL SIZE.**

If you wish to purchase a spreader box for use on a truck you already have, you cannot e a better selection than the David Bradley Spreader Box. It is exactly the same as that ished on our complete spreaders. The price for the spreader box includes everything ssary to make a complete David Bradley Spreader except the truck. Drive chains, kets, clamps and everything necessary to attach are included.

It will fit any ordinary farm truck you may have, wide or narrow track, wood or steel els. You run no risk as to perfect fit because of its complete **adjustability.** The clamp ns are formed so that sprockets may be held out the proper distance from spokes ther flat or dished wheels. Idler arms are adjustable in or out on shaft, and beater shaft sprockets are similarly adjustable. Thus a **perfect** alignment is always possible; chain, idler, drive sprocket and beater sprocket all in a straight line.

We recommend purchasing complete spreader with truck, as it costs little if any more than others ask for just a box, and then you have the best spreader always ready for use. However, the David Bradley Spreader Box mounted on any truck you have on hand will make you a spreader you could scarcely tell from a complete David Bradley. The David Bradley Manure Spreader Box is covered by the same liberal binding guarantee as our complete David Bradley Spreader. See description above.

PRICES OF DAVID BRADLEY SPREADERS

Shipped From the Big David Bradley Factory at Bradley, Ill.

o. 32H802 55-Bushel David Bradley Manure Spreader, plete with Steel Wheel Truck. Box is 10 feet long, 17 es deep and 38 inches wide, inside measurements. Width ruck is 4 feet 8 inches from center to center of tires. ht, 1,495 pounds. Price.....$69.50

o. 32H803 65-Bushel David Bradley Manure Spreader, plete with Steel Wheel Truck. Box is 10 feet long, 17 es deep and 40 inches wide, inside measurements. Width, ruck is 5 feet 3 inches from center to center of tires. ht, 1,535 pounds. Price.....$74.50

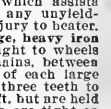
o. 32H805 55-Bushel David Bradley Manure Spreader, plete with Wood Wheel Truck. Box is 10 feet long, 17 es deep and 38 inches wide, inside measurements. Width ruck is 4 feet 8 inches from center to center of tires. ht, 1,525 pounds. Price.....$78.50

No. 32H806 65-Bushel David Bradley Manure Spreader, complete with Wood Wheel Truck. Box is 10 feet long, 17 inches deep and 40 inches wide, inside measurements. Width of truck is 5 feet 3 inches from center to center of tires. Weight, 1,565 pounds. Price.....$81.50

No. 32H800 55-Bushel David Bradley Manure Spreader Box, without Truck. Complete with sprockets, clamps and everything necessary to attach. For use on narrow truck track measuring 38 inches between bolster stakes. In ordering tell us whether your truck has wood or steel wheels, diameter of rear wheels, and number of spokes. Weight, 870 pounds. Price.....$42.50

No. 32H801 65-Bushel David Bradley Manure Spreader Box, without Truck. Complete with sprockets, clamps and everything necessary to attach. For use on wide track truck measuring 42 inches between bolster stakes. In ordering tell us whether your truck has wood or steel wheels, diameter of rear wheels, and number of spokes. Weight, 900 pounds. Price.....$47.50

DAVID BRADLEY MUD LUGS.



Patent Applied For.

We furnish mud lugs or traction cleats with every complete David Bradley Spreader. They will be found helpful when the machine is used where an ordinary wagon wheel would slip.

Mud Lugs are NOT included with the spreader boxes. We recommend that you order a set when buying spreader box only.

32H810 Set of eighteen David Bradley Mud Lugs. Adjustable to any width of tire and easily detached. Weight, per set, 12 pounds. Price, per set.....$1.55

Whiffletree and Neckyoke are not regularly furnished with David Bradley Spreader. If wanted they must be ordered extra.

32H811 Two-Horse Whiffletree and Neckyoke. Weight, 36 pounds. Price.....$1.95

No. 32H812 Three-Horse Whiffletrees and Neckyoke. Weight, 55 pounds. Price.....$3.50

BINDER TWINE. Write for Our Low Prices for 1912 on BINDER TWINE.

$19.65 FOR COMPLETE 100 FT. OUTFIT — Peerless Automatic Carriers — FOR LITTER, MANURE AND FE

Plain Carrier.

rip on the track where you want the load dumped, give the loaded car a shove and it switches and trips dumps at the desired point and the car automatically returns to the barn.

The Peerless Carrier with automatic lift permits the raising or lowering of bucket for greater convenience in loading. Lift is very powerful and he heaviest load can be handled easily. An automatic brake and lock stops and locks bucket at any desired point.

Our $19.65 price is for a complete 100-foot straightaway rod track equipment. It consists of one plain carrier complete, one trip, 100 feet of steel od track with loops and clamps, two tension bolts, one stay loop and clamps for 20-foot anchor post, one turnbuckle, and one 6-foot anchor rod. If the automatic lift carrier is wanted, order outfit No. 32H1276. Price, $26.60. If you wish a longer track than 100 feet, order as many extra feet as wanted and allow 2¾ cents for each extra foot. There are so called complete outfits listed by others at possibly a trifle less than our price, but remember when comparing prices that our $19.65 price includes rod loop clamps, stay loop clamp, turnbuckle and anchor rod. These are usually furnished by others only as extras. We consider them necessary for the best results.

The 45-degree curve should be ordered to run the track off to one side at an angle from the barn door. The curve or switch must be ordered if a square turn is to be made. The tracks on the two sides of a square turn must be suspended independently and you will need two No. 32H1281, and two No. 32H1283 for each line of track aside from the main track and one No. 32H1285 and one No. 32H1286 for each corner the circle will turn. If your barn is over 50 feet long, we recommend that you order at least one spring track suspender. This prevents sagging and relieves strain on the tension bolts. Complete directions for erecting accompany each outfit. Shipped from factory in Southeastern Wisconsin.

Send for our special Litter Carrier Circular which shows large assortment and line of carriers for both steel rod track and solid angle steel track, also special feed carriers, with a complete line of curves, switches and attachments to meet all requirements. It also shows plans of different styles of barns with complete carrier outfits for them.

You can easily make up your order from this catalog for an outfit to suit any ordinary barn, but if you are in doubt what to order, send us a rough floor plan of your barn, with measurements showing location of stalls and alleys and where you want tracks to run and we will send our special circular and quote price on a complete outfit to suit.

With it you can easily keep your
and yard clean and sanitary without the drudgery of the wheelbarrow method. It carries the manure far away, dumps it and automatically returns
reloading. Or it will dump directly into spreader or wagon, in which the manure can be hauled direct to the fields, which experts say is best for

Install a Peerless Carrier to your barn and save time, hard work and money. It will quickly pay for itself.

The Peerless Carriers are the best made, easiest running, and most convenient on the market, and our price is much less than other first class riers are sold for, and little if any more than others ask for light weight, cheaply constructed, small capacity carriers, which cannot in any way be cla with the Peerless. Compare the construction of our carriers with any others and you will quickly see the difference.

Order our Peerless Carrier and compare it in actual operation with any others and if you are not satisfied that it is the strongest, easiest running, convenient to handle carrier on the market, and that it is worth more than any other you can buy at any price, return it at our expense and we will re your money together with the freight charges you paid.

The Peerless Carrier is made in one size only. The manure box or bucket 42 inches long, 24 inches wide and 17 inches deep. One piece of heavy 18-gauge galvanized sheet forms the bottom and sides. Each end is made of two 1-inch hardwood boards cross nailed to prevent warping, and making an absolutely water box. The sides are protected by a strip of 1-inch angle steel. The bail is made of heavy 2-inch channel steel. Sheave wheels are iron, 7-inch diam have roller bearings, and are mounted on malleable swivel reversible brackets and will take short curves and run to either direction. Hangers have spring cushions so that wheels are always held in line with track, regardless of movement of bucket. Each wheel has a spring track guard which makes it impossible for it to jump the track, and switches are taken automatically. The dumping device is positive and perfectly automatic in action. Set the

Steel or Wood—PEERLESS ADJUSTABLE SWINGING CATTLE STANCHIONS—Pivot or Chain

We have sold more than one hundred thousand stanchions of the wood side bar and pivot hanger style alone, and they have never failed to give satisfaction. The same valuable features which have made them preferred by dairymen and stock raisers everywhere are found in our styles shown herewith. Nothing is lacking in the most complete and best perfected line of cattle stanchions on the market.

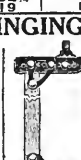
Peerless stanchions are the only truly adjustable stanchions ever produced. Easily and quickly adjusted to different widths of neck space, either 5, 5½, 6, 6½, 7, 7½ or 8 inches apart, making them suitable for any animal from a small calf to a large bull. The pivot and chain blocks can be quickly shifted so that stanchion is always supported exactly in the center of neck space. Stanchions are so braced at top and bottom, even when

f bolts should get loose, or wood should dry out, a trifle after long use, all parts will till be held rigidly, there can be no play or leverage, and animal cannot possibly pring any parts or pry open stanchion.

Large illustration shows two wood bar pivot stanchions set in stable frame work. One is closed and locked. When in this position, it swings freely on the pivot. When pen it is held securely, animal cannot turn it and has no trouble putting its head hrough. Smaller illustration shows how the stanchion is adjustable to different widths and how the pivot or chain can be shifted for any adjustments. The chain

No. 32H2205 Wood Bar Stanchion, Pivot Hanger. Weight, 18 pounds. Price, each.....$0.98

No. 32H2206 Wood Bar Stanchion, Chain Hanger. Weight, 18 pounds. Price, each.....1.08



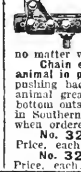
hanging stanchion is exactly the same except chain in place of pivots. Tops and bottoms of all stanchions are heavy malleables, also braces and pivots. Long loops are heavy steel straps. All parts solidly bolted together. Chains are heavy steel, 6 inches long. Side bars of wood stanchions are heavy clear white straight-grained hardwood smoothly finished. All metal parts are finished in black japan baked on, affording perfect cleanliness and protection against rust.

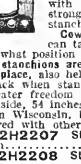
Our steel stanchions are positively the strongest steel stanchions made. Side bars are heavy channel steel lined with smooth rounded hardwood strips screwed to the steel. These strips prevent contact with the cold steel and chafing of cow's neck. If you want the strongest and most sanitary stanchion you can get, the Peerless steel stanchions will suit you.

Cows tied with Peerless stanchions are always comfortable. They can take easy, natural positions whether standing or lying down, and no matter what position they assume, stanchion is securely locked and animal cannot open it. Chain stanchions are preferred by many, because while not rigid, they always hold animal in place, also help keep animal clean by drawing forward when lying down and pushing back when rising. All our stanchions are 49 inches high inside, giving animal greater freedom than stanchions with shorter neck space. Height from top to bottom outside, 54 inches. Usually sold in lots of six or more and shipped from factory in Southern Wisconsin, but we carry in stock at Chicago to ship in smaller quantities when ordered with other goods.

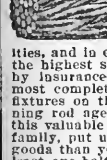
No. 32H2207 Steel Stanchion, Pivot Hanger. Weight, 27 pounds. Price, each.....$1.33

No. 32H2208 Steel Stanchion, Chain Hanger. Weight, 27 pounds. Price, each.....1.43

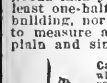




COPPER CABLE LIGHTNING RODS



Our System of Copper Cable Lightning Rods is recommended and endorsed by the leading scientific and government authorities as fully up to the highest standards and most rigid requirements which have been set by insurance companies and experts on the subject. We furnish the most complete, most substantial and most attractive line of rods and fixtures on the market at prices which are less than the average lightning rod agent or dealer pays for his goods. You can provide this valuable protection for your property and the lives of your family, put up the rods yourself and get a better job done than you could get from any agent or dealer, and save at least one-half. An expert is not needed for measuring up your building, nor for putting on the rods. We tell you below how to measure and how to order, and with every order we send plain and simple instructions for putting up.



Complete Ornamental Top.

The illustration above shows the actual size of our Copper Cable Lightning Rod, which is woven from thirty copper wires of the purest grade copper obtainable, not less than 98 per cent purity. It is a strong, solid cable, which will lay straight on buildings, and yet be flexible enough that it can be run around angles or corners without kinking or unraveling. Each wire lays to the surface and presents its entire surface as an electrical conductor, thus giving it the largest possible electrical carrying capacity. Price of cable includes sufficient copper clips and nails for fastening to building.

A complete lightning rod system consists only of the necessary amount of copper cable, with clips and nails for attaching to building, and complete plain or ornamental tops or points; the number of these points depending on the dimensions of your building and the style of construction.

The illustrations at the left show a complete plain top, and a complete top with ornamental vane with animal figure. Every complete lightning rod outfit should include one or more of these tops, either plain or ornamental, or both. The animal figures and vanes and glass balls are merely ornamental and do not affect the purpose of the system in any way. A complete top consists of a heavy pure copper tube upright, a seamless pure copper point, a galvanized brace stand for supporting the upright, a copper tee for connecting the upright to the cable and a 4½-inch glass ball. The ornamental top is the same, with the addition of the vane and animal figure. Animal figures are of zinc, full swell bodied, heavily gilded and well cut rods. Complete tops stand 5 feet high from base to point.

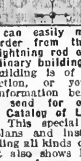
Complete Plain Top.

No. 32H3700 Copper Lightning Rod Cable. Price, per foot, including copper clips and nails.....$0.08¾

No. 32H3701 Complete Plain Top with Glass Ball. (State color glass ball wanted, whether opal, blue, ruby, silver or gold.) Price, each.....99

No. 32H3702 Complete Top with Animal Figure. (State animal figure, whether horse, cow, pig, sheep or rooster, and color glass ball wanted.) Price, each.....2.25

No. 32H3710 Complete Top with Arrow Vane. (State color glass ball wanted.) Price, each.....1.56



You can easily make up your order from this page for a lightning rod outfit for any ordinary building, but if your building is of unusual construction, or you want more information before ordering, send for our free Special Catalog of Lightning Rods. This special catalog gives plans and instructions for rodding all kinds of buildings; it also shows large illustrations of our complete line of ornamental fixtures which include many designs not mentioned on this page, besides giving much valuable information on the subject of lightning rods in general.

While the illustration of ornamental top or point shows vane with a horse figure we will, if so ordered, furnish instead, vane with either of the following animal figures Cow, pig, sheep or rooster. Vanes with animal figures are 30 inches long. Glass ball can be furnished in following colors: Opal, blue, ruby, silver or gold. Be sure to giv color wanted and state figure desired.

We also furnish ornamental tops or points with glass tail arrow vane 23 inches long in place of the animal figure. This is a very popular ornament, suitable for either residences or barns. Both animal and arrow vanes are mounted on frictionless brass swivel which permits them to turn easily with the winds.

How to measure your buildings for rods. The best way is to run a rope or cord over the building in just the same lines the rod is to be run, and where the rod will make a turn or branch, drive a nail or spike to hold the cord in place. In measuring for cable allow enough so that all bends or curves over gables or around corners will be gradual, and where cable passes close to metal cornices, water spouts, ornaments, gutters, etc., it should be connected to such objects. At least two ground rods are required for every building, and on large buildings with more than five tops or points, three groundings. Allow 10 feet for each ground connection. That is, the cable must extend into the ground 10 feet so as to be connected with moist earth permanently. Tops or points should not be over 15 feet apart. Each cupola and tower should have a point or top, and each gable or wing extending from main structure 10 feet or more should also have a point or top. There should also be a top or point at the side of each chimney.

The plan of bare shows how the rod is run and how the tops or points are placed. The rod is grounded at opposite ends and corners. Where gables or wings make branch circuits necessary, we include free of charge brass splicers for making these connections. All cable should be ordered in one piece and cut on the ground to fit its position on the building. If the roof is of irregular construction and broken up by small cables or hips, it is sufficient to place a point or top on each of the most prominent or elevated parts of the structure.

A complete lightning rod outfit with cable and complete tops will weigh, packed for shipment, from ¾ to 1 pound to the foot. Always shipped from the factory in Southern Wisconsin. When ordering be sure to state color of glass ball desired and the animal figure desired with ornamental tops.

Complete Plain Top.

Complete Ornamental Top.

NWOOD ONE-HOLE CORN SHELLERS.

89 Without Table or Fan.

Buy this sheller and you will experience the satisfaction of owning the best one-hole corn sheller in the world. It will shell rapidly and clean. So strongly made that it will give you years of splendid service. We could offer you other types of one-hole shellers at lower prices, but we do not believe them to be good value when compared with this machine at the low price we are able to offer. It is poor economy to make cents difference in price to purchase grade sheller, because such machines produce a satisfactory quality or quantity of work and usually they fall to pass one season's use. Our machines have hardwood frame, securely bolted together. We guarantee them to be equal in every way to the highest priced one-hole you can buy. Capacity is from 10 to shels of shelled corn per hour. Illustration shows sheller with feed table and fan ed, but they are furnished either with- ble or fan or with table only. Shipped factory in Southeastern Wisconsin.

PROVED No. 5 ACME AND FEED CUTTER.

79

A very handy, easy running feed cutter. While not intended to take the place of our larger Nos. 8 and 10 machines, yet es good work up to its capacity, and will r every purpose where but a few head of are kept. Cuts hay, dry or green fodder. alks without the ears, etc., and will not if properly fed. Much better made and finished than other machines of this Frame is heavy hardwood strongly bolted ice. Heavy legs, strongly braced. All parts nicely painted with red oil paint. mechanism carried on heavy cast end Tool steel cutting knife 11 inches long, a downward shearing cut against a ned cutting edge, and makes three cuts e turn of crank. Machine cuts from ¼ to 1½ inches long.

gth of cut is regulated by eccentric operates ratchet on upper roll, and is ily changed to length desired by thumb adjustment. Upper roll is spiked, and and lowers with light or heavy feeds, ams as big cuts as thin cuts of dry Tension on roller secured by wood t on side of feed trough. Lower roll is h. Shaft is 1-inch cold rolled steel. ace wheel extra heavy.

pacity from 150 to 200 pounds of dry fod- nd from 300 to 400 pounds of green fodder our. Shipped from factory near Chicago.

32H1505 No. 5 Acme Feed Cutter. at. 165 pounds. Price.....**$6.79**

X-L-ALL SELF FEED TWO-HOLE CORN SHELLER.

A sheller of unusual high quality, strength and large capacity and should not be confused with any of the numerous light and cheaply built shellers of this type.

Frame is extra heavy, well proportioned and not being top heavy, sheller cannot rack to pieces no matter how severe the service. Shafting, chains and all mechanism are much stronger and heavier than ordinarily used in shellers of this type. Because of the perfection of its construction and the perfect adjustment of all parts, this sheller attains its large capacity with but little more power than is required to operate the smaller table feed two-hole shellers, which have about one-half the capacity. The X-L-ALL self feed sheller will perfectly fulfill all the requirements of the large farmer or stockman, warehouseman or for general custom work. It is easily and quickly adjusted for different kinds of corn, is guaranteed to shell clean without breaking up the cobs or grinding the corn, and it delivers the shelled corn free from cobs and dirt, and of enough size for market. It has an extra large and powerful fan.

$48.50

WITHOUT ELEVATOR AND COB STACKER.

Illustration shows sheller complete with cob stacker and wagon box elevator, but price is for the sheller with self feeder only. If cob stacker and elevator are wanted, these are listed separately and must be ordered at the extra prices shown.

If you need a sheller of this type and want the best you can get, the one that will give the largest capacity with the least power, shell the cleanest and last the longest, order the X-L-ALL. We guarantee it will come up to these expectations.

Sheller requires 2 to 4-horse power and has a capacity of 50 to 75 bushels per hour with 2-horse power, and from 75 to 100 bushels per hour with 4-horse power. Pulley is 12x4 inches and should run 700 revolutions per minute. Shipped from factory near Chicago.

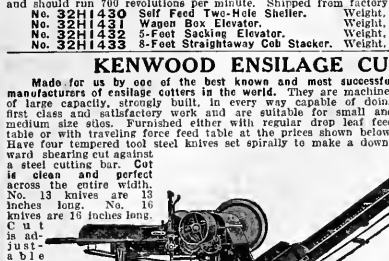
KENWOOD ENSILAGE CUTTERS.

Made for us by one of the best known and most successful manufacturers of ensilage cutters in the world. They are machines of large capacity, strongly built, in every way capable of doing first class and satisfactory work and are suitable for small and medium size silos. Furnished either with regular drop leaf feed table or with traveling force feed table at the prices shown below. Have four tempered tool steel knives set spirally to make a downward shearing cut against a steel cutting bar. Cut is clean and perfect across the entire width. No. 13 knives are 13 inches long. No. 16 knives are 16 inches long. Cut is adjustable to ¾ inch, ½ inch or ¾ inch long, and if you remove two opposite knives cuts will be ½ inch, 1 inch or 1½ inches long.

$29.25

Without Carrier



THE EASIEST AND SAFEST TO OPERATE.

Main shafts are cold rolled steel 1½ inches diameter in the No. 13 and 1¾ inches diameter in the No. 16, and run in boxes adjustable in relation to the cutting bar. Shaft is extended on both sides of the machine so that the pulley or the fly wheel can be placed on either side. Safety fly wheel is large and heavy and secured to the shaft by a friction block. The tool steel cutting bar is reversible with four edges; each edge can be used before grinding is necessary. Unless very dull, knives can be ground without removing from cutting head. Coss feed gearing takes away with necessity of exchanging gears when different lengths of cut are desired. Gearing is controlled by a safety stop lever, by which all running parts, except the cutting cylinder, can be instantly stopped or started. The lower feed roll is smooth; the upper roll is spiked. The upper roll is driven by expansion gearing and pressure controlled by an equalizer lever, subjected to an even tension spring pressure, which on plain table machines is obtained from a wood spring board underneath table, as shown in illustration, and in traveling table machines from a steel coil spring. Both ends of the roll raise uniformly. **Capacity** of No. 13 machine is from 1¼ to 2½ tons of dry fodder or 2 to 5 tons of green fodder per hour, sufficient feed for from forty to fifty head of stock. **Capacity** of the No. 16 machine is from 3 to 4 tons of dry fodder or 6 to 8 tons of green fodder per hour, or sufficient for from sixty to 100 head of stock. No. 13 machine requires from 3 to 4-horse power; No. 16, from 4 to 6-horse power. **When ordering be sure to tell us the size, speed and kind of power with which you intend to operate the machine, and also the size of diameter and face of your driving pulley.** We will then furnish the machine with a pulley of suitable size. Our swivel carrier will deliver at any point within a half circle and can be raised or lowered as desired. Carrier mounted in 4-foot, 8-foot or 12-foot lengths. **Illustration shows machine with drop leaf feed table** and with swivel carrier attached. The traveling force feed table is about 8 feet long. The force feed consists of a traveling apron of hardwood slats, attached to special chain belting. This apron is controlled by the same lever which controls the feed rolls, so that one movement of the lever stops or starts both rolls and the feed table. Shipped from factory near Chicago.

No. 32H1540	No. 13 Feed Cutter with drop leaf table.	Wt., 515 lbs.	Price..$29.25

No. 11 KENWOOD POWER FEED CUTTER.

The most popular size of power-feed cutter. It meets the general demand and there are many features of special merit not found in any other machine of similar dimensions. No feed cutter of its size will do more or better work. Frame is heavy hardwood, strongly braced. Feed table is long, heavy, deep with fixed sides, and feed throat is large to permit quick and easy feeding.

$20.55

Feed rolls are large and driven by expansion gearing. Pressure on upper roll is controlled by the long coil spring shown underneath the feed table, and by means of an equalizer bar an equal pressure is maintained at both ends of roll, thus both ends of roll raise equally, preventing binding in the bearings. Safety stop lever instantly starts or stops rolls and gearing. Sliding cone gears provide for quick change of lengths of cut.

Has four tempered tool steel knives 11 inches long, which make a downward shearing cut. Steel cutting bar has four edges and all can be used before regrinding. Machine cuts ¼, ⅜ and ½ inch long or, by removing two opposite knives, cuts will be ⅜ and 1½ inches long. Fly wheel is very heavy and has safety friction block. Machine can be operated by power windmills, horse powers or small engines. Pulley is 12x4 inches. Requires about 1-horse power and should run 400 to 600 revolutions per minute and will cut sufficient feed for twenty to forty head of cattle. Capacity per hour, 1 to 1½ tons of dry fodder or 2 to 3 tons of green fodder.

As an additional convenience, we can furnish a crank for occasional hand use, but machine is too heavy for continuous hand use. Crank is extra. Shipped from factory in Southeastern Wisconsin.

No. 32H1530 No. 11 Feed Cutter. Weight, 380 pounds. Price.....**$20.55**
No. 32H1531 Crank for hand use. Price.....**.60**

KENWOOD TWO-HOLE CORN SHELLER.

PRICE REDUCED TO $11.25

Exceedingly well made and handsomely finished. A splendid machine of good capacity. Adapted for general farm, warehouse or custom mill use. The balance wheel is large and heavy. The feed spout is directly over the shelling wheels and the rag irons and springs which control them are adjustable, so that any size of field corn can be shelled. The cob rake separates the shelled corn from the cob, delivers the cobs at a distance from the foot of the sheller and allows the sheller to be run at a good speed, with good capacity without throwing corn out with the cobs. Furnished with fan, feed table, crank and an 8-inch diameter by 4-inch face pulley. When run by power the pulley should make from 300 to 400 revolutions per minute. Capacity is from 25 to 35 bushels of shelled corn per hour. Shipped from factory in Southeastern Wisconsin or Central Ohio.

No. 32H1412 Two-Hole Corn Sheller. Weight, 250 pounds. Price.....**$11.25**
For Small Hand Corn Shellers see page 1032.

BRADLEY LEVER FEED CUTTER.

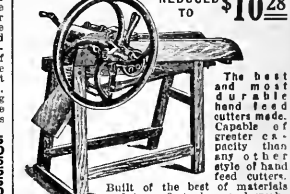
A much better made and more satisfactory working machine than is usually found in cutters of this type. Easily worth double the price of a three-legged machine and at least $1.00 more than the ordinary four-legged lever cutter. Frame is of heavy, carefully selected material and nicely finished. Knife is best quality steel, curved to give a shearing cut. Adjustment is positive. Gauge plate is adjustable for different lengths of cut. One of the handiest machines on the farm, always ready for work, never gets out of order. Just the thing for cutting small quantities of feed for immediate use. There is need for one or more of them on every farm. Shipped from factory at Bradley, Ill.

REDUCED TO $2.32

No. 32H1500 Lever Feed Cutter. Wt., 65 lbs. Price.....**$2.32**

Nos. 8 and 10 KENWOOD HAND FEED CUTTERS.

REDUCED TO $10.28



The best and most durable hand feed cutters made. Capable of greater capacity than any other style of hand feed cutters.

Built of the best of materials and in a first class and workmanlike manner. Have gearing to change length of cut, and safety stop lever which instantly starts or stops feed rolls. Feed rolls are governed by an equalizer and the coil spring shown underneath feed table, permitting both ends of upper feed roll to raise equally, preventing binding in its boxes. Have two tempered tool steel knives which make a downward shearing cut against a hardened cutting bar. Will cut either ½ inch, ⅝ inch or inch long, and length of cut may be doubled by removing one knife. Pulley can be attached to shaft. **Pulley is extra.** By power, machine should run 400 to 500 revolutions a minute. The **No. 8** Cutter has knives 8¾ inches long. Capacity, by hand, 200 to 300 pounds of hay or dry fodder or 400 to 600 pounds of green fodder per hour. Capacity, by power, 600 to 800 pounds of hay or dry fodder, or 800 to 1,200 pounds of green fodder per hour. The **No. 10** Cutter has knives 10¾ inches long. Capacity, by hand, 300 to 450 pounds of hay or dry fodder, or 600 to 900 pounds of green fodder an hour. Capacity by power, 800 to 1,200 pounds of hay or dry fodder, or 1,200 to 1,800 pounds of green fodder per hour. Have heavy safety fly wheel. Shipped from factories in Southeastern Wisconsin or Central Ohio.

X-L-ALL CORN AND COB CRUSHER AND FEED GRINDE

STRONGEST, SIMPLEST AND BEST FEED MILL MADE FOR GENERAL FARM WORK.

The X-L-ALL Grinder contains more desirable features than any other feed grinder of its type. Its superi over all the higher priced mills of this class has been proven in actual tests, and we claim for the X-L-ALL o more uniform product and larger capacity with the same power than can be obtained from any other steel burr designed for the same range of work and power.

The cob crushers, running burr, pulley and fly wheel are mounted on a heavy high carbon steel shaft which in anti-friction bearings fitted with dust-proof oil cups. Shaft has a genuine automobile pattern ball bearing end t Cob crushers are made in sections so that in case of breakage only a small section need be replaced. The heavy frame is cast in one piece, insuring rigidity and strength. The bottom is concaved with sharp ribs against whicl cobs are crushed, and it is hinged on one side and held by wooden break pins on the other, so that in case a be other hard substance gets into grinder the pins break and the bottom drops down, thus preventing further dan Hopper is heavy sheet steel securely fastened by clamps and can be easily taken off to get at inside of mill.

A strong point in the X-L-ALL Grinder is that all working parts are easy to get at. Take out two bolts and entire front of the machine can be removed, exposing the burrs, which they can be quickly changed or any adjust easily made. The fineness of grinding is regulated by a hand wheel which operates against a lever; one end of lever is carried on an adjusting bolt, and the other end is attached to main frame by a wood break pin. In cas obstruction should get into burrs this pin will break, thus allowing the burrs to spread apart and preventing dan Burrs cannot run together. Two cut-off feed regulators are provided, one at end of hopper over the b the other under hopper back of spout. Spout discharges the ground feed straight down from burrs, thus relievin burrs from back pressure and preventing clogging. Top of burr case lifts off and burrs can be examined at any Legs are heavy unbreakable angle steel, strongly braced and arranged to fasten mill to floor.

The X-L-ALL Grinder will crush and grind corn on the cob or cob alone, also shelled corn, wheat, oats, rye, barley or any kind of small grain, either separately or mixed. The will grind kaffir corn heads if the stalk is cut off close to heads. The three sets of burrs we furnish with every mill provide for a variety of products, ranging from the rough feed with the coarse burrs to as good a quality of table meal with the fine burrs as can be produced on any steel burr mill.

These mills are made in three sizes and four styles. The 0 and No. 1 mills have 8-inch burrs and have a capacity of 8 to 15 bushels of ear corn or 15 to 35 bushels of shelled corn per hour, and require 2 to 6-horse power. Pulley is 10x5 inches. The No. 0 mill is furnished without fly wheel, the Nos. 1, 2 and 3 with fly wheel. We recommend the purchase of the fly wheel. The No. 2 mill has 10-inch burrs and has a capacity of 12 to 25 bushels of ear corn or 20 to 60 bushels of shelled corn per hour, and requires 6 to 12-horse power. Pulley is 12x6 inches. The No. 3 mill has 12-inch burrs and has a capacity of 40 to 50 bushels of ear corn or 70 to 80 bushels of shelled corn per hour, and requires 8 to 15-horse power. Pulley is 12x8 inches. The No. 3 mill only has a partition in hopper, which is of considerable advantage when grinding oats mixed with corn. Capacities of all mills on oats and other small grains will be somewhat less than on shelled corn. They must be ground so fast. Nos. 0, 1 and 2 mills should be run at speed from 200 to 600 revolutions per minute, depending on the power. No. 3 mill can be run from 200 to 800 revolutions per minute. A forged steel wrench fitting every nut and sets of burrs are furnished with every mill; one set of coarse, one set of medium and one set of fine burrs.

Prices on the feed grinders do not include the sacking elevator shown in small illustration. This is furni only when ordered at the extra price shown below. Shipped from factory in Southwestern Ohio.

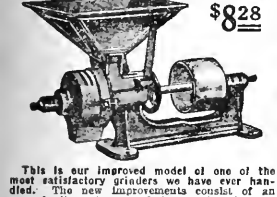
Improved Little Wonder Grinding Mills.



This is our improved model of one of the most satisfactory grinders we have ever handled. The new improvements consist of an easy feeding sheet steel hopper in place of the old style wooden hopper; the burrs are now made flexible instead of rigid, insuring finer and more uniform grinding and the mill is now supplied with a cut-off feed regulator which permits the operator to feed as much or as little to the burrs as desired. When properly operated, burrs cannot choke and grain is not scattered about the floor. Mill requires from 1 to 3-horse power. Designed for use with power windmills, small gasoline engines, and other light powers. Burrs are 5½ inches in diameter, adjustable for grinding coarse or fine. Grinds all kinds of small grains, coffee, etc. Pulley is 7x4 inches and should run from 700 to 1,000 revolutions per minute. Capacity, 5 to 15 bushels of mixed feed per hour, depending upon speed and fineness of grinding. Burrs cannot run together when empty and nails pass through without injuring the mill. Furnished with one set of coarse and one set of fine burrs. Fine burrs grind table meal. When ordering extra burrs, state whether coarse or fine burrs are wanted. Shipped from factory near Chicago.

No. 32H1650	Little Wonder Grinding Mill, as illustrated.	Wt., 90 lbs. Price $8.28

GENUINE FRENCH BUHR MILLS.

STONES ARE PERFECTLY DRESSED GENUINE IMPORTED FRENCH BUHR STOCK.

The leading French Buhr mills of America. They sell under the manufacturer's name for double our prices. Destined for custom mill use where quantity as well as quality of grinding is desired. Grind cool, rapidly and evenly. Spindles are extra heavy steel, accurately fitted to the runner stones and run in long anti-friction metal bearings. Housings are lathe turned and fit perfectly tight. Stones are accurately fitted and trammed and runner stone is balanced on the spindles. These mills can be run by any kind of belt power, can be belted from any direction, will not choke and can be run empty without injury. The 12-inch and 18-inch mills should be run about 1,100 revolutions, the 18-inch and 20-inch mills should be run about 1,000 revolutions per minute. Shipped from factory in Southwestern Ohio.

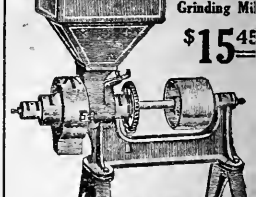
ACME SWEEP FEED MILLS.

This is the best single geared sweep feed mill you can buy. It does first class work and we recommend it to those who do not require a mill of as great capacity as our triple geared mills. It has cob breakers to break the ear corn and force it into the grinding rings. Warranted not to choke on new or old corn, either damp or dry, but will not grind corn with the husks on. The grinding rings are made of our standard mixture of hard iron and steel, and with proper use the mill will last as long as other makes. They can be gauged to grind crushed cobs and corn to any fineness suitable for ordinary feeding purposes. Average capacity based on cross-cut grinding of dry corn and cobs or shelled corn for feeding purposes is from 8 to 12 bushels an hour. The regular grinding rings furnished with these mills are coarse and are intended for coarse grinding of corn and cobs or shelled corn for feeding purposes. For fine grinding of shelled corn or for grinding kaffir corn, wheat, oats and other small grains, fine grinding rings are required. Grinding medium or fine reduces the capacity from one-third to one-half. Illustration shows a No. 10H mill. No. 10L mill has iron legs and platform instead of wood feed box. Price is for the mill complete with one pair of grinding rings only, sweep and hitch hook. When ordering mills or extra rings, always state whether you want coarse or fine rings. Coarse rings shipped unless otherwise specified. Shipped from factory in Southwestern Ohio.

No. 32H1600	No. 10H Acme Sweep Feed Mill.	Wt., 390 lbs. Price $14.30
No. 32H1602	No. 10L Acme Sweep Feed Mill.	Wt., 450 lbs. Price 16.50
No. 32H1601	Pair of No. 10 Extra Grinding Rings.	Wt., 97 lbs. Price 2.80

Big Wonde Grinding Mi



This mill is constructed on the same p ciples as our Little Wonder Grinding M but is of greater capacity. It is of few easy of adjustment and designed to elimi breakage. Intended for use with from 3 6-horse power gasoline engine or other of power. With grind mixed feed, sh corn or small grain, in quantities from 1 35 bushels per hour, according to speed fineness of grinding. Burrs are 7 inches diameter, flexible and self aligning. Ho is cast iron, 15x15 inches square. Mill cut-off feed regulating device, enabling operator to feed to the burrs any quant desired. Pulley is 7½x5 inches and sh run from 700 to 1,000 revolutions per min Mill is mounted on iron legs and top of h per is 38 inches from floor. Furnished one set of coarse and one set of fine bu Fine burrs grind table meal. When orde extra burrs state whether coarse or fine b are wanted. Shipped from factory in So eastern Wisconsin.

No. 32H1655	Big Wonder Grinding Mill.	Wt., 235 lbs. Price $15.
No. 32H1656	Pair of Extra Burrs.	Wt., 7 lbs. Price $1.

IMPROVED FULTON TRIPLE GEARED BALL BEARING SWEEP FEED MILLS.

Have Double the Capacity of Ordinary Geared Mills and From One-Fourth to One-Half Greater Capacity Than Any Other Sweep Feed Mill Made. PRICES GREATLY REDUCED.

Price Reduced from $24.75 to

No other sweep feed mill possesses so many improved features, is so simple to operate, so easy running or capable of as great capacity. Ball bearings support the internal revolving mechanism, do away with all friction, and make the Fulton the easiest running sweep feed mill on the market. The mill is so light of draft that it usually requires but one horse for average work and two horses can handle it with ease under almost any condition. The gearing is enclosed and protected from dirt and dust and is self oiling. The cob breaker breaks the ear corn and forces it into the grinding rings. **Guaranteed not to choke on old or new corn, either damp or dry,** but will not grind corn with the husks on. Grinding rings make three revolutions to one round of the horse and are made of a special high quality mixture of iron and steel and with proper use will grind from 6,000 to 8,000 bushels before they will require replacing. They can be gauged to grind crushed corn and cobs to any desired fineness, suitable for ordinary feeding purposes. Average capacity based on coarse grinding of dry corn and cobs or shelled corn for feed is from 15 to 25 bushels per hour when two horses are used. Grinding rings regularly furnished with the mill are for coarse grinding of corn and cobs or shelled corn for feeding purposes. For finer grinding of shelled corn or for grinding kaffir corn, wheat, oats, rye or other small grains, fine grinding rings are required. Grinding medium or fine with fine rings reduces the capacity from one-third to one-half. The No. 1 mill is mounted on a feed box of good heavy lumber. The No. 2 mill is mounted on iron legs and is furnished with a platform. Price is for the mill complete with one pair of grinding rings only, sweep and hitch hook. When ordering mill or extra rings, state whether you want coarse or fine grinding rings. Coarse rings will be shipped unless otherwise specified. Shipped from factory in Southwestern Ohio.

eans, grades and separates all kinds of grain and seeds. No matter what the kind or condition of seed, X-L-ALL with proper equipment will clean and grade it, remove all dirt, trash and weed seeds. Also chaff and other valuable seeds the mixture may contain. It will do the same work as high priced mills costing $25.00 to $60 and do it better.

ulfuse your plant carefully selected clean and graded seed, your crops will diminish each year in yield and ity. Grain does back unless it is bred up. With an X-L-ALL mill you can easily breed up your seed and ter crops and better prices. Get rid of weeds by refusing to plant them. Take them out of your seed with X-L-ALL Fanning Mill.

CONSTRUCTION—Mill is 32¼ inches wide, 43 inches long, 44 inches high. Capacity, 30 to 50 bushels r h, depending upon the kind and condition of seed. Screening capacity is 24x24 inches. Only the very best kiln dried lumber is used, and mill is handsomely finished and painted, strongly put together and made to last. Hopper is extra large and has a perfect feed regulator. Fan is enclosed in large sheet steel drum and ample capacity to give strong steady air blast, insuring uniform work. The lack of wind is a weak point in hy other makes of mills. Driving gears are inside mill, out of way of operator. The mill has a large ting shoe operated by a shaker elbow. Shoe is suspended by steel spring straps, allowing perfect regulation of shake. The shoe capacity is a great advantage in building up a combination or gang of several screens, as is sometimes necessary to run off undesirable mixtures which cannot be removed by mere wind blast. Screens are kept clean automatically and kept from clogging by a heavy cast iron knocker which attaches to bottom of screen and is operated by the movement of shoe.

Mill is shipped crated and all set up, except drum and sacker, which require only a few minutes to attach. Thus you get the lowest freight rate and are saved the bother of putting a complete mill together.

The sacking elevator is an extremely valuable attachment and we recommend that you order it. It saves time and labor, keeps the grain off the barn floor, and prevents weed seeds and dirt getting mixed again with the seed. Discharge spout is adjustable and holds two sacks. When one sack is filled the grain is instantly switched to the other by turning a valve.

EQUIPMENT—Eight screens and riddles are regularly furnished with every X-L-ALL mill. **With this equipment the mill will clean and separate wheat, oats, rye, barley, peas, beans, corn, rice, cotton, buckwheat, kaffir corn and broom corn.** We can furnish extra pieces as shown below, other screens and riddles which adapt the mill for cleaning, grading and separating almost every kind of seed. We send with every mill a book of directions telling how to operate the mill for every class of work. It is the most complete book of the sort put out with any fanning mill.

If you cannot find in our list a suitable equipment, or if you have a fanning mill now of other make which does not do your work to your satisfactorily, send us a small sample of seed and we will examine it for you and recommend an X-L-ALL mill with suitable equipment that will do the work. If you send a sample, address it plainly, **Fanning Mill Expert, Dept. 32, Sears, Roebuck and Co., Chicago, Ill.** **X-L-ALL Fanning Mills and Attachments are shipped from factory in Northwestern Ohio.**

32H1725 X-L-ALL Fanning Mill Separator. Without elevator. Weight, ounds. Price **$12.50**

32H1726 X-L-ALL Fanning Mill eparator. Complete with Sacking Ele- r. Weight, 200 pounds. **$17.45**

32H1728 Succotash Attachment. A five-pply zinc gas for separating wild me oats from wheat, barley and rye. t, 14 pounds. Price **$3.20**

32H1729 Chess Screen. Takes and small oats from wheat, barley and Weight, 5 pounds. Price ..... **.80c**

32H1730 Flax Attachment. Takes ed, wheat, oats, etc., from flax. Weight, nds. Price **$1.60**

No. 32H1731 Special Flax Attachment. A three-ply zinc buckle and screen. For very dirty flax. Will handle successfully a flax mixture that looks impossible to separate. Weight, 14 pounds. Price **$3.25**

No. 32H1732 Timothy and Clover Attachment. Cleans timothy or clover and separates timothy from clover and alfalfa. Weight, 14 pounds. Price **$2.95**

No. 32H1733 Clover Attachment. Cleans the seed and takes out buckhorn. Weight, 8 pounds. Price **$1.34**

No. 32H1734 Alfalfa, Millet and Hungarian Attachment. Cleans any of these seeds. Weight, 4 pounds. Price **$1.35**

No. 32H1735 Grass Seed Attachment. For cleaning timothy, English blue or orchard grass. Weight, 8 pounds. Price **$1.60**

No. 32H1736 Red Top Attachment. Consists of very fine screens required for this seed. Weight, 8 pounds. Price **$3.75**

No. 32H1738 Bean Attachment. For large varieties such as lima, kidney, soy, etc. **When ordering state which kind of beans.** Weight, 8 pounds. Price **$1.35**

No. 32H1739 Pea and Corn Attachment. For large varieties such as marrowfat peas and horse tooth corn. **When ordering state which kind of peas or corn.** Weight 8 pounds Price **$1.35**

No. 32H1740 Corn Sorting Attachment. Sorts out the misshapen kernels of the tips and butts. Weight, 8 pounds. Price **$1.36**

No. 32H1741 Wheat Grader with spout. Separate cockle and foul seeds from market wheat. Delivers the big kernels for seed in the front of the mill, the balance of the wheat under the mill, free from foul stuff. Weight, 14 pounds. Price **$1.87**

No. 32H1742 Timothy Seed Saver. Saves the timothy seed when cleaning oats and wheat. Weight, 11 pounds. Price **$1.87**

No. 32H1750 Pulley, 8x2½ inches, for operating machine by power. Weight, 7 pounds. Price ..... **.60c**

or and m Mill

$8.75 STANDARD CIDER MILLS.

This is positively the best line of hand cider mills on the market. Strictly high grade in every particular and guaranteed to give perfect satisfaction. The frames are heavy hardwood, strongly bolted together. The mill parts are cast iron and steel. Cross heads for press screws are extra heavy cast iron. Press screws are steel, accurately made and fitted. These mills will grind large as well as small apples. The Junior mill has a capacity of two to four barrels of cider per day. Tube are 10 inches high by 12 inches outside diameter. The Medium mill has a capacity of three to six barrels of cider per day. Tube are 12 inches high and 13½ inches outside diameter. The Senior mill has a capacity of six to twelve barrels of cider per day and tube are 14 inches high by 17 inches outside diameter. Each size is back geared and has a heavy balance wheel. Hoppers are large and have feed. The Junior and Medium mills are of the same construction, differing only in size and are operated by crank. The Senior mill is much larger, is double back and fitted with two cranks. Tube are strongly made of selected hardwood with heavy wrought iron hoops. Not running, better finished, or stronger made hand cider mills y price. Shipped from factory in Central Ohio.

Senior Mill.

o. 32H2387	Junior Cider Mill.	Wt., 190 lbs.	Price	$ 8.75
o. 32H2388	Medium Cider Mill.	Wt., 240 lbs.	Price	11.57
o. 32H2389	Senior Cider Mill.	Wt., 420 lbs.	Price	15.30

FORCE FEED CIDER MILL.

A first class single tub cider mill and press for family use which will do a satisfactory quantity and quality of work. It is a geared cylinder mill which crushes apples and automatically forces them through the grinding rolls. Large apples must be hand cut or quartered to obtain best results. It is strongly constructed of the best materials and nicely finished in natural wood. Is capable of a greater range of work than any other single tub mill made, and worth three of the ordinary Hutchinson pattern mills. Capacity is one to two barrels of cider per day. Tub is 12 inches high and 13½ inches outside diameter. Press screw is heavy steel and well threaded. The ideal mill for family use. Shipped from factory in Central Ohio.

$6.23

No. 32H2386 Cider Mill, Wt., 150 lbs. Price.....**$6.23**

BACK GEARED PUMP JACK, $5.85.

Do not confuse this jack with cheap single geared jacks. It is double back geared 1 to 6¾ and aside from attaching to the pump standard it has two bearing standards which attach to the pump platform, taking all belt strain off the pump, and the jack does not shift its position in any way. Can be used with gasoline or steam engines, horse powers or power windmills. It is fitted with 13-inch by 2¼-inch tight and loose pulleys. Stroke adjustable to 5 inches, 7½ inches or 9¾ inches. The wood connecting rods with the iron cross head can be adjusted to fit any height of windmill pump. Driving pulleys should make about 275 revolutions per minute. Price is for the pump jack complete with pulleys, clamps, connecting rods and cross head for attaching to pump, but does not include pump. Shipped from factory near Chicago.

No. 32H1375 Pump Jack, Weight, 95 pounds. Price.....**$5.85**

SECURITY GALVANIZED STEEL GRAIN TANKS.

Ratproof, rainproof, rustproof, fireproof and thiefproof. Steel grain tanks or granaries are coming more into general use every day. They cost more than wood, but as they are practically indestructible and give the best protection to grain, they are by far the cheapest in the end. Our graneries are made of **No. 20-gauge** heavily galvanized steel and have galvanized hoops with draw lugs. Made in sections, easily bolted together, making watertight joints. Bottoms have a heavy galvanized angle around the edge and may be set on the ground without drawing moisture. Have four openings, each 8 inches in diameter, which close with slides. The spout may be attached at either opening and grain spouted direct into sack or wagon box. This spout also serves as a door, as shown in the small illustration, and when fastened with a padlock affords perfect protection. Cover has 24-inch square manhole with hinged cover which can be locked. Tanks 16 feet or more in diameter have two such manholes. A steel hopper to be placed in the spout holes, enabling you to shovel grain direct from wagon, furnished with each tank. Used to the field or in barns. Easily put together or taken down and traosported from place to place. Shipped from factory in Western Iowa.

ACME SWEEP HORSE POWERS.

best sweep horse power made. Materiel, workmanand finish are first class. You cannot buy a better or more powerful working power at any price. They both high and low speed and are adapted for esses of work. Frames ong and strong, made t quality timber rigidly and braced. Shafts eavy steel with babboxes. High sweeps extend from each side of the , one running with and the other the horses. The speed shaft one end of the power. Illustration a 4-horse power. The 2-horse is lighter and differs slightly in detail. The power is much the same as 4-horse power except that it has four sweeps so lead poles. Powers are furnished com- with sweeps, two tumbling rods without 2 one ratchet and two safety couplings, rod block, platform and a coiled spring draft for each sweep. Two-horse powers have two sweeps and two lead poles. Tumbling rod ared for 1-inch coupling. High speed shaft makes thirty-two revolutions and low speed shaft makes ten revolutions to one round of the horses. Four-horse powers have two sweeps two lead poles. High speed shaft makes fifty-two revolutions and low speed shaft makes and one-half revolutions to one round of the horses. Tumbling rod is squared for 1¼- couplings. Six-horse powers have four sweeps but no lead poles and speed end square tumbling rod is the same as on four-horse powers. Eight-horse powers have four sweeps, no poles; high speed shaft makes sixty-five revolutions, low speed shaft makes twelve and half revolutions to one round of the horses. Shafts squared for 1¼-inch couplings. Order power jack, listed on this page, when you wish to transmit power by belt. Shipped factory in Southeastern Minnesota.

$8.82 Handy Food Cookers.

Full Capacity

In every way the best steel boiler food cooks or made. Boiler is made entirely of heavy galvanized sheet steel strongly bound at top and bottom and has a close fitting hinged cover. We furnish these cookers in 2 styles: One with sheet steel fire box and the other with cast iron fire box. Grates and flues of both styles are cast iron. Buy the cooker with cast iron fire box; although it will cost you slightly more, it will last about twice as long as a cooker with sheet steel fire box. Fire has 6 inches deep and extends entire length of boiler. A partition in the center directs the heat from the fire box to the opposite end and then back to the smoke pipe. Can be used for cooking food, boiling water and many other purposes, and will burn coal, wood or cobs. Price includes one joint of 6-inch pipe and an elbow. Shipped from factory in Southwestern Michigan.

No. 32H1981a 60-Gallon Cooker, with sheet steel fire box. Wt., 175 lbs. Price $8.82

No. 32H1981b 60-Gallon Cooker, with full cast iron fire box. Wt., 200 lbs. Price $9.95

No. 32H1982a 90-Gallon Cooker, with sheet steel fire box. Wt., 185 lbs. Price $9.45

No. 32H1982b 90-Gallon Cooker, with full cast iron fire box. Wt., 215 lbs. Price $10.95

KENWOOD AGRICULTURAL BOILERS.

FULL CAPACITY GUARANTEED.

The highest grade, best made and the most handsome and attractively designed caldron furnaces made. Popular among both farmers and butchers. Can be used for any purpose where a fine smooth kettle is required, such as rendering lard, cooking food for stock, boiling sap, melting lead, etc. Caldrons are made of the finest charcoal iron, very smooth, with black lead finish inside and we guarantee them to be full capacity. Furnaces are cast iron throughout, put together as well as soy stove made, and are so pleasing in design that they are a decided ornament to any surroundings. Price is for the furnace and caldron complete as shown, but does not include pipe. The 15-gallon size takes 5-inch pipe; the 22-gallon and the 30-gallon, 6-inch pipe; the 45-gallon and the 60-gallon size, 7-inch pipe, and the 75-gallon size, 8-inch pipe. Furnaces for coal have iron grate and heavy fire brick lining which can be taken out and replaced through the door. Shipped from factory in Central Ohio.

$7.65

For $2.00 to $5.00 less, depending on size, we could sell light weight undersize boilers with furnaces having steel jacket above the fire box and iron linings for coal. We do not consider them good in quality or value, therefore do not handle them.

FARMERS' FRIEND FOOD COOKERS.

These cookers are constructed to give the best possible results from the very smallest amount of fuel. The jacket is heavy cold rolled steel plate, supported at the bottom by heavy wrought iron handle. Kettles are made of fine grained iron with black lead finish inside, and we guarantee them to be full capacity. The rim of the kettle rests on top of the jacket and the kettle can be easily removed. Cooker is designed to be set on ground. For indoor use, set on a base made of brick and sand. Can be used for cooking food, rendering lard, or for any other purpose where an ordinary kettle can be used. Prices are for the cooker for burning soft coal complete with elbow, damper, and one joint of 6-inch pipe. Coal grates and covers are extra. Shipped from factory in Central Ohio.

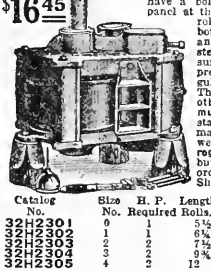
KENWOOD CANE MILLS.

FOR SORGHUM OR SUGAR CANE.



$16.45

These are extra heavy vertical three-roll mills, possessing all the good qualities of the original Great Western pattern and all the strength of the solid gear models, but without the defects of either. They are strictly up to date cane mills of the highest quality, containing all late improvements and suitable for the heaviest work. They have a bolt at each corner of the frame and are made rigid by a panel at the end. The gears are very heavy and are separate from the rolls and connected by two clutches on each gear. Top and bottom rolls have babbitt boxes, are oiled from the top and constructed so that oil cannot get into juice. Shafts are steel with turned bearings. Rollers are turned with serrated surfaces. Middle rolls are flanged at top and bottom, which prevents the cane from passing either up or down, and the feed guide is made so that the full length of the roll can be used. The gearing is encased. Capacity of these mills is greater than others of the same size, because our mills are heavier and much stronger and they press the cane dry. It is impossible to state the exact number of gallons of juice any cane mill will make. This depends upon the richness of the cane, therefore we state capacities in tons of cane per twelve hours. The regular sweep cap is single pitch, as shown in the illustration, but we can furnish double pitch cap, or level top cap if so ordered. Price includes sweep cap, bolts, oil can and wrench. Shipped from factory in Southwestern Ohio.

Catalog No.	Size No.	H. P. Required	Length of Rolls. in.	Diam. of Rolls. in. Large	Small	Capacity in Tons	Wt. Lbs.	Price
32H2301	0	1	5½	10⅛	6⅝	2 to 3	440	$16.45
32H2302	1	1	6¾	11⅜	6⅜	3 to 4	540	22.20
32H2303	2	2	7½	13⅛	7⅛	4 to 5	755	30.75

32H2305	4	2	12	18	9⅝	8 to 10	1,375	52.50

If you want a cane mill for engine power send for our Special Power Cane Mill Circular. We can save you money.

COOK'S EVAPORATOR PANS.

FOR SORGHUM AND SUGAR CANE. REDUCED TO $4.25

These pans are for evaporating sorghum, sugar cane and other thick juices. They are not suitable for maple sap or thin juices of any kind. They are strongly made with wood sides, heavily bound, riveted and soldered, with no seams exposed to the fire. Pans are 3 inches deep with division bars 6 inches apart. Galvanized pans are made of No. 24-gauge sheet steel. Copper pans are made of 16-ounce cold rolled copper. Syrup is drawn off through small spout in corner of pan. Price includes two skimmers. Pans can be set on brick arch or mounted on rocker furnace.

All pans are 44 inches wide. Capacity for twelve hours is about as follows: 66-inch pan, 20 to 30 gallons; 72-inch pan, 30 to 40 gallons; 80-inch pan, 40 to 50 gallons; 108-inch pan, 50 to 80 gallons; 126-inch pan, 75 to 120 gallons of syrup, depending upon richness of juice. Shipped from factory in Southwestern Ohio.

DAVID BRADLEY SAW FRAMES

No manufacturer can possibly produce a better line of wood and pole saw frames than these, and you cannot purchase for any price a more strongly made or better finished saw frame. They are the best made and best finished frames on the market and are worth one-fourth to one-half more than lightly constructed, cheaply made saw frames put out by others. Our saw frames are made in the famous David Bradley factory and they bear the David Bradley trade mark, which is a guarantee of supreme high quality. Frames are made of heavy selected hardwood, strongly bolted together, and painted with a bright red oil paint with gloss, not the cheap mineral paint which is generally used by others. Shafts are heavy 1½-inch cold rolled steel and run in ample babbitted bearings which are connected by a heavy iron frame, insuring perfect alignment. Steel and iron parts are heavy, well finished and well painted. Frames are shipped knocked down, as shown in the illustration to the left, thus securing a much lower freight rate than ordinary methods of shipping. Directions for setting up accompany each frame. **Our cut-saw blades are especially made for use on these saw frames. They are filed and set, for use, and are fully guaranteed to give perfect satisfaction.** 20 or 22-inch saws should be run from 900 to 1,400 revolutions per minute and require 2 to 3-horse power; 24 to 30-inch saws should be run from 800 to 1,200 revolutions per minute and require 3 to 4-horse power; 32 or 36-inch saws should be run from 700 to 1,000 revolutions per minute and require 4-horse power. Rip saws cannot be used on these frames and 30-inch is the largest cut-off saw that can be used.

DAVID BRADLEY POLE SAW FRAMES.

The strongest, best constructed and most popular Saw Frame in the country. Suitable for sawing cord wood and long poles of every description. The mandrel shaft is 4 feet 1 inch long with 1⅝-inch saw arbor and 5-inch arbor flanges. It has grooves in boxes to prevent end play. The mandrel shaft boxes are connected together with an iron frame which keeps them in perfect alignment. The center tightening pulley is hung on a heavy steel yoke bracket with heavy steel shaft, and is so strongly made that it cannot get out of line. All pulleys are 5 inches diameter and 6-inch face. Balance wheel weighs 100 pounds. The cast iron saw guard is adjustable to fit saws from 20 inches to 30 inches in diameter. Can furnish either right or left hand frame but we always ship right hand frame unless left hand frame is ordered. If machine is wanted without extension parts for table deduct 55 cents. Shipped knocked down from the big David Bradley factory at Bradley, Ill.

HIGH QUALITY ROAD SCRAPERS.

We guarantee these scrapers to be absolutely the best and most substantial scrapers made. Made of highest grade 40 to 45-point carbon low sulphur scraper steel. Do not confuse them with low quality tank steel scrapers offered by others in order to compete with our low prices. These scrapers are made for us by old and reputable manufacturers, acknowledged to be producers of the highest grade road machinery in the world. You cannot possibly buy better scrapers than these, no matter what price you pay. Order and compare our scrapers with any you can buy, and if you are not satisfied that our scrapers are equal to, if not better than others, and that at our price they are the best value you ever saw, send them back and we will gladly return your money and pay all freight charges. They are made of a single sheet of heavy specially hardened steel plate, making a round cornered and perfectly formed bowl which scours and cleans easily. The nose is rounded and enters the ground freely. Have heavy steel bail, swivel hitch and hardwood handles. Smooth bottom scrapers do not have runners on the bottom. Double runner scrapers are the favorite and have two steel runners, each about 1½ inches wide and ⅝ inch thick. Single runner scrapers have a broad single runner made of a single heavy steel plate. No. 3 size holds 3½ cubic feet and weighs 80 pounds. No. 2 holds 5 cubic feet and weighs 90 pounds. No. 1 holds 6 cubic feet and weighs 100 pounds. Shipped from factory in Western Ohio.

ACME STEEL ROAD SCRAPERS, $3.23.

These scrapers are of the same form and construction as our **High Quality Road Scrapers** shown above, differing only in the thickness and weight of the steel in the scraper bowl. Enter the ground easily and scour nicely, and if you do not use a scraper extensively they will probably wear long enough to satisfy you. We guarantee these scrapers to be better than any scrapers you can buy for prices less than we ask for our **High Quality Road Scrapers.** But if you want a scraper for long wear and hard usage, we advise you to buy our **High Quality Scrapers.** No. 4 holds 4½ cubic feet and weighs about 75 pounds. No. 5 holds 5 cubic feet and weighs about 85 pounds. No. 6 holds 7 cubic feet and weighs about 95 pounds. Shipped from factory in Western Ohio.

Don't pay freight on the woodwork part of a stone boat. We furnish this stone boat head you can make a stone boat and use any available planks you may happen to have and it will outwear several sets of plank. The head is 20 inches wide; heavy and strong. It will last a lifetime. Shipped from factory near Chicago.

No. 32H2650	Cast Iron Stone Boat Head.	Wt., 70 lbs.	Price	$1.95

David Bradley Extension Table Wood Saw Frames.

100-Pound Balance Wheel.

$12.33

Right Hand Frame.

For sawing poles or regular 4-foot cord wood. The table can be set at the side for sawing long poles, as shown in the illustration, or it can be set in front of the saw frame in the usual manner for sawing cord wood. The shaft is 4 feet 5 inches long with 1⅝-inch arbor and 5-inch arbor flanges. It has grooves in the boxes to prevent end play. The boxes are connected together by an iron frame which keeps them in perfect alignment. Driving pulley is 5 inches in diameter, with 6-inch face. Balance wheel weighs 100 pounds. The cast iron saw guard is adjustable to fit saws from 20 inches to 30 inches in diameter. Can furnish right or left hand frame but **we always ship right hand frame** unless left hand frame is ordered. If machine is wanted without extension parts for table deduct 55 cents. Shipped knocked down from the big David Bradley factory at Bradley, Ill.

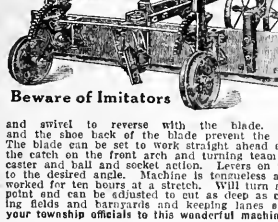
WRITE FOR OUR PRICES ON STEEL AND CAST IRON CULVERT PIPE

IDEAL REVERSIBLE FARM AND ROAD GRADER.

Saves Time, Labor and Horse Flesh. Does the work of a $250.00 Machine.



Beware of Imitators

This machine has a reversible blade which sheds the dirt and can be set to throw it to the right or left. With it one man will do the work of a $250.00 horse killing grader which requires three men and three teams or more, and do it better because the machine can be worked at times and in places where a large machine could not be used. Made entirely of iron and steel. Beam with blade attached is 12 inches wide and 6 feet long. Machine measures 6 feet from center of front trucks to center of rear trucks. Front wheels are 16 inches high. Rear wheels are 24 inches high and swivel to reverse with the blade. The angle at which these wheels work and the shoe back of the blade prevent the machine from sliding when properly operated. The blade can be set to work straight and can be changed to either angle by merely loosening the catch on the front arch and turning team to the right or left. Front wheels have both caster and ball and socket action. Levers on the rear wheels raise, lower and tilt the blade to the desired angle. Machine is tongueless and so easy on the team that it can be easily worked for ten hours at a stretch. Will turn in any place a team can turn. Blade has suction point and can be adjusted to cut as deep as can be easily worked. Of great value in leveling fields and barnyards and keeping lanes and driveways in order. **Call the attention of your township officials to this wonderful machine.** Shipped from factory in Central Ohio.

Price Reduced to $32.75

No. 32H2542	Farm and Road Grader. Wt., 535 lbs.	Price	$32.75

Our Famous Crystalline Metal Bells

Illustration shows a Schoolhouse and Factory Bell.

$6.08 AND UP.

For Schoolhouse, Factory and Church Guaranteed for Five Years Against Breakage.

Celebrated for their volume of sound and for their loud, clear, round and sweet tone. Our crystalline bell metal is a superior composition metal of high quality, and bells made from it are worth many times as much as so called alloy and cast iron bells. Our bells give almost as good satisfaction as the best copper and tin bells, which, of course, sell for much higher prices, and the same amount of money invested in one of our bells that you would invest in a copper and tin bell will secure a bell with a greater volume of sound, and a farther reaching, more satisfactory tone. Thousands of schools, churches and factories use our crystalline metal bells in preference to all others.

We allow sixty days' trial on every Crystalline Metal Bell. We expect you to give it a thorough trial, compare it in tone, volume and quality with composition bells of any other make, and if you find any reason to be dissatisfied, you can return the bell to us at our expense and we will return to you every cent you paid us for it and freight charges.

For Farm Bells See Page 1033.

We guarantee these bells for five years against breakage, and should any piece or part break through defect in material or workmanship, we will furnish a new piece or part to replace the broken part, or, if necessary, we will furnish an entirely new bell free of charge. When you buy a bell from us we guarantee absolute satisfaction, protect you against defect, save from one-fourth to one-half in price and give you greater value than you can possibly obtain elsewhere.

Our schoolhouse, factory and church bells are all of the same general design. They differ only in size and in the fact that our 44 and 48-inch bells are mounted on indestructible roller bearings. These bearings enable one person to ring our largest bells with as great ease and regularity as a small bell can be rung. Bells 24 inches and larger are fitted with our improved springs and clapper, which insure a full stroke of the clapper without the possibility of a second stroke. Iron rope wheels are furnished with 20 to 36-inch bells and sectional wood rope wheels with 38 to 48-inch bells. A rolling hammer is furnished with church bells. Weights and prices are for the bells complete with frame, wheel and wood sills. Shipped from factory in Central Ohio.

Rev. L. Epperson, Pastor Tabernacle Baptist Church, Buxton, Iowa, says: The Crystalline Metal Bell gives perfect satisfaction and is in every respect all you claim for it.

Kenwood Stump Pullers

We offer the most complete line of high class stump pulling machinery ever placed on the market, and our low prices will prove a revelation to any buyer. No stump puller will clear your lands so quickly, so satisfactorily and at such a small cost, not only for the machine itself, but also for labor, as will the Kenwood. We have sold them for years and thousands are in satisfactory use. In our Special Stump Puller Circular we not only price, illustrate and describe our complete line of stump pullers, multiplying power pulleys, cables, land tube ups, stump and root hooks, etc., but we give you the most expert advice as to the style and size of machine and attachments required to do your work. We also show large illustrations of the machines at work in different parts of the country and publish many letters from users of Kenwood Stump Pullers, telling of the wonderful feats of stump pulling accomplished with them. **Send for this free circular.** Do not even consider the purchase of any stump puller until you receive and read it. **We can save you big money** and our liberal trial offer protects you against any possible loss or disappointment and makes the Kenwood the best and safest, as well as the cheapest, for you to buy.

EIGHT STYLES AND SIZES.

Strongest and most powerful. Easiest and safest to handle. Do more work and better work than others, regardless of price.

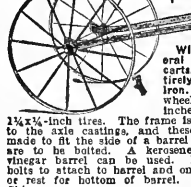
PRICES $15.75 AND UP

SEND FOR OUR FREE STUMP PULLER CIRCULAR.

E. W. Annis, Twin Falls, Idaho, says: I like the Kenwood Stump Puller better any I have seen. I would pull a tree in five minutes' time. Have pulled stumps from 2½ feet in diameter. My machine cost me $91.25 laid down here. One of my neighbors has machine which cost him $300.00 and he can't do the work I did. I used my machine years and then sold it for $70.00.

Kenwood Steel Frame Barrel Cart.

Reduced to $2.78



Will outlast several wood frame carts. Made entirely of steel and iron. The steel wheels are 36 inches high, with 1¾x1¾-inch tires. The frame is bolted solidly to the axle castings, and these castings are made to fit the side of a barrel to which they are to be bolted. A kerosene, molasses or vinegar barrel can be used. Price includes bolts to attach to barrel and one iron brace for rest for bottom of barrel. Shipped from Chicago.

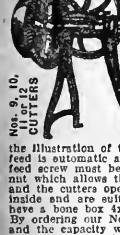
$8.85 and up.



Nos. 9, 10, 11 or 12 CUTTERS

We guarantee them to be the very best, most durable, easiest running and most satisfactory green bone cutters made, and that with the same amount of power applied they will cut more green bone than any other machine made. Cut dry or green bones with the meat on just as they come from the butcher shop, without clogging, and fine enough for chicks four days old. Nos. 9, 10, 11 and 12 machines have three solid tool steel knives. Two are corrugated and these cut grooves into the end of the bone as it is fed up to them. A straight knife follows, which makes a clean cut through the meat and grinds and splits the stringy texture of the cut bone, which other cutters produce. Nos. 9, 10, 11 and 12 machines mounted on low legs, as shown in the illustration of the No. 10 machine, or on high legs, as above illustration. The feed is automatic and adjustable. Nos. 9 and 11 have a solid nut on the feed screw and the feed screw must be turned back when filling the hone box, but Nos. 10 and 12 have a split nut which allows the feed screw to be pulled back instantly. Balance wheels are very heavy and the cutters operate easily. The Nos. 9 and 10 cutters have 3½x3½11 inches inside and are suitable for a flock of from 100 to 150 fowls. The Nos. 11 and 12 cutters have a bone box 4x3x13 inches inside and are suitable for a flock of from 200 to 250 fowls. By ordering our No. 12H3236 pulley with either of these machines they can be run by power and the capacity will be fully double what it is by hand. No. 13 machines have bone box 4x4x20 inches inside. They have three corrugated and one straight knife and when run by power are suitable for a flock of 1,500 fowls. When run by hand, being geared 4 to 1, they can easily and are suitable for a flock of 400. Low legs and adjustable automatic feed and a safety device which stops the feed if iron or other metal gets in bone box. No. 13H has balance wheel and handle for hand use only. No. 13HP has balance wheel, handle and 12x4-inch pulley and is for hand or power. No. 13P has no balance wheel or handle, but has 12x4-inch and loose pulleys and is for power only. Shipped from factory in Western Pennsylvania.

No. 0B DANDY GREEN BONE CUTTER, $6.90.

Back geared, operated by handle on rim of large balance wheel; suitable for a flock of 50 to 75 fowls. Made with a standard and is to be fastened to a bench. The bone box is 3¼x4⅝x0 inches inside. It is fed by a hand feed screw which has a split nut that swings entirely out of the way when filling bone box. Cutter has one straight and two corrugated knives. Guaranteed better than any other cutter of similar size or price. Shipped from factory in Western Pennsylvania.

No. 32H3200 No. 0B Bone Cutter. Weight, 75 pounds. Price.....$6.90

HUMPHREY'S CLOVER CUTTERS, $7.45 AND $9.45.

A rapid, easy turning cutter which will reduce clover to ½-inch lengths for feeding poultry. The cutting knife has five edges and being geared 8 to 1, gives forty cuts to each revolution of the fly wheel, while the spring in clover cutter gives ten or twelve cuts to uniform lengths. The reversible table knife, as well as the circular cutter, is made of the hardest white iron cast on a chill, harder than you could possibly temper steel. Made with stand or legs, and as a bench machine without legs. Shipped from factory in Northern Illinois.

No. 32H3125 Clover Cutter without stand. Wt., 85 lbs. Price.$7.45
No. 32H3126 Clover Cutter with stand. Wt., 108 lbs. Price. 9.45

Stutzman Fruit Evaporators.

$16.50

For drying and evaporating all kinds of fruits, berries, vegetables, corn, etc. Made of galvanized steel, fireproof and warranted in every respect. Have equal currents of hot and dry air passing from bottom to top. With proper care will produce clean, white fruit and will give perfect satisfaction. The stoves have heavy cast iron ends. Grate, pipe and instructions for evaporating are furnished with each stove. Size No. 2 is about 4 feet 6 inches high, 30 inches wide, 24 inches deep and has 16 galvanized wire cloth trays, each 12x24 inches. Will take in 22-inch wood. Has double doors. Capacity, 3 to 4 bushels per day. Size No. 3 is about 5 feet 2 inches high, 32 inches wide, 24 inches deep and has 20 galvanized wire cloth trays, each 12x24 inches. Will take in 22-inch wood. Has double doors. Capacity, 4 to 5 bushels per day. Especially adapted to green apples. Shipped from factory in Northern Indiana.

$8.85 FOR 80-EGG SIZE. Imperial Double Wall Incubators $8.85 FOR 80-EGG SIZE.

New Styles, New Sizes, Greater Values — Self Regulating, Self Ventilating, Self Moistening.
SUCCESSFUL IN ALL CLIMATES. HIGHEST AWARD AT SIX SUCCESSIVE WORLD'S FAIRS.

B. Kiser, Arondo, Wash., says: Talk about hatching chickens. Got ninety-two lively, lively chicks out of ninety-six eggs in a machine set in a moist cellar. Your machine beats anything in this part of the country.

M. Hundley, Spencer, Va., says: The Imperial Incubator is one of the best on the market. I hatched 125 chicks out of 150 eggs the first time.

Wyman, Southport, La., says: For three years your incubator has given wonderful results. Six days ago I had a 90 per cent hatch.

Erickson, Sandy, Utah, says: Your incubator has given entire satisfaction. The first time I hatched fifty chicks from sixty eggs and raised every one with your brooder, not one dying.

F. Frain, Pekegama, Ore., says: The first time I used the Imperial Incubator I hatched ninety-two chicks from 107 eggs, my first experience. Saved at least $7.90.

R. Beck, Harvard, Ill., says: The Imperial Incubator is safe, simple and convenient. Cannot find one fault with it. Does better work than any other in this locality, and burns less oil.

A. H. Normar, Concord, Tenn., says: The Imperial Brooder is O. K. Have raised three broods and have not lost a chick. I can put seventy eggs in your 65-egg incubator and it never fails to work.

J. L. Duckworth, Magee, Miss., says: The 120-egg Imperial Incubator is as good as it can be made. Had five hatches with the best success. It is simple and easy to handle and economical with oil. Have put as many as 135 eggs in it.

Bernard Devar, Coal City, Ill., says: Your Imperial Incubator certainly does run fine. It is the best on the market. Got 162 chicks out of 180 eggs the first time, 143 chicks out of 160, eggs the second hatch.

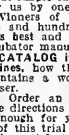
SIXTY DAYS' TRIAL

GUARANTEED TO HATCH EVERY FRESH AND FERTILE EGG, TO BURN LESS OIL AND TO PRODUCE STRONGER CHICKS THAN ANY OTHER INCUBATOR MADE.

PERFECT HATCHES ASSURED if you buy an Imperial Incubator and follow the plain and simple directions we send free with every machine. No experience necessary, even a child can operate them; just give the incubator fresh, fertile eggs, follow our simple instructions and the machine will do the rest. Made expressly for us by one of the oldest and largest incubator makers in the world. Winners of highest awards at Brussels, Chicago, Paris, Omaha and St. Louis World's Fairs and hundreds of other expositions. For thirty years these incubators have been the world's best and they always will be because they are made by the most expert and progressive incubator manufacturers in the business.

SEND FOR OUR FREE INCUBATOR CATALOG if you wish to learn more about these wonderful hatching machines, how they are made, why they are the best, etc. This book also contains a world of information interesting and valuable to every poultry raiser.

OUR SIXTY DAYS' TRIAL OFFER. Order an Imperial Incubator and use it according to our plain and simple directions for sixty days from the date you receive it. This gives time enough for you to bring off at least two hatches, and at the expiration of this trial period you are not satisfied that the Imperial is in every way the satisfactory machine we say it is; the best incubator you ever saw or heard of, return it to us at our expense and we will return you the price you paid us for the incubator, together with freight charges.



Imperial Incubators are made with either hot air or hot water heating systems. Heating pipes, etc., of the hot air machines are made of steel. Water tanks of the hot water machines are made of **heavy 14-ounce cold rolled copper and will not rust out.** Incubator cases are made of selected bone dry cypress lumber, proof against moisture and atmospheric changes and warranted not to crack nor warp. Walls are double and filled or insulated with the best non-heat conducting packing known. Doors are also packed with alternating layers of wood and fiber. Doors are double, close against perfect fitting jambs and have glass fronts so you can see all parts of the egg chamber without opening. **Egg Trays** are strongly made, have screen bottoms, and our patent turning racks which turn all eggs at one operation. The 80 and 120-egg incubators have one tray, other sizes have two. **Nursery space** under egg trays accommodates young chicks as hatched. Lamp bowls are heavy galvanized steel with metal chimney. Burners are highest grade. The fluid pressure bulb regulator is reliable and accurate at all times and indestructible. It consists of a compound arrangement of levers, operated by a metal disc filled with a fluid which expands at a temperature just under 103 degrees and regulates the temperature of the egg chamber. Thermometers are the best, made especially for incubating purposes. They are thoroughly tested and seasoned for one year before using. Other parts are steel, and are enclosed in the incubator case. All sizes rigidly mounted on nicely turned legs. **Capacities** given are the number of average size hen's eggs the machine will hold when patent turning rack is not used. When turning rack is used, capacities are reduced about one-third. Machines are nicely finished in the natural wood and highly varnished. Price is for the complete incubator, ready to operate. All you need supply is the oil for fuel, and the eggs. Our simple directions tell how to test the eggs as well as how to run the incubator. Follow them and we guarantee the Imperial Incubator to hatch every fresh and fertile egg and to produce stronger, healthier chicks than any other incubator made. Shipped from factory in Western Illinois.

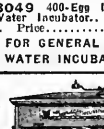
120-EGG AND 220-EGG SIZES ARE THE BEST FOR GENERAL USE.
WE RECOMMEND THE PURCHASE OF A HOT WATER INCUBATOR.

$4.65 WYANDOTTE INCUBATOR



THE BEST SINGLE WALL INCUBATOR MADE.

HOLDS 65 EGGS

Designed especially for beginners and small poultry raisers. Made in one size only and intended for use in a room where the external temperature is practically even at all times and when properly operated will hatch just as large a percentage of eggs as any incubator made. If a small incubator of this character will meet your requirements, this machine represents the best value you can obtain anywhere, but we recommend that you purchase an Imperial Double Wall Incubator because you will find it possible to operate it with better success in rooms where the temperature is subject to change. We also recommend that you use a 120-egg or larger incubator because it will cost you no more for fuel than a small one and you can hatch a great many more chicks with practically no more labor and expense than you would be put to with a machine of less capacity. The Wyandotte is positively the best single wall machine on the market; material, workmenship and finish are first class. The case is made of thoroughly seasoned, bone dry lumber which will not warp nor crack and is smooth dressed, well varnished and finished in natural wood color. It is mounted on nicely turned legs. Has ventilated bottom and the top is insulated with best non-heat conducting packing. The door is single, has double glass and closes against felt jambs. Egg tray is well made and has screen bottom; a nursery space below it accommodates young chicks as hatched. Regulator is the same as used on our Imperial Incubators. Heater jacket and lamp bowls are heavy galvanized steel. Heater pipes are steel. Hot water tanks on the hot water machines are heavy cold rolled copper. Price includes a high grade thoroughly tested thermometer, an egg tester and complete instruction book. Shipped from factory in Western Illinois.

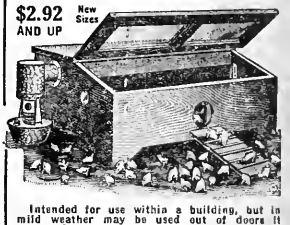
No. 32H3036 65-Egg Wyandotte Hot Water Incubator. Wt., 55 lbs. Price **6.40**

Wyandotte Indoor Brooders.

$2.92 AND UP New Sizes



Intended for use within a building, but in mild weather may be used out of doors if protected by a shed roof. Built on the "mother hen" plan, that is, the heating apparatus is in the top, as it should be. These brooders are divided into two compartments by a curtain of heavy woolen cloth; one compartment is about fifteen degrees warmer than the other, and the chicks can go to or from the heat at will. Pure air circulation is perfect and the brooders maintain an even temperature. The hot air and hot water brooders are identical in construction, except that the hot air tanks are steel while the hot water tanks and reservoir are made of copper. Fumes from the lamp cannot enter the brooding chamber, and lamps are placed and protected so that they are absolutely safe under all conditions. Lamp bowl and exposed parts of heater are heavy galvanized steel. These brooders have single door with glass panel, easy to clean and furnish plenty of light. While these machines will give perfect satisfaction when used indoors, we recommend that you select an outdoor brooder because it can be used with equal success indoors or out of doors. Every poultry raiser should have one or more brooders. They are absolutely necessary in order to be experimental, or successful. You cannot always intrust your chicks to the care of a hen with safety, for she is apt to abandon and neglect them and the increased number of chicks you will raise by using a brooder will more than pay for the machine. The brooder method is the only successful way in which to raise young chicks. Price includes a high grade thermometer, a runway, an instruction book and all attachments. Shipped from factory in Western Illinois.

No. 32H3050 60-Chick Wyandotte Hot Air Brooder. Wt., 55 lbs. Price **$2.92**

Peerless Root Cutters,

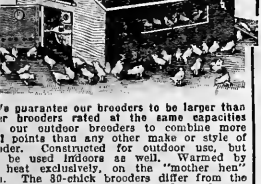
$6.85

An exceptionally high grade and efficient machine. Will cut all kinds of roots and vegetables to be fed to stock. Is fitted with small half circle steel knives. Runs easily, feeds itself, separates the dirt from the roots before reaching the knives and will not choke under any circumstances. Made in two ways. **The No. 1 Cutter,** with crank only, with a capacity of 30 to 50 bushels an hour. **The No. 2 Cutter,** with both crank and pulley, which, when run by power, will easily cut from 60 to 80 bushels an hour. Shipped from factory in Southern Michigan.

No. 32H1395 No. 1 Root Cutter. Wt., 120 lbs. Price **$6.85**
No. 32H1396 No. 2 Root Cutter. Wt., 135 lbs. Price **$7.85**

perial Outdoor Brooders.

.13 New Sizes



's guarantee our brooders to be larger than r brooders rated at the same capacities our outdoor brooders to combine more l points than any other make or style of der. Constructed for outdoor use, but be used indoors as well. Warmed by heat exclusively on the "mother hen" . The 80-chick brooders differ from the er sizes. They have but one forward comment and single door in the roof, like the ndotte Brooder. 120-chick brooders and er have a center compartment partitioned from the outer compartments by heavy den cloth curtains; the temperature of the er compartment is about fifteen degrees mer than the outer ones, and the chicks go to or from the heat at will. The heater lamp is placed within a metal lined chamber, thoroughly protected from wind and ther, easy to get at and arranged so that fumes cannot enter the brooding chamber. e air circulation is perfect and the brood- maintain an even temperature. The roof covered with heavy galvanized sheet steel, the entire machine is nicely painted. The s in the front affords abundance of light doors are arranged so the brooder can be cleaned, and either door may be opened set in sunlight and fresh air. Tanks of hot air machines are made of steel, but hot water tanks and reservoirs of the hot air machines are made of copper. The lamp l, heater jacket and lining of the lamp nber are made of heavy galvanized steel. poultry raiser should have one or more eders. You cannot depend upon the hen afely rear the chicks intrusted to her care. is apt to abandon and neglect them, and chicks you would raise by hand or brooder. The most successful poultry raisers ywhere use our brooders with most profit- le results. Price includes a high-grade ther- meter, a runway, an instruction book and attachments. Illustration shows a 120- k brooder. Shipped from factory in West- rn Illinois.

THE HIGHEST STANDARD OF WINDMILL QUALITY.

$13.50 AND UP Kenwood Ball Bearing Windmill

THE EASIEST RUNNING, LONGEST LASTING AND MO

HONESTLY CONSTRUCTED WINDMILLS MADE

Self Governing, Adjustable Stroke, Large Self Feeding Waterproof Oil Cups. High Grade Babbitt Bearings, Double Acting. Every Bolt ALL GALVANIZING DONE AFTER COMPLETION. Surface and Edges, Joints, Rivets, Bolts and Nuts Thoroughly Galvanized. That's Why Kenwood Windmills are More Rustproof Than Others.

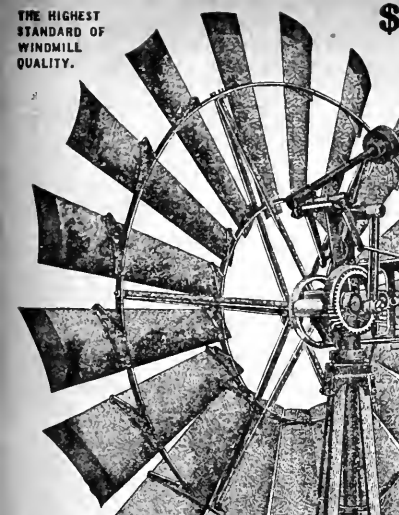

ILLUSTRATION SHOWS A BACK GEARED STEEL WINDMILL.

WE GUARANTEE

every Kenwood Windmill when properly erected and cared for according to the instructions we furnish to run in lighter winds, endure as hard service and to prove to be as durable and accomplish as much work as any other make of windmill of corresponding size and style, regardless of price. We also guarantee every piece and part of our windmills and towers to be free from defect, either in material or workmanship, and we will replace free of all charge any part which may break or give out on account of such defect. This guarantee is in full force and effect for one year from date you receive the mill or tower.

THE BEST WINDMILL FOR YOU TO BUY

Is the Kenwood, not only because our prices are about one-half what others ask for any of the standard makes of windmills, but because it is positively the best windmill made, the most strongly built, the most honestly constructed, the easiest running, the most efficient, the most rustproof and the best wearing windmill ever produced. Aside from this, it is the easiest windmill to erect. You need not go to the expense of hiring expert help to put up these windmills. You can do this work yourself with but little assistance and just as well as any windmill expert could do it. We have devoted years to the sale of windmills and have found out how to produce mills which even in the hands of the most inexperienced will go together easily and properly. We believe that ninety-nine out of every one hundred farmers can easily put together and erect our mills and towers without the aid of directions of any kind, but to insure our customers against any difficulties in this work, we have prepared complete directions, explaining in the simplest manner possible how to quickly, economically and correctly erect Kenwood windmills and towers. **We send a copy of these simple directions with every windmill or tower** and we guarantee them to make it possible for you to erect the mill or tower as easily and quickly as it would be possible for any expert to erect it. We tell you where every piece or part of the mill or tower belongs, how you should place it in position and the safest and economical way for you to raise a mill and tower after it has been put together. We have received hundreds of letters from customers telling us how easy they found it to erect our mills and how much money they saved by not being compelled to employ a windmill expert as they would have had to do with other mills. We can honestly say that in all our years in the windmill business we have never known of anyone who has not found it perfectly easy to erect our mills and towers. You can safely order the Kenwood because, aside from saving you about one-half, we will give you a better mill than you could possibly buy elsewhere, one which will find easier to erect, lighter running, longer lasting, handsomer and in every way more satisfactory than any other mill at any price.

WHY THE KENWOOD IS THE BEST.

They are made heavy enough and strong enough to withstand great wind strain and usage, the engine heads are the best material and are thoroughly braced. The mill are heavier than will be found in most of the highest priced windmills on the market. Our 10-foot windmill weighs from 150 to 200 pounds than the majority of 10-foot mills of prominent makes. The heavier the mill, the more it costs to make, and while we could make money and still further outdistance competition by having our windmills made lighter, we refuse to sacrifice strength or quality for price. All bearings are of ample size to give strength and solidity, and are lined with highest grade babbitt metal, which experience has proven to be the best for the purpose. Large self feeding waterproof oil cups insure ample and positive lubrication with but occasional filling. Wind wheel hubs have ball bearings, which reduce the end thrust friction, making the mill run with the lightest of winds. Turntables also have ball bearings, with the result that the mill turns more quickly when the wind changes direction. The governor is self acting and reliable under all conditions. It is of the weight and lever type. No springs to weaken nor break. In high winds the mill is automatically thrown out of gear; as the wind subsides it goes back into gear of its own accord. The governor does it all, no assistance from you necessary. Aside from being the heaviest, strongest, best made and easiest running mill on the market, the Kenwood is the most handsomely finished and attractive of all windmills. The wind wheel, rudder, all braces and every bolt and nut on Kenwood Steel Windmills are heavily galvanized and the wind wheel sails and rudder sheets are tipped with a brilliant red. All galvanizing is done after each part is completed, making it impossible for water to get at the rivets or into the joints to rust them away. The Kenwood is one of very few mills which are made in this way and this is one reason why they are so much longer lived than others. We have sold these windmills for many years; they are made for us by one of the most prominent windmill manufacturers in the United States and if you are at all familiar with windmills you will recognize in the Kenwood a mill for which, if you were to buy from the manufacturers or their agents, under their own name, you would pay at least double our price. These manufacturers have for years been known as the most expert windmill makers in the world.

IF YOU WANT AN OUTFIT LIKE THIS SEND FOR OUR FREE WINDMILL CATALOG.

YOUR NAME ON THE RUDDER FREE.

If you so desire, we will stencil your name on both sides of the rudder without charge, or if you wish we will send the windmill with a plain rudder, or we will leave off the brand Kenwood and stencil your name and the name of your town on both sides of the rudder. We often do this for dealers who sell and recommend to you with your name on the rudder, be sure to say so in your order and carefully print your initials and name so as to prevent mistakes.

WRITE OUR WINDMILL EXPERT

If you cannot make up a suitable windmill outfit from the goods we list in this catalog, write us stating exactly what you want. Our line of windmill goods is the most complete in the United States. We can supply you with any kind or size of a windmill outfit you want, a Suburban or Combination Outfit with tank in the tower, deep well and irrigation outfits, power windmill outfits, 14-foot and 18-foot windmills, extra heavy towers and tank structures. In fact, anything and everything in the windmill line. Write for our free **Special Windmill Catalog.** Our profusely illustrated special catalog will be sent you, offering the widest selection and containing complete information on this important subject. If you tell us the kind and depth of well you have, the work you want to do, etc., our windmill expert will submit to you an estimate of just what you require and quote you the lowest prices you can obtain anywhere on windmills, towers, tanks, pumps, cylinders, pipe, fittings, etc. Address, **Windmill Expert, care of Sears, Roebuck and Co., Chicago, Ill.**

OUR WINDMILLS ARE MADE IN THREE STYLES:

The back geared steel windmills, as shown in the large illustration, direct stroke steel windmills, and direct stroke wood windmills. The back geared steel and direct stroke steel windmills differ only in the gearing, length of stroke, in the curvature of the wind wheel sails and in that the direct stroke mill has an auxiliary side rudder. OUR DIRECT STROKE WOOD WINDMILLS are the same as the direct stroke steel mills with the exception that the wind wheel and rudder are of wood, painted white, with bright red border. They are great favorites in the Southwest and along the salt water coast. Prices are for the windmills complete and include pump pole, pull-out wire, reeling gear, bed plate and truing spider for a mill which the mill is to be attached to a tower or mast, but price does not include a tower or platform. When windmill is ordered without tower, we will ship it with bed plate and truing spider for a four-post wood tower and with pump pole and pull-out wire for a tower 40 feet high, unless otherwise ordered. We send complete instructions for erecting windmills and towers and for building wood towers. Shipped from factory in Northeastern Indiana.

The Kenwood Alway Satisfies

Mrs. N. Peck, Ossian, Iowa, says: The Kenw windmill bought two and one-half years ago has cost one cent for repairs. We had a terrible w storm here which ruined half of the mills around but the Kenwood was not hurt a bit.

W. L. Judkins, Chadron, Neb., says: I never h a piece of machinery around that has given be satisfaction than the Kenwood windmill. It forces water up a grade of 12 feet for a distance of 200 f to the barn. I could not ask for greater value my money.

A. C. Van Velzer, Houston, Texas, says: The K wood windmill and tower are perfectly satisfactory. saved about $16.00 on original cost. A common labo and myself erected it one Sunday afternoon as rec tion by following your detailed instructions, sav about $10.00 on that item.

Charles H. Burnham, Touisset, Mass., says: I h repaired and erected windmills for twelve years, have never found a windmill quite as simple as Kenwood. It has no complicated parts. None compete with it for ease of operation, quietness easy pumping in a gale. The governor takes care it perfectly. We erected and had the mill ready operate in 48 hours after receipt. We saved ab $27.00 on it.

F. J. Potter, Holley, N. Y., orders a Kenw Windmill and says: This makes five Kenwood wi mills I have bought of you in the past three yea We had a gale here which blew down barns hundreds of trees, unroofed schoolhouses and h down all kinds of windmills, including all lead makes, but all the Kenwoods are safe and sound. am ordering this mill for a neighbor whose mill destroyed, and who is now going to have a Kenwo which I am thoroughly satisfied is the best and m complete windmill on the market, regardless of pr

KENWOOD FOUR-POST WINDMILL TOWER

GALVANIZED AFTER COMPLETION.

$13.48 AND UP

Our Steel Towers are of the strongest possible construction. They are made of the best of materials and are properly proportioned and braced in every way. Every corner post, brace, brace, girth, bolt and nut **is heavily galvanized after all cutting, punching and other machine work is done.** This most important feature insures every part of the steel being covered with non-rusting metal and makes our towers more rustproof than others. Our towers are braced diagonally as well as crosswise at every corner post joint and they are so strong and rigid that when properly anchored they cannot be blown down. No. 1 towers have one set of bands for each 12 feet of their height, also a band at the platform and two bands above the platform which serve as steps. No. 1 towers are intended for use with 8 and 10-foot windmills, but in view of the small difference in price we recommend that a No. 2 tower be used with an 8-foot windmill. Nos. 2 and 3 towers have bands 8 feet apart for the entire height of the tower, also a band at the platform and two extra bands above the platform which serve as steps. No. 2 towers are suitable for 8-foot and 10-foot windmills, but we recommend that you use a No. 3 tower for 10-foot windmills when elevated more than 40 feet. No. 3 towers are suitable for 10-foot or 12-foot windmills at any height. Our towers are full height; every corner post is 10 feet 6 inches long, the extra 6 inches being allowed for the lap of one post over the one below it. This feature makes a stronger and better finished tower and also serves to prevent water from running into the corner post joints. Illustration shows a 40-foot No. 2 or No. 3 tower. Prices are for towers complete with platform, ladder, rod guides, anchor plates and anchor plates and building instructions for erecting, but does not include windmill, bed plate, truing spider, pump pole, pull-out wire nor reeling gear, these being parts of the windmill.

Shipped from fact in Northeastern Indiana.

BINDER TWINE. Write for Our Low Prices for 1912 on BINDER TWINE.

STANDARD GALVANIZED STEEL TANKS

BIG REDUCTION IN PRICES

LOCK SEAM

We guarantee our STEEL TANKS to be the best it is possible for anyone to produce and our prices to be lower than any other concern can make on tanks of as high quality. Order a tank from us with the understanding that it must be exactly as we represent it or return it at our expense and we will return your money and freight charges. Prompt shipment of all sizes.

Our Standard steel tanks are made of the very best quality of United States Standard No. 20-gauge galvanized sheet steel or heavier. No not buy a tank made of No. 22 or 24-gauge steel. Such tanks are too light to give good service and will likely rust out or break down during the first season. Workmanship on our tanks is absolutely first class. All seams are lock seams and are carefully soldered, edges coming in contact with the water. Tops are bound with angle steel. Bottoms of all tanks over 1 foot in height are secured between two pieces of flat steel or are bound with angle steel, depending on size and shape of the tank; see illustrations. Sides are firmly braced (when size and shape require it) with angle steel bars. Round end, square end and oval tanks 6 feet or longer and the larger sizes of round tanks have angle steel bars across the top, the number of bars depending on size of tank.

Our Standard tanks are regularly shipped set up and can be used without further handling if so ordered, and when such tanks weigh much over 200 pounds and are to be shipped over 500 miles or when any sizes of such tanks which weigh 125 pounds or more are to be shipped over 1,000 miles, we advise you to order them shipped knocked down, because you will then save in freight charges more than it should cost you to put the tanks together.

When tanks are shipped knocked down, all holes are punched, every part is fitted together at the factory and sufficient solder and rivets are sent with which to put the tanks together. Capacities shown in barrels are based on 31½ gallons to the barrel.

We will not cut pipe connection holes in steel tanks. You can easily cut holes exactly where you want them, by using a cold chisel and cutting against a block of hardwood. We cannot accept the return of tanks in which holes have been cut. Order pipe connections if you wish to connect pipes to tank.

CONNECTIONS for STEEL TANKS.

We do not cut pipe connection holes in steel tanks, because it is a difficult matter for anyone to tell until they receive their tank just where it is best to cut the hole. You can easily cut the hole by using a cold chisel and cutting against a block of hardwood. Our galvanized pipe connections consist of one close nipple, two leather washers, two lock nuts, and one cap, to close the pipe hole when you wish. Shipped tanks from factory in Southwestern Michigan.

4382	40	10	4	2½	19	225	11.42

$17.90 ROUND STORAGE TANKS.

Sizes Nos. A23, A8, A24 and A25 are made of No. 20-gauge galvanized steel, but can be made of No. 18-gauge at prices one-fifth higher, or of No. 16-gauge at prices two-fifths higher. Size No. A12 is made of No. 18-gauge steel, but can be made of No. 16-gauge at a price one-sixth higher. Sizes Nos. A18, A26 and A21 are made of No. 16-gauge steel, because lighter gauge is not strong enough for such large tanks. When comparing prices, don't forget to compare the gauge of steel of which the tanks are made. Round tanks are always shipped knocked down because they are too large to go into the door of a freight car. Shipped knocked down from factory in Southwestern Michigan.

No.	Size	Gauge	Diam., feet	Depth, feet	Capacity, bbls.	Wt., lbs.	Price

DIPPING TANKS. $6.69

For dipping sheep and hogs, as a preventive of contagious diseases. They are placed in the ground with top level with the surface. The animals can then be driven in and out of the tank. Made of No. 20-gauge galvanized steel, but can be made of No. 18-gauge at prices one-fifth higher. Always shipped set up. The long incline of these tanks allows the sheep or hogs to walk out easily. All sizes are 2 feet wide at top and 1 foot wide at bottom, and are furnished with end ladder. Shipped set up from factory in Southwestern Michigan.

No.	Size	Length, Top, feet	Bottom, feet	Height, feet	Weight, pounds	Price
32H4430	B1	6	3	3	120	$ 6.69
32H4431	B2	8	5	3	155	8.90

32H4434	B6	10	6	4	230	12.95

WAGON TANKS, $7.05.

The top rim of this tank is fitted with 1x1¼-inch heavy galvanized angle steel closely riveted, over which the cover is flanged and on top of the rim of the cover is riveted a strip of ⅜x1¼-inch band steel, which reinforces the cover. Others do not make their tanks in this way and this is why our wagon tanks outlast all others. A three-quarter partition is fitted across the center of 8-foot tanks, and two partitions fitted in 10-foot tanks. These partitions serve the double purpose of splash boards and braces and give our tanks strength not possessed by cheaply constructed ones. Made of No. 20-gauge galvanized steel, but will make of No. 18-gauge at prices one-fifth higher. All made 2 feet high, and with water tight top, having 14-inch round manhole. Have 1-inch pipe connection in rear end. Used on any wagon by laying board on the wagon gear. Capacity is not quite as much as shown in the table, as no allowance has been made for corners. Shipped set up from factory in Southwestern Michigan.

No.	Size	Length, feet	Width, feet	Height, feet	Capacity, barrels	Weight, pounds	Price
32H4440	E1	6	2	2	5¾	120	$ 7.05

32H4443	E4	8	3	2	12	190	12.00
32H4444	E5	10	3	2	14	235	13.62

$19.15 THRESHER TANKS.

Made of No. 20-gauge galvanized steel. Will make of No. 18-gauge at prices one-fifth higher. Trusses are heavy angle steel and entire tank is built far in excess of necessary strength. Seams are double locked. Fuel box large and its bottom is lined with 1-inch plank. Rear end of tank has a 14-inch round manhole. Has 1-inch feed pipe connection in the bottom between trusses. Just wide enough to fit a 38-inch bolster, but you can take place of 2x4-inch timber to each side of each truss to make fit a 42-inch bolster. A stationary metal bulkhead or shush board secured to fastenings on inside walls which stays the water against sudden movement and supports the tank against outward pressure. Price does not include trucks. Shipped set up from factory in Northern Indiana.

$5.98 WOOD TANKS.

Made of best Louisiana Cypress. The stock is free from unsound sap and unsound knots and is even of way suitable for tank purposes. Prices are for tanks made of 2-inch Louisiana cypress. We can furnish these tanks made of 2-inch Louisiana cypress at prices three-tenths higher than those shown. We advise that a tank be made out of 2-inch stock when the bottom is 8 feet or more in diameter. The 1½-inch stock is dressed to about 1⅜ inches thick and the 2-inch stock is dressed to about 1⅞ inches thick. Tanks up to 12 feet high are called stock tanks; tanks over this height are called storage or cistern tanks. Furnished with flat bands and adjustable draw hoops. Will furnish with round hoops at the price if so ordered. Always shipped knocked down. Shipped from factories in Northern Indiana.

WESTERN SPECIAL GALVANIZED STEEL TANKS SHIPPED FROM FACTORY NEAR OMAHA, NEB.

While these tanks, as indicated in illustration, differ slightly in style of construction, they are of the same high quality as our Standard steel tanks and we guarantee them to give perfect satisfaction. This style of tank is very popular in western states and on account of the favorable location of our factory can be shipped to western points at a very low rate of freight. Prices here quoted are for tanks made of United States Standard 20-gauge galvanized sheet steel, but will furnish made of 18-gauge steel at prices three-tenths higher. Top rims are formed of a piece of steel pipe around which the top edges of the tanks are rolled, making rounded tops which cannot possibly cause injury to stock. Bottoms are securely bound with steel angles and all seams riveted, soldered and rustproof. These tanks are regularly shipped set up, but if so ordered we will ship knocked down. Prices on other sizes and styles quoted on application. F. O. B. factory near Omaha, Neb.

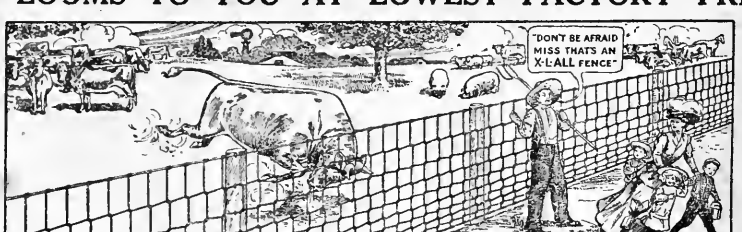
X-L-ALL SQUARE MESH FENCING — WOVEN WIRE FENCING — HARVA DIAMOND M FENCIN

TWENTY-SEVEN STYLES AND HEIGHTS. DIRECT FROM OUR LOOMS TO YOU AT LOWEST FACTORY PRICES

HIGHEST IN QUALITY. LOWEST IN PRICE.

That's Why We Sell More Wire Fencing Direct to the User Than Any Other Concern in the World.



ABOVE ILLUSTRATION SHOWS OUR No. 32H5211 X-L-ALL FARM FENCING.

WE GUARANT

To Furnish You Best Made, the Eas Stretching, Longest Lasting W Fencing You E Used and to Save Money on Ev Order.

YOU BUY DIRECT FROM THE MANUFACTURERS when you buy wire fencing from us and at a price which represents the actual cost to produce, with but our one profit added. We own and operate at Knightstown, Indiana, one of the largest and most perfectly equipped fencing factories in the country. There we make every rod of fencing we sell, and we sell every rod we make direct to our hundreds of thousands of customers at lowest factory prices. We cut out the middlemen and save you the jobbers', dealers', and agents' profits, giving you the highest quality, easiest stretching, and longest lasting fencing you ever used for a less price than your dealer pays for fencing which for height, strength, style and durability cannot compare with ours. Our line of fencing is complete. We manufacture an assortment of styles and sizes, among which you cannot fail to find the exact style or height of fencing you need. Send us a trial order. Our fencing will prove to you the truth of our claims and make you one of our steady customers.

WE GUARANTEE THE QUALITY of wire used in our fencing to be the best it is possible to obtain and every wire to be full U. S. standard gauge. We do not use undersize wire. Look well to this before buying fencing. See that you get No. 9 wire when you pay for it, not No. 9½, and No. 12 when you pay for it, not No. 12½, and so on. We state in our descriptions the exact sizes of wire used and we guarantee every wire to be full size, exactly as described.

WE GUARANTEE THE GALVANIZING of our wire to be the heaviest and best. It is properly applied and will not scale off; for this reason our wire is more rustproof and will withstand the ravages of time longer than others. Do not buy a fence made of poorly galvanized wire. It will soon rust out, give the fence an unsightly appearance and prove to be a short lived though costly fence.

WE GUARANTEE PROMPT SHIPMENT. We own and operate our own wire fencing factory and aim to carry large stocks of fencing ready to ship upon a moment's notice. Since we engaged in the manufacturing of wire fencing this branch of our business has increased to such an extent as to make it necessary for us to erect new buildings and add new machinery year after year, until now our wire fencing plant is one of the largest and best equipped in the world and we are safe in saying that we are in a position to give our customers better service than ever and to favor them with more prompt shipment than any other wire fencing manufacturer in the country.

OUR BIG FENCING FACTORY AT KNIGHTSTOWN, IND.

HERE IS WHERE WE SAVE YOU MONEY. We make every rod of fencing we sell. We cut out the jobbers' and dealers' profits. Our prices to you represent the actual cost to produce, with but our one small profit added.

WE GUARANTEE SAFE DELIVERY of every order you send us. If by chance your shipment should be delayed or lost by the transportation company, we will either return your money or send you another shipment of fencing without charge, whichever you choose.

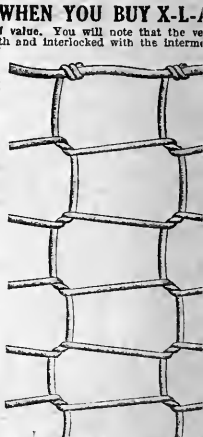
WE GUARANTEE PERFECT SATISFACTION with every rod of fencing you buy from us. We guarantee to furnish you fencing just as described in this catalog, the best it is possible to make, and to fill your order correctly and promptly and to save you money on every order you send us or you may return the fencing to us at our expense and we will return to you the money you paid us for it and freight charges.

COMPARE X-L-ALL FENCING WITH OTHER MAKES. Order a bale of fencing from us, at least enough to make 100 pounds in weight, so that you may obtain every advantage in freight and at the same time order a bale from some other manufacturer or dealer and then compare the two and see which pleases you best. If you are not satisfied that our fencing is the best for you to buy, that it will give you better satisfaction and that you can save money by purchasing from us, we do not ask you to keep our fencing, but to return it to us at our expense and we will return your money, with the freight charges you may have paid. You are the sole judge and if the high quality and superior construction of our fencings do not convince you that we are entitled to your fencing orders, you will not be out one cent.

THE SUPERIOR CONSTRUCTION OF X-L-ALL FENCING is shown in the accompanying illustration of our 33-inch 8-line wire X-L-ALL Fencing. In this illustration the size of wires is necessarily reduced, but the method of weaving is plainly shown. Compare our method of construction with that of any other fencing manufacturer and you will readily appreciate the truth of every claim of superiority we make for X-L-ALL Fencing.

OUR INTERLOCKED STAY is a distinctive feature of X-L-ALL Fencing will be found in no other. Aside from the quality of wire we use, this feature makes X-L-ALL Fencing the best and enables produce it so economically that we can offer it at prices far lower than others are comp to ask for fencing made of as heavy wires.

YOU PAY FOR NO WASTE WIRE WHEN YOU BUY X-L-ALL FENCING. Every pound of fencing is a pound of value. You will note that the ve stay wires are in one continuous length and interlocked with the interme line wires. This enables us to do away with ties of all kinds, thereby effecting a saving of about 2½ inches of wire at every junction of the wires. This saving amounts to from 1 to 5 pounds of wire (depending upon the style and height) in every rod of fencing and enables us to produce a fencing of just as heavy or heavier wires than others use and in every way as strong as it is possible to make a fence, but weighing from 1 to 5 pounds per rod less. You get the benefit of this saving in our low prices.



Our 33-Inch 8-Line Wire X-L-Fencing.

X-L-ALL FENCING IS TRULY A WOVEN WIRE FENCING and (unlike other makes) not merely a series of horizontal and vertical wires held in place by wraps, staples or other devices. It is a closely woven fabric. The intermediate line wires and stay wires are each one continuous length and interlocked so that one wire reinforces the other, making the handsomest, strongest, stiffest and most elastic wire farm fencing ever produced.

YOU CAN DO WITH FEWER POSTS because the stay wires, not the posts, support the line wires. The number of posts you will require depends upon the use to which the fencing is put, but many of our customers set their posts two rods or more apart and find them sufficient.

X-L-ALL FENCING IS HOG TIGHT because the stay wires cannot slip on the line wires, neither can the line wires move up or down on the stay wires. Animals cannot possibly work their way through the meshes of the fencing close enough to hold them when first stretched up. Every wire stays in place just where we put it when the fencing is made.

THE STRAIN IS EVENLY DISTRIBUTED over the entire height of an X-L-ALL Fence. No matter which line wire is subjected to strain, every wire in the fence stands its share and the entire fence springs back into perfect shape when the strain is removed.

NO CUT ENDS EXPOSED TO RUST. Other makes of fencing have cut at every junction of the stay line wires, which rust quickly, giving the fence an unsightly appearance and making it lived. Our interlocked stay overcomes this objectionable feature and also makes it impos for moisture to accumulate at these points and cause the wires to rust out.

X-L-ALL FENCING IS EASILY REPAIRED because if a line wire or wire should break through cident it does not loosen up beyond the second wire and the fence will not sag or los shape until you stretch an opportunity to repair it. It is a simple matter to r broken wires by splicing.

LINE WIRES ARE HEAVILY CRIMPED and provide perfectly for expa or cold. This feature, together with our interlocked stay makes X-L-ALL Fencing self r lating, and gives it an elasticity so that it conforms to all kinds of ground and stretche easily under all conditions. Some manufacturers subject their wire to a short bend or shape crimp in order to attain this object, but this method not only weakens the wire, cracks the galvanizing and makes the fence more susceptible to rust.

Read What Users Say About X-L-ALL Fencing:

R. F. D. No. 44, Clarksville, Mich.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—My last shipment of X-L-ALL Fencing is at hand and all O. K. I knew it would please me before it arrived, because the 40-rod roll I purchased of you about a year ago convinced me of that. I have it along the road, in plain view. My neighbors are interested in it, and when they ask me where I got it, I tell them of Sears, Roebuck and Co. The fence and the price has a striking effect on them and they all say, "Well, that's the kind of fence to buy." I am yours truly for X-L-ALL Fence when more is needed.
Yours truly, MARION RUOT.

Elwell, Mich.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—My X-L-ALL Fencing arrived in good order. I am well pleased with it. It is all that your catalog claims for it and more. Yours truly,
R. S. MILLER.

Zalma, Mo.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—We have received my X-L-ALL Fencing and can say it is the best I ever saw. I have two kinds of fencing on my farm, and I like yours the best. My neighbors are all of the same opinion, and I am glad that I had bought all my wire fencing from you, then I would have saved more money and would have been better satisfied. I will gladly recommend your fencing to anyone. I will need some more wire fencing soon and I am surely going to get the X-L-ALL. It is the strongest and best made fence I ever saw.
Yours truly,
DOLPH RANDOLPH.

Peoria, Ill.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—My 25 rods of X-L-ALL Fencing received today. Very satisfactory. Saved about $4.00 on it and got better wire.
Yours truly, HENRY H. ALBRECHT.

R. F. D. No. 1, Sherman, W. Va.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—I have just finished putting up the 100 rods of X-L-ALL Fencing received from you. Made the stretch in three pulls, and two men drove the staples, and in two hours' time. This is a record breaker for building fence in West Virginia hills. I enclose another order for 60 rods.
Yours truly, W. W. BATTIN.

R. F. D. No. 2, Owaneco, Ill.
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—I feel under many obligations to you for the many bargains in woven wire fencing I have received. I do not see why all farmers don't use your fencing. It has no equal. Always have a good word for X-L-ALL Fencing and when I am in need of any more, I will most surely buy the X-L-ALL.
Yours truly, JOSEPH J. MINKS.

Forest City, Iow
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—After putting up my X-L-Fencing I am well pleased with it. It is only a good fence, but is much cheaper any I can get here. Yours truly,
W. K. SKINNE

Canda, N. Da
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—I am much pleased with shipment of X-L-ALL Fencing. It through in good shape and is satisfactor every way. Yours truly,
MATH. ROLLOFSO

R. F. D. No. 3, Norwalk, Iow
Sears, Roebuck and Co., Chicago, Ill.
Gentlemen:—I am well pleased with th L-ALL Fencing. You saved me from $1 to $12.00. Yours truly,

No. 11 — Actual Size of Top and Bottom Line Wires.

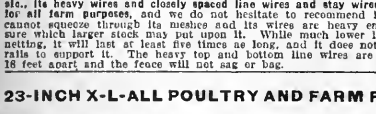
STAYS SPACED 6 INCHES APART

No. 14 — Actual Size of Intermediate Line and Stay Wires.

While this fencing was originally designed for poultry yards, lawns, gardens, orchards, etc., its heavy wires and closely spaced line wires and stay wires make it an excellent fencing for all farm purposes, and we do not hesitate to recommend it as such. The smallest pig cannot squeeze through its meshes and its wires are heavy enough to withstand any pressure which larger stock may put upon it. While much lower in price than ordinary poultry netting, it will last at least five times as long, and it does not require either top or bottom rails to support it. The heavy top and bottom line wires are sufficient supports with posts 16 feet apart and the fence will not sag or bag.

This has proven to be the most popular fencing we ever offered, and at the requ many of our customers we are now making it also in 23-inch and 34-inch heights, provi close mesh sheep and hog fence and a stock fencing of good height which will serve ord farm purposes. If you are looking for a poultry fence, an orchard fence, a light dair stock fence, or a good all around farm fencing, we recommend the X-L-ALL Poultry Farm Fencing as the best value you can possibly obtain. We sell more of the 58-inch h of this fencing and recommend it as the most desirable. Made in bales containing 5, 1 and 40 rods. We do not cut bales. Shipped from our factory at Knightstown, Indiana

23-INCH X-L-ALL POULTRY AND FARM FENCING, 18 3/5c A ROD



Has 12 line wires. Spaces between the line wires, commencing at the bottom, are 1½, 1½, 2¼, 2¼, 2¼, 2¼, 2¼, 2½, 2½, 2¾ and 3 inches, respectively. The interlocked stay wires are spaced 6 inches apart. Top and bottom line wires are made of No. 11 hard galvanized steel wire and the stay wires and intermediate line wires of No. 14 hard galvanized steel wire. This constitutes an ideal sheep and hog fencing, as closely spaced that the smallest pig cannot squeeze through its meshes and it is strong enough to stop the most vicious kind of hogs. Weight, per 100 rods, 552 pounds.

DIAMOND MESH POULTRY NETTING

While we recommend that you purchase our X-L-ALL Poultry Fencing for making poultry fences, etc., we carry a complete line of poultry netting, because there are many times when nothing else will answer your purpose. Our Diamond Mesh Poultry Netting is the highest grade poultry netting on the market. Made from genuine Bessemer hard steel wire and always galvanized after weaving, which makes it last much longer than netting galvanized before weaving, because it is much more rigid and rustproof. There are inferior grades of netting on the market made from soft steel wire, galvanized before weaving. You will find our poultry netting to be easily worth double the price of inferior grades, because it will stretch up better, last twice as long and give you better satisfaction in every way. When to the advantage of our customers we will fill orders for poultry netting from stock at Chicago, or if we can save you in freight by doing so, we will ship from stock at the factory in Massachusetts. Our poultry netting is put up in rolls 150 feet long. We do not sell less than full rolls.

No. 32H5450 Diamond Mesh Poultry Netting, with 2-inch mesh, made from No. 19 wire. The standard size mesh most generally used. Some of our competitors sell this mesh of netting made from No. 20 wire, which is not heavy enough to be serviceable.

Width, in.	Wt., bale	Price, bale of 150 ft.	Width, in.	Wt., bale	Price, bale of 150 ft.

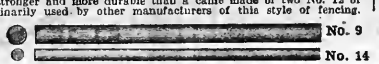
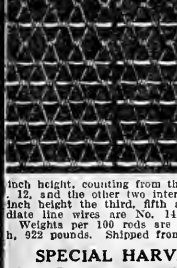
HARVARD DIAMOND MESH WIRE FENCING

AN EXCELLENT GENERAL FARM, STOCK AND HOG FENCING. Extensively used fencing fancy stock farms, private grounds, etc. Top and bottom wires are No. 9 hard galvanized steel wire, which is stronger and more durable than a cable made of two No. 12 or 14 lighter wires, such as ordinarily used by other manufacturers of this style of fencing. The double truss stays act as braces in every direction, making a firm, solid and smooth fabric, and every cross in the fence with wire acts as a spiral spring, providing elasticity as well as firmness. Line wires are heavily crimped on 4-inch centers. Crimping is done after weaving and allows for all expansion and contraction due to changes in temperature, also permits stretching the fence tightly, smoothly and evenly. If you prefer a Diamond Mesh Fence, either our Standard Harvard or our Special Harvard Fencing will give you as good or better satisfaction than any fencing of the same style you could buy elsewhere, regardless of price. Made in bales containing 5, 10, 20 and 40 rods. We do not cut bales.



SIZES OF WIRE USED IN HARVARD DIAMOND MESH FENCING.

20c A ROD AND UP SPECIAL HARVARD FENCING



inch height, counting from the bottom the second, fourth, sixth and seventh line wires are 12, and the other two intermediate line wires are No. 14 galvanized steel wire. In the inch height the third, fifth and eighth line wires are No. 12 and the other three intermediate line wires are No. 14 galvanized steel wire. Stay wires to all heights are No. Weights per 100 rods are as follows: 25-inch, 640 pounds; 40-inch, 806 pounds; 48-inch, 922 pounds. Shipped from factory at Knightstown, Ind.

Made in three heights: 25 inches with 6 line wires, 40 inches with 8 line wires, 48 inches with 9 line wires. Commencing at the bottom first five line wires of the 25-inch fence are spaced about 1½ inches apart. In the 40-inch and 48-inch fence the first 6-line wires are spaced about 4½ inches apart. Remaining line wires about No. 9 inches apart. The double trussed stay wires are wrapped around line wires about 8 inches from center to center, making openings from 6 to 7 inches at their greatest width. Top and bottom line wires in all sizes are No. 9 hard galvanized steel wire. Intermediate line wires in the 25-inch fencing are all No. 12 galvanized steel wire; but in the 40-inch and 48-inch fencing the first and second line wires are No. 12 galvanized steel wire, the third, fourth and fifth line wires are No. 14 galvanized steel wire, and the sixth and seventh line wires are No. 12 galvanized steel wire. In the 48-inch fencing the first and second line wires are No. 12 galvanized steel wire, the third, fourth and fifth line wires are No. 14 galvanized steel wire, and the sixth, seventh and eighth line wires are No. 12 galvanized steel wire.

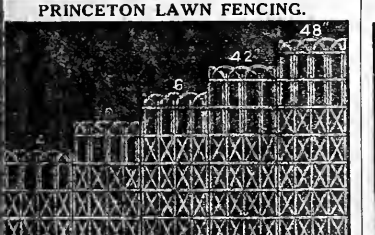
ORNAMENTAL LAWN FENCING

The Most Attractive Line of Lawn Fencing Ever Offered. Designs Patented.

In no other way and at no such small expense can you add so greatly to the appearance of your home as by putting up a neat and attractive fence. The three designs of ornamental lawn fencing shown below are really artistic and are actual triumphs of the fence makers' art. **In the quality of material and workmanship it is of the highest possible grade, so that any one of them will be an added ornament and a permanent and useful improvement for any home.**

Our line of Ornamental Lawn Fencing is the handsomest, strongest and most durable on the market, and our prices are at least one-third less than others ask for light, loosely woven fencing. We use more line wires to the different heights than are found in any other makes. The double twisted cable line wires are spaced about 8 inches apart and locked around the straight pickets with right and left twists, thus providing for contraction and expansion. The pickets are spaced 4 inches apart. The bow pickets overlap each other, making fence stiff and strong at top, so that it cannot be easily broken down. Every order is specially woven in the exact lengths ordered, and the end pickets finished off square, leaving no cut or ragged ends. Sometimes during the rush season it may require from three to four days to turn out an order, but you will be amply repaid for waiting a few days by receiving bright, brand new fencing fresh from the looms. We guarantee our fencing to be made of the full size gauges of wire specified, and to be made of the very best wire obtainable, heavily galvanized and as rust-proof as it is possible to make. Any of this fencing can be put up on either wood or iron posts and makes a strong, solid fence, but we recommend that you use our ornamental steel fence posts shown on this page, as they are the easiest to set and will make the most durable and lasting fence and the cheapest in the end. All ornamental lawn fencing excepting our Windsor design will be shipped from the factory in Eastern Indiana.

PRINCETON LAWN FENCING.

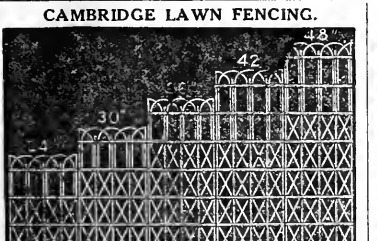


Our best and strongest design. Double twisted line wires made of No. 12½ heavily galvanized Bessemer steel wires with right and left twists locking pickets. Continuous bow pickets, also intermediate upright pickets are made of two No. 11½ galvanized steel wires twisted and formed under pressure. Fabric is closely woven and poultry proof. This is one of the most artistic designs ever produced and will add to the value and beauty of any home.

No. 32H5367 Princeton Lawn Fencing.

Height, inches	24	30	36	42	48
Weight, per foot, pounds	2	2¼	2¾	3	3½
Price, per foot	9c	10½c	12c	13¾c	15¾c

CAMBRIDGE LAWN FENCING.

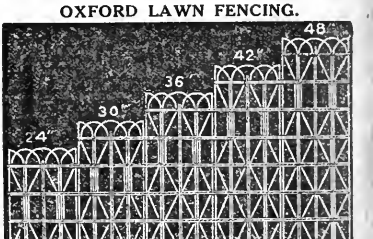


The same design as our Princeton Lawn Fencing, but the continuous bow top pickets are made of a single No. 9 heavily galvanized Bessemer steel wire. Intermediate upright pickets are made of two No. 11½ galvanized steel wires twisted together. Line wires are made of two No. 12½ galvanized steel wires with right and left twists locking pickets. Next to our Princeton, this is the best lawn fencing made.

No. 32H5372 Cambridge Lawn Fencing.

Height, inches	30	36	42	48
Weight, per foot, pounds	1¾	2¼	2¼	3
Price, per foot	8c	9½c	10¾c	12¼c	13¾c

OXFORD LAWN FENCING.



A very handsome and serviceable design. The best lawn fencing on the market for the money. Line wires are made of two No. 12½ heavily galvanized Bessemer steel wires with right and left twists locking pickets. Continuous bow top pickets are made of No. 9 galvanized steel wire and intermediate twisted pickets are made of two No. 11½ galvanized steel wires. Not quite so close a fabric as either our Princeton or Cambridge fabric, but practically poultry proof.

No. 32H5377 Oxford Lawn Fencing.

Weight, per foot, pounds	1	1½	1¾	2	2½
Price, per foot	6c	7½c	8½c	10c	11¾c

SINGLE WALK GATES, $2.35

Strongly made and artistic in design. Frames are 1¼-inch outside diameter steel tubing, nicely painted. Filled with the Princeton lawn fabric, which is closely woven and poultry proof. The scroll top ornament adds greatly to the attractiveness of the gate. These gates are amply strong and suitable for all farm purposes, as well as for lawn fencing. Furnished with good hinges and a positive automatic latch. The fabric in all gates will be woven in a special panel to fit the gate, end pickets being finished off square. When ordered with any of the three styles of lawn fencing these gates will, if so ordered, be filled to match the fencing and will be shipped from factory in Eastern Indiana. When ordered with our No. 1-A-L or Harvard farm fencing we can ship from our fencing factory at Knightstown, Ind.

No. 32H5325 Single Walk Gate. 3 feet wide by 2½ feet high. Weight, 24 pounds. Price..... $2.35

No. 32H5326 Single Walk Gate. 3 feet wide by 3 feet high. Weight, 26 pounds. Price..... $2.45

No. 32H5327 Single Walk Gate. 3½ feet wide by 3½ feet high. Weight, 28 pounds. Price..... $2.65

No. 32H5328 Single Walk Gate. 4 feet wide by 4 feet high. Weight, 34 pounds. Price..... $2.85

SINGLE WALK GATES.

With Double Ornamental Scroll, $2.75.

Of the same construction as the single walk gates shown elsewhere on this page, the only difference being that they have a double ornamental scroll instead of a single scroll, and being more particularly intended for lawn purposes, are made in a large variety of sizes, some of which would not be suitable for general or farm purposes. Frames and scrolls are nicely painted and gates are furnished with gravity hinges and a positive automatic latch. Regularly filled with our Princeton lawn fabric, but when ordered with either of our two other styles of lawn fencing we will, if so ordered, furnish gates with fabric to match. Gates weigh from 20 to 25 pounds, according to size. Shipped only from factory in Eastern Indiana.

Price, 4-ft. width	3.20	3.35	3.50	3.65	3.80

ORNAMENTAL STEEL FENCE POSTS, $1.10.

For use with lawn fencing. Line posts are made from 1⅝-inch outside diameter steel tubing and weigh from 18 to 25 pounds each. Corner end and gate posts are made from 1⅝-inch outside diameter steel tubing. End and gate posts weigh from 25 to 30 pounds each, and corner posts from 30 to 35 pounds each. **End and gate posts have a brace of 1 5-16 inch outside diameter steel tubing at the top extending horizontally to the next post, and ⅝-inch brace rod extending from bottom of post to top of next post. Corner posts have two of these braces and rods for bracing both ways from the corner.** Malleable clamps are furnished for attaching braces. All posts have 24-inch cast base and a cast iron top ornament. All posts are painted black. Prices of corner, end and gate posts include ratchets for attaching fencing. Shipped from factory in Eastern Indiana.

Sounds Impossible, but Look—Haenel Mauser Carbine $34.00 Rifle for $6.94. It's True.

Standard No. 2 Farm and Driveway Gates.

The strongest and best gate on the market for the money. Frames are made of steel tubing 1⅝-inch outside diameter, and nicely painted. Each gate has a center brace of 1¼-inch outside diameter steel tubing, which is firmly secured to the frame with malleable clamps. Each gate has also a ⅝-inch diagonal brace rod which prevents sagging. The filling or fabric is heavy galvanized square mesh farm fencing with stays spaced 6 inches apart. The spaces between line wires vary from 3 inches at the bottom to 7 inches at the top, making it practically poultry proof as well as hog tight. Good hinges and a positive automatic latch are furnished with each gate. Posts should be set 4 inches wider than gate to allow for hinges and latch. **All sizes are 4½ feet high.** Shipped from factory at Knightstown, Ind.

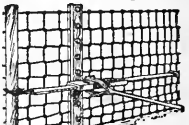
Champion Combined Fence Stretcher and Wagon Jack, $4.38.



The most powerful stretch made. The easiest and simplest to operate. One man operating the lever back and forth can accomplish more than two men with an ordinary stretcher. Stretches the fence within a foot of the post, and by setting the foot of the ratchet bar against the end post it enables you to stretch past it without setting an anchor post. Made entirely of iron and steel. Ratchet bar is 4½ feet long. Price is for stretcher complete with anchor claws and pair 63-inch hardwood clamps with bolts. Can also be used as a wagon jack, post puller, pump lifter and for numerous other farm purposes. When ordered with fencing will ship from our factory at Knightstown, Indiana.

No. 32H5384 Champion Fence Stretcher.	Weight, pounds.	Price
		$4.3

X-L-ALL Tackle Block Fence Stretcher and Safety Hoist.

A combination fence stretcher and self locking tackle block or safety hoist. Can be used by hand or power and holds at any point without slipping. Every pound pulled on the rope equals four pounds on the wire. Consists of two heavy 63-inch hardwood clamps with bolts, a pair of broad steel clevises with chains and a pair of double sheave tackle blocks, one fitted with safety clevis to grip and hold the rope when the pull is stopped. Blocks are made for ⅝-inch rope. Rope is not furnished. When used as a safety hoist with ⅝-inch manila rope, one man can easily raise 600 pounds or a team 2½ tons and hold the load wherever it is stopped. When ordered with fencing will ship from our fencing factory at Knightstown, Indiana.

$3.98

No. 32H5385 X-L-ALL Fence Stretcher.	Weight, pounds.	Price
		$3.9

INDESTRUCTIBLE STEEL FENCE POSTS.

Line posts consist of rigid angle steel uprights in which holes are drilled at proper distances to suit all kinds of wire fencing, the fencing to be fastened with tie wires. Corner and end posts are not drilled, wires should be wrapped around them. Can be set in a concrete base, as shown in the illustration to the left, or if posts are wanted to drive we **will furnish them pointed at an extra charge of 1½ cents per post.** Many form a concrete base by setting the post in the hole and pouring wet concrete around it. Height of posts given below is the height above the base or ground. Line posts are 30 inches longer and corner and end posts 32 inches longer than the heights we name. **Prices do not include concrete bases.** With home made wooden or metal molds you can make these for much less than what you would pay for freight on them. Full directions for setting posts and for making concrete bases sent with each shipment. Inasmuch as these posts are practically made to order, during the busy season it is sometimes impossible to make them as fast as our orders are received and there may be a slight delay of from 5 to 10 days in filling your order. We mention this so you may place your order slightly in advance of your requirements. Shipped from factory near Chicago.

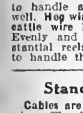
No. 32H5479 Set of Gate Castings, consists of two hinge castings and one catch. Can be used only on corner or end posts. Weight, 6 pounds. Price 67c

PRICES REDUCED

HIGH QUALITY BARBED WIRE.



OUR BARBED WIRE is the best on the market. Barbs are sharp pointed and double twisted around the main wire, and spaced with greater uniformity than will be found in the lower grades of barbed wire. Our galvanized wire is **thoroughly galvanized** and is as rustproof as it is possible to make it. We furnish only two-point barbs, which make a neater fence than a four-point barb; it is easier to handle and serves every purpose just as well. **Hog wire** has barbs about 3 inches apart; **cattle wire** has barbs about 6 inches apart. Evenly and compactly wound on good substantial reels and will be found much easier to handle than the wire you ordinarily buy.

Standard Barbed Wire.

Cables are No. 12 wire, barbs are of No. 14 wire. The 100-pound spools contain from 90 to 100 rods of wire. The 80-rod spools contain 80 rods of perfect wire and weigh about 73 pounds. We sell full reels only. Shipped from factory in Central Indiana.

No. 32H5400 Painted Hog Wire.
Price, per 100-pound spool $1.98

No. 32H5401 Painted Cattle Wire.
Price, per 100-pound spool 1.98

No. 32H5405 Galvanized Cattle Wire.
Price, per 80-rod spool 1.85
Per 100-pound spool 2.28

Special Barbed Wire.

We recommend the purchase of this wire because in nearly every instance it will serve your purpose fully as well as heavier wire and in many instances much better. Has two cable wires made of 14-gauge wire, and barbs made of No. 15-gauge wire. This wire is easier to handle than heavier wire; it is also more elastic and will yield quicker to pressure. For this reason it is really less dangerous to stock. **Put up on spools containing exactly 80 rods.** We guarantee each spool to contain this amount of perfect wire. Full spools weigh about 57 pounds each. Shipped from factory in Central Indiana.

No. 32H5410 Painted Special Cattle Wire. Price, per spool $1.40

No. 32H5411 Galvanized Special Cattle Wire. Price, per spool 1.55

No. 32H5412 Painted Special Hog Wire. Price, per spool 1.47

	Price, per 100-lb. keg	2.45	2.43

NOTE—Owing to possible market fluctuations, prices on barbed wire, smooth wire an staples are subject to change without notice, but we will always furnish at lowest market price

BEE HIVES AND BEE KEEPERS' SUPPLIES

You cannot buy better hee hives and bee keepers' supplies, than ours at any price. We guarantee our goods to be the very highest quality, and if for any reason you should feel dissatisfied with the construction or the quality of any bee keepers' supplies purchased from us, you can return them at our expense and we will immediately return your money and freight charges. Hives made to absolutely accurate measurements and standards, and the supers, bodies, frames and other parts will interchange with any other make of hives of the same style.

We have brought together on this page and put at the command of every bee keeper the resources of two of the largest and most reputable manufacturers in the country, thus making up the best and most complete line of high quality bee keepers' supplies on the market and giving a far better and larger list to select from than any other one dealer, jobber or manufacturer can offer.

Five Complete 1½-Story Hives Crated for Shipment.

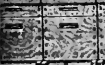
WHITE PINE HIVES are preferred by most bee keepers to hives of any other material, because white pine lends itself to the making of easy lumber to work, it is possible to obtain a better and more uniform finish than with any other hive lumber. It is also closer and cleaner grained, and when the lumber is selected and properly handled, white pine hives are unquestionably superior to those made of any other material. The most particular fancy bee keepers will be satisfied with our white pine hives. We guarantee them to be the best finished and most perfectly made hives on the market.

YELLOW CYPRESS pine, it is, from the standpoint of utility, a perfectly satisfactory hive lumber. Where hives are used without painting it will stand moisture and weather better than any other lumber. Good cypress being more plentiful than a suitable quality of white pine, it is also cheaper. Bees will work as readily as in pine hives. Our cypress hives are made from the best grade of smooth dressed yellow cypress lumber and we guarantee them to give perfect satisfaction.

Bee hives are generally used 1½ stories high, that is with brood or bottom hive, and one super or top hive, but by ordering extra supers you can make two stories or more. Generally in lots of five, ten, etc., but we list single hives so that you can order any quantity. They are always shipped partly knocked down, and are not painted. Bee hives, extractors, and seller supplies when ordered with them are always shipped direct from factories, but we carry a large stock of sections, frames and smaller supplies at our Chicago store, and will ship them there when ordered with other merchandise or when to purchaser's advantage.

White pine hives are shipped from factory in Southeastern Wisconsin. Cypress hives and all Massie hives from factory in Western Iowa.

Section Honey Boxes.



No. 1 Quality. We do not handle seconds.

ee-piece scalloped sections. Made of clear wood, perfect in finish, free from defects. 1 grade, the very best sections made. 4¼x4¼x1⅞ inches. Sold only in full

MASSIE PATENT DOUBLE WALLED HIVES.

Complete with Sections and Starters.

The Massie is a double walled, double cover, divisible, alternating hive, and possesses numerous advantages over all others. It excels the chaff hive because there are no open spaces between and behind dummy and frames to allow the bees and it is also of lighter weight. With a Massie hive for winter quarters you will avoid the loss of many bees and find a greater number of young bees early in the spring. The queen enlarges the brood nest more rapidly and brood rearing continues without interruption. When the honey season arrives the Massie will be full of bees ready to work, while the colonies in other hives are just in good breeding condition. The cover is made of a sheet of heavy galvanized steel, fastened to 2-inch dovetailed wood sides which fit down over the super. Inside top of cover is lined with soft wood held in place by wood strips. There is an opening over the escape board with space in center to receive a Porter bee escape. The super is 5⅝ inches deep and has thirty-two 4x5x1⅜-inch plain sections with foundation starters, eight section supporting slats, nine cleated fence separators and two flat steel spring clamps to hold sections securely together, leaving no space between for comb or bees. The brood chamber is 7⅛ inches deep, has nine frames 15⅝ inches long and 7¼ inches deep, close fitting their entire height. These frames are hung in the hive by rivets on the end of each. Bees are excluded from the frame rests by removable wedges which also lock the frames, permitting the brood chamber to be inverted. Between the ends of frames form solid inner end walls with air space between them and the hive ends. The frames may be handled singly or in pairs or more at once. A movable division board at each side of frames constitutes inner side walls with an air space between it and the hive walls. Flat spring steel clamps lock frames and division boards securely together. The top bars of frames have grooves with wedges for holding foundation starters. Hives can be enlarged to 2 or 2½ stories by ordering extra brood chambers. The brood chambers can also be used as supers for extracted honey. The bottom is ¾-inch thick, secured between interchangeable grooved side rails. The rear end of the floor is covered with a wire screen, with a removable slide over it which can be moved back to afford ventilation without disturbing the bees. This slide is grooved on one side and can be used as a feeder, as well as a cover for the ventilator. A reversible entrance block regulates depth and size of entrance or close it entirely. Shipped from factory in Western Iowa.

Dandy Bee Smoker.

A splendid smoker for the money. Has straight nozzle, tin fire chamber; 2¾ inches in diameter and 4 inches high. Gives good satisfaction when one has but a few colonies of bees.

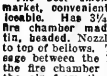
No. 32H3540 Dandy Bee Smoker. Wt., 1 lb. Price.....54c

Champion Bee Smoker.

The best smoker on the market, convenient and serviceable. Has 3¼-inch lined fire chamber made of heavy tin, beaded. Nozzle is hinged to top of bellows. The air passage between the bellows and the fire chamber compels all the air from the bellows to be forced through the fuel.

No. 32H3541 Champion Bee Smoker. Wt., 1¼ lbs. Price.....73c

Globe Bee Veil With Springs.



Made of French net in tulle with silk face piece. Five spring steel bars keep the veil away from the face and neck. These bare button on the studs on the neckband of the veil.

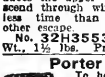
No. 32H3544 Globe Bee Veil. Wt., 5 oz. Price.....92c

La Reese Bee Escape.

Can be placed under hives with supers which are crowded without smothering the bees. The hum of the bees below induces the bees above to ascend through wire cones in less time than with any other escape.

No. 32H3553 La Reese Bee Escape. Wt., 1½ lbs. Price.....32c

Porter Bee Escape.



To be placed in the center of a honey board and saves the work and misery of smoking and brushing bees out of supers. Place the escape in a board and slit between super and hive and the next morning you will have a super of honey.

No. 32H3558 Porter Bee Escape. Wt., 2 oz. Price.....18c

Bee Brush.

Strongly made with soft pliable fibers, secured in a wood handle, long enough to reach across an ordinary frame.

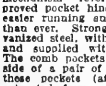
No. 32H3565 Bee Brush. Wt., 4 oz. Price.....17c

Rubber Bee Gloves.

The best and most durable bee glove made. The rubber coating is applied to this elastic material. Seams are sewed and overcast like a kid glove. No glued seams to come apart. Have long gauntlet sleeves with elastic bands to prevent bees from crawling in.

No. 32H3543 Bee gloves. Wt., 5 oz. Price, per pair.....$1.13

1911 Model Improved Cowan Honey Extractors.



New improvements, consisting of ball bearings at top and bottom shafts upon which the inside mechanism revolves, and improved pocket hinges make them easier turning and more durable than ever. Strongly made of galvanized steel, with conical bottom and supplied with anchor rods. The comb baskets are hinged inside of a pair of hoops. Combs are put into these pockets (after uncapping) the honey extracted from one side by a few turns of the crank, and then without touching the comb the pocket is swung around and a few more turns of the crank extract the other side. Intended for extracting combs of frames, but pockets are 2¾ inches wide, so that honey can be extracted from partly filled sections by reducing the width of the frame. Shipped from factory in Western Iowa.

No. 32H3575 Improved No. 15 Cowan Honey Extractor. Comb pockets, 9¾ inches; can be 20 inches in diameter. 29 inches high. Wt., 70 lbs. Price.....$10.62

No. 32H3576 Improved No. 18 Cowan Honey Extractor, for frames not over 18 inches deep. Can be 24 inches in diameter and 29 inches high. Wt., 120 lbs. Price.....$12.45

We can furnish nearly everything used by bee keepers. If this page does not show what you want, send for our Special Catalog of Bee Keepers' Supplies, which shows other styles of hives and many other articles not shown on this page.

ORNAMENTAL FENCING

The home beautiful is never so complete, never so attractive as when the approach is ornamented with beautiful wrought steel or steel and wire fencing. Compared with the added dignity and beauty which this artistic yard enclosure brings to your home, the extra cost is a mere trifle. You are no doubt proud of your home, proud of your lawn with its flowe and shrubbery; then why not make the picture complete, and pleasing the eyes of not only yourself and family, but pleasing to your neighbo as well?

Wrought Steel Ornamental Fencing

Measure in with all styles of Wrought Steel Fencing all gates and posts required, adding $2.50 for each single walk gate 3 feet wide, and $5.00 for a double driveway gate 9 feet wide, if required. Add the price of each corner post, end post and gate post. All line posts are included in the per foot price of the fence.

Tombstones and Monuments in Marble and Granite

Write for our big catalog of beautiful memorials in either Vermont Marble or Barre Granite. We are quoting the most complete line of original designs in many different sizes and ranging in prices from $3.00 for a polished Marble Marker to $768.00 for a massive Barre Granite Monument, with a design and size to suit any taste or purse. If you are in need of a tombstone or monument, you cannot afford to be without this catalog, as the information which it contains and the designs which it illustrates will aid you in making your selection and give you a knowledge of the value of high class monumental work, even if you decide to make your purchase elsewhere. It will tell you more about the high class of material and quality of workmanship which we put into our monumental work; it explains our method of shipping direct to you from the quarries in Vermont, saving you all of the long intermediate expenses incident to the old fashioned method of selling monuments and tombstones.

We also show in this catalog a complete line of Ornamental Lawn and Cemetery Fencing, Garden Seats, Vases and Flower Boxes, Wire Grave Guards, Marble Entrance Steps, and other cemetery and lawn accessories. It is without a doubt the most complete catalog of its kind ever published and you will find it worth many times the small amount of trouble it gives you to write a postal card saying, "Send me your Book of Monuments."

Imperishable Limoges Porcelain Portraits for tombstones and monuments. A popular method of permanently preserving the features of departed loved ones is that of placing a porcelain portrait of the deceased in the tombstone. We are prepared to furnish these porcelain portraits, reproduced from any photograph of the deceased and firmly set it in any monument or tombstone you may order. A full description, with sizes and prices will be found in our Tombstone and Monument Catalog, which we mail free and postpaid to any address.

You take no risk in ordering from us, as we guarantee every tombstone and monument we ship to reach destination in perfect condition, free from mar, scratch or injury in transportation, or we will replace any damaged part free and prepaid. Freight charges on monumental work are very low and we quote the rate of freight to a few points in your state in our Special Catalog of Tombstones and Monuments.

Lettering Extra. Prices for carving inscriptions in both marble and granite are quoted in all of the different styles and sizes in general use.

Do not delay, but write for this big catalog at once.

Carrara Statuary

IMPORTED FROM CARRARA, ITALY.

Beautiful statuary designs made from genuine Carrara Marble, imported direct from Carrara, Italy, and known the world over as the best obtainable for statuary work, are shown in our big Catalog of Tombstones and Monuments. No more suitable memorial could be selected for a child's grave than a beautiful child statue like the illustration here shown, mounted on a pedestal made of the hardest and best Vermont marble; the statue itself being made from pure Carrara Italian Marble.

Write for our Special Catalog of Tombstones and Monuments. In its pages you will find a full description of this and other beautiful statues made from the world's best imported marble. As an example we quote below prices on the statue illustrated here, boxed and delivered on the cars at the quarry in Vermont. Lettering extra. Total height, 4 feet 10 inches. Statue, 2 feet high. Other dimensions in proportion. Shipping weight, 1,250 pounds.

Price $7.60

ATLAS PLATFORM SCALES

GUARANTEED ACCURATE AND PERFECT IN MATERIAL

MONEY BACK IF YOU ARE NOT SATISFIED

This is positively the best portable platform scale you can secure at any price. It is guaranteed accurate in weighing, perfect in material and workmanship and equal in material, finish and sensitiveness to any scale sold at twice the price. Don't judge the quality or the accuracy of the Atlas Scale by the low price we quote on it, because you find that practically every other scale on the market that is constructed like the Atlas is advertised at a price which will range from $5.00 to $20.00 more than our price. If you want the best portable scale you can buy and want to save money, buy the Atlas. You will not be disappointed in it. So sure are we of this we will ship you the scale with the understanding that you can return it if you are not satisfied, even after comparing it with any higher priced scale on the market, and we will send back to you every cent you paid for the scale and for freight charges on it.

CONSTRUCTION. **All castings are of the best grade gray iron. Base and platform** are extra heavy to stand severe usage. **Platform center, pillar and pillar cap** are No. 1 grade maple thoroughly seasoned. **Levers** are heavy castings, well braced, and, barring accident, will never break. **Bearing pivots** throughout are of the best grade tool steel accurately ground to a knife edge, insuring sensitiveness such as is found only in scales of other makes sold at twice our price. **Bearings** on platform are of hardened steel and platform is fitted with check pin to prevent raising when load is let down on edge of platform. **Corner loops** supporting levers are fitted with hardened self adjusting bearing plates. **Weigh beam** is of solid brass, not brass plated iron commonly used, and is accurately graduated and adjusted to U. S. standard weights. We can furnish either single or double beam styles at prices quoted below. Beams on 600, 800 and 1,000-pound scales are graduated to 50 pounds by ¼-pound marks. On larger sizes beams are graduated to 100 pounds by ½-pound marks. Scale is mounted on wheels held to base by steel axles running clear across instead of on small castings generally used. **Finish.** All iron parts are nicely finished in a gloss black. Wood parts are painted a handsome Prussian blue with gold striping, and varnished two coats with best quality of varnish. Brass beam is highly polished. The Atlas Portable Platform Scale will weigh absolutely correct on all parts of the platform.

BAG RACK ATTACHMENT **consisting of iron pipe frame fitted with a device which will hold bag upright and open, and which is adjustable in height,** can be furnished at $1.85 extra. If you want this attachment order No. 11H7053 and allow $1.85 in addition to price of scale. All Atlas Scales are taken apart and boxed for shipment in order to reduce the freight charges. We furnish complete simple directions for assembling each scale so anyone can set it up. Shipped direct from factory in Southern Michigan.

PRICES, SINGLE BEAM SCALES

If you want scale with double beam order from double beam list.

HARVARD PLATFORM SCALES

We make this scale in 600 and 1,000-pound capacities only, and while it is a first class scale in every respect, it is not built so well nor finished as nicely as the Atlas Scale described above. The Harvard Scale is gotten up to compete with scales sold by others at $7.50 to $10.00, and while we guarantee it to weigh absolutely correct on all weights up to its capacity and to be perfect in material and workmanship, we do not recommend its purchase for use where considerable weighing is done. For those who only have occasional use for a scale it will give satisfactory service. The Harvard Scale is without question the best value ever offered. It is similar in appearance to the Atlas, but is not as highly finished. Beam is single bar polished steel graduated to 50 pounds by ¼-pound marks. Bearing pivots are of nicely ground and adjusted; base, levers and other castings are good quality gray iron nicely finished in black, and woodwork is clear hardwood, nicely finished in blue and well varnished. Each scale is scaled to U. S. Standard weights and guaranteed to be perfect and accurate. Shipped direct from factory in Southern Michigan.

Catalog No.	Capacity	Size of Platform, Inches	Shipping Weight	Price
11H7005	600 pounds	15x22	135 pounds	$6.29
11H7006	1,000 pounds	16x24	140 pounds	7.45

NEW CENTURY PLATFORM SCALES

This is a medium grade scale which we recommend to those who do not wish to invest in our Atlas Scale, although the Atlas Scale is positively **the best scale** to buy and we compare favorably with any portable scale on the market. Our New Century Scale is better than the Harvard Scale and is similar in construction to the Atlas, except that it is not so finely finished and does not contain the same grade of material. The New Century Scale is fully guaranteed to give accurate weight on all weights up to its capacity, but it will not stand as hard service as the Atlas. All castings are of a good grade gray iron, all pivots and bearings are hardened steel, wood parts are selected maple, and beam is solid brass accurately marked to 50 pounds by ¼-pound marks. Iron parts of scale are finished in black, woodwork in blue with gold striping, and all is nicely varnished and well packed for shipment. We guarantee the New Century Scale to be perfect in material and workmanship, and will replace any parts proving defective, free of charge to the purchaser. Full directions for assembling and adjusting packed with each scale. Shipped from factory in Southern Michigan.

Catalog No.	Capacity	Size of Platform, Inches	Shipping Weight	Price

11H7012	1,000 pounds	17½x25	158 pounds	8.5

HERCULES PITLESS WAGON SCALE

PERFECT TRUE WEIGHT

$37.95

5-TON

This Pitless Wagon Scale has a platform 8x14 feet in size, 12 inches above ground, and is suitable for general farm use, equal to many pitless scales sold by others at $50.00 to $60.00. While the Hercules Scale is a high grade accurate and durable scale, we want to especially call your attention to the Atlas All Steel Pitless Scale shown on page 1127, which is positively the best pitless scale ever offered at any price, and if you have considerable weighing to do and want a pitless scale we would advise you to get the Atlas All Steel Pitless Scale.

CONSTRUCTION OF THE HERCULES SCALE **is first class throughout.** Levers are of T shape steel bars, the long ones being trussed to brace and stiffen them. **Bearing pivots** are of tempered tool steel ground to a sharp bearing edge to insure accuracy. **Beam** is solid brass accurately marked to 1,000 pounds by 5-pound marks on upper bar and to 5,000 pounds by 500-pound marks on the lower bar, giving you the full capacity on the beam without the use of loose weights, which are liable to become unsetted, lost or stolen. Platform is supported on beam box side by a steel I beam furnished with scale. Opposite side of platform is supported by 6x8-inch wood stringer, furnished by purchaser. **End sills** are of 8x12-inch lumber, furnished by purchaser. These are tied together by steel pipe connection and special brackets which we furnish. **Beam box** is full size, made up of matched lumber and well painted. **Easy to set up.** The building directions furnished with this scale are so simple and plain that anyone can set up the Hercules Scale even though they have never done any work of this kind before.

FULLY GUARANTEED **to be perfect in material and workmanship,** and we agree to replace any part giving out by reason of defect in material or workmanship, free of charge to the purchaser. If you are not perfectly satisfied with the Hercules Scale you can return it at our expense and will send back every cent of your money, including the freight charges you may have paid. Shipped direct from factory in Southern Michigan.

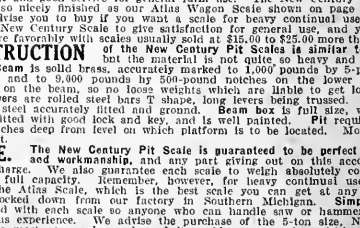
No. 11H7096. Hercules Standard Pitless Wagon Scale. Capacity, 5 tons. Size of platform, 8x14 feet. Shipping weight, 675 pounds. Price..... **$37.95**

NEW CENTURY PIT WAGON SCALES

ACCURATE SENSITIVE

$28.50

3-TON



The illustration shows scale with platform removed and beam box opening on platform side. In use, however, the opening is on opposite side. This scale is constructed to meet the requirements of those who want a medium priced scale which can be depended upon for accurate weight and good service for general farm use. The New Century Scale is not built so heavy or so nicely finished as our Atlas Wagon Scale shown on page 1127, which is the scale we advise you to buy if you want a scale for heavy continual use. However we guarantee the New Century Scale to give satisfaction for general use, and you will find that it will compare favorably with scales usually sold at $15.00 to $25.00 more than our price.

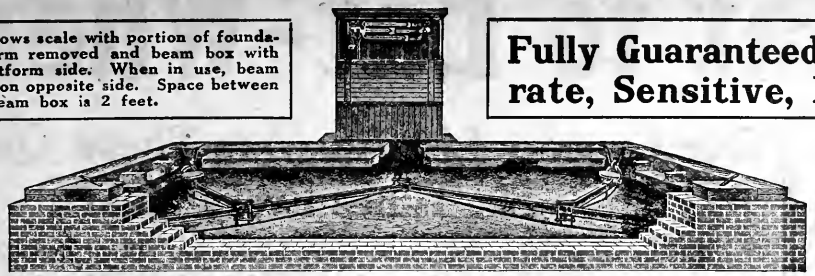
THE CONSTRUCTION of the New Century Pit Scales is similar to the Atlas but the material is not quite so heavy and it is not finely finished. **Beam** is solid brass, accurately marked to 1,000 pounds by 5-pound marks on the upper bar and to 5,000 pounds by 500-pound notches on the lower bar. **Total capacity** is shown on the beam, so no loose weights which are liable to get lost or stolen are required. **Levers** are rolled steel bars T shape, long levers being trussed. **All bearing pivots** are of tool steel accurately fitted and ground. **Beam box** is full size, well built of matched lumber, fitted with good lock and key, and is well painted. **Pit** required for this scale is only 22 inches deep from level on which platform is to be located. Most pit scales require 30-inch pit.

GUARANTEE. **The New Century Pit Scale is guaranteed to be perfect in material and workmanship,** and any part giving out on this account will be replaced free of charge. We also guarantee each scale to weigh absolutely correct on all weights up to its full capacity. Remember, however, for heavy continual use we advise the purchase of the Atlas Scale, which is the best scale you can get at any price. All scales shipped knocked down from our factory in Southern Michigan. **Simple complete directions** furnished with each scale so anyone who can handle saw or hammer can set it up without previous experience. We advise the purchase of the 5-ton size, No. 11H7085, as this is the size most commonly used, and it enables you to do weighing which you would not be able to do with a lighter scale.

Catalog No.	Capacity	Size of Platform	Shipping Weight	Price
11H7083	3 tons	8x14 feet	525 pounds	$28.5
11H7084	4 tons	8x14 feet	545 pounds	30.7
11H7085	5 tons	8x14 feet	565 pounds	32.5

TLAS PIT STOCK AND WAGON SCALE

llustration shows scale with portion of founda-n and platform removed and beam box with ening on platform side. When in use, beam x opening is on opposite side. Space between tform and beam box is 2 feet.



Fully Guaranteed, Accurate, Sensitive, Perfect

35.95

IT WAGON SCALE is so called because it is necessary to dig a pit in which a foundation is constructed on which to hang the scales, platform being on the same level as the surrounding ground.

R ATLAS SCALE requires a pit but 22 inches deep and is very regular in shape, making it very easy to build. Most other pit scales require from 24 to 36 inches deep and irregular in shape, which means more expense in labor naterial to construct.

AS SCALES ARE ADAPTED for coal yards, grain elevators, public weighing and general farm use where the best ument is desired. Don't judge the quality of our Atlas Scales by the price, because our is way below the prices asked by others for this grade of scale. Bear in mind that we hese scales at prices based on actual factory cost with but our one profit added, and are not compelled to pay three to five fancy profits on a scale, as would be the case if purchased it in the usual manner.

ARANTEE. Atlas Scales are guaranteed to give accurate weight on all weights up to their full capacity, to be perfect in material and workmanship and to you perfect satisfaction in every respect. If you are not satisfied you may return the at our expense and we will return your money, together with any freight charges you so you will not be out one penny if you decide not to keep the scale. We agree to e any piece or part which breaks on account of defect in material or workmanship free arge to the purchaser.

E WEIGH BEAM IS SOLID BRASS, not brass plated or brass faced, as is used by a great many scale manufacturers. The full capacity of the scale is on the beam, which has three accurate plainly ed bars; thus no loose weights are required, the top bar of the beam, which is marked to pounds by 10-pound marks, is used to get the weight of the empty wagon, stock rack ny other container used. The sliding poise on the top bar is fitted with set screw for ng the poise in position. The net weight of the load can then be obtained by the reading e middle and lower bars. The lower bar is graduated to 500 pounds by 2½-pound marks, balance of the capacity of the scale on scales up to 5 tons capacity is shown on the le bar, which is marked by 500-pound notches. On 6 and 8-ton scales the middle bar is ed to 8,000 pounds, the balance of capacity being obtained by a special sealed jug weight.

E BEAM is fitted with balance ball for balancing the scale when necessary to overcome the weight of ice, snow, dirt or rain on the platform. We also sh counterpoise to be used when sealing the scale. Beam Box is well made of selected er and painted inside and out with the best lead and oil paint. Door is strongly built and fitted with a flat key lock, so outsiders cannot get at the beam and tamper with it. Beam box measures 58 inches high, 45 inches wide and 9 inches deep.

THE LEVERS of our Atlas Scale are constructed of T shaped rolled steel bars, which are stronger and more durable than the cast iron levers used by so many manufacturers. All levers are trussed with heavy round steel rods, making them perfectly rigid under the most severe strain. The tension of the truss rods is adjustable by means of right and left hand nuts. Truss posts, lever heads which carry the pivots by which the levers are suspended, and the pivots upon which the platform bearings rest, are firmly secured to the ends of the levers by bolts and rivets.

THE PIVOTS are of highly tempered square tool steel, and bearing points are ground to a knife edge, which insures sensitiveness and accuracy in weight. The bearing pivots are securely mounted in heavy castings. The lever and beam rod connections are square in shape and roomy, and the cone bearings are carefully hardened. All this goes to make the scale sensitive in action, which means accurate weight.

ALL WORKING PARTS in the pit are hung from the four corners by heavy loops and hangers with knife edge bearings. This provides a flexible, free acting suspension, another feature which aids in giving accurate weight. This method of suspension is far superior to the method in use by many others in which scale is supported on posts or piers which are not flexible, making a stiff working scale.

PLAIN AND SIMPLE INSTRUCTIONS are sent with each scale so you will have no trouble in erecting it. The plans show shape and measurements of all the timbers and lumber needed, and there is no possible chance of erecting the scale wrong if the instructions are followed. Any one who can handle a hammer and saw can do the work without previous experience. This scale is shipped knocked down from Southern Michigan, from which point purchaser pays the freight. Small parts are securely boxed and the beam box is crated. We do not furnish timbers or planks with this scale.

PRICE LIST.

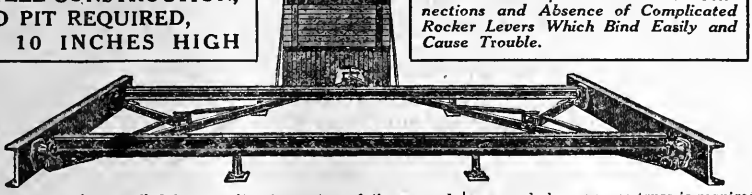
TLAS PITLESS STOCK AND WAGON SCALE

LL STEEL CONSTRUCTION, NO PIT REQUIRED, ONLY 10 INCHES HIGH



Note the Simple Direct Lever Connections and Absence of Complicated Rocker Levers Which Bind Easily and Cause Trouble.

57.90

SEALED TEST WEIGHT.

Our U. S. Standard 50-Pound Test Weight is guaranteed correct and can be used to test the accuracy of any platform or wagon scale. Every owner of a scale should have one. Shipped from the scale factory in Southeastern Michigan.

No. 1 1H7199 50-Pound Sealed Test Weight. Price..... **$2.15**

PITLESS SCALE is so called because it sets on top of the ground and does not require a pit, as is the case with a pit e. We recommend the Atlas Pitless Scale to you as being the best ess scale now on the market. It is constructed throughout of steel and vy castings and, although only 10 inches to platform level, we guarantee o work freely and to give absolutely correct weight and good service.

R ATLAS PITLESS SCALE is of the same high grade construction as our Atlas Pit Scale described ve, and the remarks made in reference to quality of material, guaree, accuracy, etc., apply to this Pitless Scale as well as the Pit Scale.

E BEAM is made of the best quality brass, highly polished and accurately marked. The total capacity of the scale is shown the beam, so no loose weights, which are liable to become stolen or , are required. The upper bar of the beam is graduated up to 2,000 nds by 10-pound marks; the lower bar is graduated to 500 pounds by -pound marks; the middle bar is graduated to 8,000 pounds by 500nd notches. The beam is equipped with tempered tool steel pivots, urately ground. The sliding poises are brass faced. Beam is furnished h balance ball and counterpoise, so scale can be quickly balanced when essary to overcome the weight of snow, ice, dirt, rain, etc., on the platform.

E BEAM BOX is of selected lumber and is finished inside and out with best quality lead and oil paint. The box is proed with a good lock and key, so that the beam cannot be tampered h or the scale used by outsiders.

E FRAME of the scale is formed of two heavy channel irons for each end, firmly connected by heavy pipe connections and spe- corner brackets.

E PLATFORM is supported by heavy steel I beams, which are tied together with heavy pipe connections and locknuts. ne I beams are fitted with hardened bearing feet; platform measures 4 feet and is but 10 inches above ground.

E LEVERS are each constructed of one piece of heavy T shape steel and the long levers are strongly trussed by a heavy flat el bar turned edgewise to obtain the greatest strength. The short levers are made heavy so no truss is required. Look out for scales with cast iron levers which are liable to break just when needed the most. The lever heads, the lever nose irons and the truss posts are strongly secured to the levers by bolts and rivets.

THE BEARING PIVOTS for the levers are of square tool steel, tempered and hardened and are ground sharp, making a sensitive and durable bearing point which will remain accurate indefinitely. All lever connections are extra heavy and roomy, so free motion, insuring a sensitive scale, is assured. Cone bearings of hardened tool steel are used in all lever connections.

THE CORNER PIVOT LOOPS, by which the head ends of the levers are suspended from the corners of the scale frame, are very heavy and strong and the bearings of these loops are carefully hardened, making a perfect frictionless surface where the knife edge lever pivots have their bearings.

ALL WORKING PARTS under the platform are suspended from the corners by heavy loops with knife edge bearings. This method insures more freedom of motion and consequently a more sensitive and accurate weighing machine than the method of supporting levers on posts or chairs which have no flexibility.

GUARANTEED ACCURATE. Our Atlas Pitless Scale is guaranteed to weigh absolutely correct on all weights up to its full capacity. Each scale is tested and sealed to U. S. standard weights, the accuracy of which has been established by the U. S. government. If you are not perfectly satisfied you may return the scale at our expense and we will return the price you paid for it, together with any freight charges you paid.

WE FURNISH EVERYTHING COMPLETE except the lumber for platform and nails for assembling it.

ANYONE CAN SET UP OUR SCALES. We furnish complete simple directions, so you can set up the scale yourself, even if you never before had experience in this line. Anyone who can handle a hammer and saw can do the work.

Scale is shipped knocked down and securely packed from our factory in Southern Michigan. Small parts are securely boxed and the beam box is crated. We do not furnish timbers or platform planks. **$57.90**

ur Double Wrapped Packages Insure Cleanliness and Purity

Our grocery has no "open stock." We have adopted every known device in ndling and stock keeping to insure cleanliness throughout our entire Grocery epartment. Its wide aisles are flanked by tier upon tier of spotlessly clean elves containing the various articles described in our Grocery List, every article a container or double wrapped package which seals the contents against air, ist or the contamination of other foods. There is no such thing as an open x, bin or barrel in our entire Grocery Department. Groceries bought from are positive in quality as well as in purity. We have but one quality standard **THE BEST.** We do not purchase job lots nor odds and ends of stock. We lect a certain grade to sell for a certain price and we compel those who supply to furnish quality that meets our standard absolutely. If it is impossible to cure goods which conform perfectly to our standard, we discontinue quoting ices on the same in our Grocery List. Our guarantee protects every customer the matter of quality, purity and price. If you order a 5-pound can of any of ur leading brands of coffee, we will return the price of the entire can after 2 pounds ive been used, if our coffee should fail to satisfy you in quality and price. If you buy our flavoring extracts you will not only save money but you get nothing but the pure extract of the best fruit, **unadulterated** and **uncolored.** Our flour is packed in quarter-barrel and half-barrel sacks of heavy paraffin coated paper, with an outside covering of close woven burlap, guaranteed to reach you in perfect condition. In every way we serve the interests of our customers.

Write and ask us to put your name on our ocery Mailing List and you will receive new editions six times a year, as fast as y are issued, keeping you right up to date all seasonable lines, new goods and latest v prices.

We want **your** name for our Grocery Mailing List. If you want to set a better table, to increase the variety and improve the quality of your food, you need our Grocery List. And you'll save money too, for most of our prices are even lower than you have paid for inferior qualities.

$1.55 For No. 5 or No. 6 SCHOOL DESKS $1.65 For No. 5 or No. 6

SCHOOL DIRECTORS, COUNTY COMMISSIONERS, SCHOOL BOARD COMMITTEES, TEACHERS, everyone having anything to do with the buying of school furniture, note our new school furniture proposition. See the astonishing prices we quote, very much less than this line of goods has ever before been offered.

OUR SIMPLEX SCHOOL DESK,

illustration of which is here shown, is the best school desk manufactured at any price. It is the acme of school desk building, excelling in simplicity of construction, quality of materials, beauty of outline, ease of operation, noiselessness and durability any school desk ever before manufactured. Our whole aim in building this desk has been to reduce the number of parts to the minimum, thus reducing first, the cost, and secondly, the liability to get out of order. We have succeeded in reducing the price to a level never before attained, and so simple and wonderful is the construction of the Simplex School Desk that it is absolutely impossible for it to come apart or get loose and noisy, no matter how long it is used.

GENERAL DESIGN.

No desk was ever placed in a schoolroom which is more beautiful in appearance than the Simplex. While striving for the beautiful, however, we have kept constantly in mind the needs and the comfort of the growing child. In graceful contour of the back and seat we offer a desk conforming to the natural lines of the body, the most comfortable school seat ever devised. The castings are in attractive patterns and the writing surface is at the proper height and slightly tilted at the approved angle.

SEAT HINGE THE VITAL POINT IN A SCHOOL DESK.

We have produced a hinge which is absolutely free from complicated parts, thus eliminating the possibility of breakage, wear and noise making. We have but one detached part in the hinge of the Simplex seat, the buffer spring. It will wear a lifetime and still be as good as new. The spring is tempered by a special process and is so surrounded and protected by other parts that it cannot be strained, weakened, broken or gotten out of place by any sort of usage. This arrangement of the spring makes the movement of the seat the easiest and most noiseless of any school desk on the market. The Simplex hinge is, in fact, frictionless, noiseless, and as near perfection as human skill can produce it.

THE CASTINGS.

The castings used on the Simplex Desk are attractive in design and finish. They are made with the greatest care, using only the best grades of new iron. No old or scrap iron is used, which accounts for their remarkable toughness and elasticity. The half rounded shape is a feature which gives our castings great strength. The finish is two-coat japan, thoroughly baked, insuring a smooth, glossy, permanent finish.

THE WOODS.

All the wood used in the Simplex School Desk is selected rock maple, thoroughly seasoned and kiln dried. Under no circumstances do we permit the use of wood which has not been as thoroughly dried as the most modern woodworking methods require. The pieces comprising seat, back and top are carefully milled, tongued and grooved, glued under pressure, and then so thoroughly sanded that the joints are practically unnoticeable and will not come apart. In finishing we use the best three-coat work—one coat of heavy filler well rubbed in, one coat of the best shellac well sanded, and a heavy coat of varnish, which guarantees a handsome and lasting finish. Seat, back and top are attached to the iron framework by means of lugs, ribs and screws—a method of construction which has stood the test of time, and which, though simple, gives the strongest desk it is possible to devise.

Ink wells are not furnished with the No. 5 and No. 6 desks.

Reduced Prices.

Prices shown below apply on orders for less than 50 desks.

On orders for 50 to 200 desks, deduct 5 cents per desk from prices below.

On orders of 200 desks and over, deduct 10 cents per desk from prices below.

This is the Handsomest, Simplest, Strongest, Lowest Priced, Most Satisfactory School Desk Ever Offered.

This wonderful desk offer is only a sample of what we will save you throughout our entire line of school furniture and supplies.

SEND FOR SCHOOL FURNITURE CATALOG.

BINDING GUARANTEE

WE GUARANTEE THE WORKMANSHIP ON OUR DESKS TO BE FIRST CLASS IN EVERY RESPECT, AND THE MATERIALS TO BE THE BEST THAT CAN BE PRODUCED; AND IF NOT SATISFACTORY THEY MAY BE RETURNED AT OUR EXPENSE.

TABLE SHOWING SIZES, PRICES AND SHIPPING WEIGHTS OF OUR SCHOOL FURNITURE.

Our school seats are quoted f. o. b. cars from factory near Grand Rapids, Mich., or from warehouses in Chicago and St. Paul. School desks are shipped knocked down, and your freight agent can give you the rate per 100 pounds from Grand Rapids, and this table will enable you to figure quite closely the total weight and freight charges of the outfit desired.

Just write a postal card or letter and ask for our Special School Furniture Catalog and it will be mailed at once, free and postpaid.

HE FARM AVORITES ECONOMY CHIEF SAVE TIME AND MONEY

CREAM SEPARATORS

ECONOMY
Trade Mark Registered in United States Patent Office.

POSITIVELY GUARANTEED TO BE
THE WORLD'S CLOSEST SKIMMERS
ON WARM OR COLD MILK.

ECONOMY
Trade Mark Registered in United States Patent Office.

ALWAYS SOLD ON 60 DAYS' TRIAL

OVER 290,000 NOW IN USE

THE USE OF THE ECONOMY CHIEF HAS SPREAD LIKE A PRAIRIE FIRE

Less Than Eight Years 290,000 Have Been Sold. Today it outsells all the widely advertised makes and its sales are rapidly approaching those of all others combined. Once started a neighborhood it becomes the separator of that neighborhood. The sale of other makes soon ceases and in time, as old machines e way to the Economy Chief, we have a Chief neighborhood exclusively.

hy Is This? The Reason Is Plain. It is the best cream separator money can buy. Skims closer, runs easier, cleans quicker and does its work better than the next best, and a lot better than the ordinary kind. ers cannot help but advertise and praise it. Friends, relatives and neighbors see and try it and are convinced that they cannot ial the Economy Chief no matter where they buy or what they pay, so they, too, buy the Chief and in turn help to spread its ularity and sale.

e Have a Wonderful Separator in The Economy Chief. It is the one big shining success of the cream separator business, because it outskims and outclasses all attempted npetition.

In Original Invention, Up to Date Improvements, Ease of Runni and Close Skimming, the Economy Chief Leads the Wor

You Can Skim More Cream from any milk with the Economy Chief than with any other separator. It skims old milk, strippers' milk and milk from the breeds most difficult to skim perfectly.

It Is the Only Successful Cold Milk Skimmer and skims cold milk on which all other machines clog up, with the same ease as it skims fresh milk, warm from the cow. It gives you a beautiful smooth cream of finest texture, free from froth and just as heavy or thin as you want it.

The Secret of the Economy Chief's Success lies in its wonderful patent protected bowl and skimming cores that are the envy of all other makers, but which they dare not imitate or duplicate. These skimming cores give perfect control of the separating currents of skim milk and cream, preventing all the remixing, conflicting currents and lost motion that cripples the effectiveness of less perfect bowls.

In the Economy Chief Bowl the milk is guided and controlled from the moment the whole milk enters it until the completely separated milk and cream pass from their respective exits. The full centrifugal power generated by the rapid revolution of the bowl is utilized, and the result is the complete and almost instantaneous separation of the skim milk and cream, regardless of age, condition or temperature. It saves cream for you with every turn of the crank that other less effective bowls lose in the skim milk. We positively guarantee the Economy Chief to be the world's closest skimmer under all conditions.

The Economy Chief Bowl is built of the finest wrought steel, forged, turned and drawn into shape and is of giant strength. The frame of the Chief is heavy and rigid and scientifically designed to withstand many times the greatest strain that can be put upon it in use.

The Shafting is of the finest carbon steel, of ample size. Every moving part runs in extra long bearings of genuine Harding formula phosphor bronze, making a nearly frictionless and wearproof construction. The bowl runs in patented bearings which are marvelously simple and effective. They absorb outside shocks, prevent vibration and noise and automatically hold it to its true center so that it runs easily and quietly.

There Are But Three Gear Wheels, the smallest possible number. The supply tank is drawn from a single piece of heavy steel without a seam or sharp corner. The new Chief is right even to the sma detail. It is built in the largest and best equipped cream sepa factory in the United States. Over 600 men are employed year around in building it. The best modern machinery and finest tested material made to our own formula and skilled careful workmanship in every operation make it the most pe and durable cream separator made.

Take An Economy Chief Apart and compare it, p by piece, with o separators. You will find our material and workmanship so n superior that it will astonish you. When you note the long bro anti-friction bearings, the wide faced gears and the fine car steel shafting, the secret of its strength and durability will plain to you. You will not fi single frail or delicate part. ball, roller or cone bearings. friction clutches. No fancy adj ments to make. It is simple, sible and solid. A machine b to stand hard usage and do work year after year without pensive repairs or overhauling.

The New 1912 Mode while retaining every one of great exclusive features which h made the Economy Chief so cient and durable, have been r forced and improved in ma ways. In all sizes we are now ing reinforced skimming cores w double thick top and bottom pla and ribs. We have also adopted improved lower bearing which be quickly removed without turbing the gearing or other pa

Our New Triple Bron Bearing for the pinion sha gives it over 4 incl of anti-friction bearing surfa making a practically wearpr construction. The cream tube now detachable and can be replaced with a new one in a mom if ever necessary. The new easily cleaned bowl pot on the and 600-pound sizes is an idea housewives will appreciate. T face of the large gear wheel and pinion are nearly 50 per cent wi than in last season's models, making for still greater durability.

In the New 600-Pound Models we have also made base wider and heav and increased the capacity of the supply tank. The interior of t frame on all sizes is easily accessible for oiling and cleaning a in design it is the strongest and most handsome we have ev turned out.

You Will Be Delighted with our new models. Their hi quality is seen at the first glan and long use will serve to confirm your good opinion. Bet separators cannot be made.

We Give $2.00 In Value to the Agent's $1.0

If Made in the big up to date Economy Chief Cream Separator factory and sold at a single small profit over the factory cost, the way we sell the Economy Chief, the Sharples, Empire, De Laval, Bluebell, United States or any other agents' machine, could be sold at the same price as the Economy Chief, and many of them for a great deal less.

You Are Asked to Pay $60.00 to $90.00, or even more, for agents' machines because they are sold on the profit—profit—profit and more profit plan. The factory profit, state agent's profit, local agent's profit and dealer profit raise the price to you clear out of sight but do not add cent to the real value. Agents charge you $2.00 or more f every dollar's worth of value they give you. Our prices, as giv below, are as much as any separator of any make is really wor and should be your guide in buying. Agents will ask twice much for their machines, or even more, if they think you w stand for it, but not a single agent's machine has the real val in it that you get in the Economy Chief.

1912 Prices Way Below All Competitio

New 1912 Model	ONLY	New 1912 Model	ONLY	New 1912 Model	ONLY
250 to 300 Pounds Per Hour Capacity	$27.65	350 to 400 Pounds Per Hour Capacity	$34.90	600 Pounds Per Hour Capacity	$42.3

RY THE ECONOMY CHIEF FOR 60 DAYS

pose You Were Thinking of buying a farm in a locality where you were not acted and had selected a likely looking place but were a little tful about putting your money into it for fear it might not out to be as good as it looked.

ie Owner of the Farm, putting his hand on your shoulder and looking you re in the eye, would say, "I know this farm is just as I have sented it to be and you can make money by working it. rove it I will let you till it for a season and harvest a crop. i if you are satisfied that it is the farm you want you can for it; if not, we will call the deal off and you will not be out nt." You would be more than likely to take up his offer, use you would know that he was a pretty square sort of a and must be sure his farm was just as he claimed it to be.

.t's the Kind of an offer we make and always have made on the Economy Chief Cream Separator. give every buyer sixty days' trial so that he can see if it is the kind of a separator he wants and if it is going to be a ey making investment for him.

Have So Much Confidence in the Economy Chief that each year we put sands of them in the hands of customers to test out alongof any and all other cream separators sold by agents. We t ask the name of the other machine or the price. We let expert agent run his machine, and our customer, even though iever before saw a cream separator, can run the Economy f and beat the agent at his own game, because the Economy f easily outskims and outclasses all competitive machines.

Expert Is Needed to tell which machine is the best. The solid strength and durability of the nomy Chief shows in every line, and the way it handles cold and delivers a solid stream of smooth, perfect cream while agent's separator is clogging on the same kind of milk, is an opener.

7 Good Centrifugal Cream Separator will save a world of m that is wasted by the old fashioned pan raising or gravity em, but the Economy Chief does more than this and actually s cream that other separators do not get because they cannot as closely. It also skims cold milk that other machines ot skim without clogging and it handles old mixed milk and per's milk perfectly.

Tou Are Milking Cows, no matter how you dispose of the milk, we ask you by all ns to order an Economy Chief on two months' trial. If you skimming by hand and making butter at home it will give an extra pound of butter for every three you are making the butter will be finer in quality and bring a bigger price. elling to a cheese factory or whole milk creamery, skim at e instead, saving the long daily haul and you will also have t nutritious skim milk for the young stock. If you are shipcream it gives you a richer and heavier cream than you can in any other way.

1 Should Have An Economy Chief ready for use in case of accident mergency. If roads are bad or bridges down and you cannot to the creamery, cheese factory or railroad station, the Econ- Chief will always save the cream. Cream keeps well, is pped cheaply and the demand, at good prices, is always greater the supply.

Mr. Dairyman— We want to put an Economy Chief in on trial with you and we ask you to use it for two months. If you find it pays you and is a money maker, keep it. If not, send it back and we will return any money sent us. We will also pay all freight charges both ways and in addition allow you a fair price for reboxing it and hauling it to the depot.

Give the Economy Chief a good thorough test and look it over carefully. Let your wife run it and ask the neighbors to examine it. Compare it with the best separator in your neighborhood. Test the skim milk and cream from it or have them tested at the creamery. Compare your cream checks with what they were before you received it. Carefully note your saving in labor, time and money, and if after a two months' test you are not well and fully satisfied with the Economy Chief in every way, we want you to send it back.

Do Not Keep It if you are not fully convinced that it is a time saver and money saver for you. We do not want to have a single dissatisfied customer and would far rather lose the sale than have you keep the separator if you are not well pleased with it and glad to recommend it to others.

This Offer Is as Fair and Square as we know how to make it. We do the largest cream separator business in the United States and send every machine out on sixty days' trial, making the buyer the sole judge. We will accept your decision without question, return all money paid us, pay all freight charges and allow you a reasonable amount for reboxing the machine and hauling it to the depot if you return it.

Let Us Send You an Economy Chief on these terms and after a fair trial we are sure you will wonder how you ever got along without one.

THE ECONOMY CHIEF GUARANTEE

Economy Trade Mark Registered in United States Patent Office.

CERTIFICATE No.———

CERTIFICATE OF GUARANTEE

This is to Certify that the Catalog No.———CREAM SEPARATOR, sold———Town of———State of———is warranted to be perfect in material and workmanship, and perfect in operation, if properly set up and managed. We agree to replace, free of charge, any piece or part giving out by reason of defect in material or workmanship, for a period of twenty years from date.

When referring to this guarantee, please do not fail to mention Certificate Number, and also bowl number, which will be found stamped on bottom of bowl of machine.

Dated at Chicago, this———day of———A. D. 18——

SEARS, ROEBUCK AND CO.

This long term binding guarantee goes with every Economy Chief.

The Economy Chief Is Built with an accuracy and care that is unknown in ordinary machine shops and factories. Not only is the finished machine carefully examined, run and tested in every possible way by trained experts, but each individual part is measured, gauged and examined by keen eyed inspectors whose gauges and templates will not allow a variation from the true size of half a thousandth of an inch.

The Inspection Department is entirely separate from any other. No workman or foreman knows who will inspect his work. No inspector can tell whose work he is inspecting, so there is no chance for favoritism. Every bearing, shaft, casting and stamping bears the inspector's stamp, showing it to be perfect and accurate as to size.

This Is the Best Evidence and Guarantee that the Economy Chief is perfect. That you may have written evidence of it we issue to each Economy Chief buyer a written guarantee by which we bind ourselves to replace free of charge any part giving out through defect in material or workmanship for a period of twenty years from the date of purchase.

This Gives You Full and Complete Protection and by its terms, if by any chance a part should show a defect of any kind in years to come, we not only replace it free of all charge, but also send it to you with all transportation charges prepaid.

UR GREAT SKIMMING CHALLENGE TO LL SEPARATOR MANUFACTURERS

: Economy Chief is the Closest Skimmer in the World, Under All Conditions, and We Can Prove It. There is No Other Just as Good.

Ve Will Give $1,000.00 in Gold

the separator manufacturer who can produce a machine that will (skim the Economy Chief at temperatures of 50, 60, 70, 80 and 90 grees. We make this offer to all the manufacturers of all the cream parators sold by agents in the United States. We have tested them and we know what we are talking about. The New Economy Chief aks first. The best of the others is a poor second.

Our Great $1,000.00 Skimming Challenge has been widely advertised years. It has been open to every cream separator manufacturer in United States, is still open and has never been accepted. No separator manufacturer dares meet the Economy Chief in a fair and square nning test. It simply outskims and outclasses all competitive chines on hot or cold milk.

WAYS OF ORDERING

No Matter Which of the Following Methods of Ordering You Adopt You Have a Full Sixty Days' Trial, and In Case You Send Back the Separator We Always Promptly Return All Money Sent Us and Pay the Freight Charges Both Ways.

Sending the Full Amount of Cash With Order

The best and easiest way of ordering is to simply send us the full price of the separator selected with your order, either in the form of an express money order, postoffice money order, personal check or bank draft. As soon as we receive it we make prompt shipment of the separator. In a few days it arrives at your station and you merely call for it, pay the agent the small amount of freight charges due, take it home and put it into use for sixty days before finally deciding to keep it. Then if you don't want it, send it back to us at our expense and we will promptly send back all your money, including the freight charges you paid. This is the plan followed by nine out of ten of our customers and we feel sure that if you adopt it you will find it to be the easiest, simplest and best way.

Sending No Money At All With Your Order

If you would prefer not to send the money with your order just go to your banker in your home town and get from him a letter saying that he knows you to be reliable (which you can easily do). Enclose this letter with your order and we will at once ship the separator selected. After you have had sixty days' trial and are satisfied that the machine suits you in every way you can then send us the money.

We Will Ship C. O. D. On a Small Deposit

We will ship any separator on $1.00 deposit if you live East of the Rocky Mountains or on $5.00 deposit if you live West of the Rocky Mountains, the balance to be paid to the express agent when the separator reaches your depot.

This is a good way of ordering, but has a slight disadvantage, as the express companies usually make a charge of from 50 to 75 cents for the collection and return of the money to us, which you must pay. This is not a large amount, still by sending us cash with your order you can save it, and it is, of course, well worth saving.

Depositing the Money In Your Home Town Bank

By this method your money remains right in your own bank in your home town while you are trying the separator and you can get it at once in case you decide to return the machine to us. If you wish to order in this way just write us asking us to send you a copy of our Cream Separator Certificate of Deposit and we will do so at once. When you receive this certificate take it to your local bank in your own town and deposit the purchase price of the cream separator with your banker. He will fill out and sign the certificate and you can enclose it with your order. As soon as we receive it we will at once ship the separator which you select.

When the separator arrives take it home and use it for sixty days. Give it a good trial and if at the end of the sixty days the banker does not hear from you, or if you let him know that you are satisfied with the machine, he will send the money you have deposited to us, or if you decide to return the separator to us within the sixty days simply deliver it at the railroad station and the railroad agent will give you a bill of lading. Take this bill of lading over and hand it to your banker and he will at once return to you all the money you have deposited with him, and we, of course, will pay you back all the money you paid for freight charges, so that your trial will not cost you a penny.

If Offered Time or Easy Payment Terms By an Agent

Do not accept his offer, no matter how liberal it may seem, without first writing us. We can prove to you that it is to your interest to buy and use the Economy Chief, and no agent can make better prices or more liberal terms than we can. We want your cream separator order and will meet and beat any and all competition.

Old Cream Separators Taken In Exchange

If you have an old centrifugal cream separator of any make that runs hard, does not skim clean or is worn out, we will make you a most liberal proposition to take it in exchange for the big fast skimming Economy Chief.

If you are using your old separator every day you can arrange to keep right on using it until the new Chief is received and put into use. When we receive your old machine we will hold it for sixty days while you are trying the Economy Chief and will send it back to you and return any money paid us in case you wish to return the Chief.

In the past two years thousands of customers have taken advantage of our exchange offer and we have yet to hear of one who was not well satisfied with his bargain. If your old cream separator is worn out or is in need of expensive repairs, by all means send for our cream separator exchange offer. It will surely interest you.

FREIGHT CHARG ARE ONLY A SMALL IT

Freight charges are alike to one and all and you agent or dealer must pay exactly the same rates as you He always figures the freight charges in the price sells you a separator and usually charges a good profit freight charges as well as his profit on the separator as you can easily see when you compare his prices wi So you can see how small the freight charges really how little they amount to compared with your saving by buying a separator from us, we print below a tabl gives you the freight rates per 100 pounds on cream se from the factory at Waterloo, Iowa, to points in eac The average shipping weight is about 215 pounds a freight rates to your town will be almost exactly the they are to the town which is nearest to you.

Why 98 Per Cent of the Best Farmers Use the Economy Chief

The Economy Chief has always been built for everyday farm use. It is not made merely to show at fairs and exhibitions. There are no fancy fixings put in just for the sake of having something to talk about or to catch the eye of prospective customers, and give trouble forever afterward.

Agents' Machines are built to display a lot of so called talking points and selling features. The agent must have something new and something different from everyone else to talk about. His new feature may be of no value and is more than likely to be entirely impracticable for use in a farm separator, but it gives him something to talk on, and that is the main thing, for talk is his stock in trade.

The Economy Chief is built, not for show purposes, but to do the work, not only when you buy it, but for months and years afterward. Built to last indefinitely. There is almost no wear out to it with ordinary care. All the parts that are subjected to any wear whatever are removable and can be replaced, if need be, at a trifling cost.

IT IS THE ACME OF SIMPLICITY

Really By Far the Most Simple Cream Separator Made.

The Self Cleaning Bowl.

After skimming, simply run through 2 or 3 quarts of warm water in which a little washing powder has been mixed and the cores are cleaned perfectly by the same great centrifugal force that skims the milk. When the bowl has stopped and the cores are removed they will be found to be bright, clean and dry. The easy cleaning features of the Economy Chief are a delight to the housewife.

There are no fine adjustments for the user to make. It is adjusted just right at the factory when it is built, and stays that way. No ball bearings, cones, adjusting nuts, washers, etc., to fuss with; no clutches that do not clutch. Nothing for you to ever change but the cream screw; which is just a simple screw. If you want heavier cream, turn the screw in a little. If you want a lighter cream, turn it out. That's all there is to it.

Anyone Can Learn to operate the Economy Chief in a few minutes' time, even though they never before saw a cream separator. Every operation is so simple and so natural that directions are hardly required, although we furnish full and complete directions with every one.

There Is Nothing About It that requires a mechanic or a skilled workman. No tools are needed except the screwdriver and wrenches that go with it. Your wife, boy or hired man can run it and skim the milk just as well as the most accomplished expert. It's almost nothing to clean. Needs no special care except the ordinary oiling and cleaning any piece of machinery must have.

FEW PARTS AND VERY SIMPLE.

Has Very Few Parts and not a single weak or delicate one. Only one-half to one-tenth as many parts as other machines (by actual count some widely advertised machines have ten times as many parts as the Economy Chief.) Only five parts to the Economy Chief bowl, instead of 40 to 50 separate parts as in some machines. Only three parts to the Economy Chief ratchet. Pinion and shaft are cut from a single steel bar. The worm wheel is pinned immovably to the shaft.

Adjusted Right at the factory and stays that way. How much better this is than having to bother with a handful of cones, balls, washers, nuts and set screws that are always working loose and giving trouble. Look out for the complicated machine that the agent sells. Many of them are filled with talking points for the agents and trouble for the user.

The Economy Chief Frame is a tower of strength. Strong and solid as a rock and will not weave or give while running. Scientifically built to give the greatest rigidity, and of ample weight. It is sanitary; easy to sweep or mop under; no corners for dirt to gather. No spilled milk, and the new tool shelf and oil collector prevents oil stains on the floor. It is the only separator that can be used in the kitchen without giving the housewife a world of cleaning to do.

The Crank is only 9½ inches long and is just the right height for easy turning without straining the back and arms. The supply tank is low enough so that a short person can pour a pail of milk into it without straining himself or splashing the milk, yet high enough so that dirt or dust is not likely to fall into it.

A Shelf Is Provided for the cream pail, raising it up from the floor. The skim milk spout is high. You can set an 8-gallon can under it easily. This is a point worth watching. On the so called low tank machines the skim milk spout is often so low that you can only put a small vessel under it, which must be changed continually, as it fills while skimming, usually splashing the milk over the floor and machine in making the change.

The Bowl is light and easy to handle, yet of enormous strength. The bowl spindle is of solid carbonized steel of the highest quality. All shafting is cut and turned from fine steel. Every moving part runs in extra long bearings of the genuine Harding formula phosphor bronze, the finest anti-friction metal in use.

Only Three Gear Wheels, all heavy and strong, and cut with the finest gear cutting machinery money can buy, insuring perfect accuracy and easy running. The supply tank is not made of pieces of tin soldered together in the ordinary way, but is drawn from a single sheet of heavy steel, smoothly and without a wrinkle or sharp corner. No dirt and germ collecting corners or leaky seams in this tank. It will last as long as the separator does.

The Economy Chief is built complete in the big Economy factory, the finest, largest and most completely equipped in the United States.

It's Only by Building it in one great factory, so that we know that every bit of material in it is the best that money can buy for its purpose and that every part is of ample strength and accurately made by careful workmen under our own supervision, that we can ship them out as we do all over the United States on sixty days' trial, to be matched against any and all machines in the hands of expert agents.

The Economy Chief is built to compete with any cream separator made at any time or any place. In the hands of the most inexperienced dairyman who perhaps has never before seen or at least run a cream separator, it must defeat the experienced agent who is an expert in covering up the weak points of his machine and showing up its good points, and it does it.

The Economy Chief cannot have a single weak point. If it did we could not send it out on trial as we do. About 290,000 Economy Chief Separators have been sent out on trial and are now in use. They have met and defeated all the prominent machines in the hands of experienced agents thousands upon thousands of times. The Economy Chief is simply unmatched for simplicity and effectiveness. It outskims, outwears and outclassea all competitors.

Use It Alongside of any other machine and see for yourself how much better it skims warm or cold milk, how much easier it runs, how simple it is compared with other machines, how easy to handle, to clean and to care for. The Economy Chief has won its place on pure merit as the most popular and biggest selling cream separator in the United States, simply because it is the best in every way.

No Matter What Separator You May Favor or what the agent or dealer may tell you, do not close the deal for any machine at any price without first trying it alongside of the Economy Chief. Remember, it costs you nothing to try the Economy Chief. We will gladly ship it to you for sixty days' trial alongside of any cream separator made, regardless of price or reputation, and you are to be the sole judge of which is the better.

We Do Not Ask You to sign any contract or agreement of any kind. You are not under the least obligation to us to keep the Economy Chief because you have ordered it on trial. If after your test you wish to return it to us, we will at once without question return all the money you sent us and pay all the freight charges both ways, so that your trial will not cost you as much as a single penny. Send us your order on trial and let us show you what the Economy Chief will do.

The High Skim Milk Spout.

The skim milk spout is high so that a big milk can goes under it easily. The cream pail sets on a shelf where dirt is not likely to fall into it, and out of the reach of cats and dogs.

The Handy Tool Shelf.

This is an exclusive Economy Chief feature. The tool shelf has ample room for wrenches, oil can, etc., and they are easily reached from either side. It is provided with a covered oil collector that saves all the waste oil and prevents oil stains on the floor.

$10.00 to $20.00 SAVED by Buying Watson Wagon, But LOST by Buying Elsewhere. SEARS, ROEBUCK AND CO., CHICAGO, ILL. **1135**

THE ONLY BOWL That Skims Cold Milk as Wel Warm and Purifies and Aer Both Skim Milk and Cr

The Economy Chief Bowl skims anything in the milk line that can be skimmed. Skims warm or cold milk, new, old or mixed milk, strippers' milk, and milk from cows of all breeds and cows on dry feed. Skims milk in any condition right down to a trace so small that it can only be found by a fine chemical test. Skims perfectly clean for all practical purposes.

We Fully Guarantee the Economy Chief to outskim any cream separator made, at all temperatures. Some separators skim warm milk fresh from the cow nearly as closely as the Economy C but when conditions for skimming are difficult, when the m old or cold, or from cows far advanced in lactation, they waste cream, clog up and are useless. They one and all the wonderful reserve capacity, the great patented imp ments that put the Economy Chief bowl in a class by itse the only cold milk skimmer. The best separators of the makes lose twice as much butter fat as the Economy under average conditions; ordinary separators lose from to ten times as much. Butter fat is by far the most valu of all farm products, and you cannot afford to waste a drop

To Get All the Cream under all conditions, winter and summer, you must use the Economy Chief. No separator is made or can be made that will skim the cream from thick, clabbered milk or milk that is so cold that it is partly frozen, as the particles of ice and slush will fill up the exits. But the Economy Chief will skim anything else.

In Winter when the cows are giving but little milk, you can mix the morning and evening milk and skim once a day if you use the Economy Chief. With any other separator you must heat the milk before you can skim it. Think of the labor of building fires and the fuel you must use if you are obliged to heat milk before skimming during the cold winter season, which means nearly six months of the year.

You Can Save all the heavy lifting and fire building and the danger of scorching the milk by buying the right separator in the first place, the only one which will skim the milk cold as well as warm. This is the patent protected Economy Chief that other makers dare not imitate. Close skimming under all ordinary dairying conditions is necessary if you are to make the greatest profit from your herd. Every drop of cream left in the skim milk means valuable butter fat lost. Some separators lose cream with every turn of the crank. None skim as closely as the Economy Chief.

You Have Read our great $1,000.00 challenge offer on a preceding page. This offer has been made for years and widely advertised. Every separator maker knows about it, but it has never been accepted. They know from their own tests and from the experience of their agents in the field that their separator cannot compare with the Economy Chief for close skimming.

You Can Buy a Cow Every Year with the cream that the Economy Chief will save that other separators would lose if you are skimming the milk from a herd of ten cows.

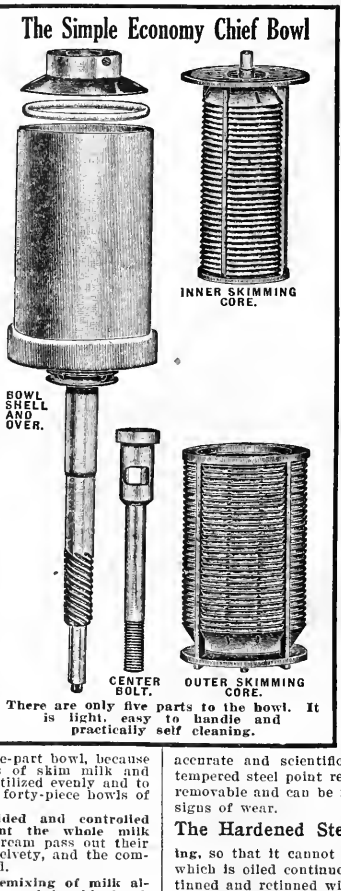
Like All Really Great Original Inventions the Economy Chief bowl is simple. There are only five parts to it: The bowl shell, two skimming cores, center bolt and bowl cover. Yet this simple five-part bowl, because of its wonderful control of the separating currents of skim milk and cream so that every inch of its skimming surface is utilized evenly and to its fullest extent, is more effective than the thirty or forty-piece bowls of less scientific construction.

In the Economy Chief Bowl the milk is guided and controlled from the moment the whole milk enters the bowl until the separated skim milk and cream pass out their respective exits. The cream is purified smooth and velvety, and the completely separated skim milk also is purified and aerated.

There Are No Conflicting Currents and no remixing of milk already skimmed in this bowl. The milk and cream are separated almost instantly under the influence of the centrifugal force, the skim milk passes out at the bottom of the bowl and the cream at the top, quickly and quietly. It is this perfect control of the separating fluid in the bowl that prevents clogging in the Economy Chief and makes it such a remarkable cold milk skimmer.

The Dirt Collector and Purifying Chamber is an original Economy feature. Every drop of whole milk must pass through it before it enters the skimming chamber. Here all dirt, hair and other impurities are removed and deposited, and the purified milk passes down through an equalizing distributer which feeds it into the neutral zone of the skimming chamber, where under the action of the centrifugal force and controlled by the patented Economy double opposed skimming discs it is almost instantly separated. The cream as it passes out is regulated to any desired density by turning a simple screw in or out. The dirt and impurities do not enter the skimming chamber at all, and both skim milk and cream leave the separator in better condition than the original whole milk.

The Simple Economy Chief Bowl



There are only five parts to the bowl. It is light, easy to handle and practically self cleaning.

The Economy Chief has the nearest self cleaning bowl has ever been invented. The skimming core cleaned by the same great centrifugal force skims the milk, more powerful than the stro hand, and acting upon every inch of the su at once.

To Clean It requires but two or three utes' time. After the skim is finished and the cream flushed out of the while the bowl is still running, simply through 2 or 3 quarts of warm water, to wh little washing powder has been added.

The Centrifugal Force cleans the perfectly, and the bowl stops, remove them and you will them clean, dry and shining like new. The c that adheres to the inside of the bowl sh quickly removed with the brushes we fur Rinse the tank and cream cover and the cle is finished.

Customers Grow Enthusiastic over easy c ing feature of the Economy. Many have to they could clean their machines completely in time than is required for the old style heavy arator bowl to run down so that it can be t apart.

Economy Chief Bowls are light and e handled, weig but 7⅛ to 8¾ pounds, according to size. are of enormous strength, being made of the est wrought steel throughout and are many t stronger than is necessary to withstand the g est strain which can be put upon them running.

The Bowl Top, the bowl bottom and c bolt are turned and cut wrought steel forgings. The bowl shells are d from flat sheets of tough steel in enormous p es right to the Economy factory. The cores made up of wrought steel discs, with extra h top and bottom plates and ribe, all riveted gether, so that they are practically as strong cut from a solid block of steel.

The Bowl Spindle is cut from hard car ized steel. The dri worm on the spindle is a splendid exampl accurate and scientific gear cutting. The bowl revolves on a diam tempered steel point resting on a hardened steel ball. This point is e removable and can be replaced at a trifling expense if it should ever s signs of wear.

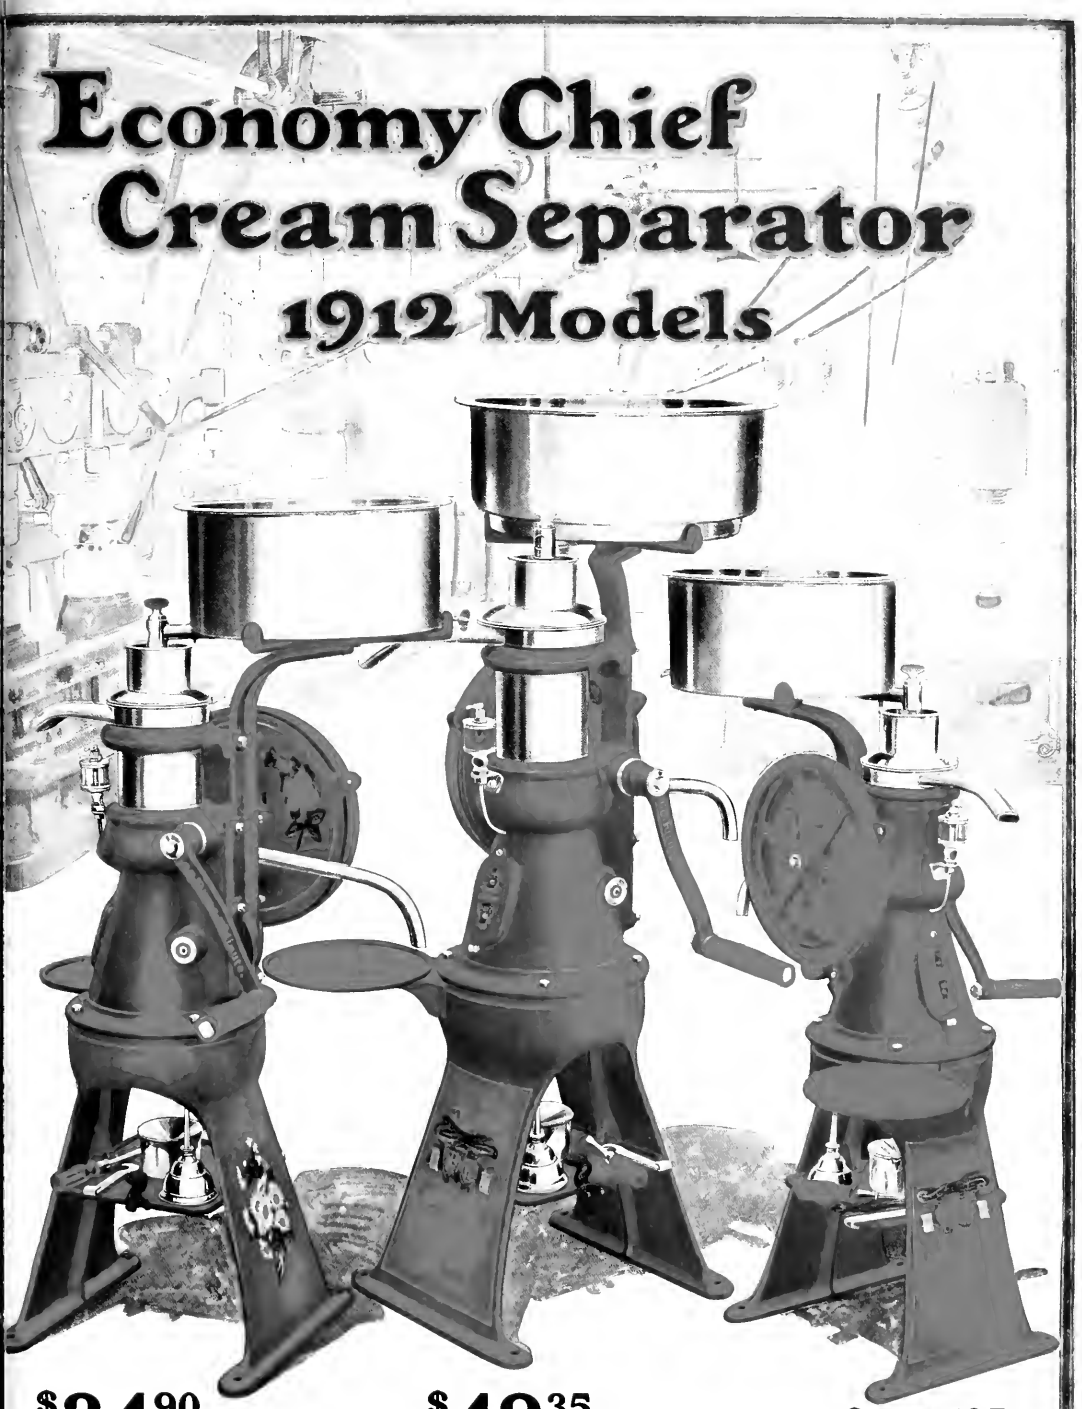
The Hardened Steel Cream Regulating Screw is seated bronze bu ing, so that it cannot rust or stick. The entire bowl, except the spi which is oiled continuously in operation by an automatic oiler, is hea tinned and retinned with the best pure tin to prevent rust.

Although the Economy Bowls are so light and small, becaus their scientific construction t l easily outskim bowls twice as large, weighing 12 to 15 pounds and taining thirty to forty loose parts. They measure but 3 3-16 inches in diameter, and other bowls are clumsy and hard to handle compared them.

The Bowl is the most important part of any cream separator. Economy bowls save valuable cream that is lost by o less perfect ones. Careful dairymen with their own best interests in have found they can use no other, for the marvelous Economy Chief b has changed dairying from a doubtful speculation to a safe and profit business. It has saved and is saving many millions of dollars yearly herd owners and is one of the greatest inventions of the age in f machinery.

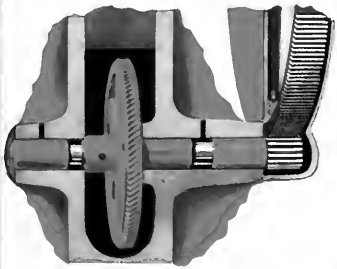
Economy Chief Cream Separator

1912 Models

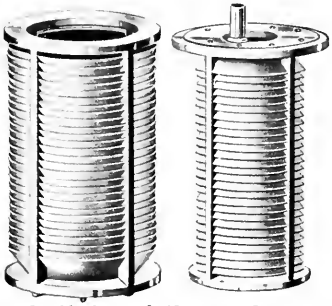


$34.90 **$42.35** **$27.65**

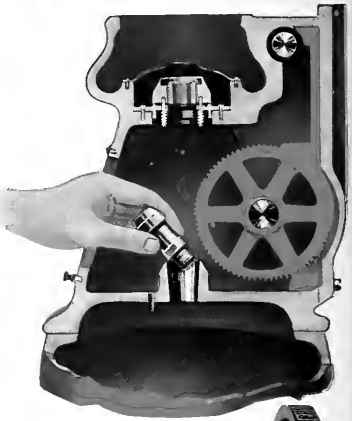
SOME OF THE NEW FEATURES THAT MAKE THIS SEASON'S ECONOMY CHIEF CREAM SEPARATORS BETTER THAN EVER



Triple Pinion Shaft Bearings in All Sizes.



Double Strength Skimming Cores in All Sizes.



Quickly Removable Lower Bearing in All Sizes.

Detachable Cream Tube Top in All Sizes.

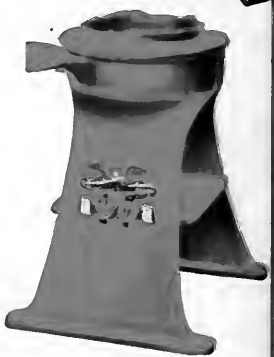
New Sanitary Pot on 400 and 600-Pound Sizes.

Gears 50 Per Cent Wider Than Before in All Sizes.

Extra Large Cream Pan on the 600-Pound Size.

Interior Easy of Access in All Sizes.

Big Capacity Supply Tank on the 600-Pound Size.



Extra Heavy Base on the 600-Pound Size.

Strong and Lasting in Every Detail

THE SIMPLE TROUBLE PROOF GEARING

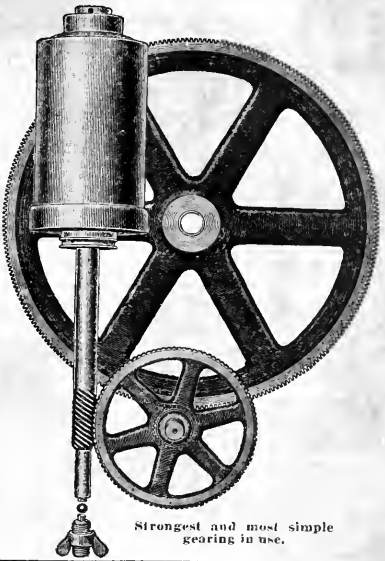
The Complete Economy Gearing is shown in this illustration. The large driving wheel is turned by means of the crank handle and in turn revolves a small cog wheel called the pinion. Pinned solidly to the pinion shaft and revolving with it is the bronze worm wheel that, meshing with a spiral worm cut in the steel bowl spindle, revolves the bowl.

This Is All There Is to It. Only three gear wheels and only two points of contact, the large gear with the pinion and the worm wheel with the worm on the bowl spindle.

The Gears Are Amply Heavy and broad faced and made of materials that run together with the least wear and friction. The low speed driving gear is of fine grained cast iron and meshes with the carbonized steel pinion. The high speed worm wheel is made of fine phosphor bronze and runs with the hard carbon steel bowl spindle. This is a combination that gearing experts will tell you is ideal for long life and easy running. The shaft-ing is all hard carbonized steel ground to exact size and runs in extra long anti-friction phosphor bronze bearings.

The Position of Each Gear Is Fixed and exact in relation to the others. The main driving gear bolts up to a shoulder on its shaft. The pinion is cut solid with the pinion shaft and the bronze wheel is pinned immovably into place so they cannot get out of adjustment.

The Chief Gearing Is Adjusted Right at the factory and stays that way for it cannot be changed. Look out for ball bearings and adjustable cone bearings, bicycle chains and bevel gears. They are trouble breeding fads—all right in a machine shop with a mechanic at hand to tinker with them and keep them running, but not suited for farm use. Stick to solid trouble proof simplicity and the Economy Chief.



Strongest and most simple gearing in use.

THE MAIN DRIVING GEAR AND SHAFT

Carbonized steel shafting running in Phosphor Bronze Bearings.

For long wear this combination can't be beat.

The Main Driving Shaft is turned and ground from hard carbonized steel and is 15-16 inch thick in the bearings. The ratchet plate is milled and cut from a steel forging and is screwed into place against a shoulder on the shaft. The driving shaft runs in two phosphor bronze bearings 1½ inches long, giving 3 inches of anti-friction bearing surface. Note this carefully, as most makers simply run the driving shaft in a hole in the frame and do not use bearings of any kind at this point.

All Economy Gears Are Cut from the solid metal by the best gear cutting machinery and are carefully tested for accuracy and smooth running. You cannot beat this construction.

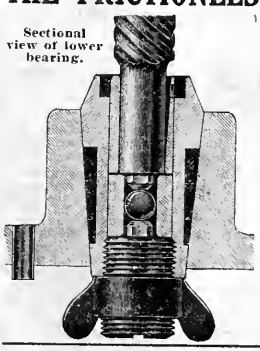
THE WORM WHEEL AND PINION

The Pinion and Shaft are cut and turned from a single bar of hard carbonized steel. The worm wheel is made from Hard-ing's formula phosphor bronze, the finest and hardest anti-friction metal that money can buy and is a splendid example of accurate and scientific gear cutting.

Notice the three long bronze bearings.

In the 1912 Model the pinion shaft runs in three anti-friction bronze bushings which support it both ends and in the middle, giving over 4 inches of fine phosphor bronze bearing surface and distributing the strain so there is practically no wear out to it. This is one reason for the strength and durability of the Chief. The cast iron and short bronze bearings used by other makers cannot and do not last as long.

THE FRICTIONLESS LOWER BEARING



Sectional view of lower bearing.

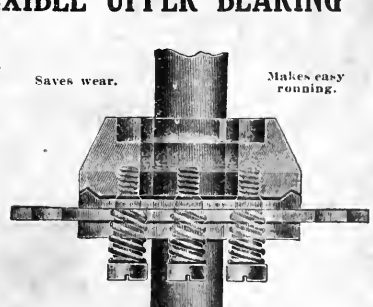
In the Lower End of the Bowl Spindle a tool steel point tempered to flinty hardness is inserted. This rests on a hardened steel ball which supports the weight of the bowl and spindle and in turn revolves on another hardened steel point in the lower adjusting screw. Fine anti-friction bronze bearings surround both the lower end of the spindle and the steel bearing ball, holding them in true and perfect line, so that the bowl spins as freely as a top on the steel ball.

It Would Be Hard to Devise a better bearing than this one. It is nearly frictionless, very simple; there is nothing to break or get out of adjustment and all parts can be easily replaced at a trifling cost if ever necessary, as both the bearing points and the ball are easily removed and replaced with new ones.

THE FLEXIBLE UPPER BEARING

The Flexible Upper Bearing which surrounds the bowl spindle just below the neck and centers the bowl is shown in this X-ray picture. If a sudden jar or shock causes the bowl to swing or shake, this flexible bearing brings it back to its true center quickly and quietly.

It Is an Ingenious Patented Device and is positively and automatically self centering. The flexible bronze spindle bearing is seated in a heavy metal block which rests on a conical rim and is centered by springs at the bottom. It acts gently and positively and controls the bowl without noise or jar.



Saves wear.

Makes easy running.

X-Ray Picture of the Upper Bearing.

BUILT FOR HARD STEADY USE

THE AUTOMATIC LUBRICATOR.

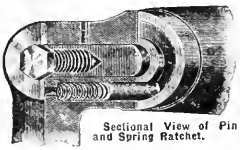
Sectional View of Oiling System.

This Sectional View shows our automatic oiler and the tube that carries the oil to the upper bowl bearing. In operation the bowl runs very rapidly and our automatic oiler feeds lubricating oil into the spindle bearing a drop at a time at regular intervals, thus providing a constant thin film of oil between the bowl spindle and the bronze bearing, insuring easy frictionless running and preventing wear.

The Amount of Oil Required is small, three or four drops a minute being the proper feed. Our sight feed lubricator is easily regulated to feed the desired quantity by means of the knurled nut at the top and once regulated needs no further attention except to start and shut off the flow of oil, which is done by turning the top lever up or down. Our lubricator is generously large in size and made of brass nickel plated and polished. It is provided with a glass reservoir and sight feed so that the supply and flow of oil is easily seen.

THE POSITIVE NEVER SLIP RATCHET.

Our Strong Simple Ratchet has but three parts. A forged steel ratchet plate secured to the main driving shaft, a hardened steel pin in the crank which is held in contact with the ratchet plate by a single tempered spiral spring. Nothing to get out of order or break about this ratchet.



Sectional View of Pin and Spring Ratchet.

It Is Positive and Never Fails and as it operates at low speed there is practically no wear or strain upon it. No slipping, lost motion or wedging as in friction clutches, no weak intricate parts working under an excessive strain as in spindle and pinion ratchets. When you stop turning the crank the bowl and gearing run down together, stopping the bowl quickly without undue wear on any single part. The wear is distributed over all the moving parts equally and is not all upon one or two parts as it is where other ratchets and clutches are used. This old reliable pin and spring ratchet has never been equaled for strength and durability.

PHOSPHOR BRONZE BEARINGS.

Examine the Ordinary Run of agents' separators and you will find bronze or babbitt metal bearings for the bowl spindle, cast iron or short brass bearings for the pinion shaft and no bearings at all for the crank shaft which simply runs in a hole drilled in the cast iron frame. This is a cheap construction and will not last.

In the Economy Chief with the idea of quality always uppermost, regardless of cost, we insure long life and easy running by using genuine Harding formula phosphor bronze bearings of extra length for every moving part. This Harding formula bronze is the finest and hardest anti-friction bronze now in use. Each bearing is turned and drilled from a solid casting, to get the metal in its toughest and most durable form.

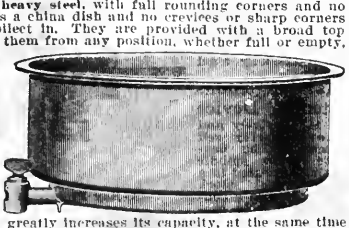
This Is An Expensive Construction but it pays in the end. All bearings are removable and easily replaced if ever necessary. The bearing surfaces are broached to an exact size, accurate to the thousandth part of an inch and polished to a mirror finish.

SEAMLESS ONE-PIECE SUPPLY TANKS.

Another Exclusive Economy Chief Feature is our sanitary supply tank. The ordinary supply tank is a pieced tin affair with soldered joints and sharp corners that catch the dirt and germs and are hard to clean, as housewives well know.

Economy Tanks Are the Sanitary Kind, each being drawn from a single sheet of smooth heavy steel, with full rounding corners and no seams; as easy to clean as a china dish and no crevices or sharp corners for germs and dirt to collect in. They are provided with a broad top rim you can easily lift them from any position, whether full or empty, and the old style lifting handles are unnecessary.

The Circular Gutter in the bottom drains them quickly and to the last drop. They are heavily double tinned with pure block tin and will last as long as the separator itself. For the 600-pound size machine we have adopted an extra large tank this season, with swelled sides, which greatly increases its capacity, at the same time retaining all the sanitary features of the smaller tanks.



THE SANITARY FAUCET.

The Supply Tank Faucets are extra large to insure the full flow when the milk is low in the tank and an extension channel helps to drain the last of the milk out quickly.

The Faucet Key Is Removable and an opening in the end permits you to run a brush straight through the channel from end to end, cleaning it in a moment. An improved rest takes the weight of the tank and contents off the faucet when standing on a flat surface. Notice also that the bottom of the key is flush with the faucet bottom and cannot be driven up, causing the milk to run out when setting on a table, as the ordinary keys used on other separators will do. Our faucets are cast brass, polished and heavily nickel plated.

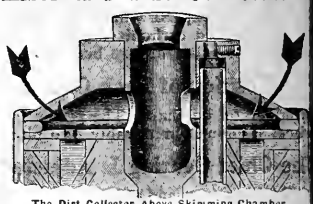
Our Quick Draining Faucet.

STRONG POINTS ABOUT THE BOWL.

The Purifying Chamber and Dirt Collector.

One of the Main Reasons for the big demand for Economy cream is its purity. It keeps longer and makes butter of better flavor than ordinary cream, because every drop of whole milk entering the bowl is purified and cleansed before it is skimmed.

The Purifying Chamber is located between the cover and the top plate of the inner core. It receives all the whole milk as it enters the bowl, and by centrifugal force all the dirt and impurities in the milk are extracted and deposited here. The milk purified and cleansed then passes down into the skimming chamber. In other separators the milk is fed directly into the skimming chamber, where the dirt is deposited between the discs, contaminating all the milk that passes through them, so that a small quantity of dirty milk will often give the entire skimming a bad taste or odor. Pure milk makes pure cream and in the Chief the milk is purified before it is skimmed.



The Dirt Collector Above Skimming Chamber.

THE NEW HEAVY SKIMMING CORES.

The New Reinforced Cores.

The Skimming Cores this season are made with extra heavy ribs and top and bottom plates. As these are the only parts that are subjected to rubbing or wear when the bowl is taken apart or put together, the life of the bowl is more than doubled and the cores greatly strengthened.

In the New Model the cores are also fitted with a removable cream tube top which can be easily unscrewed and replaced by the user if it should ever become worn or damaged by accident, saving the trouble and expense of returning the bowl for repairs.

REGULATING THE CREAM.

The Economy Chief Cream runs free from froth or foam. You can regulate it to any desired density by turning the cream screw in the bowl head in or out with a small screwdriver which we furnish with the machine.

You Can Skim the Thin Cream that ice cream makers demand, heavy cream for shipping or a medium cream for home butter making with equal ease and can change the density of the cream at any time without taking the bowl apart.

The Cream Screw is made of hardened steel and turns in a bronze bushing set in the bowl head, which prevents it rusting in and sticking.

Every Detail in the Economy Chief is worked out with greatest care and no expense has been spared in our aim to make it the most perfect of all farm cream separators.

We Use The Very Best Material regardless of cost. Our workmen are skilled and careful. Every part is carefully gauged and inspected by trained inspectors. Each finished machine is tested by power and by hand. The Economy Chief is honestly good all the way through and we stand back of every one we put out, guaranteeing it absolutely to do all that any separator can do better than any other machine made, regardless of price.

DAIRYING FOR PROFIT

HOW TO MAKE THE MOST MONEY IN THE EASIEST WAY

A WELL MANAGED DAIRY YIELDS BIG RETURNS.

A Well Conducted Dairy is a source of continual pleasure and profit for its owner. No other form of farming pays so handsomely or so surely. Dairying not only brings a fine income every month in the year, but enriches the soil. With the greater fertility, larger crops and natural increase in his herd the wise farmer, who is careful to get the greatest benefit from his dairy, soon finds that his industry has placed him in a position of competence and ease.

THE SECRET OF SUCCESS.

The Sure Way to Quick and Certain Success In Dairying is to make use of the products while they are in the best condition and will bring the greatest returns. For example, butter fat fed to the pigs in old sour milk is nearly valueless, while the same butter fat if sold in sweet fresh cream will bring 25 to 35 cents a pound. Again, a pile of unused manure in the barnyard not only has no value, but is a nuisance, yet that same manure rightly spread on the fields will so fertilize the soil that the increase in the crop yield may be worth hundreds of dollars.

THE GOLDEN CROP OF BUTTER FAT.

Butter Fat Being the Most Valuable Dairy Product in fact, the most costly of all farm products, naturally the first care of the thoughtful dairy farmer is to get all the butter fat from the milk in the best condition. Butter fat is distributed through the milk in millions of tiny particles. Ordinary milk contains about two million particles of butter fat to each drop and to extract and concentrate these butter fat particles in the form of cream is the dairyman's most important problem.

OLD WAYS OF GATHERING BUTTER FAT.

In Olden Times the only known way of gathering the fat particles was to set the milk in pans in a cool quiet place and in time the butter fat particles being lighter a part of them would slowly rise to the surface, to be skimmed off as cream, but this causes a loss of from one-half to one-fifth of the butter fat which never rises to the top and is wasted or fed to the pigs in the sour skim milk.

The Cooley Can or Deep Setting System for raising the cream in tall narrow cans plunged in ice water is just a little better than the shallow pan method but the loss is still a serious one.

The Dilution Method, by which cold water is mixed with the milk before setting it aside to cream, is the worst of all gravity systems. The cream is thin, poor in quality and there is not much of it. The mixture of sour skim milk and water that is left is almost useless for food and animals grow poor drinking it.

THE OLD METHODS ARE WASTEFUL.

Any and All Gravity Systems Waste Butter Fat as from one-half to one-fifth of it does not come to the top and is left in the skim milk. This means a clear loss of from one-half to one-fifth of the total gross profit. Not one business in ten can stand a loss like this and survive; so to be successful the dairyman must avoid this waste.

THE WHOLE MILK CREAMERY.

Selling the Whole Milk to the Creamery is another wasteful way as, while you get credit for all or nearly all of the butter fat, the cost of the hauling back and forth eats up a large part of the profit, if you pay to have it done, or takes a great deal of your own valuable time if you do it yourself. The skim milk from the creamery vat is always a source of danger, as it is more than likely to contain contagious germs from infected animals in other herds and may spread tuberculosis, lumpy jaw or other deadly diseases among your young stock.

THE EASIEST WAY OF ALL.

The Only Way to Make the Greatest Possible Profit from your cows is to use a centrifugal cream separator and separate all the butter fat from the fresh milk as soon as the milking is finished and while it is still fresh and in perfect condition. This not only gives you all the fat in its best condition, but in addition, you have the sweet skim milk still warm with the animal heat of the cow and full of nutritious and life giving properties for feeding.

Sweet Skim Milk Is Worth Ten Times as Much as the old sour milk for feeding; in fact, with the addition of a little chopped corn or oil meal it is fully equal to whole milk for raising young stock.

THE ROAD TO SUCCESS.

The First and Most Necessary Step to Successful Dairying is to buy an Economy Chief Cream Separator and separate the cream from your milk at home as fast as the milking is finished, and whether you sell the cream or make and sell butter, you have solved the profit problem in your dairy.

The Economy Chief Is Going to Make It a Sure Money Maker at all seasons of the year. It gets every bit of the fat out of the milk and gives you the skim milk and cream while they are in the very finest condition. The day you start to use it the hard drudgery of the dairy disappears and the market value as well as the quantity of your dairy products increase. You are on the road to sure dairy success. You are proof against ordinary bad seasons or crop failures. From the sale of butter or cream there is a continual stream of money flowing on to your farm. The soil grows richer and more fertile year by year and the harvest is not confined to one season, but is continuous.

ANYONE CAN USE IT.

Compared With Other Farm Machinery the Economy Chief is very simple. There is nothing complicated or mysterious about it. You don't have to be a mechanic or know anything about machinery to use it. The hired man, a half grown boy or your wife can run it just as well as you can, but simple though it is, it is a most wonderful money maker and starts to pile up profit for you the day you put it into use.

To Operate It you simply pour the milk into the supply tank as fast as milked or when the milking is finished. Turn the crank and turn on the faucet that lets the milk into the bowl. In a moment a stream of the finest, pure, smooth cream comes from one spout and the sweet fresh milk from the other.

It Separates the Milk From the Cream at the rate of a milk paitful in from two to four minutes, according to the capacity of the machine. The cream is smooth, velvety and free from froth and can be regulated to any desired consistency, from the thinnest to the heaviest, by turning a single simple screw.

In Passing Through the Bowl It Has Been Purified and cleansed of germs and dirt and when cooled will not only bring a bigger price than the old sour cream from the pan raising method, but will keep three or four times as long. The skim milk is also purified and aerated and is in the very best condition for feeding.

BETTER IN EVERY WAY.

Instead of Losing From One-Fifth to One-Half the butter fat, and getting the balance in poor condition, you take it all from the sweet fresh milk while it is in its finest condition, and the Economy Chief has made the difference. The dairy work is so easy. Thirty minutes after the milking is over the skimming is finished, the cream set aside to cool in a single can and the separator washed. The sweet skim milk has been fed to the stock and the dairy work is over.

Instead of 100 Pounds of Milk to Handle you have but 10 pounds of cream. Only one can to scald and wash, where you had twenty pans before. No sour milk standing around. No tiresome hand skimming. No long hours of work in a damp chilly dairy and no long hauls to the creamery over good or bad roads in all kinds of weather. Your cows are so little trouble that you hardly know you have them, and the best part of it is that you will make several times as much profit from each cow as you did before using the Economy Chief.

BOTH SKIM MILK AND CREAM PURIFIED.

The Purifying Chamber in the Economy Bowl, through which the whole milk must pass before entering the skimming chamber, takes out all the dirt and germs that may have dropped into the milk after leaving the cows. The cream, purified and aerated, is delivered in the smoothest and most elegant condition, free from froth and containing any desired proportion of butter fat.

After Cooling it will keep in good condition several times as long as gravity raised cream which has been spread over the top of the sour milk for hours, gathering dust from the air and rapidly fermenting.

A SAVING IN MANY WAYS.

In Churning Separator Cream the saving over gravity raised cream amounts to 15 or 20 pounds of butter extra in the course of a year from the milk of a single cow, because it churns out more completely. Separator cream, too, churns in about one-half the time of gravity raised cream. The butter granulates quickly and there is less buttermilk and less fat left in the buttermilk.

Separator Cream Can be Shipped Hundreds of Miles if desired. This gives you a broad market and you can always sell at the highest price. With the Economy Chief you can skim any cream, from the thinnest, to a cream so heavy that it will hardly flow. It is a big advantage to be able to skim a 40, 50 or even a 60 per cent cream, as you can do with the Chief. If shipping cream, you make a big saving in freight charges if the cream is rich and heavy, as a can containing a rich cream may contain twice as much butter fat as a can of thin cream, and although the value is twice as much, the freight charges are no more for the rich cream than for the thin cream, so they cost you only half as much for each pound of butter fat in the cream.

SWEET SKIM MILK FOR FEEDING.

The Fresh, Sweet Separator Skim Milk still warm with the animal heat of the cow and aerated and cleansed by passing through the Economy bowl makes splendid food for young animals and they thrive on it. Pigs and calves on a sweet skim milk diet grow fast and put on flesh rapidly for it contains all the protein of the whole milk, the rich nutritious sugar of milk, the caseine and, in fact, everything necessary to build muscle and bone rapidly and cheaply. All that is lacking is the butter fat which simply supplies the animal heat and fat producing elements. A little oil meal or corn meal, worth about a cent a pound, takes the place of the high priced butter fat and makes the skim milk just as good for feeding young animals as the sweet whole milk fresh from the cow.

Calves and Pigs Brought Up on This Diet grow rapidly and at the end of the first year are heavier and in more marketable condition than they would be at the age of two years if fed on old sour milk. Don't raise sickly stunted stock on old sour milk for they are a drug on the market and hardly worth the time and trouble of bringing them up. Feed no milk but sweet nutritious skim milk and you will raise stock that you will be proud of and can always sell readily at a big price.

Sweet Skim Milk Is Also a Splendid Food for Chickens and careful poultry feeders value it at not less than 50 cents per hundred pounds for this purpose when fed with corn meal. In towns and cities it is in great demand by bakeries and is very valuable as human food.

MAKE YOUR DAIRY A BIG WINNER

GET THE TOP PRICE FOR YOUR BUTTER.

Separator Butter Always Brings the Highest Price. Turn to the market report in your daily or weekly paper and you will see that separator or creamery butter is quoted at from 3 to 10 cents a pound more than common dairy butter. Even in the spring, when butter is most plentiful, there is always a greater demand for high grade separator butter than can be supplied.

Economy Chief Cream Makes Butter of the Finest Quality because it has been purified and the dirt and harmful bacteria removed. It is in just the proper condition for butter making. It ripens evenly, churns quickly and completely. With a little care the grain of the butter is perfect, the flavor unsurpassed and in keeping qualities it has no equal. It is worth more than dairy butter and always brings more.

You Will Be Surprised to See How Easily Your Butter Will Sell and the good prices that it will bring. Hundreds of our customers have told us that they are now getting from 5 to 10 cents a pound more for their butter than they did before buying a cream separator, and many have said that the increase in the selling price of their butter alone has paid the whole cost of the Economy Chief the first season.

NOW IS THE TIME TO START.

Don't Hesitate or Put It Off but start on the easy and profitable way of dairying by ordering the Economy Chief this very day. Sell a cow if necessary. Three cows and an Economy Chief will pay you much bigger profits than four cows without one, for you not only double your profits but also save the board of the extra cow. It will pay for itself the first season if you have but three cows, and pay for itself ten times over in a season with thirty cows and will continue to make money for you at the same rate for years to come.

ORDER ON TRIAL TODAY.

Don't Delay, But Order an Economy Chief on trial right away and the results will surprise you. You will have better cream and more of it. Cream of any density, from the thinnest to the richest. Better butter with less churning. Sweet pure skim milk in the best condition for feeding. Larger and better calves and swine. Larger prices for everything—for butter, for cream and for stock. A big reduction in the dairy work.

Do Away With the Long Hours of Hard Work in a cold, damp dairy and the endless labor of building fires and washing cans and pans, the heavy lifting and the wear and tear on man and beast in the long haul to the creamery. There is a sure profit for you in the Economy Chief. A profit with every turn of the crank, week days and Sundays, the year around. You will get big returns with less than half the time and labor you have spent heretofore in striving for small profits or perhaps no profit at all.

While We Have Tried to Tell you about the Economy Chief in a plain honest way in these pages, the best way to find out for yourself just what it will do under your own farm conditions is to order one on trial for sixty days. Don't put it off, but order now— **TODAY.**

BUYING AGENTS' TALK

Every month in the year cream separator agents by thousands are wearing out the roads in their everlasting search for farmers who are willing to be talked out of forty to fifty dollars in real money.

The agent's stock in trade is a supply of separators worth $25.00 to $40.00 each and his one object in life is to dispose of these separators to farmers for $40.00 to $50.00 more than they are worth.

When he makes a sale he takes a liberal share of the $40.00 to $50.00 profit for himself and the rest goes to state agents, jobbers and other middlemen between the buyer and the factory.

The agent must have a well hung tongue and a pleasing and persuasive manner to be successful. He must so charm you with his windy boasts and reckless promises that you forget to look at his separator at all because if you did you would easily see that it is not worth half what he asks for it.

No matter what make of separator the agent sells he always loudly claims that it is the best and only one for you to buy. Not that he has any real knowledge on the subject; not one agent in a hundred ever saw the inside of a separator factory in his life and he knows very little about his own separator and practically nothing about others except from hearsay.

The agent's promises are many and easily broken because he never puts them in writing. He tells you when your separator needs repairing he will fix it for you. As a matter of fact he is no machinist and you can do a better job of repairing yourself than he can.

He tells you also that he always has repairs on hand, but when you need a repair, where is the agent. Very likely he is canvassing in the next county and when you locate him you find he has to send to the factory for the repair you want, which you could have done just as well yourself in the first place.

The agent is a persistent individual, he sticks to the possible buyer like glue. He repeats his little story over and over and promises anything and everything to get your money, but once the sale is made he loses interest in you. He never expects to sell you another separator and has nothing else to sell, so he don't care what becomes of you or the machine.

The quick and easy way to get rid of the talkative separator agent is to say to him, "I won't pay you a cent more for your separator than Sears, Roebuck and Co. ask for their Economy Chief Separator, and what is more, you must give me sixty days' trial the same as they do. I will then put one of their machines in on trial alongside of yours and see for myself which one is the best."

This is a knockout blow for the agent. He knows he can't compete with the Economy Chief in quality, price, skimming or in any other way, so after sputtering around a little he loads up his machine and drives away to look for someone who never heard of Sears, Roebuck and Co. and the Economy Chief.

How much better it is for you to buy your cream separator from a strong, well established and reliable concern like Sears, Roebuck and Co. who have thousands of things to sell besides cream separators and who are bound to treat you fairly because they want to hold your trade and good will. A concern with their own great factories who ask you only a small margin over the actual factory cost, who put their claims and promises in print, give you a guarantee that means something and promptly return your money, including freight charges, if you are not fully and completely satisfied.

REPAIRS AND REPAIRING

We have very little call for repairs for Economy Chief Cream Separators, as there are so few parts that ever give out in use that it is rarely a repair is needed.

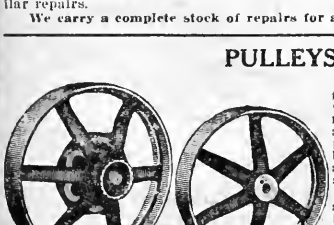
Repairs are free if they come under the terms of our twenty-year binding guarantee, and they go to you with express charges prepaid so that you are not put to a penny of expense. If, however, it is necessary to replace a part giving out through natural wear or a part broken through accident which is not covered by our guarantee we charge you only about one-half as much as other makers would charge you for similar repairs.

We carry a complete stock of repairs for all Economy Separators, old and new, at Chicago and of course another stock at the factory, and in addition we have a complete repair shop at Chicago where we are equipped to do bowl balancing, rebuilding and separator repairing of all kinds.

Our prices for both repairs and repair work are very low. Our repair shop is run at an actual loss for the benefit of our customers and we sell repairs at just enough profit over the cost to cover the handling expense.

We guarantee to furnish any needed repair for any Economy Separator purchased from us, whether it is in one, five, ten or twenty years from now or take back your machine and return the full purchase price. This guarantee relieves you of any anxiety on the question of repairs.

PULLEYS FOR POWER.



Friction Pulley. Solid Pulley.

We can furnish either a solid or a friction pulley for use with our Economy Chief Cream Separator when it is to be operated by a gasoline engine, animal or other power. These pulleys fit all sizes and are attached by simply removing the crank and replacing it with a pulley which is fastened on with a bolt the same as the crank. The pulley should revolve at the rate of sixty turns a minute and the belt should not be too tight.

We advise the use of the friction pulley, which enables you to start the separator slowly and bring the bowl up to the proper speed without strain on the gearing. If operated with a gasoline engine the best results can be obtained by using a countershaft with tight and loose pulleys.

No. 23H127 Solid Pulley to attach to crank shaft. Size, 12 inches in diameter and 2-inch face. Shipping weight, 22 pounds. Price.....$1.25

No. 23H128 Friction Pulley to attach to crank shaft. Size, 14 inches in diameter and 2-inch face. Shipping weight, 32 pounds. Price 2.25

We cannot furnish pulleys to fit separators of other makes.

Rubber Bowl Rings.

No. 23H667 Rubber Bowl Rings to fit any size Improved Economy or Economy Chief Cream Separators. Price, per package of six rings.37c
Shipping weight, 3 oz.
Per package of twelve rings 55c
Shipping weight, 5 oz.

We do not break packages. Directions for the care of rings printed on each package.

Cream Separator Supplies.

For prices on other supplies and repairs for Economy Cream Separators see direction booklet furnished with the machine. If you have lost or mislaid your direction booklet we will gladly send you another one free of charge on request.

27.65 FOR THE GENUINE ECONOMY CHIEF CREAM SEPARATOR

This is our latest and best Economy Chief Separator in the small size. Capacity, 250 to 300 pounds or about 120 to 145 quarts of milk an hour. It skims any quantity from 1 gallon up and is adapted for a dairy of from two to four or five cows.

It has the new 1912 features and is built of the finest material throughout and with the same care and accuracy as our larger machines. The bowl is light and easily handled. It has but five parts, is 3 3-16 inches inside diameter and weighs only 7½ pounds. It has our famous purifying and cleansing features. Is practically self cleaning and is built of the finest wrought steel throughout. Equipped with the new double strength skimming cores.

The crank is but 9½ inches long. Just right for easy turning. The supply tank is at the most convenient height. Easy to fill yet up out of the way.

This is a wonderfully close skimmer of warm or cold milk. It is so easy to handle and run that a woman or fourteen-year old girl can skim the milk, clean and care for it without trouble or undue exertion.

It is strong and solid in construction, nothing to get out of order or give trouble. No fancy adjustments to make and the ideal separator for a small dairy.

We always recommend a larger size for any but a very small dairy, as the larger size is as easy to handle and care for and does the skimming so much quicker. However, if you have only two or three cows and never expect to increase your herd, this size will give you splendid satisfaction.

No. 23H21 New 1912 Economy Chief Cream Separator. Capacity, 250 to 300 pounds per hour. Shipping weight, 200 pounds. Price..... **$27.65**

34.90 LATEST AND BEST MODEL ECONOMY CHIEF CREAM SEPARATOR

New 1912 Model Economy Chief in the medium ze. Capacity, 350 to 400 pounds or 170 to 195 quarts n hour.

At $34.90 this size is a wonderful bargain. The conomy Chief is the only separator sold at a fair nd square price. Just a small margin over the ctual cost to build in the largest and best equipped eparator factory in the United States.

Our prices are far below what others ask for eparators of the same size and capacity. We sell n the most liberal terms. Give the strongest guarntee and longest trial offer ever heard of.

The Economy Chief is a wonderful skimmer. It ives practically every drop of cream and skims so uch easier and quicker than other machines that he difference will surprise you.

This size is equipped with our latest style wrought eel bowl with double strength cores. The bowl easures but 3 3-16x6½ inches inside and weighs nly 8 pounds. Length of crank is 9½ inches. The hort crank, light bowl and frictionless gearing make run remarkably easy and it will give you splendid atisfaction.

This size is best adapted for a dairy of five cows r less and could be made to do for a slightly larger airy, but we strongly advise the purchase of the big apacity Chief shown on the following page, which oes the skimming in one-half to two-thirds the me of the smaller sizes, is no harder to handle and are for and will always take care of an increase in our herd.

Every Economy Chief is fully guaranteed by s and sold subject to sixty days' trial on your wn farm.

No. 23H22 New 1912 Economy Chief Cream eparator. Capacity, 350 to 400 ounds per hour. Shipping weight, 15 pounds. Price..... **$34.90**

THE SIZE TO BUY

The large 600-pound per hour capacity Economy Chief Cream Separator is, for several very good reasons, the cheapest machine to buy, no matter whether your herd is a large or small one.

To begin with, the 600-pound per hour capacity Economy Chief will last twice as long, just twice as many years as the 300-pound per hour capacity machine, for the simple reason that it skims any quantity of milk in one-half the time.

A cream separator, like any other machine, is only worn as it is used and will run a certain number of days and a certain number of years before it will require repairs. As the big capacity machine does the skimming in one-half the time, naturally it will last twice as long and do twice the skimming before repairs will be needed.

Even at double the price of the small size machine it would pay you best to buy it, and it does not cost you anything like twice as much.

Consider also what your time is worth. In the spring when you are putting in your crops, every hour and almost every minute is worth big money to you. You cannot afford to waste your time or use it uselessly.

When you think that with the big 600-pound capacity Economy Chief you can save one-half the time needed to do the skimming twice every day in the year and save one-half the labor of turning the crank, you can easily see what a world of time and labor you will save in the course of a year.

The big machine runs practically as easy as the smaller ones; the difference in running is hardly noticeable. It is cleaned just as easily and just as quickly. It will require only one-half as much oil, as it is used only one-half as much, and, best of all, these big advantages that you get the benefit of every day in the year really cost you nothing, because the big capacity machine lasts twice as long and actually costs you less per year to use than the smaller machine.

Another reason: You will surely want to increase the size of your herd when you start to use the Economy Chief, because it makes the dairy work so light and easy that you can double the number of your cows and still have less work to do than you had before.

The big machine will always take care of an increase in the size of your herd and of the extra milk supply which you will have at certain seasons of the year.

Purely in your own interests we ask you to order the big 600-pound capacity Economy Chief described on the following page. No customer who has ever bought the big size has had reason to regret it, while many who have purchased the smaller sizes have found it to their advantage to increase their herds and buy the large machine later on.

Order the right size in the first place, the big 600-pound per hour Economy Chief and you will make a wise choice.

$42.35 FOR THE NEW 1912 MODEL ECONOMY CHIEF CREAM SEPARATOR

IN THE BIG FAST SKIMMING SIZE

THIS IS OUR BIGGEST AND BEST SIZE

The Most Popular Cream Separator We Have Ever Sold. The biggest selling separator on the market today, the greatest bargain we have to offer and the best value for your money. You can make no mistake in ordering this big fast skimming size on trial. About seven customers out of every ten are using it today.

All Say It Is the Best Investment they ever made. Everyone is charmed with the speed and ease with which it does the work, skimming the milk from a big herd of cows in almost no time.

This Big Economy Chief skims 600 pounds or about 300 quarts an hour, or at the rate of a milk pailful every two minutes, yet it is just as easy to clean and care for as the smaller sizes. Practically as easy running and always provides for an increase in the size of your herd in future years. It is the cheapest machine for you to buy in the long run. As it skims in one-half the time, it will last much longer than the smaller machines and saves time and labor every day in the year.

At $42.35, It Is a Splendid Bargain. This is just the cost to build in the largest and most complete separator factory in the world with a single small profit added. Our $42.35 price for a separator of 600 pounds per hour capacity is far below all attempted competition. Agents ask $80.00 to $100.00, and even as high as $125.00, for separators of this capacity which will not compare with the new Chief in any way.

We Save You $45.00 to $60.00 or more and give you a stronger and more substantial separator, one that will last longer and surpasses all others in closeness of skimming on warm or cold milk.

The New 1912 Model has all the great features that have made our previous models so popular with particular dairymen and many valuable improvements in addition. The new extra large capacity seamless supply tank, the new broad heavy base, the strong rigid new style frame, new sanitary bowl pot and extra large cream pan are all shown in this illustration. In addition, the big fast skimming Chief is equipped with the new double strength cores. It has the new quick removable lower bearing, the triple pinion shaft bearings and extra wide faced gears. The crank is only 9½ inches long and is at just the right height for comfort and ease in turning. The supply tank is low and easily filled, while the skim milk spout is high, permitting a big milk can to go under it easily.

The New Chief has many exclusive patented features, including the wonderful double opposed disc bowl that outskims all competition, the anti-reflex upper bearing, frictionless lower bearing and other features that rival manufacturers dare not copy and cannot furnish at any price.

The Bowl Has But Five Parts: The bowl shell, cover, feed rod and two simple cones. It weighs only 8¾ pounds and measures 3 3-16x7⅛ inches inside. It is light and easy to handle, yet of enormous strength, for it is built of solid wrought steel throughout. Every part of the machine is proportionately strong. The frame is massive and rigid and will not shake or weave. The base is extra wide and heavy and provided with a handy tool shelf and ample size. All shafting is turned from solid carbonized steel. Every bearing is of fine phosphor bronze and of extra length. The construction throughout is the very best and the Economy Chief will stand the hard grind of daily farm use and do its work perfectly long after the ordinary run of cream separators are worn out and discarded.

With the Usual Care and oiling any good machine should receive there is almost no wear out to it. We ran an Economy Chief of this size in our shop for 8 hours each day during an entire year, which was equal to ten to fifteen years of farm use, and at the end of the year it was practically as good as new, the bearings and shafting showing almost no wear.

The New Chief Is Simple and easy to understand. Any one can set it up. Anyone can run it. While we send full directions for setting up and operating it, directions are hardly needed, as you can see almost at a glance just how it is set up and operated. There are no fancy adjustments to be made, nothing to regulate but the density of the cream, which is done by turning a single, simple screw in or out. A hired man or a fourteen-year-old boy or girl can run it and do the skimming easily and without trouble.

This Is the Best Size for any dairy, large or small. If you have but a few cows it not only does the skimming in almost no time, saving you time and labor twice daily, but provides for an increase in your herd, and you will surely want to enlarge when you see how much the Economy Chief will reduce the daily time and work in the dairy. It is as easy to handle and clean as the smaller sizes and will handle any herd up to twenty-five to thirty-five and even fifty cows nicely and because of its big capacity, saves time and work every day it is in use.

Let Us Send You This Big Fast Skimming Economy Chief on sixty days' trial. Match it against the very best cream separator in your neighborhood, regardless of price, and if you are not fully satisfied that it is a better machine in every way, we want you to send it back and we will not only return all the money sent us, but pay the freight charges both ways and allow you a reasonable amount for rehoxing and hauling it to the depot.

No Other Maker ever has dared to make an offer like this one. We can do it on the Chief because it actually outclasses all competition and has met and defeated every other prominent machine times without number. It is the machine of all others for you to buy.

We fully guarantee that it will take more cream from the milk, run easier, will clean quicker and will stand more hard every day use than any other separator.

Fireplaces

MANTEL GRATES for either coal or gas are illustrated in our Special Mantel Catalog, varying in price from $1.98 to $12.97, according to selection. We furnish them either in beautiful oxidized copper or brass finish on cast iron and steel, or in Berlin black soft tone finish. The assortment is large and the handsomest line of open fireplace equipments ever offered by us or anyone else at prices to compare with ours.

FLOOR TILE

Ceramic Mosaic Floor Tile in this black and white design ready for laying reduced to 16 cents a square foot. We want you to know you can have a beautiful ceramic mosaic tile floor in your vestibule, bathroom, or any other room at the astoundingly small cost of 16 cents a square foot, ready for laying. The greatest opportunity of the age for owning a beautiful, aseptic, sanitary floor at prices never dreamed of before, a floor that will outwear the house itself.

Fireproof, sanitary, and the cleanest floor ever laid. The sweetest, prettiest bathroom floor you ever saw when laid in pure white.

Send for our Ceramic Mosaic Floor Tile Color Plate Book, where we tell you all about the simple method of preparing, leveling and laying ceramic mosaic floor tile; how any workman who can level a Portland cement bed can lay the floor.

Home builders and contractors, do not overlook this opportunity, as this reduced price is to be obtained from us and from us alone, and our straightforward, simple instructions how to lay it and how to dispense with the high priced tile setter under our directions for laying.

16c UPWARD AND A SQUARE FOOT, square feet, ready for laying, accompanied with a perfect plan and thorough instructions so that no one may make a mistake in laying it perfectly.

BUILT AT A BIG SAVING

SAVED $500.00.

York, Neb.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—We were more than satisfied with everything we received, as we failed to find even a piece of poor material in the entire bill. We have saved fully $500.00 on this building, besides having better material than we could possibly have gotten at our home town. We were greatly surprised, too, at the manner and promptness in which our order was handled.

Very truly yours,

J. P. BERCK.

SAVED $1,000.00.

Cohoes, N. Y.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I am sending you a photograph of house built from materials shipped from you and according to your plans. I am pleased to say that I was pleased and satisfied with quality of materials and your prompt shipments. Your plans are a great help to anyone that wants to build. After a close estimate I can say that I have saved $1,000.00 on this property.

Very truly yours,

FRANK CHAMBERLAND.

SAVED $450.00.

No. 1037 East Ash Street, Salina, Kan

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I am sending you a photograph of my r house built with material ordered from you and after y plans. I saved $450.00 and the material is better than I co buy here.

Respectfully yours,

JNO. HOLZENBERG

SAVED $200.00.

Grafton, Mass.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The lumber and finishing material are much better than I could have gotten here. My contractor tells me that I have saved about $200.00 on the whole. I am living in the house this winter and like it very much and will say right here that Sears, Roebuck and Co. are perfectly fair and square and have done everything that they agreed to do.

Yours very truly,

D. S. CHASE.

BETTER THAN EXPECTED.

No. 107 South Sixth St., Fulton, N. Y.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I was very much pleased with the building material bought of you. It was far better in every respect than I expected to get for the low price paid. The doors are fine; in fact, everything is the same. Everything came in good condition.

Yours respectfully,

I. S. JENNINGS.

QUITE A SAVING.

New Haven, Conn.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I am sending the photograph of our cozy Sears-Roebuck house. I bought all the material from your firm at quite a saving and I certainly advise our friends where to get their goods.

Very truly yours,

LOUIS STREITLEIN.

Write for Book of Over

One Hundred Modern Homes and Barn

MAILED FREE

RESIDENCES, BUNGALOWS, COTTAGES AN FLAT BUILDINGS. BEAUTIFULLY ILLUSTRATE

FREE PLANS FOR ANY OF THEM.

In our Book of Modern Homes we illustrate over one hundred dif eat styles of houses adapted for city dwellings, suburban homes, coun houses, farm houses and barns, ranging in cost for building from $500 to $5,000.00. On this and the following page we show a few of many houses which have been built according to our plans and w material purchased from us.

Read what the builders of these houses say about the saving th made and the high quality of the material.

This book shows a number of beautiful illustrations in color, living room, dining room, kitchen, bathroom and bedrooms as well the exterior of a model home are all illustrated in full color. Other houses are illustrated with beautiful halftor with first and second floor plans in reduced size, with number of rooms, sizes, etc., plainly marked, and our cost for the materials printed with each illustration. Remember, our costs are not guesswork. They are positively accurate. prove them by giving you a typewritten bill of materials, specifying every item of building material, showing the pr for which we agree to furnish this material. The price at which we claim these houses can be built includes all of material. Don't break ground or sign a building contract before you get a copy of our Book of Modern Homes. We c positively save you one-third or more in the cost of your home. You will get better results out of our building pla which cost you nothing, than you will get out of building plans you may get other architects $100.00 or more for.

Whether you are a contractor and builder or intend to build your own home, you positively cannot afford to be with this Book of Modern Homes. Write for it today.

OUR $100.00 BUILDING PLANS COST YOU NOTHIN

Our $100.00 building plans for any of the houses shown on this page or any of over one hundred styles of hou illustrated in our free Book of Modern Homes described below will cost you nothing. If you intend building any ki of a house, be sure to write for our Book of Modern Homes. It will mean a saving to you of fully one-third the ent cost of your building. The original set of each one of these plans cost us from $100.00 to $150.00 per set to prod (but cost you nothing). The high grade materials we furnish at wholesale prices enable you to make such savings as t following: We save you $500.00 on a $1,500.00 house, $600.00 on a $2,000.00 house, $1,000.00 on a $3,000.00 hou $1,500.00 on a $4,500.00 house. Such are the savings we make you on every house illustrated in our Book of Mode Homes. The letters printed directly below the houses shown on this page will give you some idea of our ability to a you all we claim. We are receiving letters every day from grateful customers telling of the high quality of the materi received, of the big saving they made and thanking us for enabling them to put up homes at a reasonable cost.

Our building plans, specifications and bill of materials, which cost you nothing, as explained below, include following:

1—A complete set of blue prints, with all details and dimensions plainly marked, drawn to the scale of one-quarter inch to the foot.

Front Elevation, showing the front view of the house.

Right Side Elevation, showing the right side view of the house.

Left Elevation, showing the left side view of the house.

Rear Elevation, giving a back view of the house.

Longitudinal Plans, showing cross section.

Foundation Plans, giving information with reference to excavation, foundation, etc.

First Floor Plans, with sizes of rooms, partitions, doorways, windows, etc., given in detail.

Second Floor Plans (if a two-story structure), giving size of rooms, partitions, location of windows, doors, etc., in detail.

Detailed Drawings of Materials, showing stair finish, balusters, style of window trimmings, hardware, porch finish, cornice finish, and all the material necessary to give st and character to the structure inside and out.

2—Complete specifications of material and labor, outlini all the conditions under which a contract may be let, abling you to protect your interests perfectly, if house is be built by contract.

3—Complete bill of materials and labor, itemizing quantity and dimensions of timbers required, also quantity and kind of exterior finishing lumber, porch wo roofing, window and door frames, doors and windows, int finishing lumber, including all molding, stairwork, et building hardware, such as door locks, hinges, cupbo catches, drawer pulls, sash locks, gutters and eaves troug glass, paints, varnishes and fillers for outside and ins painting. In addition to all these details, we will furn you on request, when we receive your order, absolutely f of charge, a complete set of heating plans and plumbi plans.

Our plans are the work of the best known licensed architects specially engaged by us for this service. They fu investigated the requirements of home builders everywhere in the United States and have embodied in our plans the w latest ideas of the best posted contractors and builders in this country, as well as the very best architects, giving us variety of houses specially adapted for city, town or farm homes. Ideas and suggestions impossible for you to secu elsewhere at any price.

Our Plans and Specifications Call For the Highes Grade Materials and Labor

We specify the best grade of mill work, dimension lumber, hardware and paint, as well as the highest grade wor manship throughout. Our estimates are accurate. We prove them by giving you exact figures on every item. We se you a typewritten bill of materials with our blue prints and specifications. We guarantee our prices on mill work such windows, doors, interior trim, flooring, siding, hardware, paint, mantels, plumbing and heating. On these we save y nearly one-half. We make a very liberal allowance for all labor such as carpentry, masonry, painting, excavating, lathi and plastering. The cost of it all is included in our estimate. Our estimates are absolutely reliable. You can f within a dollar or two the exact cost of your finished dwelling before you start to build. Write and get our Book Modern Homes at once.

YOU CAN DO THE SAME

SAVED $150.00.

2736 Meredith Ave., Omaha, Neb.

s, Roebuck and Co., Chicago, Ill.
ntlemen:—I am sending photo of my new house built
rding to your plans and with material purchased from you.
uld not have been better satisfied as to the quality of the
erial, the promptness of the shipments and the way I was
ed. I saved about 25 per cent on the materiel as com-
d with local prices. My carpenters said it was the best
e of lumber they had ever used.

Yours truly,
R. L. GILCHRIST.

"FIRST CLASS IN EVERY RESPECT."

No. 822 Baltimore St., Waterloo, Iowa.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I am sending photo of my house, which looks fine, but the interior is finer. The material I bought from you was first-class in every respect and many contractors here, after seeing it, said the lumber and mill work could not possibly be duplicated here.

Very truly yours,
C. A. BARTELL.

SAVED OVER $1,000.00.

Dixon, Iowa.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The lumber and mill work that I bought from your firm is satisfactory in every way. I saved from $1,000.00 to $1,200.00 on the house that I put up last summer.

Very truly yours,
CHAS. J. DAHMS.

The letters shown on these two pages are but a few of the many we receive from satisfied ne builders. When writing any of these people enclose a two-cent stamp for their reply.

NEVER SAW AS FINE OAK DOORS.

DOYLE SHEEP COMPANY,
Douglas, Wyo.

rs, Roebuck and Co., Chicago, Ill.
Gentlemen:—The material I bought of you for house No. 132 was satisfactory in every way and especially the lustle
sh. I never saw as fine oak doors. Thanking you for your fair dealing, I am,

Yours respectfully,
G. N. DOYLE.

SAVED $225.00.

The above is a picture of our Modern Home No. 147, with some alterations, built at Mandan, N. D., by Mr. Arthur Witherow. He says: "The material was fine, and I could not wish better. I saved about $225.00 after paying freight."

SAVED $140.00.

Bay Shore, Long Island, N. Y.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I was very well pleased with the quality of material sent by you. The red oak trimming was the prettiest lot of mill work I ever saw, and the carpenters did not have to sand it or dress it in any way before using. Your columns were of the best, also your doors and sash cannot be excelled at twice the cost. I saved at least 30 per cent on the material.

Yours very truly,
S. J. SMITH.

Successful Building.

A Book Written By Our Customers.

If you will write and ask us for our Successful Building Book No. F6366, containing testimonial letters written to us by our customers, we will mail it to you at once, free and postpaid. It will give you facts you ought to know regarding the building and will explain how you can get $1.50 value for every $1.00 you spend. In our Building Material and Mill Work

talog and in our Book of Modern Homes we show the big money savings we can make you on nber and building materials. We receive letters daily from every state in the Union telling us savings such as are shown on this page. Very likely the book illustrated above contains letters m friends of yours in your own town, at least in your state. This book will give you con sive proof from the lips of our customers, as the letters published in it are from contractors, penters, builders, professional men, farmers, mechanics and others who have sent us their ers. These letters prove all our claims and will satisfy the most skeptical person. **Send today this book.** Ask for our Successful Building Book No. F6366. It will explain to you the secret building at a saving of fully one-third.

SAVED $800.00.

Roselle Park, N. J.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Am very glad to say that whatever I purchased from you for my house, which I think amounted to $800.00 or $900.00, has been found to be very satisfactory. I know that I could not have obtained the same material here for less than about twice the amount, considering quality. I shall certainly favor you with as many orders as I can.

Wishing you continued success, I remain,
Your customer,
JOHN C. JOHNSON.

THE PICTURES reproduced on these two pages were made direct from photographs furnished by customers, who have built with our materials and according to our plans.

540 Kinds and Sizes of COTTAGE DOORS Carried in Stock.

PAINTED AND GRAINED DOORS. Our painted and grained doors are all made with bevel raised ls and O. G. sticking. Manufactured from low grade lumber, but no defects which seriously affect wearing qualities. The doors are painted two coats and the grained doors two coats besides the ning coat, all painted by hand. Carried in stock in two grades, Standard Grade, which is the low e usually furnished by other concerns, and the Special High Grade, which is a door very much bet- than the average and which is sold and furnished by us only. We recommend the high grade door.

OUTSIDE DOOR FRAMES. For other designs see Mill Work Catalog. Frame has a 1¾x4⅝-inch drip cap; 1¾x4⅝-inch outside casing; 1¾x5¾-inch jamb, rabbeted to suit thickness of door and a 1¾-inch oak sill. All good sound stock, allowing but few defects. The jamb is dadoed for sill but not for head, thus allowing carpenter to cut to fit smaller openings.

No. 63H7976 Plain Drip Cap Outside Door Frame, for frame buildings with 2x4 studding. Knocked down and carefully bundled for shipment. For door, 3 feet by 7 feet or smaller opening. Price..... 32.03

IMPORTANT. ALL DOORS, SASH AND MILL WORK IN THIS CATALOG SHIPPED FROM MILL WORK FACTORY IN EASTERN IOWA.

HOW TO ORDER WINDOW FRAMES, STORM SASH AND BLINDS

from the tables below. The column of sizes under the heading, "Size of Glass," shows the size of glass in inches in the window and all prices on the same line in the other colu refer to WINDOW FRAMES, STORM SASH and BLINDS to fit this particular size. For illustration, take a two-light window, glass size 24x28, price on a window glazed el strength is 89 cents, price on a pulley frame for this size window $1.66 and the size of the sash opening of this same window is 2 feet 4½ inches by 3 feet 2 inches. The price storm sash for this size window is 95 cents and for the blinds $1.20, weight of this window is 22 pounds, and if you wish to order sash weights, divide the entire weight of the wi by four, which will give you the size of each of the four weights required to balance the window. The word "GLAZED" means "including glass."

Two-Light Window

Sash, 1¾ inch Thick. Check Rail. Price includes Glass Glazed in the Sash, Held in Place by Putty. Price Includes Both Sash.

SASH WEIGHTS.

No. 63H7200 Sash Weights. To hang a window, four sash weights are required, each weighing one-fourth the weight of entire window. Our weights are standard diameter and length, according to weight. We ship sash weights from Chicago and two Eastern foundries, whichever foundry is nearest you. Sizes from 3 to 9 pounds by half pounds, sizes from 9 to 26 pounds by pounds. When ordering be sure to state sizes. Price, per pound 1½c

WINDOWS—Our windows are made of soft pine and glazed with a good grade of window glass. Very carefully packed.

FRAMES—We use better lumber in our frames than is used by most concerns. Our frames are unusually good. Shipped knocked down in bundles to save you freight.

STORM SASH—Made of soft wood and glazed with good window glass. Well packed for shipment.

BLINDS—Made of soft pine and very well constructed, made same width as windows, but 1 inch longer.

On this page we show only a part of this line. For other designs, etc., see our special Mill Work Catalog.

ALL MILL WORK ON THIS PAGE WILL BE SHIPPED DIRECT FROM FACTORY IN EASTERN IOWA.

FOR OTHER SIZES AND DESIGNS OF WINDOWS, FRAMES, STORM SASH AND BLINDS, SEE OUR SPECIAL MILL WORK CATALOG.

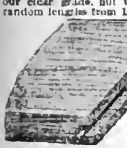
HARDWOOD FLOORING

WE FURNISH ROYAL ACME FLOORING IN TWO GRADES

Our Clear Grade is free of knots and imperfections in manufacture. Furnished in random lengths from 2 to 16 feet inclusive. Not over 8 per cent of lengths 4 feet long and under. **Our Select Grade** is the kind most dealers sell as clear or high grade. This grade is not so clear as our clear grade, but will lay with but little waste and allows but few defects. Furnished in random lengths from 1⅝ to 16 feet inclusive. Oak and maple flooring is not sorted to any widths.



Hardwood flooring is shipped from our Chicago factory.

WHEN ORDERING, bear in mind that flooring with 2-inch face is figured as 2½ inches wide, and flooring with 2¼-inch face is figured as 3 inches wide, to allow for tongue and groove. When making up your order increase the amount about 30 per cent more than the actual measurement of the surface to be covered, also allow a few feet additional for waste. To Illustrate: A room 10x12 feet equals 120 square feet. If flooring 2-inch face is ordered add 30 per cent (36 to 40 feet) to order about 160 square feet. The same rules apply no matter from whom you buy your flooring.

ROYAL ACME OAK AND MAPLE FLOORING, the highest grade of flooring made. At these low prices anyone can afford to have the highest grade of maple, quarter sawed red oak or plain oak floor. prices are but little higher than the retail lumberman charges for common soft wood flooring.

STEEL POLISHED AND END MATCHED. Royal Acme Flooring in either maple, oak or quarter sawed oak is scientifically treated, cured in kilns at a temperature of 212 degrees Fahrenheit. Every foot is steel polished every piece is end matched. The ⅞-inch is hollow backed and bored for blind nailing. Ship from Chicago factory or from our big lumber yards in Southern Illinois.

QUARTER SAWED RED OAK FLOORING.

The Price Quoted Does Not Include Casing, Jambs, Base Blocks nor Cap Trim.

If You Are Going to Build a House or Do Considerable Building Send For This Catalog. Mailed Free on Request

MANY NEW LINES ADDED. This catalog shows a big line of the latest designs of Craftsman and Mission doors with a complete line of trim to match, built-in china closets, casement sash, hardwood flooring, etc.

JUST ONE LOOK INSIDE THIS CATALOG will convince you beyond a doubt that we can save you nearly one-half on everything in the building line. Brimful of new suggestions and ideas for anyone thinking of building. Every carpenter, every contractor, in fact, any one interested in the building trade, should have a copy of this book.

THIS SPLENDID CATALOG explains how we guarantee the quality of every item we offer to be as well as quotes the lowest prices ever named; how we guarantee delivery of all mill work in perfect condition or make good anything damaged or broken in transit; how we deliver our goods perfectly clean, bright and new, free from marks, stains, etc. In the pages preceding this we illustrate a large selection of our mill work and building materials, although, necessarily we are obliged to show the illustrations small to avoid taking up too much space. If you are in a hurry to place your order and cannot wait until you receive our Special Mill Work Catalog, don't hesitate to order direct from these pages as they show a big and well selected line of mill work and building materials at our lowest prices.

CONTRACTORS, CARPENTERS AND BUILDERS, be sure to get this Special Catalog of Building Material and Mill Work. You cannot afford to be without it. You can rely on it for your entire supply of building materials. There is no source of supply so complete for you, there is no one else that can offer you a finer quality, a larger line or more up to date designs and none that can deliver building materials so promptly and in such excellent condition. Remember, it contains everything you need. (See our list below.) Everything is illustrated with beautiful, clear, sharp halftone engravings or in colors, and we absolutely guarantee everything to be just as described. This catalog will enable you to make lower prices on bids for competition. It will secure for you many contracts that you could not otherwise secure. If competition is not so sharp, it will enable you to make a larger profit. Our control of timber supply, immense factory facilities and direct from factory shipments put our prices below all competition.

CONTENTS.

Front Doors. 324 kinds and sizes of Oak and Birch Front Doors, 325 kinds and sizes of Soft Wood Front Doors, 126 kinds and sizes of Paneled and Grained Sash Doors, 512 Kinds and sizes of Four and Five-Panel Doors in cypress, white pine, yellow pine, etc.

Steel Roofing, Steel Siding and Ceiling, steel brick siding, steel rough stone face siding, roofers' tools and supplies, fireproof partitions, etc.

Asphalt Roofing and Building Paper, deadening felt, tarred roofing felt, roofing nails, caps, etc.

Plaster Board, Ornamental Steel Ceiling.

Simplex Ready Made OR Portable Buildings

SIMPLE, STRONG AND ECONOMICAL. We handle a complete line of portable buildings, garages, chicken houses, photograph galleries and cottages of many sizes, from one room to five rooms, all of which are attractively designed and made in such large

ntities that you could hardly buy the material necessary to build one of them for the price we quote you on the plete house, ready to bolt together.

SIMPLEX HOUSES ARE PORTABLE. They can be taken apart as readily as they are put together. Ideal for side or summer resorts. Anyone owning a Simplex portable building can move it from one place to another at e or no expense or store it for future use. Sections are interchangeable, making it possible to lengthen the house ny time by adding other sections.

STRONG AND STURDY enough for any purpose. Many Simplex houses are being used by homesteaders in the it and Northwest for farm houses. They can easily be made warm enough for the most severe weather by lining Peerless Wall Board shown below.

WHY OUR PRICES ARE SO LOW. The cost of a portable building depends on the cost of lumber, as half of the re cost is in this one item alone. We manufacture our own lumber from our own logs in our big Southern mills. portable building factory is operated in connection with our **big 40-acre** lumber yard in Southern Illinois, are independent of the lumber trust and our method of "from stump to consumer" saves you the jobbers' profit, the wholesale dealers' profit and the retail dealers' profit. We make you a further saving by manufacturing our Simplex Portable Buildings in large quantities at our new modernly equipped factory. All this saving goes to the customer buying a Simplex Portable Building in the way of lowering the price and bettering the quality. Shipped from factory in Southern Illinois. We carry a full assortment in stock ready for instant delivery. We can fill your order within five days. Our houses can be put up ready to live in within a few hours. No saws or plane or other tools necessary. The only tools required are a wrench, hammer and screwdriver.

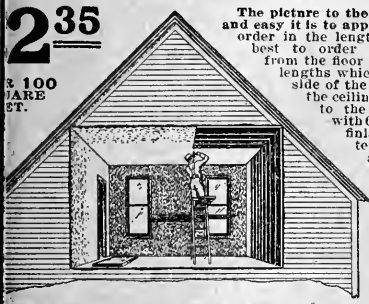
Our Catalog of Portable Buildings is free. Send for it today if interested.

PEERLESS WALL BOARD

AS A SUBSTITUTE FOR LATH AND PLASTER HAS NO EQUAL.

2.35

R 100 UARE ET.



The picture to the left shows how simple and easy it is to apply wall board; simply order in the lengths required, it being best to order lengths which reach from the floor to the ceiling and also lengths which will reach from one side of the room to the other for the ceiling. Nail the wall board to the studding and joists with 6-penny wire nails. Use finishing nails if you intend to cover your walls and ceiling with wall paper, and flat head nails when you use molding or casing over the joints. When the last sheet is applied room is ready for occupancy.

Peerless Wall Board is now being used in buildings of all descriptions, including residences, summer homes, cottages, factories and office buildings, garages, portable houses and even in barns and chicken houses. For repair work it cannot be beaten. It will enable you to finish your garret, changing it from an unsightly storeroom to a valuable extra room. It will also enable you to divide large rooms into smaller rooms at little expense without having the annoyance of lathers and plasterers and without the muss and dirt that is inevitable when the old fashioned plastering is done.

Most pleasing and satisfactory results can be had by using Peerless Wall Board with panel work, as shown in the lower illustration. When applied in this manner all cracks or joints are concealed by molding, and it can be painted or kalsomined with good results. If Peerless Wall Board is used with wall paper, fill joints where the sheets come together with Peerless putty, then shellac the joints. One pound of Peerless putty is necessary for each 150 lineal feet of joint. From 1 to 2 pints of shellac are sufficient to cover all joints in an ordinary house.

The illustration above shows the actual thickness of Peerless Wall Board. It shows how the three plies of heavy fiber board are cemented together into one solid piece with two heavy layers of refined asphalt.

PEERLESS WALL BOARD is carefully packed in wood crates, thus insuring our customers of receiving it in perfect, clean condition. Shipped direct from Chicago factory.

BLUE PLASTER BOARD

A STRONG LIGHT WEIGHT CARDBOARD TO BE USED AS A SUBSTITUTE FOR LATH AND PLASTER.

Less than ¼ cent a square foot for our Fulton Brand Blue Plaster Board. This material is being used very extensively in camps, cottages, bungalows, etc., as a cheap substitute for lath and plaster. Wall paper may be used over it, or by covering the seams with one-half round molding a very neat paneled effect may be had. See illustration.

Fulton Brand Blue Plaster Board is light weight cardboard, less than 1-16 of an inch in thickness, made only in AA grade from carefully selected stock and makes a sheet strong and durable. In color it is a pleasing shade of blue, and where the one-half round molding (used for covering the seams) is painted white, the color combination of the Blue Plaster Board and the white molding is very pleasing. It is put on with an ordinary billposter's tack; or any large headed tack will do. If Blue Plaster Board is to be covered with wall paper, we recommend that a narrow strip of cheese cloth be pasted over all joints. This prevents the wall paper from cracking at the seams after it becomes dry. For sheathing purposes it would be hard to obtain a stronger or tougher material for the purpose than our Fulton Brand Blue Plaster Board.

Blue Plaster Board is shipped direct from our Chicago store or from Kansas City warehouse. It can be included with your order for wall paper or other merchandise.

OF COURSE, We Have Them—Crex Grass and Bungalow Wool Fiber Rugs.

GRAVEL BURLAP ROOFING

A ROOFING OF THE FIRST QUALITY

Hailproof. Needs No Coating. Fireproof.

GRAVEL BURLAP ROOFING is just what the name implies, roofing made of wool felt as a base, burlap center, asphalt and gravel surface. The wool felt and burlap center are thoroughly saturated with asphalt at a temperature of 325 degrees Fahrenheit and formed into one solid piece, then heavily coated with a thick layer of asphalt compound and gravel coated with washed lake pebbles.

AN IDEAL ROOFING FOR LAYING OVER SHINGLES, because it is heavier and has a stiffness not found in other makes of roofing. The heavier gives added strength and equalizes contraction and expansion caused by sudden and extreme changes in temperature. It is the heaviest prepared roofing made and is sold in one weight (one thickness) only. Weight, 85 pounds, hence is warmer in winter and cooler in summer than shingles, slate, steel or other prepared roofings.

WE FURNISH FREE with every roll sufficient large headed galvanized nails and cement, and full and complete directions for laying. Anyone can lay it. No experience required. The only tools required are a common jackknife and a hammer.

CAN BE LAID IN ONE-FOURTH THE TIME it takes to lay shingles and at a total cost of less than one-half the cost of the commonest grades of wood shingles.

GRAVEL BURLAP ROOFING IS HAILPROOF because it is made with strong burlap cloth center, making it sufficiently strong to withstand sleet, hail, snow and the heaviest downpour of rain. It never needs coating or painting, as exposed surface is heavily covered with a thick layer of asphalt compound further protected with gravel. As a result it will wear ten years without coating repairing. While a trifle more expensive to commence with, it is cheapest in the end when once laid your roofing troubles cease.

SUITABLE FOR ANY PITCH OF ROOF. It can be used on any kind or style of roof "from a mansion to a henhouse." It is being extensively laid on buildings for stores, offices, factories and warehouses which are located in districts where flying embers are a menace to the average roofs, or in localities where steel roofings have been considered the only fire protection. Can be laid on roofs with as slight a pitch as one-quarter inch per foot, because it is made with a 2-inch border free of gravel permitting a tightly cemented and waterproof seam.

FURNISHED IN ROLLS CONTAINING 108 SQUARE FEET, Covering a surface 100 square feet. Price includes all necessary large headed galvanized nails and waterproof seam cement, and full directions for laying.

PRICE FOR GRAVEL BURLAP ROOFING.

Catalog No.	Ply or Thickness	Rolls Contain	Covering Space	Weight	Price, per Roll or Square
63H3026	Extra Heavy	108 sq. ft.	100 sq. ft.	85 lbs.	$2.69

Gravel Burlap and Midget Gravel Roofing are shipped from Chicago or from Kansas City, Mo., warehouse, from which points customer pays the freight. Cannot be shipped from Cincinnati, Ohio, or Pittsburgh, Penn., warehouses.

Midget Gravel Roofing (NO BURLAP IN THIS ROOFING.)

Made in three weights or plies of the same high grade materials as are used in Gravel Burlap Roofing and has the same surfacing or outside appearance, but it contains no burlap.

Catalog No.	Thickness	Width, Inches	Number of Square Feet per Roll	Weight, per Roll, Pounds	Price, per R
63H3051	1-ply	32	108	65	$1.50
63H3052	2-ply	32	108	75	1.75
63H3053	3-ply	32	108	83	1.95

Duck Brand Ready Roofing is THE BEST two and three-ply prepared TARRED FELT ROOFING MADE, regardless of price. Every ounce of material used in this roofing has waterproof qualities and does not contain clay or other cheap mineral substances which are often used by many manufacturers who aim to get weight (heavier rolls), but who care little or nothing about the wearing quality. We recommend this tar roofing only to those who are looking for a low cost roofing to last but a year or two. Where longer wear is desired buy Asphalt or Best-of-all roofing shown on pages 1155 and 1156.

Compare the prices and the quality of our tarred felt roofing with any other make or kind of tarred felt roofing and remember if we do not save you money and give you better roofing, you may return it at our expense and we will immediately return your money together with any transportation charges you have paid. Shipped from our Chicago factory, or from our Chicago store if ordered with other merchandise. 108 square feet to the roll.

Catalog No.	Grade	Thickness	Weight	Price, per Roll
63H3102	Medium	Two-Ply	40 pounds	47c
63H3103	Heavy	Three-Ply	60 pounds	75c

The above prices on Duck Brand Prepared Tarred Felt Roofing do not include caps, nails or coating. For each roll of 108 square feet you should order extra 1 pound tin caps, 1 pound roofing nails and 1¼ to 2 gallons of roof coating. Each roll is 32 inches wide.

We specially recommend our Best-of-All, Oriental Slate Surfaced or Flint Surfaced Asphalt Felt Roofing to those who desire a roofing which will last as long as shingles

BARBED ROOFING NAILS AND TIN CAPS.

DUCK BRAND READY ROOF COATING

for coating tarred felt roofs. Distilled from low heat, straight run American coal tar, and is more durable and far superior to coatings made from common kind of tar. The coating is the life of any tarred felt roof, keeps it soft and pliable, avoiding cracking in extremely cold weather and protecting the felt from the heat of the sun and the wear of storms and rain. Do not try to economize by not putting two coats of Duck Brand Ready Roof Coating on your tarred felt roof. Do not wait until your roof leaks or is in bad shape before renewing the coating. Afterward apply a coat of Duck Ready Roof Coating every two or three years. Requires 2 gallons to a square. Shipped from Chicago factory or from Chicago store when ordered with other merchandise.

63H3035	50-gallon barrel	575 pounds	5.00

TARRED FELT.

Used for Roofing, Sheathing or General Building Purposes.

TARRED FELT is the best kind of building paper. Architects specify and recommend it in the construction of a first class building. It is also used for gravel roofs. Tarred Felt is made of carefully selected wool paper felt, thoroughly saturated with redistilled coal tar. American coal tar.

THIS FELT is used extensively for roofing sheds and temporary buildings. It is still used in roofing large buildings where the specifications require about three to five layers of tarred felt, each layer of which is thoroughly coated with pitch or our Duck Brand Ready Roof Coating. After the several layers of tarred felt have been laid, they are then covered to the depth of an inch or more with sand and gravel. We recommend No. 1 Tarred Felt for all first class jobs. It makes an excellent sheathing felt and should be used between all floors where a good job is wanted. As a sheathing paper for putting under weatherboard it has no equal.

No. 2 TARRED FELT. This grade of tarred felt is also used for gravel roofing where several layers are specified. It can be used in any place where the No. 1 grade is used, but it is lighter weight (not so thick), and where a medium grade of work is required a No. 2 Tarred Felt will be found very satisfactory.

No. 3 TARRED FELT. This grade of felt is made with the same care as the two heavier grades, but is lighter in weight and much thinner.

Shipped from our Chicago store.

RED ROSIN SIZED BUILDING PAPER.

26 CENTS Per Roll. FOR SHEATHING PURPOSES.

OUR PRICES are extremely low for this high grade building paper. Many of the largest contractors throughout this broad country are continually scouring us orders for large quantities of this paper. Do not overlook the economy of properly lining your building with plenty of this high grade paper. It will save its first cost during the first winter, due to the reduction in your fuel bills, to say nothing of the added comfort to your home.

Red Rosin Sized Building Paper is made with a filled paper for a body and is faced on both sides with a well calendered stock that is thoroughly rosin sized, rendering it dampproof and vermin proof. We sell four different weights of this paper. We recommend for ordinary building purposes our Leader Brand, as it is of sufficient thickness to give entire satisfaction.

Our Fulton Brand is made with exactly the same stock, but is considerably heavier than our Leader Brand and there is no better or heavier Red Rosin Sized Paper made by any other concern.

Our Acme Brand is the same quality as our Leader excepting that it is a lighter weight.

Our Competition Brand is a fair grade, similar to the kind sold throughout this country. It is light in weight, as it runs only 7 pounds to the square.

Shipped from our Chicago store or from our Kansas City warehouse.

All rolls contain 500 square feet.

ROOFING PITCH.

A GENUINE straight run American coal tar roofing pitch. We the best grade of roofing pitch that we obtain. We have a large sale to manufacturers and contractors on this material. It is in a solid state and requires melting and the proper consistency for gravel roof use. Especially used for tarred felt roofs. Foundations below the ground are made waterproof after being heavily coated with this roofing pitch. We do not sell less than full barrels which weigh 300, 350 and 575 pounds. Shipped from Chicago factory or Chicago store.

No. 63H3056 Roofing Pitch. Price, per 100 pounds.....

Competition Brand Blue Plaster Board.

We have an occasional call for a cheaper grade of Blue Plaster Board and while we do not recommend the use of "A" grade material, we can furnish it. This "B" grade Blue Plaster Board is not finished as well, is not as tough and strong as our "AA" grade Fulton Brand Blue Plaster Board shown on page 1153, and for the difference in price we would by all means recommend that you buy our Fulton Brand "AA" grade Blue Plaster Board. Shipped from our Chicago store.

Rubber Roofing — Flint Sand Coated Roofing

e Offer Under
e Trade Name of

Composition Rubber Roofing

he "rubber" referred to in the description of this roofing is merely the trade name for a mineral substance looks like rubber and feels like rubber, but, unlike rubber, it will never rot and is not affected by moisture.

or the BEST rubber finished fing made se Best-of-all Roofing page 1156.

Ve guarantee these prices to be far below others charge for the very same roofing h they sell under various trade names.

hy not buy the best roofing, such as ntal Slate Surfaced, Best-of-all or t Surfaced Asphalt Roofing? The ve named roofings will wear many rs longer than Composition Roofing other makes and the price of these l grade fully guaranteed roofings is a little higher than the cheaper des. However, if you want a cheap fing to last a short time, then buy Composition Roofing.

Composition Roofing is sold by us for the purpose of meeting the demand of those who want ready roofing because it is low in price and who are not so particular about its wearing qualities. While this roofing is widely advertised by its manufacturers under various names to wear from five to ten years, we hesitate to recommend or guarantee it for this period because it contains low grade asphalts and crude oil which, according to best authorities, lack the wearing qualities such as are found in our Best-of-all Roofing, page 1156, and Flint Surfaced Asphalt Roofing shown at bottom of this page.

OUR POLICY. Roofing which is recommended to wear a given time as printed in connection with our prices is backed by our binding guarantee; **IF IT DOES NOT LAST THE FULL LENGTH OF TIME WE CLAIM IT SHOULD WEAR, WE WILL REPLACE IT BY FURNISHING NEW ROOFING.** We can make no claims as to the length of time Composition Roofing will wear, but believe that it is a remarkably good bargain at the prices we quote here. We would, however, advise you to be careful in selecting your roofing or you may buy this very same make of roofing and pay double our prices for it. Composition Roofing is made of standard felt, saturated with an asphaltic composition and is finished on one side with a smooth mineral asphalt coating and on the other side coated with fine sand. This roofing may be used with either side up, according to the wishes of the purchaser.

Composition Roofing is shipped direct from our Chicago factory or from our Chicago store. Composition Roofing is made 32 inches wide and is put up in rolls containing 108 square feet, or enough material to cover a square of 100 square feet, furnished complete with nails and cement inside the rolls.

The BEST flint surfaced roofing made is listed below.

FLINT SURFACED ASPHALT ROOFING

95¢ PER ROLL

Heavier by a Half Ply Than Other Flint Surfaced Asphalt Roofing.

Our Flint Surfaced Asphalt Roofing is heavily surfaced on both sides with clean flint sand, adding much to its fireproof qualities. Being flint sanded on the under side as well as on the top side makes it especially fireproof, because flying embers or coals are not likely to set it on fire from the top, while the same coating of flint sand on the under side acts as a resistance against fire from the inside of the building. Flint Surfaced Asphalt Roofing is 32 inches wide. It is guaranteed to be made from a long fiber pure wool felt and saturated with the highest grade of asphalts and double coated with highest grade pure mineral asphalt. It is absolutely free from animal oil and is guaranteed not to melt or run in summer, or crack or break in winter. It is the best fire resisting asphalt roofing on the market.

This is an asphalt roofing; there is positively no coal tar used in its manufacture. This fact alone helps to make it fireproof and the waterproofing qualities of our coating give it a good heavy body, making it very strong and flexible. We absolutely guarantee our Flint Surfaced Asphalt Roofing to be the heaviest sanded asphalt roofing ever made.

Please compare the thickness, weight, strength and quality of materials used in our Flint Surfaced Asphalt Roofing with other makes of flint coated roofing and the result will be that you will order from us.

Made of the same high grades of wool felt and asphalts that are used in our celebrated Best-of-all Roofing described on page 1156.

Flint Surfaced Asphalt Roofing Requires No Coating When First Put On the Building.

3½-PLY ROOFING specified by architects for the higher class of buildings such as residences, schoolhouses, factory buildings or wherever a high class, long wearing roofing is required. Will wear 12 years.

2½-PLY ROOFING. Used on residences, barns, public buildings and if not abused will wear 9 years.

1½-PLY ROOFING is intended for use on temporary buildings, sheds, etc., and will last 5 years.

We furnish free with every roll of our Flint Surfaced Asphalt Roofing plenty of large headed galvanized barbed roofing nails and sufficient cement, with all necessary directions for laying. We use large headed galvanized nails in place of tin caps because they more firmly secure the roofing and do not rust out as tin caps do.

Quicker delivery and lower freight charges are assured by shipping direct from our factories and warehouses near you. Large orders going to Eastern and Southern points will be shipped from factory in Cincinnati, Ohio, or Pittsburgh, Penn. Orders to Western and Southwestern points will be shipped from our warehouse in Kansas City, Mo. We also ship from Chicago factory, and small orders going with other goods will be shipped from our Chicago store. Remember, it costs you no more for the roofing shipped from any of these points, but it enables us to reduce the freight charges to almost nothing

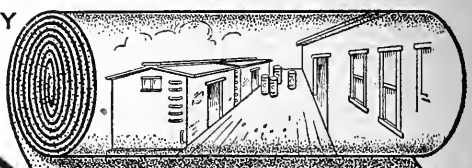
BEST-OF-ALL ROOFING

FROM FACTORY DOOR TO YOU



THICKEST, HEAVIEST AND MOST DURABLE SMOOTH FINISHED ROOFING MADE

Don't Buy Roofing From Anybody Without First Making These Tests

PLEASE COMPARE:

1. **THICKNESS**—Best-of-all is from 10 to 15 per cent thicker.
2. **WEIGHT**—Weighs from 10 to 15 per cent heavier.
3. **FLEXIBILITY AND STRENGTH**—Ours exceeds others by 25 per cent actual test.
4. **QUALITY**—We use pure asphalts and long fiber felts. You won't find tar or oil in this roofing.

After you make these four tests there can be but one result. Whether it be for house or barn you will buy Best-of-all Roofing. There is no doubt about Best-of-all wearing longest.

The Four Tests, simple as they may seem, tell the difference between good and bad roofing. When buying Best-of-all Roofing **You Can't Go Wrong. We Guarantee Every Roll.** If you are not satisfied we will return your money as cheerfully as we accept your order; you simply take no risk whatever.

In our Best-of-all Roofing we offer you roofing that will outwear tin, tar or gravel roofing and has stood the test in all climates from Alaska to the Gulf of Mexico. A weatherproof and fire resisting roofing that looks like rubber, feels like rubber and wears like iron. It is made of heavy, strong, long fibered wool felt, saturated with the best grades of asphalt. Best-of-all Roofing is elastic, pliable and tough, not affected by changes in climate, vapors, steam or gas and will not rust. Unlike most other kinds of prepared roofing, it is free from odor and will not discolor rain water; it can be used on either steep or flat roofs. Anyone can lay it, the only tools required being a knife and a hammer. **Samples mailed free on request.**

A roofing that is **Heavier, Thicker and Stronger** than any standard make.

It is a Proven Fact that prepared roofing of good quality like Best-of-all will outwear shingles. Here's your chance to buy it at a fraction of their cost.

We buy every ingredient that enters into the manufacture of Best-of-all Roofing, and we buy only the best. The best pure wool felt and best grade of asphalt only are used. Then, not being satisfied with buying the best, we analyze every ingredient thoroughly before we use it, so that we can feel satisfied that positively everything going into the makeup of this roofing is the best. These precautions, together with the use of only the latest improved machinery, skilled workmen and manufacturing every roll in our own factory, result in Best-of-all Roofing, positively the best roofing made, regardless of cost.

To reduce your freight charges and to avoid delays in transit we will ship your order from our factory or one of the warehouses nearest you. Warehouses in **Cincinnati, Ohio; Pittsburgh, Penn.; Kansas City, Mo.; Atlanta, Ga.;** and factory at **Chicago, Illinois.** We charge you no more no matter from which point your roofing is shipped. You save delays and reduce freight charges.

WE FURNISH FREE with every roll of our Best-of-all Roofing large headed galvanized roofing nails and plenty of cement for lapping seams or joints. Galvanized nails will not rust, hence will last for many years. No matter what kind of roofing you buy, insist on using galvanized roofing nails with large heads.

IT IS FIRE-RESISTING AND WATERPROOF.

It Is Better and Cheaper Than Tin, Tar and Gravel, or Any Other Kind of Roofing, and WILL OUTWEAR THEM ALL.

2.25 PER ROLL ORIENTAL SLATE SURFACED ROOFING

FURNISHED IN TWO COLORS, RED AND GREENISH GRAY. GUARANTEED TO WEAR TWELVE YEARS. COLORS WILL NOT FADE.

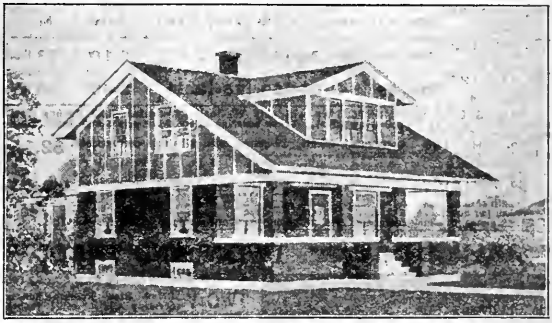
ORIENTAL SLATE SURFACED ROOFING is the most beautiful roofing made. Its color is permanent. Fine enough for the most expensive residence, yet low enough in price for the most humble cottage. Made from a long fiber pure wool felt, saturated with an asphalt composition and heavily coated with hard asphalt in which the crushed slate is thoroughly embedded. We guarantee the high quality of every ingredient used in making this roofing. It positively needs no coating nor attention after it is laid. It is fire resisting and for this reason makes an excellent roofing for buildings near factories, foundries, etc., as it will not catch fire from flying embers.

It is furnished in two colors, red and greenish gray. These colors are permanent, as they are the natural colors of the slate just as it is quarried.

MAKES A BEAUTIFUL ROOF. Red Slate Surfaced Roofing is a dull rich red and makes a beautiful roof for any building.

FOR SIDING OF HOUSES AND OTHER STRUCTURES IT CAN'T BE BEAT. Gray Slate Surfaced Roofing is a greenish gray color, having just a slight tinge of green. This roofing makes an excellent siding when battens are used over the joints and cannot be distinguished from stucco or cement. Used as a roofing and siding with very pleasing effects.

Here's a chance to reduce the cost of your building, adding to its beauty, reducing its cost of upkeep, as no painting is ever required and with the satisfaction of knowing that it will wear equally as long as wood siding. We recommend using Red and Greenish Gray Slate Roofing together, the red for roofing and the greenish gray for siding, as pretty a color combination as can be had and you have the satisfaction of knowing that the colors are permanent and that neither roofing nor siding need be touched for at least twelve years. **Anyone can lay it. Complete directions go with every roll.**



By using Oriental Roofing you save $62.25 on an average roof of 16 squares. Roofing and labor amount to $44.00. Shingles and cost of laying shingles amount to $106.25, a clear saving of $62.25, and you have a roof that is guaranteed to wear twelve years without any attention whatever, which is worth more to you than the saving.

WE FURNISH FREE with every roll large headed galvanized roofing nails and plenty of cement for lapping seams or joints. Note that we furnish a galvanized nail with large head which costs 100 per cent more than the old style roofing or shingle nails and tin caps. We know that a good roof depends on its being firmly secured to the roof boards. Galvanized nails will never rust, hence will last for many years.

Price of Red and Greenish Gray Slate Surfaced Roofing.

No. 63H3062 Greenish Gray Slate Surfaced Roofing, 108 square feet. Weight, 80 pounds. Price, per roll..... **$2.25**

TO REDUCE YOUR FREIGHT CHARGES AND TO AVOID DELAYS IN TRANSIT, we will ship your order from our factory in Chicago or the one of our warehouses nearest you. Warehouses in Cincinnati, Ohio; Pittsburgh, Peno.; Atlanta, Ga., and Kansas City, Mo. The price is the same no matter from which point your roofing is shipped.

Samples will be mailed free on request.

ORIENTAL ASPHALT SHINGLES

FURNISHED IN RED, GREENISH GRAY AND GRAVEL BROWN.

WILL NEVER CHANGE COLOR. Oriental Asphalt Shingles retain their rich color always, because they are surfaced with real red or greenish gray ushed slate in their natural colors or with washed midget lake gravel which is brown in color. Absolutely no paint or artificial color used in making ese shingles.

GUARANTEED TO OUTWEAR WOOD SHINGLES. Oriental Asphalt ingles will outwear wood shingles, because they are waterproofed clear rough. The crushed slate not only furnishes the never fading color but is e actual wearing surface of the roof.

REQUIRE NO ATTENTION AFTER BEING LAID. WE GUARANTEE HESE SHINGLES TO WEAR TWELVE YEARS WITHOUT PAINTING R ANY ATTENTION WHATEVER.

ALL SHINGLES ARE OF UNIFORM SIZE, 8x12¾ inches. Unlike wood ingles, there are no culls to be thrown away; every shingle being of iform size there is no labor wasted in selecting the proper size shingles r the proper place. Oriental Shingles can be laid with less labor than ood shingles, and after they are laid have the appearance of slate shingles. riental Asphalt Shingles should be laid 4 inches to the eather and ½ inch apart.

e Guarantee These Shingles to Wear Twelve Years.

ASPHALT PLAIN CUT SHINGLES are packed in adles, each bundle containing enough shingles to cover square feet when laid 4 inches to the weather and ½ ch apart; 425 shingles will lay one square or 100 uare feet. 425 Asphalt Shingles will cover as much surce as 900 wood shingles laid 4 inches to the weather. riental Shingles can be laid on the same sheathing as ood shingles, even if roof boards are from 1 to 2 inches art. Shipped from factory in Chicago.

Catalog No.	Surfaced With	Price per Square of Shingles (One Square)	Weight, per Square, Pounds
63H3048	Crushed Red Slate	$4.35	210

63H3047	Washed Midget Gravel	4.25	225

EXTRA HEAVY STEEL ROOFING AND SIDING U. S. Standard Weig

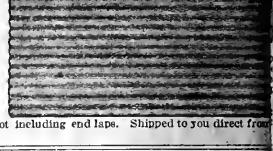
Steel is an excellent material for roofing, siding, ceiling, etc., on account of its being a strictly fireproof material. Easily applied, no experience being needed. Can be laid at a small cost for labor on any kind of a roof. Can also be laid over old shingles.

PRESSED CORRUGATED STEEL. Can be applied directly to studdings or rafters without sheathing. Extensively used for roofing, siding and ceiling in factories, stores, fireproof buildings, grain elevators, etc. Extra strong on account of its corrugations.

2½-INCH CORRUGATED SHEETS are furnished in sheets which actually measure 26 inches wide, but have a covering width of only 24 inches on account of the side lap. When ordering, allow from 4 to 6 inches for end laps depending upon the pitch or slant of the roof. If used for siding, a 2-inch end lap is sufficient. When ordering by the square be sure to order 108⅓ square feet to cover 100 square feet, not including the end laps. Shipped to you direct from steel mills in Central Ohio.

BE WISE! Order our extra heavy grade (26-gauge). Costs about 10 per cent more. It is fully 20 per cent thicker and 50 per cent heavier but costs no more to lay and wears nearly twice as long. It costs a trifle more at first but it is the cheapest in the end.

WE FURNISH TWO THICKNESSES. United States Standard 28-Gauge, is known the country over as sta weight and thickness, and United States Standard 26-gauge, which we describe as EXTRA HE and which is fully 20 per cent one-fifth heavier than standard 28-gauge. We recommen 28-gauge in preference to the standard weight as it costs but a trifle more, costs no more to la gives nearly double the wear.



1¼-INCH CORRUGATED SHEETS are furnished in sheets which actually measure 25 inches in width, but have a covering width of only 24 inches on account of side lap. When ordering, allow from 4 to 6 inches for end lap, depending upon the pitch or slant of the roof. If used for siding, 2-inch end laps are sufficient. When ordering by the square, be sure to order 104⅛ square feet to cover 100 square feet, not including end laps. Shipped to you direct from

Made in U. S. Standard Grade (28-Gauge) and Extra Heavy Grade (26-Gauge)

TWO-V AND THREE-V CRIMP STEEL ROOFING

Made in U. S. Standard Grade (28-G and Extra Heavy Grade (26- Gaug

V Crimp Roofing can be used on any roof having more than 2 inches fall to the foot.

TWO-V Crimp Steel Roofing has a covering width of 24 inches after lapping one crimp over the other. It can be put directly on the rafters which should be placed 24 inches from center to center and the V wood strips nailed on the top surface of the rafter. Put a crosspiece between the rafters wherever there is a joint or lap. This roofing should be well coated with paint under the lap and nailed down to the crosspiece between the rafters.

Requires no soldering and folding or hammering of seams or joints; anyone who has ordinary mechanical ability can put it on.

THREE-V Crimp Steel Roofing has a covering width of 24 inches from center to center of two outside crimps. The center crimp adds much to the strength of the sheet as it stiffens the iron and prevents the sheets from rattling. Three-V Crimp Steel Roofing can be laid over old shingles or on smooth surface where you can place a wood V strip to support the center crimp. On a new roof it is only necessary to place sheathing boards every 2 feet, this being close enough to allow the V strips to properly support and strengthen the center of the sheets.

NOTICE—Prices on galvanized and black sheet steel are subject to fluctuations of the market. In event of decline we will give our customers the benefit of any reduction and return the difference in price. Sheet steel shipped from Central Ohio.

EVERYTHING IN CONCRETE MACHINER

We Guarantee QUALITY. We Save You Money Becaus
Our Prices Are Based on Actual Manufacturing Cos

Get This Big FREE Catalog of CONCRETE MACHINERY

BEFORE YOU BUY ANYTHING IN THIS LINE

Space does not permit the showing of our complete line of concrete machinery in this Big Catalog so we have issued a special catalog which illustrates and describes our complete line of concrete block machines, molds, mixers, tile machines, culvert cores, etc. If you are interested, be sure to send for this free special catalog. Send us a postal card or letter and ask for our Special Concrete Block Machinery Catalog and it will go forward to you by return mail. This catalog quotes the lowest prices that have ever been made on high grade machinery, and you really cannot afford to buy a machine or mold anywhere until you get our catalog and see the remarkably low prices we have made on our guaranteed machines and molds.

We are the most extensive handlers of concrete machinery in the country, and we offer our entire line of machines and molds at prices which represent but one small profit over the actual manufacturing cost. More of our machines are in use than of any other make. Whether you need but one mold or equipment for a complete plant, we can furnish what you need, save you money on your equipment and guarantee to furnish machinery as good or better in quality than you can get at twice our prices. Shipment of all our machines or molds is made subject to our usual "Money back if not satisfied" privilege which protects you against any possibility of an unsatisfactory deal. **Be sure to get our free Concrete Machinery Catalog before you buy anything in this line,** in case you are unable to select your needs from this and the following page. **No matter what you need for making concrete products don't fail to get our free Concrete Machinery Catalog, because it will surely save you money.** We have the largest and most complete line of up to date machinery, sold under a binding guarantee as to quality of material and workmanship, and at prices lower than have ever before been asked for practical machines or molds. **Send for our Concrete Machinery Catalog today, NOW, before you forget it.** Our line of designs is complete. Every pattern for face design is made from an impression of actual cut stone which has been cut by an expert. This insures a perfect and fine appearing product.

INFORMATION FREE. **If you want any special information on the concrete material subject** free of charge, and without obligating you in any way. Below we describe briefly some of the items in our line. However, you should by all means get the special catalog and read our complete descriptions of our entire line of machines and molds. The catalog also contains many photographic reproductions of our machines and molds, and their products, including buildings which have been erected of products made with our machinery.

CONCRETE MACHINERY FOR EVERY PURPOSE

Building Blocks.

Our Triumph Block Machine with complete outfit for 8x8x16-inch blocks at $12.75 is the biggest bargain ever offered in the line. Our Wizard Concrete Block Machine at $42.50 with a complete big outfit is partially described on page 1161 of this catalog. It is the fastest machine ever made, and our price means a saving of about half over what you would have to pay if you bought elsewhere. In connection with our line of block machines, we show a complete line of extra attachments for special shape blocks suitable for special angles and openings, silos and ornamental work. Our line of face plates is most complete and the designs are by far prettier than any that have ever before been offered by anyone. With our machinery you can make any kind or style of block that you may need. Our Special Concrete Machinery Catalog describes and illustrates all this in detail. Be sure to get this free catalog before you buy your equipment. We can save you money and furnish you with better machinery than you can get anywhere else.

Concrete Mixers.

Machine mixed concrete is better than hand mixed, and in addition, you can save time and money by using a mixer and can turn out a better class of work, uniform in color and quality of material and save on the cost of cement because the mixer will do the work quicker and better than by hand. Our Concrete Machinery Catalog tells all about our line of mixers. Be sure to get it and learn how much you can save by buying your machinery from us.

For only $19.75 we can furnish a well made, very efficient hand batch mixer of large capacity. This mixer has a capacity of 3 to 5 cubic feet per batch, or a daily capacity of 20 to 25 cubic yards. It is made of heavy plate steel and best gray iron castings and is securely mounted on a substantial hardwood stand. Our Concrete Machinery Catalog also describes our power batch mixer at $18.25.

Concrete Porches.

A SAMPLE OF OUR PORCH MOLDS PRODUCT

No block yard is complete without a line of molds for making porch columns, piers, rails, balusters, ornamental column caps or ornamental balls. We have an exceptionally fine line of molds for making all kinds of ornamental work for porches and concrete building decoration. This class of work is most interesting, commands a good price and the profits in the sale of concrete porch material are big. You can make concrete porch products in our molds as handsome as cut stone at a small fraction of the cost. These molds are furnished at prices ranging upwards from $3.79 for a 10x12-inch column mold. Our complete outfits of porch and baluster molds at $17.85 and $43.65 cannot be purchased anywhere else for less than $35.00 and $75.00, respectively. All molds fully guaranteed. For $10.95 we furnish an adjustable cap, sill and step mold suitable for making window caps, sills, steps, etc. We can furnish extra ornamental plates for this mold for making ornamental caps, coping, water tables, etc. Be sure to get our Special Concrete Machinery Catalog before you buy any concrete machinery of anyone.

Concrete Brick.

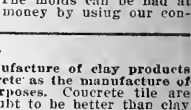
Concrete brick are rapidly displacing clay brick, and in most localities, where there is a supply of sand or gravel, concrete brick, much more handsome in appearance and more durable than clay brick, can be made and sold at a profit at a lower price than clay brick. We can furnish a durable and simple brick machine at $18.65. The machine has a capacity of 1,200 to 1,500 brick a day. Our Two-Way Brick Machine makes brick either face up or face down, has a capacity of 3,000 brick a day and is sold at about half what is asked by others for an inferior machine. Both our brick machines and a full line of extra ornamental face plates are described in our Special Concrete Machinery Catalog.

Concrete Fence Posts.

Wood fence posts are becoming scarcer and higher in price each year. A first class wood post cannot be had at any price, due to scarcity of good timber. Concrete forms a perfect substitute for wood posts and makes a post that is everlasting, proof against rot, prairie and forest fires and repair expense. The concrete post in the first place need not cost more than a wood post and when the elimination of replacement and repair expense is considered no one can afford to use anything but concrete fence posts. Our Special Concrete Machinery Catalog describes in full how concrete fence posts are made, tells what they cost, and illustrates two types of molds for making concrete fence posts. The molds can be had at prices ranging from $2.25 up. You can save money by using our concrete fence post molds.

Concrete Tile.

There is probably no branch in the manufacture of clay products which has been displaced so rapidly by concrete as the manufacture of tile or pipe for drainage and sewerage purposes. Concrete tile are cheaper and have been proven beyond all doubt to be better than clay tile from every standpoint. Our Concrete Machinery Catalog describes and quotes prices on machines and molds for making both drain and sewer tile and tells all about the advantages of this new everlasting material over the old costly and short lived clay tile. If you are considering the manufacture of tile or want tile for drainage or sewerage purposes, be sure to get our Special Concrete Machinery Catalog and learn all about how easily and cheaply you can make everlasting tile.



Concrete Culverts.

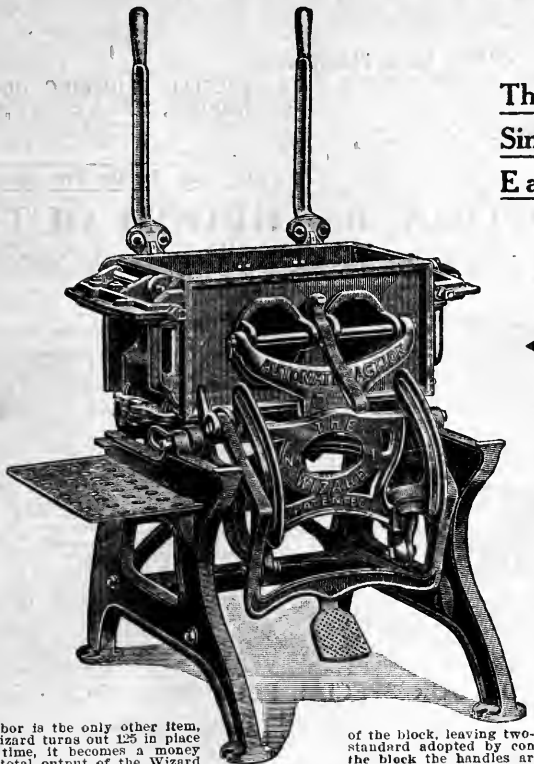
County and road commissioners take notice! We are now in a position to furnish a collapsible steel core for use in concrete culvert and sewer construction at a price for outright sale that is less than what you ordinarily would have to pay for the rental of molds for this kind of work. Formerly steel molds or centers for culvert and sewer construction were leased or rented, but by special arrangement we can sell the molds outright and save you some money besides. Don't fail to send for our Special Concrete Machinery Catalog if you are interested.

WIZARD AUTOMATIC FACE DOWN CONCRETE BLOCK MACHINE

42.50

With Big mplete Outfit

The World's Best Simple, Quick Acting Easily Operated



The Wizard is the only automatic liptical core concrete block ma- ine manufactured, and actual tests / our customers have demonstrated eyond all question of doubt that it the quickest and most easily perated machine on the market. abor is one of the biggest items expense in the manufacture of ement blocks, and the machine hich will turn out the largest num- er of perfect blocks in a given ngth of time is the machine that ill be the biggest profit maker for ie owner. The great saving in time d labor enables you to undersell our competitors and get more busi- ess.

NE MAN CAN MAKE 125 LOCKS A DAY on the Wizard Machine, while he best that one man can do on the verage machine of other makes is eventy-five blocks a day. As the aterials in each block cost the ame (about 5 cents a block) and labor is the only other item, ou can readily see that when the Wizard turns out 125 in place f seventy-five blocks in the same time, it becomes a money aver to its owner. Comparing the total output of the Wizard vith that of the slower machines, and comparing the cost of he block in each case, you can double your profits by using he Wizard.

THE CONSTRUCTION of the Wizard Block Machine is perfect in every detail, all parts being made of the best grade iron, and all parts are accurately fitted, so that the machine as a whole, works smoothly and accurately, insuring a perfect product.

OPERATION. Blocks are made face down, which is conceded by all block authorities to be the proper way to make a block. This method permits the use of a fine waterproof material for facing and a coarser material for the backing of the block. In addition, when tamping face down, the material is forced into the face plate depressions, which brings out all the beauty of the design.

CORES are elliptical in shape, which makes a stronger block than any other type. Core space is one-third the total volume of the block, leaving two-thirds bearing surface, which is the standard adopted by concrete block authorities. To release the block the handles are drawn forward and, as the flask turns over, the cores drop out gradually and smoothly and are entirely out of the block when flask is completely turned over. The handles are next spread out, releasing the end doors from the block, and the flask is then thrown back, leaving block on pallet to carry away. The release of the block and locking of the flask for the next block can be accomplished in half the time it takes to tell it. Iron pallets are used which are provided with handles, doing away with the necessity of a separate carrier so inconvenient to use, and takes time to handle.

OUR CHALLENGE TEN-DAY TRIAL OFFER AND GUARANTEE. **Send us your order for the Wizard Machine and we will ship you the machine with complete outfit,** including twenty-five pallets, direct rom our factory. You can compare it with other machines, and test t for ten days, and if it does not make better blocks and make them aster and easier than any other machine on the market, even though other machines cost twice the price you paid for the Wizard, you can return it to our factory at our expense and we will immediately return o you the total cost price and any freight charges you paid.

PALLETS. The Wizard Block Machine uses iron pallets which are provided with a handle for convenience in handling, and does away with the use of a special carrier, which is so inconvenient o use, but is required on most other machines. The block is removed rom the machine as soon as it is made, but must remain on the pallet for twelve to twenty-four hours, until it becomes sufficiently set to handle. We furnish twenty-five pallets with each machine and as it is necessary to have a pallet for each block you want to make n a day, we would advise you to order extra pallets as per list below. **Wood pallets,** while a little lower in first cost, prove to be the most expensive in the long run. The alternate wet and dry conditions to which they are subjected cause them to warp and crack very quickly and if this is not discovered promptly you are liable to make a great many imperfectly shaped blocks which will have to be discarded, causing a loss in time, labor and material. These pallets also require replacing. **Iron pallets,** barring accidents, are everlasting; will never warp or crack and never require replacing.

PRICE LIST OF PALLETS.

Catalog No.	Size, Inches	Weight, Pounds	Price, Each
11H5537	8x 8x16	7	24c
11H5547	8x 9x16	9	27c
11H5557	8x10x16	10	32c
11H5567	8x12x16	11	38c

THE OUTFIT FURNISHED WITH EACH MACHINE consists of two sets of face plates, end doors and attachments for making whole, half, quarter, corner, gable, joist and pier blocks in standard rock and plain face designs; a set of plugs for making solid blocks; tamper; strike off tool for finishing back of block; hopper and twenty-five cast iron pallets. This equipment is all that is necessary for making blocks for the average builder.

A COMPLETE LINE OF EXTRAS. Lack of space prevents our showing our extra face designs and special bay window, 4-inch course and circle block attachments for the Wizard Machine, but we show illustrations of our complete line of face plates, attachments, etc., in our Special Concrete Machinery Catalog, which we send free on request.

If you want a special attachment and do not care to wait for our special catalog, order whatever attachment you wish and allow the price usually asked for this attachment by others. We will fill your order at the correct price and return the difference between our price and the amount you send.

All our face patterns are made from master patterns that were first made in cut stone. Experts have pronounced them to be the most handsome plates offered by any concern. We can furnish the following designs: Shallow Rock, Medium Rock, Heavy Rock, Plain, Panel, Tooled Edge Rock, Tooled Edge Bushhammer, Tooled, two styles of broken Ashler, Water Table, Cobblestone, Ornamental Wreath, Rope and Scroll. You can have your choice of any two of these designs with our Wizard Machine, if you prefer any of them to the Medium Rock and plain design furnished regular. Our Wizard Block Machines are shipped direct from factory in Central Ohio.

WE MANUFACTURE PLUMBING GOOD

YOU CAN NOW AFFORD THE LUXURIES OF MODERN PLUMBING no matter where your home is located. By manufacturing plumbing goods in our own factory we are able to sell you the best grade of modern plumbing at a great saving as compared with what you will pay elsewhere, because the plumbing business has been monopolized by a combine which maintains prices by agreement and reaps large profits. Our one profit principle effects an exceptional saving for you when applied to the plumbing goods business.

WE HANDLE STRICTLY "A" GRADE No. 1 PLUMBING GOODS, tested and inspected before shipping. Every article is sold under our binding guarantee as to quality, on receiving any plumbing goods from us that fail to please them you may return them at our expense and we will return to you the price and any freight charges you paid. We could not afford to make this guarantee unless we were absolutely sure our goods would please you.

WE HAVE MADE IT VERY SIMPLE to install plumbing in any building, old or new, and have solved the water supply problem for you, giving any resident of the most remote country district the same benefits and as great conveniences in the matter of water supply as the residents of cities. We have entirely eliminated the necessity of using lead pipe and have practically made plumbing an iron pipe proposition throughout. About all you need to do when you order our plumbing with iron pipe connections is to locate the place for the goods in your building and then screw the parts together. Any ordinary workman or householder can do it with perfect success, and if you desire we will gladly make you a complete working drawing when you place your order with us, if you will send us a rough sketch of your house. This plan will show you where to place your fixtures, where to run your stack, how to vent each fixture; in fact, this drawing will show you where to place every fitting we send you and make the installation of your plumbing a simple that practically no one will experience any trouble in installing these goods. If you want to get our prices and advice on putting in a water supply outfit that will give you even a higher water pressure than most cities have, and at a very small expense, see page 1158 of this catalog.

SPECIAL PLUMBING GOODS CATALOG, FREE ON REQUEST, contains a larger assortment and a more complete line of plumbing goods than space will permit us to show in this catalog. We will be glad to have you make your choice from this catalog, but if you want some article not found here, be sure to write for our Special Plumbing Goods Catalog before buying elsewhere. We will supply all your needs at prices which will effect a big saving on everything you buy.

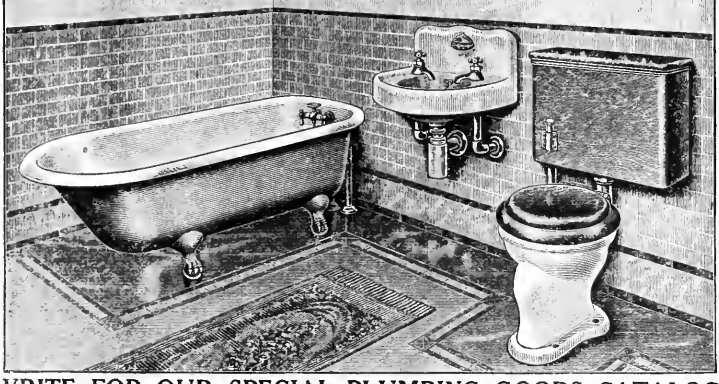
OUR PERFECTION BATHROOM OUTFIT, $37.95

WITH SIPHON WASH DOWN CLOSET. A COMBINATION THAT IS STRICTLY HIGH GRADE AND ONE THAT HAS GIVEN OUR CUSTOMERS THE UTMOST SATISFACTION. WE HAVE SHIPPED THOUSANDS OF THESE OUTFITS AND HAVE YET TO HEAR FROM ANY DISAPPOINTED CUSTOMER. OUR PLUMBING GOODS ARE MADE UNDER OUR OWN SUPERVISION. WE KNOW THEIR MATERIAL AND CONSTRUCTION FROM START TO FINISH AND ARE THEREFORE IN A POSITION TO GUARANTEE THEM THROUGHOUT.

THE CLOSET

furnished with this outfit is a low down pattern, is thoroughly sanitary, and one that will pass the most rigid inspection. The tank is made of golden oak, thoroughly seasoned and highly polished. It has a capacity of 6½ gallons, which is sufficient to cause a positive and powerful flush. It is lined with copper, all fittings and trimmings are made of heavy brass, and it is furnished with a rubber ball valve, which is one of the best valves on the market on account of its simplicity. The water is shut off by a rubber ball setting into the seat of the flush valve, and should it become necessary at any time to repair this valve, all that is required is to unscrew this rubber ball from the rod and screw in a new ball, so simple a child can do it easily. It is furnished with pearl top push button, a slight touch of which releases the valve and causes a positive flush. The seat furnished with this outfit is golden oak. Closet seat, which is highly polished, is furnished with cover. It is also furnished with offset nickel plated heavy brass hinges. The bowl furnished with this closet is a siphonic action bowl made of the highest grade English vitreous earthenware, and is the equal of any pottery on the market, regardless of price. We furnish this closet complete with tank, seat, bowl, supply pipes and nickel plated closet screws to fasten bowl to floor.



THE LAVATORY

furnished with this outfit is a cast iron porcelain enameled lavatory, 18x21 inches in size, 4-inch back and 4-inch roll rim. We consider this lavatory one of the neatest and most efficient ever placed on the market. It is furnished complete with sanitary soap tray, 1¼ inch heavy nickel plated anti-siphon trap with waste to wall, two nickel plated low down compression basin cocks with china tops marked "Hot" and "Cold," two nickel plated supply pipes from basin to wall.

THE BATH TUB

furnished with this outfit is a 5-foot tub made of cast iron with roll rim and is white porcelain enameled. It is manufactured from the highest grade gray cast iron, is graceful in appearance and is equal to any bath tub on the market. We furnish this bath tub complete with a No. 4½ Fuller bath cock made of brass, highly nickel plated and connected with brass nickel plated waste and overflow pipes, and two heavy brass nickel plated supply pipes.

WRITE FOR OUR SPECIAL PLUMBING GOODS CATALOG

ABOUT SHIPPING. The closet in this outfit is shipped from Chicago. Shipping weight, 100 pounds. The bath tub and lavatory are shipped from our factory in Southeastern Wisconsin. Shipping weight, 380 pounds.

No. 42H9214½ Perfection Bathroom Outfit, complete. Price..... **$37.95**

For the convenience of our customers we can furnish the above outfit with all fittings threaded for iron pipe connections at an extra charge of $1.50.
We can furnish the above fixtures with fittings to floor instead of wall at the price quoted, and when wanted in that way, specify so when writing your order.

OUR GEM BATHROOM OUTFIT, $45.35

WITH SIPHON JET CLOSET.

OUR GEM BATHROOM OUTFIT is a strictly high grade bathroom outfit, and one that is in keeping with the furnishings of the finest homes. We have prepared this outfit in order that our customers may have an opportunity to equip their homes with an outfit equal to the best on the market, regardless of price.

THE TUB

furnished with this outfit is a 5-foot heavy roll rim, cast iron, porcelain white enameled bath tub with claw pattern feet, and is furnished complete with our No. 4½ brass nickel plated bath cock nickel plated heavy brass supply pipes, and nickel plated brass connected waste and overflow.

THE LAVATORY

furnished is 18x24 inches with a 10-inch back, made of high grade cast iron, heavy enameled by a special process which we guarantee will not flake, craze or peel off. It has a large apron, as shown in illustration, and is furnished complete with one anti-siphon trap, nickel plated air chamber supply pipes and nickel plated brass faucets.

THE CLOSET furnished with this outfit is a siphon jet bowl with a low down tank and seat. The tank is highly polished, fitted with heavy brass trimmings, and is furnished with a pearl top push button, a slight touch of which releases the valve and causes a positive flush. It is furnished with a heavy brass nickel plated supply pipe from tank to floor. The seat is made of highly polished oak and has heavy brass nickel plated offset hinges. The bowl furnished with this closet is made of the very highest grade of English vitreous earthenware.

WE FEEL POSITIVE that any person purchasing this outfit from us will be more than satisfied with its quality and appearance, as it is impossible for us to do justice to it by mere description and illustration. The closet in this outfit is shipped from Chicago. Shipping weight, about 200 pounds. The bath tub and lavatory are shipped from our factory in Southeastern Wisconsin. Shipping weight, about 450 pounds.

No. 42H9215½ Gem Bathroom Outfit. Price..... **$45.35**

We can furnish the above outfit with all fittings threaded for iron pipe connections at an additional cost of $1.50.
We can furnish the above fixtures with fittings to floor instead of wall at the price quoted, and when wanted in that way specify so when writing your order.

JEWEL BATHROOM OUTFIT - - - - $68.25

THIS OUTFIT is the height of perfection, and equipped with all the latest modern appliances. The bath tub is a 5-foot "A" grade bath tub, with nickel plated combination hot and cold water bath cock, nickel plated supply pipes, and is fitted with our improved standing waste, which is a decided improvement over the old style plug.

THE LAVATORY is our pedestal style, 20x24 inches, and is furnished with our model waste, nickel plated air chamber supply pipes, and nickel plated cross handle indexed basin cocks.

THE CLOSET is one of the most improved types of up to date outfits on the market. The tank is genuine mahogany with a piano polish, lined with a heavy grade of copper lining, high pressure compound ball cock, and is equipped with a china handle lever to flush the tank. The seat is genuine mahogany, semi-saddle pattern. The closet is equipped with a rubber ball valve, the best and simplest valve on the market. The bowl is siphon jet style, made of the highest grade vitreous earthenware.

THIS OUTFIT is an unapproachable value and the equal of any outfit you could purchase, regardless of price. The lavatory and bath tub are shipped from our factory in Southeastern Wisconsin, the closet from our Chicago store. Shipping weight, complete, about 500 pounds.

No. 42H9216½ Jewel Bathroom Outfit. Price..... **$68.25**

We can furnish the above outfit with all fittings threaded for iron pipe connections at an additional cost of $2.00.
We can furnish the above fixtures with fittings to floor instead of wall at the prices quoted, and when wanted in that way, specify so when writing your order.

Kitchen Sink Outfits Should Be in Every Home.

No. 42H9075¼ We show in this illustration a complete outfit, consisting of kitchen sink, No. I brass lined pitcher spout pump, 1½-inch lead sink trap with iron connections soldered on the same; enough 1½-inch galvanized iron pipe to run from sink to floor, and enough 1¼-inch galvanized pipe to reach from pump to floor. You must order enough 1½-inch pipe extra to run from cistern to pump, and enough 1½-inch pipe to run from under floor where sink is placed to where you want the waste water to run. All connections are for iron pipe and anyone can set it up. For prices on iron pipe see page 1177.

$6.25 AND UP

Price 12c

The Acme Water Still.

No. 42H1479 This illustrates one of the most improved water stills on the market and one which we know will give our customers satisfaction. This still when placed on your cook stove will supply 10 quarts of distilled water a day. Enough water for drinking and toilet use for the ordinary family. This still is made of polished copper tinned on the inside; is 17½ inches high and 10 inches in diameter. Weight, about 25 pounds. Price $5.00

Galvanized Range Boilers.

Tested to 200 Pounds Pressure and Guaranteed to Stand an 85-Pound Working Pressure. Guaranteed One Year.

Range boilers can only be used in homes where there is a constant water pressure, which can only be obtained in cities having water works or in homes equipped with our water supply outfits. Where you have such pressure, these tanks can be connected with lead or iron pipes to your cook stove or hot air furnace and hot water can be drawn from the faucets without any extra expense. Our boilers are made of heavy gauge galvanized iron fully riveted with galvanized rivets. But when ordinary or fire pressure is over 75 pounds we recommend our extra heavy boiler listed below. Furnished complete with stand, galvanized inside tubes and extra heavy brass couplings.

No.	Height, Wt., Gal.	Lo. Lbs.	Price
42H1081¼	30	60 72	$ 5.75
42H1083¼	40	60 85	6.95
42H1084¼	52	60 120	11.75

The above prices are for boilers fitted with brass couplings for lead pipe connections. If wanted for iron pipe connections add 20 cents to above prices.

Extra Heavy Range Boilers.

Tested to 250 Pounds and Guaranteed to Stand 150 Pounds Working Pressure. Guaranteed Three Years.

These boilers are much heavier and better boilers than the ones listed above, and should be used in cities having a pressure of over 75 pounds; they will outwear the Standard Boiler, and we recommend their use. Furnished complete with brass couplings at prices given below.

No.	Gallons	Weight, Lbs.	Price
42H1087¼	30	105	$ 8.10
42H1088¼	40	124	10.25
42H1089¼	52	170	13.00

The above prices are for boilers fitted for lead pipe connection; if wanted for iron pipe connection add 20 cents to above prices.
Prices on Copper Range Boilers quoted on application.

Peerless Combination Range Boiler and Gas Water Heater.

No. 42H1090½ The Peerless Combination is without question the most efficient and economical method ever devised for the purpose of heating water. It is made of extra heavy materials and is guaranteed by us for the period of three years. It is so constructed that it eliminates coils or dead arms, has a perfect and direct circulating system within itself and it is an impossibility for it to clog or choke up. It is made with a two-burner system and with the small burner alone, which consumes five feet of gas an hour, will retain water in the boiler at 140 degrees. We can cheerfully recommend these boilers to our customers and should always be purchased when gas is to be used for heating water. This boiler can also be connected with a furnace or cook stove the same as the ordinary range boiler.
30-gallon, complete, as shown.
Price $24.00
40-gallon, complete, as shown.
Price 25.75
We can furnish the above fitted with gasoline burners. Write for prices if interested.

New Style Philadelphia Hopper Closet.

No. 42H924½ This is a Cast Iron Closet Bowl, heavily enameled on the inside and painted on the outside. To be connected with lead pipe direct to water pressure. This makes a neat and cheap outfit for use in basement and outside places. Weight, 15 pounds. Price, for closet bowl only....$1.30
For seat for above bowl see No. 42H9284½.

The Child's Comfort Seat - - - - - 80c

No. 42H117 A detachable Toilet Seat for children. Convenient, sanitary article used in connection with the regular seat of water closet. Takes place of chamber, vessel and nursery commode. Can be carried in a traveling bag for use on trains and boats and in railroad stations and hotels. Price.....80c

Hercules Gas Water Heater.

$4.20

No. 42H1080¼ A moderate priced copper coil heater and one which we are sure will give good results. It has a coil of best seamless drawn copper tubing, which provides ample heating surface and possesses many advantages over cast iron devices, iron pipes, etc., being not only a better heat conductor, but reducing the number of joints to a minimum. It can be connected readily to any range boiler with iron pipe, as the unions furnished with it are threaded for iron pipe connections. Each heater is fitted with ground joint brass unions. The conical deflector forces the flame and heated air to circulate close to the coil, and prevents down draft. The jacket is lined with asbestos, which prevents the escape of heat into the surrounding air. It is 8 inches in diameter, 15 inches high. ¾-inch tube. Usually connected with 30 or 40-gallon boiler to supply hot water to sink, bathroom and lavatory. Will heat enough water for a bath in ten minutes. Weight, 25 pounds.
Price, with Russia iron jacket....$4.20

Our New Model Nickel Plated Gasoline Heater $7.85

No. 42H217¼ is made of 24-gauge galvanized iron incased in nickel plated white metal and is an ornament to any bathroom. It is 28 inches high and 12 inches in diameter and will hold 13¾ gallons of water. The copper coil and heat flues are placed at the bottom of the heater. The circulation is created by a ⅝-inch copper coil 6 inches in length, extending from receptacle up into the heater, which insures circulation and rapid heating qualities. The fire coming in contact with the bottom and the flues so arranged that all the water drawn from the tank passes through the receptacle, enables one to get hot water almost instantly. Small quantities of water heated in two minutes, and will also heat the water ready for bathing in twenty minutes. Shipped from factory in Detroit, Mich. Shipping weight, 40 pounds.
Price $7.85

Enameled Iron Kitchen Grease Trap - - - - $6.10

No. 42H7001/4 This trap is mostly used in hotels, restaurants or anywhere where a large quantity of grease is thrown into sinks, as it catches all the grease and prevents it from running into the sewer and clogging sewer pipes. Size, 9x10x10 inches. Weight, 70 pounds.
With polished brass trimmings. Price.$6.10
With nickel plated trimmings. Price, 6.29
We can furnish the above with all connections threaded for iron pipe at 75 cents above prices quoted.

Mahogany Finish, Low Outfit - - - - $12.95

No. 42H118¾ This outfit made of Birch with mahogany finish, makes a very desirable outfit instead of oak, and one we guarantee to give our customers satisfaction. The tank and seat are made of birch wood with mahogany finish. The tank is lined with 10-ounce copper and capped with a heavy galvanized strip; is equipped with a high pressure ball cock, rubber ball valve and is fitted with a pearl top push button. The seat is fitted with heavy brass offset hinges which are made to stand wear as well as being highly nickel plated. The bowl is a wash down siphonic action bowl, made of the highest grade vitreous earthenware.

This is an outfit that is ordinarily sold for double the we ask for it, and knew that it will meet the approval customers desiring a mahogany finish outfit. Weight, nds. Price.....

12H119¼ Same as above, fitted with siphon l. Price..... $16.50

Low Tank Combination Closet With Siphon Jet Bowl - - $15.25

No. 42H120¼ The low tank closet is by far the most popular closet now on the market. It does away with the long supply pipes and high tank. Has a 2-inch opening in bowl which insures a positive flush every time; is noiseless and neat in appearance. Can be placed in an out of the way place or under stairs where high tank will not go. The tank is made of solid oak, golden oak finish, is lined with heavy sheet copper, has copper float, brass valve, etc. The valve is our improved positive flush valve, and cannot get out of order. A slight pressure of the valve lever or button empties the tank completely. The seat and cover are made of oak, with heavy brass offset hinges, heavily nickel plated; supply pipe is ½ inch in diameter, nickel plated; furnished complete ready to set up with a heavy brass nickel plated connection from tank to bowl. The bowl is high grade vitreous English earthenware, siphon jet style. Supply pipe is threaded for iron pipe connection. Shipping weight, about 115 pounds.

Price, complete, with plain earthenware bowl..... $15.25

If wanted with local vent, add 25 cents to above price. We can furnish this style bowl only, without tank or seat, for $7.65.

No. 42H125¾ Quarter Sawed Oak Outfit, same as above, except the tank and seat are made of quarter sawed oak with piano polish. Price..... $16.75

Genuine Mahogany Low Down Closet Combination - - - $22.50

No. 42H126¼ This outfit is composed of a genuine mahogany tank and seat with a siphon jet closet bowl. The tank is made of genuine mahogany with round corner box top and is equipped with a china handle and a nickel plated lever at the bottom of the tank, as shown in illustration. This without question is one of the highest grade outfits on the market today and has been gotten up by us in response to requests from our many customers who desire to purchase an especially high grade closet outfit at a price quoted by others on competition closets. It is furnished with a rubber ball valve, which is the most simple contrivance on the market today. The tank is lined with heavy copper and is high grade in every respect. The seat is a genuine mahogany semi-saddle seat with heavy nickel plated offset hangers. The bowl is a siphon jet bowl made of the highest grade English vitreous earthenware. Shipping weight, 120 pounds.

Price, complete, as shown in illustration $22.50

ess Washout Water Closet Loose Board - - - $11.30

The equal of closets that plumbers sell at $16.00 to $20.00.

No. 42H130¾ By far the best finished and most up to date closet on the market. It has the round cornered oak 5½-gallon siphon tank, Golden oak finish, with double oak attached seat, 1¼-inch nickel plated flush pipe and ½-inch nickel plated supply pipe, with our 3 front washout, plain earthenware bowl and all fixtures are nickel plated. Tank is copper lined, has patent float cutoff, with chain and pull to flush closet, and with loose board back, which does away with iron brackets and a much neater job. It is made of the eat materials throughout and the work- p and finish are perfect. Furnished te, ready for use, no fitting or extras d. Shipping weight, about 90 pounds.

, with plain bowl..... $11.30

anted with trap vent, add 25 cents to price.

ean furnish this style bowl only, with- nk or seat, for $4.35.

Our Special Low Down Closet Outfit, With Brass Supply Pipe - - - $11.95

No. 42H111¼ One of the best bargains ever offered by anyone, due to the quantities in which we purchase them and the one small profit we add. The tank furnished with this outfit is a 6½-gallon tank and is lined with heavy copper from the bottom of the tank to the height in which the water stands. From this part to the top of the tank is placed a heavy galvanized iron strip which prevents the moisture from eating through the wood, as is often the case with the majority of the low price closets on the market today. This tank is fitted with a rubber ball valve, one of the simplest and best valves on the market. The tank is made of golden oak, well seasoned and highly polished, and is furnished with a pearl top push button, a slight touch of which raises the rubber ball, releases the water and causes a positive flush of the closet bowl. The seat is also made of well seasoned golden oak, highly polished. It is furnished with nickel plated offset hinges, made of heavy brass, and will practically wear for a lifetime. The seat is furnished with rubber bumpers where they are necessary. The bowl is a siphonic action closet bowl. It is made of the highest grade of English vitreous earthenware, is nicely glazed and polished, and the equal of pottery sold by others, regardless of price. We furnish nickel plated closet screws to fasten bowl to floor. We also furnish a heavy brass nickel plated supply pipe reaching from tank to the floor. The connection to attach bowl to the tank is a heavy brass nickel plated elbow. Shipping weight, 100 pounds.

Price, complete as described, with plain bowl, with supply pipe threaded for iron pipe connection $11.95

No. 42H116¼ Quarter Sawed Oak Closet Outfit, same as above, except the tank and seat are made of quarter sawed oak and finished with a piano polish. Price.... $13.50

If bowl is wanted with local vent, add 25 cents to above price. We can furnish this style of bowl only, without tank or seat, for $4.30.

Peerless Combination Hopper and Trap Closet, With Loose Board Tank - - - - $11.95

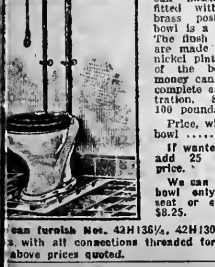
No. 42H136¾ This makes one of the best low priced outfits we carry. The tank is a 5½-gallon tank, made of oak, golden oak finish. The pipe and fittings are the same as described in our No. 42H130¾ Closet. Everything is first class. Could not work better nor last longer at any price. A great many prefer this combination hopper to the regular No. 3 front washout, as shown in No. 42H130¾, as it gives a more positive flush, has greater force, etc. The tank is fitted with a loose board back, which makes a much neater and better job than tanks furnished with brackets. Shipping weight, 95 pounds.

Price, complete, ready to set up...$11.95

If wanted with local vent, add 25 cents to above price.

We can furnish this style bowl only, without tank, seat or supply pipes, for $4.30.

RLESS SIPHON JET SET - - - - - $16.73



No. 42H141¼ Furnished complete with 8-gallon high tank with loose board back which does away with unsightly brackets and makes a very neat job. It is lined with copper, and all fittings and valves are made of brass. The seat is made of oak, highly polished, and the tank and seat are golden oak finish and seat is fitted with nickel plated brass post hinges. The bowl is a siphon jet bowl. The flush and supply pipe are made of brass heavily nickel plated. This is one of the best outfits that money can buy. Furnished complete as shown in illustration. Shipping weight, 100 pounds.

Price, with plain bowl $16.73

If wanted with local vent, add 25 cents to above price.

We can furnish this style bowl only, without tank, seat or supply pipes, for $8.25.

ean furnish Nos. 42H136¼, 42H130¾ and 42H141¼ s, with all connections threaded for iron pipe at 25 above prices quoted.

VITREOUS TANK LOW DOWN CLOSET - - - - - $15.10

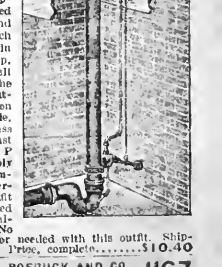
No. 42H112¼ We are able to offer our customers this season an outfit with a vitreous tank, the equal of outfits for which others ask $30.00 to $35.00, and one which we know will give universal satisfaction. The tank is a recess pattern tank, much larger than the ordinary tank sold by the regular plumber, with a china handle with double action lever, double guide, flush valve and nagrom float, elevated ball cock and seamless copper float, large flush elbow made of brass, heavily nickel plated, and furnished with heavy brass supply pipe, nickel plated. The bowl furnished with this closet is a siphon action wash down bowl made of the highest grade English vitreous ware. The seat is birch, mahogany finish with nickel plated offset, post hinges; in fact, it is one of the highest grade outfits of this kind on the market today. Shipping weight, about 135 pounds.

Price $15.10

No. 42H114¼ Same as above, except furnished with siphon jet bowl. Shipping weight, about 150 pounds.

Price $19.10

WHITE ENAMEL FROST-PROOF CLOSET, Complete, $10.40



No. 42H105¼ In our Frostproof Closet we believe we have one of the best on the market. The heavy brass valve which we furnish is placed below the frost line and is connected to hopper with a heavy copper chain, fastened to seat. When seat is lowered the valve opens automatically and flushes the hopper. When seat is raised it closes the valve and opens the drain pipe, which allows all water left in pipes to drain into trap, which leaves pipes at all times free from water. The price we ask is for this outfit complete with cast iron hopper, enameled inside, round wood seat, brass frostproof valve, 5 feet cast iron soil pipe, cast iron P trap, wrought iron supply pipe, chain and lever complete from lead and iron ferrule. This is the best outfit to use in cold or exposed places, because water is always below frost line. No closet tank is furnished or needed with this outfit. Shipping weight, 110 pounds. Price, complete..... $10.40

Brass Gate Valves.

No. 42H5788 These standard valves have brass seats and rising stem, tested to 100 pounds steam pressure. In the construction of these valves the bearing of the wedge being central it acts uniformly on all parts of the disc, consequently it will force the disc to the seats and have an equal bearing on all parts. These valves are used either for steam or water where a full opening (same size of pipe) is required and will allow the water to be drained from pipe in cold weather.

Hercules Stop Waste Cock.

No. 42H5873 The Hercules is so constructed that it can be instantly changed from right to left, and vice versa, by simply reversing position of handle when cock is open. The combination T and lever handle is cast in one piece. When T handle is desired the lever can be easily broken off by a slight blow from a hammer. This stop is made of a very high grade of metal and will give much better results than our standard grade goods.

Weight, lbs.	1½	1¾	2	3	3½	4	
Price	44c	45c	50c	56c	67c	78c	90c

Expansion Flue Brushes.

No. 42H6198 The illustration shows our improved Expansion Tube Brush. The improvement consists in so arranging the sections that the open space between the sections does not extend the entire length of the brush and thus cleans the whole of the flue each time it is pushed through. This brush is made entirely of steel and malleable iron, and is the most substantial and effective flue cleaner made. In ordering tube brushes be particular to give the outside measurement of tube.

Size, inches	1¾	2	2¼	2½	3

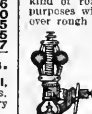
Brass, Price	$2.94	$3.20	$4.27	$4.75	$5.65	$8.20

The New Judson Governors.

No. 42H6398¼ This governor is especially designed for traction engine service where it is necessary to change the speed of engine while it is running. By this device speed can be increased or diminished from 25 to 30 per cent without changing the tension of spring. Also with this improvement the engineer can give the engine sufficient speed for any kind of road service, and immediately change it to the proper speed for threshing or other purposes without stopping. This governor is otherwise constructed so the jolting of the engine over rough and uneven ground or roads has but slight effect on the regulation.



Size, In.	Height, In.	Pulley Face	Weight, Lbs.	Diam. Speed	Engine Cylinder Diam.	Price
⅜	10	1½x1¼	6	700	1½ to 2½	$ 5
½	13	2¼x1½	16	600	3 to 3	7

Sand Pumps.

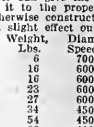
No. 42H6220¼ Used by drillers for taking sand and dirt from a bored well. A strong, well made article. Size, 3-inch. Weight, 17 lbs. Price, $2.22. Size, 4-inch. Weight, 26 lbs. Price, $3.25. Can furnish in sizes 5, 6, 7 and 8-inch. Prices quoted upon application.

Hydrants.

No. 42H1725¼ All parts of hydrant that water comes in contact with are of brass, not at the way of frost. It is anti-freezing. The waste operates perfectly, emptying the water from rising pipe when the valve is closed and closing the waste when valve is open. Valve can be pulled out at top when in need of repairs, thus avoiding the necessity of digging it up. Weight, about 55 pounds.

Size, ¾ inch.	
To set in ground 3 feet	$2.98
To set in ground 4 feet	3.27
Size, 1 inch	
To set in ground 3 feet	6.65
To set in ground 4 feet	7.18

New Water Relief Valve.



No. 42H6331 Brass Water Relief Valves to be used on end of cylinders on steam engines and remove all danger of bursting out cylinder heads by accumulation of water in the cylinder. Furnished set at 50 or 75 pounds. State which is wanted when ordering.

Standard Wire Hoisting Rope.

On account of its flexibility is almost universally used for hoisting purposes. Made of six strands, each of which is formed by twisting nineteen wires together, and a hemp rope or center. Is very pliable, and will wind on moderate sized drums and pass over reasonably small sheaves without injury.

We now list two grades of wire rope, made of Swedish iron and steel. The Swedish iron is the kind generally used, and will give good service, but where a strength is required, or where lives are at stake, as in mines, etc., we would recommend the cast steel as being best suited for this purpose.

When ordering wire rope for the first time give full particulars of the work, the size of drums, pulleys, curves, etc., and if the rope is not suitable, advice will be given. No. 42H6205 Swedish Iron Rope.

Diam.	Per Foot	Diam.	Per Foot
⅜ in.	3½c	¾ in.	14c
½ in.	5½c	⅞ in.	19c
⅝ in.	8½c	1 in.	25c

No. 42H9061½ Cast Steel Rope. This rope is made the same as No. 42H9060, only steel is used in its construction instead of Swedish iron.

Diam.	Per Foot	Diam.	Per Foot

Hercules Fire Extinguisher

Examined, Labeled and Approved Under Direction of the National Board of Fire Underwriters.

This is a 3-gallon type machine, made of heavy cold rolled copper and is an article that should be in every household store and factory as it has no equal for extinguishing fire. By having one of these machines handy many a fire that would otherwise spread and cause great damage would be overcome at their beginning. They are always ready to use. All that is necessary to put same in operation is to invert the extinguisher upside down and the chemical will immediately come from hose. Can be used repeatedly by recharging according to directions. A machine ever sold at anywhere near the price we ask. Weight, 20 pounds.

No. 42H5526¼ Price..... $7.

EVERY FARMER HIS OWN PUMP MA

We carry one of the most complete lines of pumps of all styles and sizes at prices (quality considered) lower than ever shown by any manufacturer or dealer. This line has been selected after very careful investigation and study, and our claims are not merely talk or empty boasts, but the facts as shown by actual tests. Our pump business has grown steadily, the result of our shipping only such pumps as we know will give the best of satisfaction. We select for your convenience, complete pump outfits for different depth wells. The prices quoted include pump, piping, cylinder, cylinder rods, everything cut and threaded complete, so that all you have to do when you receive the pump is to screw the pipes together, lay a few boards over your well for a platform, nail or bolt your pump to this platform, and the equipment is complete, ready to pump water.

THESE OUTFITS ARE VERY SIMPLE TO INSTALL. You will have no difficulty whatever in putting in any of these outfits. We are so confident of this that we guarantee to accept back any of these outfits and return the price and any freight charges you paid find that you cannot put it in so it will work perfectly.

We list two styles of pumps: Lift Pumps and Force Pumps. Lift Pumps lift the to the spout from which the water flows. Force Pumps lift and force the water at the time. If you want to force water to different places about your premises, order a Pump. Wherever water is to be lifted more than 30 feet to the cylinder, cylinder extended, as water cannot be lifted more than 30 feet to the cylinder. For work we make a charge of 5 cents a foot for cutting and threading the rod, etc. charge does not include piping. You must order enough piping to reach from the into the water in your well.

We are always pleased to furnish estimates on complete Pump Outfits. Send diagram of your well, where you want to use the water, depth of well and whether you are to lift or force water, and we will quote a price for the complete outfit. We furnish this information free and it places you under no obligation to buy anything from us.

EUREKA ANTI-FREEZING LIFT PUMP

COMPLETE WITH GALVANIZED PIPE FOR DUG OR OPEN WELLS

$4.75

IN OUR EUREKA WINDMILL LIFT PUMP we offer you an outfit suitable for dug or open wells. The prices quoted below are for pumps fitted with iron cylinder, but where the well is over 30 feet deep we recommend the use of our brass body cylinder. This is a heavy, substantial pump, and we guarantee it to give good satisfaction in wells up to 80 feet deep when the cylinder is lowered for deep wells as shown in illustration. This pump is designed for use in dug or open wells and is intended to lift and not to force water. For such a well we can guarantee this pump to be equal to any pump on the market, and we know that any one of our customers purchasing one of these outfits will be highly pleased with it. Do not hesitate to order this pump through fear you cannot set it in the well. We cut and thread the pipes and rods, and all you have to do is to screw the pipes and rods together, set it on your platform, and you are ready to pump water. We furnish this pump with a combination head and it can be used either to attach to a windmill or for pumping by hand. If, however, you desire to purchase it only for hand pumping, you can deduct 25 cents from the prices quoted below.

THE PRICES quoted below are for complete outfits, pumps, galvanized pipe, cylinder and rod all cut and threaded to the proper lengths, complete with 3x10-inch iron cylinder, which is most commonly used. If, however, you desire a large quantity of water, we can furnish a 3½-inch cylinder at 50 cents over prices quoted below.

No. 42H5100¼ Pump and outfit complete with 1¼-inch pipe for 10-foot well. Weight, 90 pounds..... **$4.75**

No. 42H5101¼ Pump and outfit complete with 1¼-inch pipe for 15-foot well. Weight, 102 pounds..... **$5.25**

No. 42H5102¼ Pump and outfit complete with 1¼-inch pipe for 20-foot well. Weight, 114 pounds..... **$5.75**

No. 42H5103¼ Pump and outfit complete with 1¼-inch pipe for 25-foot well. Weight, 126 pounds..... **$6.25**

No. 42H5104¼ Pump and outfit complete with 1¼-inch pipe for 30-foot well. Weight, 138 pounds..... **$7.50**

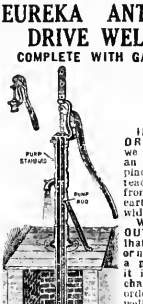
No. 42H5105¼ Pump and outfit complete with 1¼-inch pipe for 40-foot well. Weight, 174 pounds..... **$9.00**

No. 42H5106¼ Pump and outfit complete with 1¼-inch pipe for 50-foot well. Weight, 200 pounds..... **$10.50**

If a pump is wanted for wells over 50 feet deep, just state how deep the well is in which you desire to use this pump and allow 15 cents for each foot over the price quoted for the 50-foot well. For example: If your well is 75 feet deep the price of the outfit would be as follows: Cost of 50-foot well, $10.50; 25 feet extra at 15 cents a foot, $3.75; or a total of $14.25. The above prices are for pumps fitted with iron cylinders. We recommend the use of brass body cylinder. If wanted with 3x10-inch brass body cylinder instead of the iron add $1.50 to the above prices.

EUREKA ANTI-FREEZING DRIVE WELL OUTFIT

COMPLETE WITH GALVANIZED PIPES



$5.70

IN OUR EUREKA DRIVE WELL OUTFIT we offer our customers an outfit to be used in places where water is reached within 25 feet from the surface of the earth and in ground in which there is no rock. WE FURNISH THIS OUTFIT in such a way that any person, whether or not he has ever installed a pump, can easily put it in with absolutely no chance for failure. In order to install a drive well, all that is necessary to do is to dig a hole from 3 to 4 feet square and about 4 feet deep, so that the cylinder of the pump may be placed in same to avoid the pump freezing in winter time. After your hole is dug, screw the drive well point on to one of the pieces of pipe which we furnish, with a coupling, then screw the driving cap, which we furnish, on top of this pipe and drive this into the ground with a post maul. When the first length of pipe is driven down remove the cap, screw another piece of pipe on to the coupling you attach to the one already driven into the ground, and drive this into the ground. Repeat the operation as often as necessary until you have your point driven down into the water. Then screw the pipe on to the cylinder of the pump, place some manure around the cylinder of the pump in the hole from which you dug, to prevent cylinder from freezing, and you have your outfit ready for pumping. After you have pump screwed together, all that is necessary for you to do is to lay three or four pieces of plank or board over the top of your well to answer the purpose of a platform.

THE PUMP furnished with this outfit is the same as the one furnished with our dug well outfits. We furnish this pump fitted with a combination top suitable for hand or windmill pumping, but should you prefer to buy this outfit for hand pumping, with a top such as shown in the illustration, you can order it in this way and deduct 25 cents from prices quoted below.

WHILE THIS PUMP can be used for any depth well, providing you dig the hole to within 25 feet of the water, we do not recommend it for wells over 25 feet deep, nor in stony ground, but in places where the water is not more than 25 feet from the surface we guarantee this outfit to give excellent satisfaction. All that is necessary to ascertain when you have struck water is to procure a strong cord, attach a small piece of iron or lead to the end of this string, and after you have driven each piece of pipe into the ground, just drop this string into the piping, and you can then readily see after pulling the string out whether or not water has been reached.

BEFORE ORDERING THIS PUMP, all you have to do is to ask your neighbor who now has a pump how deep he was compelled to dig or drive his well before he struck water and you can order an outfit accordingly.

The following prices are for pump outfits complete with 3x10-inch iron cylinder, 3½-inch head well point, 3x10-inch iron cylinder, 1¼-inch driving cap, and enough 1¼-inch galvanized pipe to complete wells for the depths specified.

No. 42H5110¼ Pump and outfit complete with 1¼-inch pipe for 10-foot well. Weight, 96 pounds..... **$5.70**

No. 42H5111¼ Pump and outfit complete with 1¼-inch pipe for 15-foot well. Weight, 108 pounds..... **$6.25**

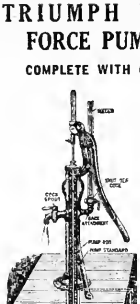
No. 42H5112¼ Pump and outfit complete with 1¼-inch pipe for 20-foot well. Weight, 120 pounds..... **$6.80**

No. 42H5113¼ Pump and outfit complete with 1¼-inch pipe for 25-foot well. Weight, 130 pounds..... **$7.20**

The above prices are for pumps furnished with iron cylinders. We recommend the use of brass body cylinders, which we furnish. If wanted, add $1.50 to the above prices.

TRIUMPH WINDMILL FORCE PUMP OUTFIT

COMPLETE WITH GALVANIZED PIPE



$9.30

WE PRESENT HEREWITH A PUMP OUTFIT which we believe will meet a growing demand in the pump line. These outfits are intended for use in wells of any depth up to 75 feet, where it is possible to put a cylinder down to within 10 feet of the water. WE FURNISH THIS OUTFIT with such simple instructions that anyone whether he has ever installed a pump or not can easily put it in his well with absolutely no chance of failure. The pump is made heavy and strong, and is especially adapted for connecting it to windmills. There is a brass cock at the spout and a brass shut off cock at the back, as shown in the illustration. Buy enough 1-inch pipe to reach from pump to tank and connect it up, as we do not include this in prices given below. When you wish to pump water into an overhead tank or to any place higher than the pump, simply turn off the cock at the spout, and the water is forced through the back pump and out through the back attachment to the place desired. This back attachment is made to connect to 1-inch pipe. When you desire to force water through the cock at the spout, turn off the shut off cock in the back attachment, and the water will run through the spout. The cock at the spout is threaded to fit ¾-inch hose, and by attaching a hose to it you have a powerful sprinkling pump.

THIS OUTFIT cannot be used in a well over 25 feet deep, unless you have an open or dug well, as the cylinder must be extended to within 10 feet of the surface of the water. Of course if your well is cased, and the casing is over 4¼ inches in diameter, the pump will admit the cylinder, which is about 4¼ inches over all, you could use this outfit, as the cylinder could be slipped down inside the casing.

REMEMBER, we cut and thread all the pipe and pump rod and furnish all connections, so that all you have to do is to connect it together and drop it into your well. The pump is furnished with a windmill head, but if you do not intend to use it in connection with a windmill, we can furnish it for hand use only, and if you wish it furnished this way you may deduct 25 cents from the prices quoted below. The prices given below are for complete outfits, and consist of pump, galvanized pipe, cylinder and rod, all cut and threaded to the proper length.

No. 42H5130¼ Pump and outfit complete with 1¼-inch pipe for 20-foot well. Weight, 125 pounds..... **$9.30**

No. 42H5131¼ Pump and outfit complete with 1¼-inch pipe for 30-foot well. Weight, 150 pounds..... **$10.75**

No. 42H5132¼ Pump and outfit complete with 1¼-inch pipe for 40-foot well. Weight, 210 pounds..... **$12.00**

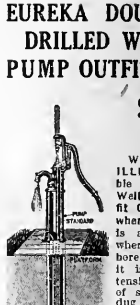
No. 42H5133¼ Pump and outfit complete with 1¼-inch pipe for 50-foot well. Weight, 240 pounds..... **$13.15**

No. 42H5134¼ Pump and outfit complete with 1¼-inch pipe for 60-foot well. Weight, 270 pounds..... **$14.50**

No. 42H5135¼ Pump and outfit complete with 1¼-inch pipe for 75-foot well. Weight, 320 pounds..... **$15.75**

If wanted with brass body cylinder, add $1.50 to above prices.

EUREKA DOUBLE ACTI DRILLED WELL FORC PUMP OUTFIT COMPLE



$13.25

WE SHOW IN T ILLUSTRATION our ble Acting Deep O Well Force Pump and fit Complete as it ap when placed in a well. is a very popular where it is necessar bore or drill a well, it is also used very tensively and with the of satisfaction in ope dug wells in depths from 75 to 150 or 200 This is the outfit used in places where strata of the earth is posed of hard substa and where it is neces to drill or bore to water instead of dig a well. These pumps made with a wind head to be attached windmills, and are so that all parts below platform will enter pass into the well co when used in drilled Fo fit a drilled well this pump it is not essary to cut off the ing as in this style p of other makes, and fore the casing may carried up close to platform, thus keeping surface water and o impurities.

IN ORDER TO STALL A DRILLED BORED WELL, we ommend that you ploy a well driller or b in your local town to this for you, and put in your casing, if desire your well to stand, and after this done, all that is neces for you to do in orde be insured of a per pumping pump is to the table below, the outfit for the d which you have, we will ship this pump you complete with piping and rods cut threaded complete with all the necessary rings which you will need to connect pump, and all that will be necessary for to do will be to screw the different pipes rods together, which any boy can do, it into your well, and you are ready pumping. This pump, as you will see by illustration, is furnished with two cylin which make it a double acting pump, we recommend this as the best pump drilled or bored wells, it is one of the best fits which we have or can furnish for deep or dug wells where a large amount of water is required. We fur this pump and outfit complete with a stre at the bottom of pipe which prevents any sticks or sediment from getting into the w of the pump, also with hose attachment spout, as this is a force pump and can used very satisfactorily for sprinkling purp This pump is equipped with a brass upper cylinder, and a brass lower cylin both of which are 2¼x12 inches and wil in 3-inch well casing.

No. 42H5120¼ Pump and outfit com with 1¼-inch pipe for 30-foot well. Weight, 172 pounds..... **$13**

No. 42H5121¼ Pump and outfit com with 1¼-inch pipe for 40-foot well. Weight, 200 pounds..... **$14**

No. 42H5122¼ Pump and outfit com with 1¼-inch pipe for 50-foot well. Weight, 230 pounds..... **$15**

No. 42H5123¼ Pump and outfit com with 1¼-inch pipe for 60-foot well. Weight, 260 pounds..... **$17**

No. 42H5124¼ Pump and outfit com with 1¼-inch pipe for 75-foot well. Weight, 300 pounds..... **$18**

The above outfits are for wells specifie the above table, but should you desire place one of these pumps in a well de than 75 feet, we make an additional ch of 15 cents per foot for each foot deeper 75 feet. For example: If your well is feet deep, an outfit for a 75-foot well w cost you $18.95, and you would add 25 at 15 cents per foot which would be plus $18.85. Total for 100-foot well, $2

WE SAVE YOU 50 TO 75 PER CENT ON GASOLINE ENGINES.

2C PITCHER SPOUT IRON PUMP

This is strictly a high grade pump for wells 20 feet deep and less. Only the best quality of material enters into the construction of them. They are made with revolving cap so the handle can be placed on either side of the pump. They are also equipped with trip valves, so that by raising the handle when through pumping the water runs out of the pump, which prevents it from freezing in winter time. Can furnish for lead or iron pipe connection. Iron pipe connection is sent unless otherwise ordered. Average weight, 25 pounds.

ACME ROTARY POWER RON FORCE PUMP $7.98

Figure 180

Our Acme Rotary Force Pump is complete with tight and loose pulleys. A perfect protection in case of fire, as it will force water 200 feet and throw a solid stream 50 feet

ater 30 feet. It is an excellent pump for actories, creameries or for any building where ater power can be had. It will give the best atisfaction for irrigation purposes. The driving shaft is made long enough to allow the se of a balance wheel with handle on the nd of it, so that pump may be worked by and in case engine should be out of order. The spout is threaded for iron pipe at the end nd also at the top where it connects to pump. hese pumps can be run at a speed of 200 evolutions per minute without injury, although we recommend running them at about 00 revolutions. A pump of this size should ot be placed more than 20 feet from the ater to work successfully. If wanted with oalance wheel and handle for hand power, alow $2.50 in addition to prices below. We uarantee these pumps to do just what we ay they will do, but cannot advise their use for pumping acids or hot liquids. The second olumn of figures in the table gives the caacity per minute when pump is running at a peed of 100 revolutions. Pump comes complete, as illustrated, but without pulleys or belting. For pipe see page 1177. Nos. 42H5710¼ and 42H5711¼. Weight, 75 to 150 pounds.

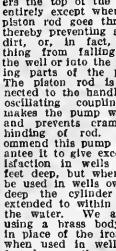
OUR ANTI-FREEZING IRON LIFT PUMP $2.58

A lift pump with 6-inch stroke, which is adapted for wells not over 30 feet deep. The pump has a revolving top, so that handle may be turned to any side while pumping. The 4-foot piece of pipe which connects the cylinder to pump screws into the pump at spout, thus creating an air space between pump and cylinder, which prevents water from freezing in cold weather. The cylinder is made of iron, bored true and polished, 10 inches long and tapped to take 1¼-inch pipe. While this is an excellent pump and gives entire satisfaction for wells up to 30 feet in depth, we believe, for the small difference in cost, our customers will obtain a much better bargain by procuring our No. 42H5264¼ or No. 42H5266¼ pump. When ordering this pump remember we furnish 4 feet of pipe, as shown in illustration, to reach from platform to cylinder, so if your well is 25 feet deep you need only order 21 feet of pipe to complete your outfit. We list pipe on page 1177 of this catalog under Nos. 42H5710¼ and 42H5711¼. Average weight is 62 pounds.

	Price
No. 42H5256¼ 2½-inch cylinder for 1¼-inch pipe	$2.58
2½-inch cylinder for 1¼-inch pipe	2.60
3½-inch cylinder for 1¼-inch pipe	3.25
4-inch cylinder for 1¼-inch pipe	3.74

TRIUMPH HAND ANTI-FREEZING IRON LIFT PUMP $3.64



This pump has a heavy revolving cap which allows the handle to be swung to any side of the pump desired by the one pumping. This cap covers the top of the pump entirely except where the piston rod goes through, thereby preventing sticks, dirt, or, in fact, anything from falling into the well or into the working parts of the pump. The piston rod is connected to the handle with an oscillating coupling, which makes the pump work easily and prevents cramping and binding of rod. We recommend this pump and guarantee it to give excellent satisfaction in wells up to 30 feet deep, but where it is to be used in wells over 30 feet deep the cylinder must be extended to within 10 feet of the water. We advise not using a brass body cylinder in place of the iron cylinder when used in wells over 30 feet deep, as they work easier and last longer, for which we charge $1.50 in addition to the prices quoted below. See example for ordering under No. 42H5310¾ if well is over 30 feet deep. The pump is furnished complete with 4 feet of pipe and rod and 10-inch cylinder, either 3 or 3½ inches in diameter, at prices stated below. Average weight of these pumps is 70 pounds.

No. 42H5264¼ 3-inch cylinder for 1¼-inch pipe. Price	$3.64
No. 42H5266¼ 3½-inch cylinder for 1¼-inch pipe. Price	3.98

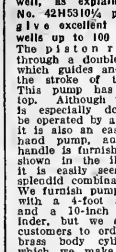
OUR IMPROVED EXTRA HEAVY LIFT PUMP FOR FEET YARDS AND HEAVY WORK $4.40

Figure 75

Our extra heavy 6-inch stroke hand lift pump, which is especially designed for stock and feeding yards where large quantities of water are needed. The distance from bottom of cylinder to flange on pump is 4 feet. The pump is made throughout of heavy material. The cylinder is heavy and strong and capable of lifting large quantities of water. For wells up to and including 30 feet in depth, the cylinder need not be extended. All that is necessary to do is to order enough 1¼-inch pipe to reach from cylinder to bottom of well. If well is over 30 feet deep order sufficient 1½-inch pipe to reach to the bottom; also allow for enough 1¼-inch pipe to extend cylinder to within 10 feet of the surface of the water at 6 cents a foot. See how to order pipe and rod in cases of this kind as explained under No. 42H5310¾. We can furnish these pumps fitted with brass body cylinder at an extra cost over prices given below of $1.50 on the No. 42H5285¼ and $1.80 on the No. 42H5286¾. Average weight, about 80 pounds.

No. 42H5285¼ 3½-inch cylinder, fitted for 1¼-inch pipe	$4.40
No. 42H5286¼ 4-inch cylinder, fitted for 1½-inch pipe	4.55

TRIUMPH WINDMILL ANTI-FREEZING IRON LIFT PUMP $3.98



Our windmill pump with 6-inch stroke, which, when cylinder is extended into well, as explained under No. 42H5310¾ pump, will give excellent results in wells up to 100 feet deep. The piston rod works through a double fulcrum, which guides and steadies the stroke of the pump. This pump has a closed top. Although this pump is especially designed to be operated by a windmill it is also an easy working hand pump, and as the handle is furnished just as shown in the illustration, it is easily seen what a splendid combination it is. We furnish pump complete with a 4-foot set length and a 10-inch iron cylinder, but we advise our customers to order it with brass body cylinder, for which we make an extra charge of $1.50 over prices given below. It is necessary to have this cylinder extended when used in wells over 30 feet deep, as explained under No. 42H5310¾. Average weight, is about 75 pounds.

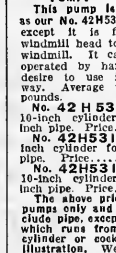
No. 42H5276¼ 3-inch cylinder for 1¼-inch pipe. Price	$3.98
No. 42H5278¼ 3½-inch cylinder for 1¼-inch pipe. Price	4.30

TRIUMPH HEAVY HAND IRON FORCE PUMPS - - - $4.90

Our 6-inch stroke heavy hand force pump. It is complete with a 10-inch iron cylinder and a 4-foot set length of wrought iron pipe. The spout is a plain round one furnished with a shut off clevis attached to it, so that the water may be shut off at spout and forced through the back of the pump to tank or other places on the premises. We also furnish a hose clevis, so that ¾-inch hose may be attached to spout for sprinkling purposes, washing buggies, etc. We can furnish with this pump a cock at spout, which can be turned off or on by turning a lever at spout, for $1.00 in addition to prices quoted below. The shut off cock is also threaded at spout, to which ¾-inch hose may be attached. We can also furnish it with back attachment, see illustration No. 42H5310¾ below, consisting of nipples, pipe and brass lever shut off, for $1.10 extra. The pump just as shown in illustration is suitable for pumping water if well is 30 feet deep or under, and all that is needed in addition to pump is enough 1¼-inch pipe to reach from cylinder to bottom of well, but if well is over 30 feet deep order cylinder extended and pipe as explained under No. 42H5310¾. Average weight, about 80 pounds.

No. 42H5301¼ 2½-inch cylinder for 1¼-inch pipe. Price	$4.90
No. 42H5302¼ 3-inch cylinder for 1¼-inch pipe. Price	5.00
No. 42H5303¼ 3½-inch cylinder for 1¼-inch pipe. Price	5.05

TRIUMPH WINDMILL FORCE PUMP. $5.75



This pump is the same as our No. 42H5301¼ pump, except it is fitted with windmill head to attach to windmill. It can also be operated by hand if you desire to use it in this way. Average weight, 90 pounds.

No. 42H5310¼ 2½x 10-inch cylinder for 1¼-inch pipe. Price	$5.75
No. 42H5312¼ 3x6-inch cylinder for 1¼-inch pipe. Price	$5.90
No. 42H5314¼ 3½x 10-inch cylinder for 1¼-inch pipe. Price	$6.10

The above prices are for pumps only and do not include pipe, rods or feet which runs from pump to cylinder or cock shown in illustration. We can furnish cock at spout, and back attachment at the same price as quoted under No. 42H5301¼ if your well is over 25 feet deep you must have your cylinder extended, as explained below.

We give herewith an example showing how to order pipe, rod, etc., for a well 50 feet deep, so if your well is deeper all you have to do is to order more pipe and rod in proportion, and if it is not so deep order less.

EXAMPLE:

	Price
No. 42H5264¼ 3-inch cylinder	$3.64
No. 42H5711¼ 46 feet 1¼-inch galvanized pipe at 7¾ cents a foot	3.57
Socket, 36 feet extending cylinder at 5 cents a foot	1.80
Total	$9.01

DOUBLE ACTING IRON FORCE PUMP WITH THREE-WAY COCK - $10.27

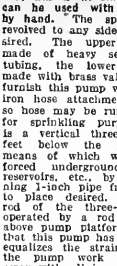


Figure 100

It has a windmill head and can be used with windmill or by hand. The spout may be revolved to any side of pump desired. The upper cylinder is made of heavy seamless brass tubing, the lower cylinder is made with brass valve seats. We furnish this pump with malleable iron hose attachment for spout, so hose may be run from pump for sprinkling purposes. There is a vertical three-way cock 3 feet below the platform, by means of which water may be forced underground to tanks, reservoirs, etc., by simply running 1-inch pipe from this cock to place desired. The shutoff rod of the three-way cock is operated by a short iron brackets above pump platform. The fact that this pump has two cylinders equalizes the strain and makes the pump work easily, doing away with all jars or jolts. The downward stroke of the handle causes only one-half of the water in the cylinder to discharge, the other half being discharged by the upward stroke, creating a steady flow of water from the spout. We guarantee this pump to give perfect satisfaction in wells up to 150 feet deep, but in wells more than 30 feet in depth the lower cylinder must be extended to within 10 feet of the water. See example under No. 42H5310¾ to extend cylinder and all you need besides. Nos. 42H5323¼ and 42H5324¼ are fitted for 1¼-inch pipe. Nos. 42H5325¼ is fitted for 1½-inch pipe. Average weight of these pumps is 105 pounds.

No. 42H5323¼ With 2½-in. cylinder	$10.27
No. 42H5324¼ With 3 -in. cylinder	10.40
No. 42H5325¼ With 3½-in. cylinder	10.67

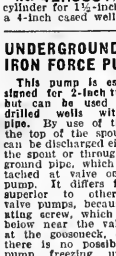
DOUBLE ACTING DRILLED WELL FORCE PUMP - $9.63

This pump is adapted for drilled wells of small bore of any depth, equipped with windmill head and constructed so that all parts below the platform will enter and pass into the casing or drilled hole. To equip a drilled well with this pump it is not necessary to cut off the casing, and therefore the casing may be carried up close to the platform, thus keeping out surface water and other impurities. It is equally satisfactory in open or dug wells, and is a strictly high grade, satisfactory pump. The upper cylinder is brass lined, the lower cylinder has brass body. Pump is equipped with strainer hose attachment without additional charge. Owing to its double acting cylinder this pump operates very easily by hand and may be used as a hand force pump as well as a windmill pump.

In ordering this pump for a deep well the lower cylinder should be dropped to within 10 feet of the bottom of the well. See example under No. 42H5310¾. Average weight, 125 pounds.

No. 42H5332¼ 2½ - inch brass cylinder for 1¼-inch pipe, with pump into a 3-inch cased well. Price	$9.63
No. 42H5333¼ 3-inch brass cylinder for 1¼-inch pipe. With go into a 3½-inch cased well. Price	9.75
No. 42H5334¼ 3½ - inch brass cylinder for 1¼-inch pipe. Will go into a 4-inch cased well. Price	10.30

UNDERGROUND VALVE IRON FORCE PUMP - $7.90



This pump is especially designed for 2-inch tubular wells, but can be used in open or drilled wells of 1½-inch pipe. By use of the wheel in the top of the spout the water can be discharged either through the spout or through an underground pipe, which may be attached at valve on bottom of pump. It differs from and is superior to the ordinary screw-way valve pumps, because the operating screw, which is brass, is below near the valve and not at the gooseneck, consequently there is no possibility of the pump freezing up in cold weather. The pipe at the right forms the air chamber. When this pump is used for tubular wells it is made with a cap at the stuffing box, which, when unscrewed, leaves an opening large enough to pull the plunger up through without disconnecting the pipe or moving the pump. The pump is threaded for 2-inch pipe, but may be bushed to take as small as 1-inch. The discharge is fitted for 1-inch pipe and the gooseneck is fitted with a clevis for ¾-inch hose. Prices stated below are for pump only and do not include any pipe, cylinder or rod. For pipe see No. 42H5710¾ and 42H5711¼, and for rod see No. 42H5630. Cylinders are listed under Nos. 42H5528¼ to 42H5552¼. Average weight is 120 pounds.

No. 42H5352¼ 6-in. stroke. Price	$7.90
No. 42H5353¼ 10-in. stroke. Price	8.35

EXTRA HEAVY WINDMILL IRON LIFT PUMP STANDARD - $3.11

This is a lift pump only and cannot be used for forming water. If a force pump is wanted, order No. 42H5317¾ or No. 42H5351¾. This standard is very satisfactory if used in pumping water for stock or feed yards. It is much heavier than our common windmill pump and the spout is higher from the platform. The size pipe ordinarily used with it is 2 inches, but we can furnish it for 1¼-inch or 1¼-inch pipe. Prices given below do not include pipe, cylinder or rod, which you must have to make a complete outfit. For pipe see No. 42H5710¾ and No. 42H5711¾; and for cylinders see Nos. 42H5528¾ to 42H5552¾. The rod is listed under No. 42H5630.

Average shipping wt., 75 pounds.

No. 42H5349¼ 6-inch stroke...**$3.**
No. 42H5349¾ 10-inch stroke...**3.57**

EXAMPLE—If you desire an outfit for a 40-foot well, select the pump you want, either No. 42H5349¼ or 42H5349¾, then include with this 40 feet of 2-inch pipe if you wish to use a 4-inch, or 40 feet of 1¼-inch pipe with 3¼-inch cylinder, or 40 feet of 1¼-inch pipe if any smaller size cylinder than 3¼ inches is to be used. Select the kind of cylinder wanted and allow for extending the cylinder 30 feet, at 5 cents per foot, or $1.50.

HEAVY ACME IMPROVED WINDMILL IRON FORCE PUMP STANDARDS - - $3.96

This Standard is equipped with a brass stuffing box and the piston rod works through a special bushing which presents it from wearing out easily. There is a threaded outlet directly back of spout on the barrel of the pump into which 1-inch pipe may be screwed. This pipe may be run to a tank or reservoir and water forced through it to some by attaching the shut off cleats which we furnish on the spout. This is a very much heavier standard than the ordinary pump is equipped with and is especially designed for deep wells. Prices quoted are for standard alone and do not include pipe, cylinder or rod, and it cannot be used without these parts. For pipe see Nos. 42H5710¾ and 42H5711¾; for cylinders see Nos. 42H5528¾ to 42H5552¾; and for pump rods to be used in extending cylinder see No. 42H5630. For an example as to how to order an outfit of this kind we refer you to No. 42H5349¼ on this page. Average shipping weight is 80 pounds.

No. 42H5347¼ 6-inch stroke for pipes 1¼-inch pipe. Price.....**$3.96**

No. 42H5351¾ 10-inch stroke for 2-inch pipe. Price.....**4.30**

EXTRA—If a hack attachment is wanted, such as is shown and described under No. 42H5310¾, allow $1.10 additional to prices given above, and if a shut off cock at spout is desired, allow $1.00 in addition to prices above.

WOOD FARM PUMPS - - $2.48

Made from the best selected stock; thoroughly painted, striped and varnished and furnished with iron handle brackets and iron spouts. The plunger, which is the vital part of a suction pump, is of the very latest improved pattern. Our wood pumps are adapted for wells not more than 30 feet deep. If well is of greater depth, we recommend that you select one of our iron pumps as described on page 1175 and on this page. Besides the pump, order enough tubing of size to match pump to reach from the bottom of pump to bottom of well. Tubing comes in lengths of 12 feet or less. When more than 12 feet of tubing will be required to reach to the bottom of the well order coupling for each joint to connect the tubing. Average shipping weight, about 55 pounds. Outside measure, 6x6 inches.

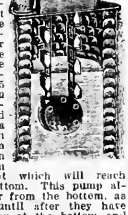
PERFECT IMPROVED PURIFYING PUMP - $4.35



Simplest pump construction in the world for raising water and at the same time purifying it. It is adjustable to any well or cistern. It is of very durable construction and materials; operates with no endless chain made from the best of galvanized wire. We do not recommend them for use in wells or cisterns beyond 30 feet deep. For wells of greater depth we urge you to purchase one of our iron pumps as described on page 1175 and on this page. You will note by the illustration that buckets and chain run through a bearing which hangs in the water at the bottom of the well, and in ordering this pump you should order equipment which will reach within 2 feet of the bottom. This pump always furnishes the water from the bottom, as no water enters cups until after they have passed under the bearing at the bottom and begun the upward movement, when the air escapes and they are filled with the best and the coldest water. The pump comes complete with chain, cups, lower bearing, ready to be placed in wells of different depths, as indicated in price list below. Furnished with either steel or wood curb. Average weight, about 75 pounds.

	Wood Curb	Steel Curb
No. 42H5442¼	Price for 10-ft. well	$4.35	$ 6.45

No. 42H5461¼	Price for 30-ft. well	7.95	10.30
No. 42H5443¼	Extra Galvanized Buckets and Chain. Price, per foot		9c

TRIUMPH WINDMILL REGULATOR PUMPS WITH UNDERGROUND VALVE - $12.70

This pump is especially designed for use in connection with a windmill, and will automatically keep the water in an elevated storage tank, or a pneumatic tank, at any height or pressure that may be desired. The pump is substantially built throughout, the regulating cylinder being made of seamless brass tubing, while the remainder of the pump is made of the best grade of gray cast iron, with the exception of the stuffing box nut, rod, etc., which are manufactured from first quality brass. This pump not only raises the water to any point desired, but pulls the windmill out of gear when the tank is full, and holds it in this position until the water is lowered, when the regulating device automatically throws the mill back into gear to resume pumping until the tank is again filled. This pump will prevent tank from overflowing, and at the same time keep it full without any attention whatever; also prevents undue wear to the windmill and pump. By means of the weight and lever the mill can be thrown out of gear when any pressure in the tanks, or any height of water that may be desired, is obtained. This pump may be operated either by windmill or hand power and the water can be piped to a tank from the underground valve or led through the spout at the top by simply operating the three-way cock. Approximate weight, 160 pounds.

No. 42H5354¼ Price, complete, with 2¼-inch iron cylinder.....**12.70**
No. 42H5355¾ Price, complete, with 3-inch iron cylinder.....**15.50**

A brass body cylinder is wanted in place of iron cylinder listed, add $1.50 to above prices.

OUR NEW ACME TANK PUMP, $5.25

This pump is made on entirely new principles, the cylindee being placed in a horizontal position, which gives great strength and simplicity. It is strictly a double acting pump, sucking water at each stroke of the piston. Cylinders 5 inches in diameter, with a 5-inch stroke. Openings are 2 inches in size for both suction and discharge and have an extra connection for the discharge pipe, so that 1-inch hose may be used if desired, which is of great advantage for sprinkling or fire protecting purposes. The spout is attached to the top of the pump and is reversible and so arranged that the largest pail will fit under the spout, thus avoiding the use of lead hose when a pail of water is wanted. It has a capacity of two barrels a minute, and will force water 60 feet. It is equipped with brass valve seats, and we can guarantee it to be the equal of any pump of this style ever placed on the market. There are tank pumps on the market sold at lower prices than ours, but, quality considered this is by far the cheapest pump to buy. Weight, about 90 pounds.

THIS STRAINER FREE.

No. 42H5386¼ Price, complete, as shown in illustration. No hose.....**$5.25**

No. 42H5657 5-Inch Crimped Plunger Leathers for above pump.
Price, per set of two....**56c**

No. 42H5389¼ Pump complete with 20 feet 2-inch suction hose. Price.....**$9.85**

Standard Suction Hose, to be Used With Above Pump.

Very strong and heavy.

With smooth bore to reduce friction, inserted spring steel wire to prevent collapsing and enlarged ends to fit over pump connection. Sold in 10, 15, 20 and 25-foot pieces only. Size inside, 2 inches. Weight, per foot, 1 pound. Requires 2¼-inch clamp.

No. 42H5391¼ Standard Grade. As illustrated. Thick walls, good quality rubber and duck. Best hose made for the price.
Price, per foot.....23c

No. 42H5390¼ Extra Grade. Green braided cotton cover. Equal to the best grades sold by others.
Price, per foot.....34c

No. 42H5398¾ Special Grade. Heavy woven red cotton cover. Finest rubber, best duck. Will stand more hard usage and outlast any other suction hose made.
Price, per foot.....39c

Cast Strainer for Suction Hose.

Prevents trash, etc., from entering pump. 2 inches long with 2-inch neck. Weight, 2 pounds.
No. 42H5396 Price.....29o

Chain Pump Buckets.

No. 42H5477 Rubber Buckets, for chain pump. Weight, 1½ ounces.
Price, each.....5o
Per dozen.....50o

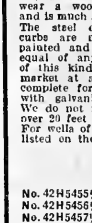
Galvanized Pump Chain.

No. 42H5478 Extra Chain for above pumps. Weight, per foot, 4 ounces.
Price, per foot.....2½c

2¼-Inch Patent Hose Clamp for Suction Hose.

Has nut to tighten or release clamp. Extra strong and heavy. The best tank hose clamp made. Weight, 6 ounces.
No. 42H5393 Price..9o

Chain Pump Tubing.



No. 42H5483¼ Our Chain Pump Tubi as shown in the illustration, comes in pie from 4 to 7 feet and is made of kiln dr wood with bore of 1⅝ inches. It is desigr for use in connection with our wood chain pumps and is offered you at a low price. Weight, about 2 pounds per fo

INVINCIBLE RUBBER BUCKET PUMP - $2.4

These pumps are so well known that a lengthy description is unnecessary. We furnish them in two styles, the wood curb with wood tubing the curb and tubing being made of the best selected stock for this purpose), and steel curb and steel tubing. The steel curb is made of 14-gauge galvanized sheet steel and is the one we recommend to our customers, as it will outwear a wood pump and is much stronger. The steel or wood curbs are nicely painted and are the equal of any pumps of this kind on the market at any price. Pumps are furnish complete for the depth wells specified bel with galvanized chain, rubber buckets, We do not recommend these pumps for we over 20 feet deep. Average weight, 60 pounn For wells of greater depth see our iron pum listed on these pages.

HYDRAULIC RAM, $4.80

The Acme Hydraulic Ram is used to elevate water to a h tank or reservoir or to force water a long distance from the sou of supply. Set this pump below a spring or stream of water a distance of from 25 to 50 feet. Place the ram 1 foot below level of the spring for every 10 feet that you desire to elevate water. Bear in mind that the ram only lifts about one-seventh the water which runs into it, even under the most favorable conditions, the balance of water runs out of the ram at the valve the operation of lifting and is, of course, wasted. Determine table shown below which ram you will need. Order enough for your purpose, prices of which will be found under N 42H5710¼ and 42H5711¾ on page 1177. All you have to do is connect the supply or feed pipe to ram and place one end in spring. Connect the discharge pipe to the other eldo of ram run it to the tank into which you wish the water to empty. further information we will send upon request our Hydraulic R Circular more fully describing ram.

Foot Valves.

his is a Combination Foot ve and Strainer. It is to be wed on the end of the pipe the bottom of the well and prevent anything from ering the pipe to choke the es of the cylinders. It is act as a check valve, ping the pipe full of water the time, making prim- unnecessary. It is a time saver and at its price every well should be equipped with It is made in three sizes, as follows:

42H5670	For 1¼-in. pipe.	Price.24c
42H5671	For 1½-in. pipe.	Price.30c
42H5672	For 2 -in. pipe.	Price.40c

Drive Well Points.

Made of wrought iron pipe, galvanized inside and out after the holes are punched. They are covered with brass ganze, and gauze is covered and protected by a perforated brass jacket. No. 60 gauze is most commonly used. No. 100 gauze is for quicksand. Either flush point for tubular wells or with cast head for driving. Be sure to state which is wanted.

Iron and Brass Body Pump Cylinders.

By means of the cylinder water is raised, and unless the cylinder is well made good results can be obtained. A good cylinder must be bored true and plunger must fit accurately. Valves must be simple and durable. The cost of repairing a cylinder is usually more than its first cost, so it pays to get the best. Our cylinders are the best that skilled workmen can produce and our prices as low as equally well made goods can be sold for. Cylinders 2 inches in diameter are fitted for 1-inch pipe. Cylinders 3½ inches in diameter are fitted for 1½-inch pipe. Cylinders 4 inches in diameter are fitted for 2-inch pipe. All cylinders fitted for 1¼-inch pipe. We can furnish these cylinders in iron or brass body. The brass body will outwear two of the iron cylinders. Therefore we recommend them.

IRON BODY CYLINDERS.

No.	Diam., inch	10 In. Long	12 In. Long	16 In. Long

Price, 1½-inch pipe	.25c

Tubular Well Cylinders.

These cylinders are designed to be dropped down into pipe of the sizes we list below. The tubular cylinder has many advantages over the common cylinder, a few of its fine points we give here. It is made with shoulders or caps and this enables it to be slipped into pipe and set at any desired distance. This also makes it easy to remove it for repairing purposes or to take it up out of one well or place it in another. The only tool required is the seating tool listed below and enough 1-inch pipe for lower seating tool to place where cylinder is to be placed. The body is made of seamless drawn brass tubing with brass valves, which last longer than iron cylinders. Stroke, 12 inches. Not made smaller than 2 inches.

Radiant Acetylene Gas Plan

SAFE, ECONOMICAL, EFFICIENT, ACKNOWLEDGED THE BEST SUBSTITUTE FOR SUNLIGHT.

Did you ever stop to realize what a gas plant in your own home would mean to you? Ever realize the convenience of just striking a match at any hour of the night, turning on the gas and having your room filled with light—not such light as is given by a kerosene oil lamp, but with a beautiful white light which brightens every nook and corner in your room? Acetylene gas can also be used for cooking with excellent satisfaction.

Up to this time we have avoided the question of acetylene lighting as we were unable to procure a machine which we could with safety recommend to our customers, because other machines were found to necessitate the placing of the generator in the basement, a plan in which there is always more or less danger. But our Radiant outfits eliminate all possible danger because our generator is buried in the yard, away from the house; and we therefore most highly recommend it.

We are so confident that you will be more than pleased with a Radiant outfit when installed that we are selling them under the following guarantee: You can install this outfit at your home, use it for sixty days, and if by that time you are not perfectly satisfied with it in every way, you can return it to us at our expense and we will return you the purchase price, together with all freight charges you paid.

OUR ACETYLENE GAS LIGHTING PAMPHLET AND ESTIMATES FREE.

If interested in Acetylene gas lighting, kindly write us for our Acetylene Gas Lighting Pamphlet, which also shows fixtures, gas ranges, plates. Give us a rough sketch of your house, showing the numbe rooms and height of the ceilings and about where you would like to the fixtures placed. Also give us a general idea of what kind of fixt you desire and we will be glad to make up an estimate, showing ex what the outfit will cost you complete. This will not put you under obligation to buy.

THE EVER READY PNEUMATIC WATE

YOUR OWN WATERWORKS.

SUPPLY OUTFIT

A RELIABLE FIRE PROTECTIO

Great Boon to Country Homes. Provides Running Water, Hot or Cold, for Your Kitchen or Bathroom or Anywhere on Y Premises. Protection Against Fire. Simple in Construction, Easy to Install, Easy to Operate, Low in Price

$42.00 AND UP

Our Pneumatic Water Supply Outfit brings you all the conveniences of a city waterworks system. Water in the kitchen, for the bathroom or anywhere in any of your buildings.

Our Ever Ready Pneumatic Water Supply Outfit as shown in this illustration is the system we recommend to our customers where the outfit is to be operated by hand, and a small quantity of water (not over 160 gallons per day) is required. This system will draw water from a well or cistern where the surface of the water is not a greater distance than 25 feet below the pump. The outfit consists of the following material, and is all ready to set up and use.

One 30-inch by 6-foot vertical pneumatic tank, total capacity of 220 gallons, and a working capacity of 160 gallons.

One special horizontal double acting force pump with 3-inch brass lined cylinder and hydro-pneumatic cylinder attached.

One water gauge complete.

One pressure gauge registering up to 100 pounds.

One 1-inch check valve.
One 1-inch gate valve.
One ¾-inch stock and waste cock.
One ½-inch hose bibb. (All pipe and fittings cut and threaded, as shown in the illustration.) One working blue print. One set of instructions.

No. 42H2044½ Ever Ready Pneumatic Water Supply Outfit, as described above, complete with 30-inch by 6-foot tank. Price..... **$47.50**

No. 42H2043½ Ever Ready Pneumatic Water Supply Outfit, same as described above, complete with 24-inch by 6-foot tank; total capacity, 140 gallons; working capacity, 100 gallons. Price..... **42.00**

No. 42H2046½ Ever Ready Pneumatic Water Supply Outfit, as described above, complete with 30-inch by 6-foot tank; total capacity 315 gallons; working capacity, 225 gallons. Price..... **57.00**

The Ever Ready Pneumatic Water Supply Outfit is certainly a boon to residents of the smaller cities who have heretofore been compelled to depend on the attic tank for their supply of water. The unhealthy condition of the water after it had stood for a week in a rusty tank was a source of endless danger to the health of the family, while the supply of water was limited, and no end of trouble experienced in keeping the tank filled and in running order. There being no pressure in the tank, people realized they had no means of fighting fire, and that their homes were in constant danger of destruction. Little wonder then that the Ever Ready Pneumatic Water Supply Outfit was enthusiastically received and has met with a tremendous sale. With the installation of the Pneumatic Outfit you have a complete waterworks system of your own. Modern plumbing fixtures may be installed and an abundant supply of pure running water provided at the kitchen sink, the lavatory and the bath tub, affording splendid convenience in the home, together with the pleasure and benefits of an invigorating bath after your day's work is done. Water can also be supplied in the barn yard for your horses and cattle; your lawn may be properly sprinkled, buggies washed and other needs nicely provided for. Absolute protection from fire is afforded by the Ever Ready. You will have on an average 30 to 50 pounds pressure in the tank, which is sufficient to throw a strong stream of water with a hose, high over any ordinary country or village home. Notwithstanding the benefits and comforts to be derived from such a system, the cost is comparatively small. A complete outfit, including every necessary item, will cost only from $42.00 up, depending on the size.

The Ever Ready System is very simple in construction, consisting merely of an airtight, very substantially built tank, a pump, so constructed that either water only, or air and water can be forced into the tank, and the necessary valves, fittings, gauges, etc., that go to make up the complete outfit. When water is pumped into the tank (about ten minutes' work in the morning will furnish the day's supply) it forces the air up to the top and as air is readily compressed, a large quantity can be forced into a small space. By pumping water into the tank until it is about two-thirds full you will have a pressure on the system of from 15 to 20 pounds. As water is drawn from the system, the air expands and gradually forces the water out through the discharge pipe. By pumping air into the tank with the water, any pressure that may be desired can be obtained. As a column of water 27 inches high is equal to 1 pound pressure, you will be able to draw water from faucets located on the second floor, say 20 feet above the pneumatic water tank, when the gauge of the tank registers between 10 and 12 pounds.

We sell a large number of systems every year, and are thereby able to reduce the factory cost to the minimum. We add but one small profit to the actual manufacturing cost, and you will consequently find our prices on all these outfits exceptionally low. If you are interested in this modern up to date water supply system, write for our Special Plumbing Goods Catalog. Also advise us as to the approximate amount of water you will use per day, and of how many members your family consists; also tell us whether the source of supply is a well, cistern, or spring, and if a well, the distance from the surface of the ground to the surface of the water, the total depth of the well, and its diameter. With this information we will be able to send you an itemized estimate of the cost, together with complete information regarding the outfit that will give you the best results. Our experts will give your letter their immediate attention, and a complete estimate and specifications will be sent to you by return mail.

With every Ever Ready Pneumatic Water Supply Outfit we furnish a one-year guarantee, which protects you against defects, poor workmanship, or inferior material, and also guarantees the outfit to give perfect satisfaction. **Write for our Special Plumbing Goods Catalog.** A postal will bring it.

CERTIFICATE OF GUARANTEE.

crease Your Crops by Spraying

Your Fruits and Vegetables

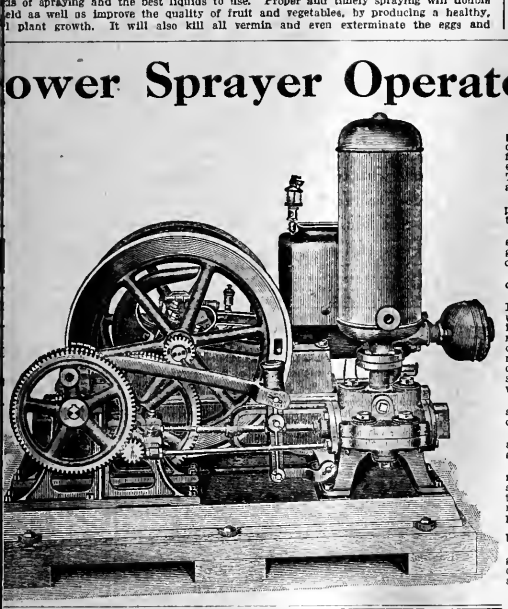
ORDER FROM THIS PAGE, OR WRITE FOR OUR SPRAYING MACHINE CATALOG

ue value of sprayers in the extermination of deadly plant vermin and the preventing ure of black rust, fungus growth and other diseases of plants, has been proven d doubt by investigation and experiments by government experts during the past ars. The results of their investigation, besides a vast amount of other information ing plant diseases and pests and their destruction by spraying, are published in our ng Machine Catalog, a copy of which we shall be pleased to send you if you are interested in the subject of spraying. The ravages of disease and vermin had ly decreased the yield, as well as destroyed the trees and plants themselves, before t was aroused and scientific tests made which have developed the most practical ds of spraying and the best liquids to use. Proper and timely spraying will double eld as well as improve the quality of fruit and vegetables, by producing a healthy, l plant growth. It will also kill all vermin and even exterminate the eggs and larva before they reach a harmful stage, and has proven very successful in the prevention and treatment of disease.

In these pages we illustrate and describe a few of the sprayers we handle, any one of which will be found perfectly satisfactory for the work intended. If you are interested in the subject of spraying, we advise you to write for our Special Spraying Machine Catalog, which contains a complete line of power and field sprayers, together with full instructions on spraying, when it should be done and what solution to use to exterminate the various insects, etc. The catalog is free for the asking, and will be found a valuable book of reference on the subject of spraying.

For a complete line of Power and Field Spraying Outfits send for our Spraying Machine Catalog.

ower Sprayer Operated by Gasoline Engine



This Power Sprayer outfit includes our Acme Double Acting Spray Pump mounted complete with 2-horse power gasoline engine. A substantial, powerful, reliable and highly efficient equipment for all spraying purposes. After having given this outfit an unbiased and fair trial, we are confident you will pronounce it the peer of any spraying outfit you have ever used or ever heard of. This, perhaps, to you sounds like a pretty broad assertion. To prove this assertion and as evidence of the explicit confidence we have in **your judgment and our pump,** let us ship the outfit to you on an unconditional **ten-day trial.**

GASOLINE ENGINE. Our Economy Gasoline Engine is thoroughly described on page 1184. Capacity, 2-horse power. Style, stationary. Iron base. Hopper cooled, self contained galvanized tank. 6x4-inch plain pulley. **Guaranteed.**

PUMP. Designed, constructed, tested and guaranteed for spraying purposes. No expense has been spared to make this pump the very best in the market. Capacity, 5 gallons per minute, or capable of supplying from two to four leads of hose with single or combination nozzles.

Only the very best grade of materials are used in the construction of this pump and connections. Strong and smooth gray iron castings, and best quality No. 1 brass.

CYLINDER. Is 2½ inches in diameter and of correct length to give a 4-inch stroke. Is fitted with seamless drawn brass lining securely inserted and easily removed by simply unscrewing, and can thus be replaced by a new lining. This is an essential feature, as the insoluble substance in the different spraying solutions acts on the lining and makes replacement necessary. Suction openings are provided at both sides of pump underneath the cylinder. Discharge can be taken out at either side of air chamber. This arrangement makes it possible to make connections from the same side of pump or from both sides as conditions may require. The heads attach to flange on cylinder with four ⅝-inch cap screws. The joints are perfectly tight, both the flange and heads being faced and fitted with rubber gaskets.

VALVES. The four valves are entirely of brass, ground on to brass valve seats in separate boxes and in pairs, one set elevated to retain prime. All valves are accessible and can be easily removed by unscrewing caps.

PLUNGER. Consists of three cast iron followers machined to fit the cylinder accurately, and are equipped with a special high grade hot water packing. Is attached to brass covered piston rod operating through brass stuffing nut in head.

PRESSURE GAUGE. A pressure gauge is fitted to the discharge pipe, as is also a relief valve. This valve can be adjusted to any desired pressure, as indicated on the pressure gauge, and when the pressure in the pipe reaches the point for which the valve is set the valve opens and allows the liquid to flow back to the supply. This safety device eliminates any possible chance for damage which might otherwise result to either the hose or pump.

FULCRUM HEAD. Serves as a guide for piston rod, preventing friction in the stuffing box and consequent wear.

DROP FORGED CRANK SHAFT. Suitable babbitted box bearings support shafts for gears. Pitman bar connecting crank shaft with plston of pump can be released and pump operated by hand with lever provided for that purpose. Pump can be removed from skid, as can also the engine, by simply loosening lag bolts in base.

Pump tested under 250 pounds pressure. Safe working pressure, 200 pounds.

Increase Your Crops by Irrigation

LET OUR IRRIGATION EXPERTS TELL YOU WHAT YOU NEED. INFORMATION ABSOLUTELY FREE.

Did you ever stop to think how much your success as a farmer depends on the moisture the soil gets? Do you know that some of the dryest and most arid districts in the Southwestern states are now producing splendid crops year after year because they are properly irrigated?

Crop growing by irrigation has made wonderful strides in the past few years and will make still further progress in the future. It is hardly necessary for us to advance any arguments in favor of irrigation, as we believe every farmer knows that his crop yield depends to a great extent on the amount of moisture his land gets.

Methods of irrigation have been discussed pro and con and there are several different ways of securing the same results and we believe that the majority of farmers are hesitating to install an irrigating outfit, not because they don't appreciate its advantages, but because they do not know what outfit to buy. For this reason we have established a Department of Irrigation, composed of irrigation experts who are thoroughly acquainted with all conditions throughout the United States and with the different methods of irrigation. **The advice of these experts is yours for the asking.** We make no charge and will gladly figure out a complete outfit for you.

The illustrations on this page show but a few of the outfits we are prepared to furnish. Our prices will save you considerable money over what you would have to pay elsewhere and every outfit is guaranteed absolutely to give satisfactory service and is shipped on trial, so that if it does not prove satisfactory, you can return it and get your money back, together with any freight charges you paid.

If you are interested in irrigation, write and tell us your conditions, describe your farm, tell us how many acres of land you have, where you get your water, what crops you expect to grow and the kind of soil in your neighborhood and our experts will figure out what you need and give you prices on a complete outfit.

Address all letters to **Department H, Mechanical Engineers, SEARS, ROEBUCK AND CO., CHICAGO, ILL.**

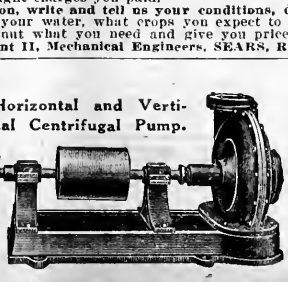
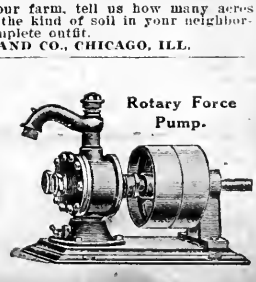
Horizontal and Vertical Centrifugal Pump.



Rotary Force Pump.



Acme High Grade Barrel Sprayin and Whitewashing Pump, $5.73

THE BEST PUMP OF ITS KIND EVER MADE

Without question the most serviceable and up to date pump of this type on the market today, regardless of The pump is equipped with two cylinders, the upper cylinder being made of brass, and the lower cylinder is lined. It is also equipped with brass plungers, brass check valves and brass valve seats. All working parts that in contact with the liquids used are brass. The body of the pump is a large air chamber, and after the pump is pressure it will discharge a steady spray, lasting two minutes or more, with one or two strokes of the handl making it a very easy pump to operate. On account of being equipped with two cylinders, this pump is double On the upward stroke of the pump half of the solution in the piping is discharged, and on the downward stro other half is discharged, thus making a continuous spray, a point which should receive due consideration prospective purchaser of a pump. Each pump is fitted with a jet agitator. This is a general purpose pump a be used for spraying, whitewashing, washing windows and buggies, extinguishing fires, sprinkling lawns, flowe etc.; in fact, in any place where water is needed, this pump can be used to great advantage.

We furnish this pump with a shut off valve at the nozzle, so that the spray can be shut off by simply turni valve. If others quote you a lower price than ours compare the weights given for our pump with the weights of sold by them.

$9.35 Acme Improved Sprayer

For Whitewashing, Painting and General Purpose Spraying.

No. 42H5503¼ Simple in construction, mechanically perfect, the best all around sprayer ever put on the market. Has no equal for spraying all kinds of trees, plants, shrubs, vines, etc., and is of the greatest value for stock and poultry farms, nursery men and florists, fruit growers, cold storage plants, factories, packing houses, warehouses; in fact, any and every place which requires the application of disinfectants, insecticides, fungicides, whitewash or cold water paint. This machine produces the strongest power and when used with extension pipe the tallest trees can be reached. **The reservoir is made of heavy galvanized iron and holds 3 gallons of mixture.** The cover is reinforced and so designed that the pump may be instantly removed, thus exposing all working parts. The pump is **made entirely of heavy brass, except the handle parts.** There is an agitator which is operated by the handle and which keeps the solution thoroughly mixed about the suction opening. This pump is fitted with 8 feet of three-ply discharge hose, stop cock and two 4-foot lengths of extension pipe, with **latest pattern Vermorel nozzle.** Five extra inserts are furnished with each nozzle, and they can be replaced as often as necessary to keep the spray of uniform size. The machine loaded is **easily carried** from place to place, and has a decided advantage over sprayers that are mounted upon barrels or other large reservoirs. Weight, 45 pounds. Price.....**$9.35**

$3.60 Acme Compressed Sprayer

Self Operating or Automatic.

We can thoroughly recommend this to be the highest type of a compressed air sprayer manufactured or placed on the market. It is a combination of all the good points of every sprayer of its kind that has been introduced, and we know that it will give excellent satisfaction to our customers. It is simple in construction, perfect mechanically, made of the very best material throughout, and will stand the strain of high pressure and hard usage. During the last few years we have sold thousands of these pumps and we have yet to hear from our first dissatisfied customer. The pump is easily removed for cleaning and there is nothing to get out of order. It has a capacity of 3½ gallons and produces ample pressure for spraying all kinds of fruit trees, and is unexcelled for spraying potatoes, tobacco, tomatoes, etc., in patches of 5 acres or less. Enough compression is obtained with eight to ten strokes of the piston to spray for several minutes a mistlike spray or solid stream. We furnish this spray with 2 feet of hose, and we advise our customers to purchase the brass sprayer which is non-corroding and will practically wear a lifetime. We list this sprayer with common cock and automatic cock, but recommend the use of the brass sprayer with the automatic cock. Extension pipes can be screwed to the nozzle and extended to any length desired. Weight, 7 pounds.

Notice—This sprayer cannot be used for whitewashing.

Spraying Pump, $1.98

No. 42H5520 The construction of the pump requires the pressure on the handle to be all done on the down stroke, the pressure on the cylinder acting as a cushion, and partly forcing the handle up again, thus making it very easy of operation, requiring no foot rest, nor other device to steady it. The hose can be detached at top of pump and a nozzle attached in its place, either for spraying, sprinkling or throwing a solid stream. It is also arranged so that a small stream is discharged with great force from the bottom of the pump into the bucket or barrel, serving to thoroughly agitate the mixture at all times when the pump is in use. For washing windows, buggies, etc., it is very useful. Weight, about 5 lbs. Price..**$1.98**

Bamboo Extension Rod.

No. 42H10009¼ To be used in reaching tall trees. A great advantage over the ordinary extension, as they are light, and the inner tubing being made of brass prevents collection of scale. Length, 9 feet. Price.....**$2.00**

Brass Strainer.

No. 42H10007 Made of brass and should be used to strain all mixtures before placing them in sprayer.
Price **75c**

Hercules Nozzle.

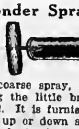
No. 42H10039 One of the latest and best nozzles ever placed on the market. One of the most important things for successful spraying is a satisfactory nozzle and we know the Hercules will give universal satisfaction.
Price **$1.00**

Marvel Spray Pump Fire Extinguisher

This is a combination spray pump and fire extinguisher, one which we know will give our customers splendid satisfaction as a general purpose sprayer. It is equipped with a heavy brass pump, and all valves, etc., that come in contact with materials used in spraying are brass, and therefore will not get out of order. This pump is furnished with two nozzles, one for fire extinguishing purposes or general purpose sprinkling, which will throw a stream from 40 to 50 feet, 2-foot extension pipe, and also with a spraying nozzle for spraying purposes. The pump is made of galvanized iron, nicely painted, and has a capacity of 4½ gallons.
No.42H5519¼ Price.$4.40

$4.4

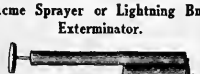
Wonder Sprayer.



The Little Wonder Sprayer is adapted for spraying all kinds of vegetable plants. It sprays a fine mist or coarse spray, which is accomplished by turning the little brass nozzle backward or forward. It is furnished with brass balls. Will spray up or down and takes the place of any kind of atomizer made. Is simple in construction, nothing to get out of order; furnished in either tin or galvanized iron. We know anyone purchasing this sprayer will be more than pleased with it. Capacity, 1 quart.

No. 42H5494 Tin. Price.....48c
No. 42H5495 Galvanized iron. Price.....60c

Acme Sprayer or Lightning Bug Exterminator.



The best low priced sprayer sold by anyone. It is made of IX tin or brass; piston rod is made of heavy steel rod, with a hardwood stuffing box. Cylinder is 1¾x15 inches. Weight, about 2 pounds. Capacity, 1½ pints.

No. 42H5490 Price, IX tin.**29c**

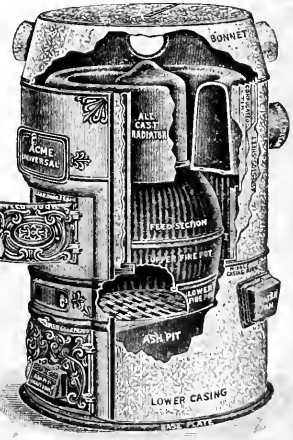
OUR NEW ACME UNIVERSAL FURNACE

This furnace represents the highest type of construction. It will burn successfully both hard and soft coal and will give equally good results with either fuel. There is considerable demand in many sections of the country for a furnace with an all cast radiator, and our Acme Universal has been especially prepared to fill this want. The general construction of the furnace is somewhat similar to our Acme Tropic, which heretofore has been our best furnace, but with the all cast radiator the Acme Universal is the superior of the two. We guarantee the Acme Universal to be unsurpassed by any warm air furnace on the market today in efficiency, durability and price. We will gladly figure on this furnace to heat your home if you will send us the necessary floor plans and specify that you want our new furnace with the cast iron radiator.



ACME UNIVERSAL FURNACE FOR HARD OR SOFT COAL.

Catalog No.	Furnace No.	Diameter Casing, Inches	Diameter Fire Pot, Inches	Heating Capacity, Cubic Feet	Price, With Casing, as Shown

HEAT YOUR HOME WITH A HERCULE
HOT WATER OR STEAM HEATING SYSTE

Heats Every Room to an Even Temperature, Avoids Dust, Ashes or Coal Gas in Living Rooms, Save Household Furnishings. A Great Saver of Time and Labor. Easily Installed by Anybody in Any House. Can Be Filled With a Bucket.

Write for Modern Heating Catalog Free on Request

Estimates Are FREE For The Asking

Consider These Additional Advantages:

No carrying coal upstairs.

Unnecessary to remove ashes every morning.

Fire needs attention but twice daily—morning and evening.

No dust, soot, ashes or coal gas in living rooms.

Great saving in carpets, rugs, curtains and other household articles.

Much less house cleaning.

Chances for colds and sickness greatly lessened, due to freedom from dampness and variation of temperature.

May save you several hundred dollars in doctor's bills.

If you have a running water system of any kind, you can put a coil in the fire pot of the boiler; connect it with a range boiler and have an abundant supply of hot water ready for use day or night.

Send us a rough sketch of your building on our plan blank if you have one. We will send plan blanks for Hot Water or Steam Heating Plants on request. Give the size of each room, the distance between the floors and ceilings of basement and first, second and other floors (if any), locate windows and outside doors on sketch and show dimensions of each. From this sketch we will figure the necessary size of radiators for each room and will send you an itemized estimate and complete specifications, quoting prices and describing each item you will require to install this modern money saving convenience in your home.

Send us your sketch at once. Don't wait. If you have a blue print of your building or a drawing from which the carpenter has worked, send it to us, as we will be able to figure the plant from that and it will then be unnecessary for you to make up another sketch. When we send you the estimate we will return your blue prints or architect's sketch by registered mail. We employ a force of heating engineers who have had years of experience in estimating and designing heating plants. We know that we can furnish you with a plant that will give better results at a lower price than any you could buy elsewhere. We make absolutely no charge for estimating the cost of your heating plant or for designing the system when we receive your order. You will only be charged the actual catalog price of each item necessary for the complete plant, and as these prices represent the factory cost with but one very small profit added, you can readily see that the total cost of the heating plant will be very low. Write us today.

SEARS, ROEBUCK AND CO.

Certificate No.

Certificate of Guaranty

This is to Certify that the Heating Plant sold by the undersigned to [illegible] is guaranteed to be absolutely perfect in every detail, all castings free from flaws or defects, and when properly installed and operating, in accordance with plans and specifications submitted, is guaranteed to heat the building for which it is furnished to a comfortable degree of warmth, during the coldest weather, as specified in the request for estimate. Should this plant fail in any way to give perfect satisfaction to the purchaser within two years from date, in addition to the return of same at our expense for transportation charges both ways, and we agree to refund the purchase price.

Dated at [illegible] this [illegible] day of [illegible] 19[illegible]

Sears, Roebuck & Co.
Chicago, Ill.

This illustration is a copy of our two-year written guarantee on our heating plants, absolutely protecting you in every way.

Hot water and steam heating plants stand first among modern improvements in home comforts. They are the ideal heating systems. We have saved you money on your other supplies, let us save you money on a guaranteed heating plant. Send us a sketch of your home and we will quote you figures for a hot water or steam heating plant complete, guaranteed to comfortably heat it, at a surprisingly low price. Direct connection with one of the largest manufacturers of heating materials, and the application of our money saving system to this line of merchandise enables us to make you a large saving. Our prices are based on manufacturing cost with just one profit added, eliminating all unnecessary expenses and profits of middlemen.

A Hercules Heating System keeps every room in your home at summer temperature while the thermometer may register from 30 to 40 degrees below zero. You can regulate the heat in each room to any temperature desired. **No more dressing in cold rooms;** you have perfect control of the heat, such control as you cannot have with any other heating system. Regulation of the Hercules system is simple, positive and when so desired can be made automatic. We always figure sufficient reserve capacity to make it unnecessary to force the fire, no matter how low the temperature may be. While the lowest temperature varies according to locality, even this is taken into consideration when figuring your heating plant.

The first cost of a Hercules Heating Plant is, of course, a little higher than that of stoves, but the cost of fuel and maintenance is less than that of the required number of heating stoves to heat your home throughout; this and the indirect saving in home furnishings make it a much better paying investment than stoves. The Hercules system may be installed in a building just being built, or in an old house without damaging or marring the building. The boiler is placed in the basement and the piping to the different radiators is laid out to give the best possible results.

Remember that no matter where you live, whether or not you have running water, you can install a Hercules system. Water can be forced into it with a hand pump or you can fill it with a bucket through the expansion tank; or if a steam heating plant, you can pour the water into the boiler by removing one of the small plugs at the top and using an ordinary funnel. When once filled, it is not necessary to add more than 5 to 6 gallons during the season.

Write For Our Free Book, Modern Heating Systems

On opposite page we list boilers, radiators and other heating material, from which you can gain an idea of the saving we can effect for you, but if you are in need of a heating plant be sure to write at once for our Special Catalog of Steam and Hot Water Heating Systems, a splendid book, fully explaining the working of the Hercules Steam and Hot Water Heating Plants, also quoting lowest possible prices on a complete line of heating materials. In this book you will find samples of working drawings showing how the Hercules system is designed and installed.

COMFORT STEAM OR HOT WATER THREE-COLUMN RADIATORS.

Shipped from factory in Western Pennsylvania.

OUR RADIATORS are of the latest improved design, and the ornamentation cannot fail to be acceptable to any of our customers, as it is pleasing and harmonious. Comfort Radiators are constructed to hold a pint of water to a foot of radiating surface. The spaces between the sections are wide, thereby assuring a perfect air circulation and enabling the radiators to do more effective work in giving off heat.

THE CASTINGS are made of the finest grade of gray iron of uniform thickness, and are free from all flaws and pinholes. All Comfort Radiators are tested to 70 pounds pressure before leaving our factory. We can furnish radiators in any number of sections desired.

While we list below only three-column radiators, we can furnish one, two or three-column radiators, ranging in height from 20 to 45 inches; low six-column radiators from 13 to 26 inches; also dining room, wall and any kind of special radiator that you may desire.

For full information and prices see our Special Heating Catalog.

When ordering be sure to state whether you want radiators for steam or hot water, also how they are to be tapped, otherwise tapping will be as follows.

STEAM RADIATORS ARE TAPPED AS FOLLOWS UNLESS OTHERWISE SPECIFIED:

Up to 24 feet	1 -inch supply
24 feet to 50 feet	1¼ -inch supply
50 feet to 100	1½ -inch supply
Over 100 feet	2 -inch supply

HOT WATER RADIATORS ARE TAPPED AS FOLLOWS UNLESS OTHERWISE SPECIFIED:

Up to 50 feet	1 -inch feed and return
50 feet to 75 feet	1¼ -inch feed and return
Over 75 feet	1½ -inch feed and return

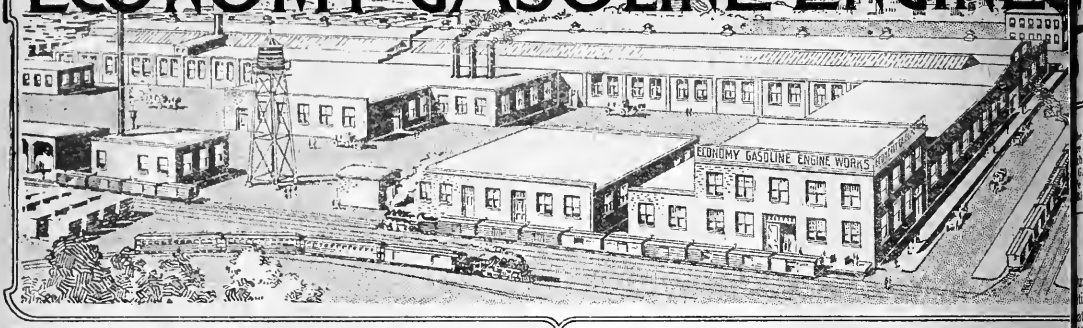
ECONOMY GASOLINE ENGINES



Built in This, Our Own Factory at Sparta, Mich

We invite you to visit our mammoth gasoline engine factory at Sparta, Mich., 14 miles from Grand Rapids. If you live near this factory or are ever in the neighborhood, we would like to have you call and look over one of the largest and best equipped gasoline engine factories in the country.

Our factory superintendent will gladly show you how we build the high grade Economy Gasoline Engine; he will show you how we have been able to reduce the cost of making each part by the installation of high grade automatic machines, how we have improved the system of handling the work in the factory, how we test every engine before it goes out, to be sure that it is in perfect running order.

This factory has been pronounced by men who are in a position to know, to be one of the best equipped, most up to date and best organized gasoline engine factories in the country. They tell us that they were astounded to see us using the highest grade materials in our engines and the finest automatic machines in their manufacture.

If you could take a trip through our factory with the superintendent and see the methods we use to reduce the cost and still produce a high grade engine, if you could see for yourself the high grade material that we use in the Economy Engines and then go through some of the other factories where gasoline engines are made and compare their methods of manufacture with ours and consider their methods of selling gasoline engines, we know you would not be at all surprised that our prices are so much lower.

Our low prices do not mean any reduction in quality of material or workmanship, but are the result of the saving we make by manufacturing in an economical manner, in an up to date factory, by doing away with all unnecessary handling expense, by shipping the engines direct to the users, by being satisfied with one very small profit over and above the actual cost of manufacture.

The bottom has been knocked out of the high prices that formerly ruled the engine trade. There is absolutely no reason why you should pay from one-third to one-half more for a gasoline engine than the prices we ask. The Economy Engines are high grade in every respect. We guarantee them absolutely. We have all sizes in stock ready to ship, your size, just the engine you want. It is waiting at the factory ready to start to your farm the minute you say the word.

You Will Pay for a Gasoline Engine This Year

Whether you buy a gasoline engine this year or not, you will surely pay for one. Without a gasoline engine you waste far more time and money in a single year than the price we ask for an engine that will do your work. We don't believe we will have to waste any time arguing with the farmer over the question of buying a gasoline engine, for an up to date farmer knows that its value is as thoroughly established as the value of a self binder over the hand method.

The right engine for you to buy is the Economy Gasoline Engine. It is the one engine for you to buy, because it is built in a perfectly organized and modern factory by people who know how. We do not need to tell you that all parts are perfectly made on automatic machinery so as to be instantly interchangeable without fitting in case of repairs or replacements. We do not need to describe to you the different kinds of metals we use in the various parts. You can take our word for it that every part of an Economy Engine is just exactly as it should be, because we back it with our guarantee, the one guarantee that asks no questions, that makes no conditions, a guarantee that considers you, the purchaser, to be the sole judge of whether or not you are satisfied. This is the basis upon which we sell the Economy Gasoline Engines, and in making them we never lose sight of the fact that the finished product must be good enough to carry such a guarantee.

Our fair and square selling method enables you to try the Economy without risk. You send us your order; we send you the engine. You try it on your own farm in your own way, doing your own work for sixty days. If you are not entirely satisfied that the Economy Engine is the one you want, you send it back to us at our expense. If you do not like the Economy Engine, the trial does not cost you a penny, because we send you back the purchase price and the freight charges. That is the kind of a trial that proves something. It protects you absolutely from an unsatisfactory purchase.

VE GUARANTEE THE ECONOMY

) Be Equal to Any Gasoline Engine You Can Buy, Regardless of Make or Price

he Economy Is the Only Gasoline Engine Sold Today at a Fair and re Price With a Reasonable Profit Over and Above the Cost to Build gh Grade Gasoline Engine in One of the Biggest and Most Up to Gasoline Engine Factories in the World. Ve Want You to Try One of These High Grade Economy Engines at Risk. If You Are Not Satisfied, We Pay All Expense. Compare the Economy With Any High Grade Gasoline Engine You Know of, Test Them Side by Side on the Same Work; if the Economy Does Not Pull as Much and Do It Easier and on Less Gasoline, You Can Send It Back and We Will Send You Back Your Money, Together With Any Freight Charges You Have Paid.

WHAT WE GUARANTEE

Our whole reputation is behind this guarantee. Our success entirely due to living up to it without argument. We see to hat the engine is made so it can carry this guarantee. It vides you complete protection.

We guarantee the Economy Gasoline Engine to be equal in erial, construction, finish and power developed to any gas- e engine made, regardless of price; to do all that we claim, evelop its full rated horse power, to do as much work at as a cost for gasoline and oil as any other gasoline engine. guarantee to furnish repairs whenever needed on short ce at a reasonable cost and will replace absolutely free at time any part of an Economy Gasoline Engine that gives on account of defect in material or workmanship.

We Give You 60 Days to Prove Our Claims

This is no idle offer just to get your order, but a frank statement of the confidence we have in the Economy Gasoline Engine. We only ask that you give the Economy a chance to prove its worth to you. Send us your order with the money for the size you want and we will ship you the gasoline engine and give you sixty days to try it on your own farm before you decide to keep it. If you don't want it, we don't want you to keep it. You can compare it with any gasoline engine you know of as to power, durability, simplicity and finish. If you do not feel that the Economy is as good, if not better, than any other gasoline engine on the market regardless of price; if you are not perfectly satisfied in every way, you may return the engine and we will send you back every dollar you paid out, both price and freight charges.

e Engine You Need for Your Work

n buying a gasoline engine you should be absolutely sure that the you pick out will do your work. If you are not sure, write and tell st what you want to do and we will tell you what engine will do work most economically.

he 1½-horse power engine is for very light work, cream separators, ing machines, pumping, etc.

he 2-horse power engine is for running several of these light ines at a time or taking care of other small farm machines.

he 4-horse power engine is for light farm machinery, running small feed grinders, fanning mills, etc.

he 6-horse power engine is really the best all around farm engine to You cannot make a mistake by buying this engine, as it will handle ood advantage the large sized farm machines, and it will also take of the light work as well and do it economically.

he 8 and 10-horse power engines are for heavy work, ensilage cut- threshers, etc.

e very careful in making your selection of a gasoline engine. Be sure have plenty of power. If there is any doubt in your mind, write us re placing your order.

We Can Always Furnish Repairs

All parts of the Economy Engine have been standardized. By this we mean every part is made like every other part of the same kind. All parts are made on modern automatic machines and they fit within a thousandth part of an inch, where that degree of accuracy is necessary. This not only means that we can put the engines together accurately and guarantee perfect results, but it means that you can secure repairs or extra parts as long as you need them. We keep a complete record of every engine shipped. We pay particular attention to repair orders, they are filled promptly, shipment being made the same day the order reaches us, and when the part arrives you can put it on yourself; all the tools you will need are furnished with the engine, the monkey wrench, pliers and screwdriver. You will not have to alter the part in any way, as all parts are absolutely interchangeable on the different engines that we build.

HOW TO ORDER A GASOLINE ENGINE

f you have made up your mind to buy a gasoline engine, the first thing to do is to decide on what size of engine you need for your work. If you k you know, but are not sure, just send us the order and tell us what you want to do and we will tell you if you have made a mistake.

Simply send us a letter enclosing the price of the engine, give us the number and horse power of the engine and we will do the rest.

If you have several machines to run, tell us what they are; our experts are thoroughly familiar with all matters of this kind and you can trust bsolutely to give you just what you want. We will ship the engine immediately, as we have them in stock; and remember, you have sixty s to try the engine on your work before you decide to keep it.

A RED HOT SPARK

THIS WONDERFUL BATTERY IS FURNISHED WITH ALL ECONOMY GASOLINE ENGINES

A STRONGER AND BETTER SPARK AT LESS EXPENSE

E STAND-BY MULTIPLE BATTERY gives a red hot spark, a spark that is much stronger than you can possibly get from the regular equipment of dry cells furnished on t gasoline engines. The Stand-By Multiple Battery will last much longer than the regular dry cell. This derful battery is now furnished as regular equipment on all Economy Engines. Every engine we build ship out will be furnished with this Stand-By Multiple Battery, with the exception of the Little Wonder ine we sell for $29.95.

HE STAND-BY MULTIPLE BATTERY IS FURNISHED WITHOUT EXTRA CHARGE ON ECONOMY GASOLINE ENGINES

While this Stand-By Multiple Battery costs twice as much as the ular dry cell equipment usually furnished by gasoline engine manu- turers, it is so much superior to anything ever furnished for the ition system of a gasoline engine, outside of the magneto, that we e decided to add this extra expense in order to make our engines e satisfactory, in order that there will be absolutely no trouble from ignition system. It is only one illustration showing to what extent will go to add every possible improvement to the Economy Gasoline gines, keeping them in the lead of all other engines in every possible

If you cannot secure a Stand-By Multiple Battery with the engine you ect to buy, insist upon a magneto; do not accept an engine of any d unless you know you are going to get the hottest possible spark.

You can only get this with a magneto or a Stand-By Multiple Battery, and the Stand-By Multiple Battery is furnished only on Economy Engines. We don't wish to state that the Stand-By Multiple Battery is superior to a magneto; it is not, but next to the magneto it is the greatest thing ever added to the gasoline engine, as it overcomes most of the aggravating troubles that people have had in the past with gasoline engines, which have been with the ignition system, and as the Stand-By Multiple Battery and the magneto now make it possible to have an absolutely sure hot spark, there should be no further trouble in starting an engine and keeping it running. Don't order any kind of an engine without the Stand-By Multiple Battery or a magneto, and if you will order an Economy Engine we will furnish the Stand-By Multiple Battery as regular equipment without extra charge.

No. 11H256 Stand-By Multiple Battery only. Weight, 25 pounds. Price.....$4.00

QUICK DELIVERY FROM WAREHOUS

Kansas City, Mo., St. Paul, Minn., Harrisburg, Penn.

WE CAN MAKE IMMEDIATE SHIPMENT FROM ANY OF THESE WAREHOUSES, SAVING YOU A GREAT DEAL TIME IN DELIVERY AND SAVING YOU CONSIDERABLE IN FREIGHT CHARGES.

For quick delivery we have arranged to carry a supply of our 2, 4 and 6-horse power Economy Gasoline Engines and Pumping Outfits, all crated, with complete equipment, as described below, including Stand-By Multiple Battery, in the above warehouses.

The difference between the warehouse price and the price for the engine shipped from our factory in Michigan is the carload freight rate from the factory to the warehouse and a very small charge for storage, so that by shipping from the warehouse we save you the difference between the carlo and the local freight rate. All the freight charges you w have to pay on receipt of the engine will be the charges fr the warehouse to your station.

Shipping you an engine from one of these warehouses giv you the lowest possible freight rate, the quickest delive The engines are all ready for immediate delivery and will shipped the next day after we receive your order, so that t engine will reach you in the shortest possible time.

Send All Orders to SEARS, ROEBUCK AND CO., Chicago, Illino

Also specify from which warehouse you wish the engine shipped.

DESCRIPTIONS OF 2, 4 AND 6-HORSE POWER ENGINES

2-Horse Power Stationary Engine

See picture of engine on opposite page.

Our 2-Horse Power Economy Gasoline Engine may be used for running machinery usually operated by hand, such as feed cutters, grinders, grindstones, cream separators, washing machines, churns, sheep shearing machines, small lathes, drill presses, pumps, etc. It is one of the greatest labor saving machines you can buy. Equal in every way to any 2-horse power engine on the market. Shipped on sixty days' trial; guaranteed for life. All ready to run, with gasoline tank in base, Stand-By Multiple Battery, spark coil, wire, pliers, monkey wrench, oil can, 1 quart of oil and one box of grease, also a complete instruction book which explains how to care for and operate the engine.

SPECIFICATIONS.

TYPE—Four-cycle, water cooled.
BORE—4 inches.
STROKE—6 inches.
SPEED—450 revolutions per minute.
FLY WHEEL—Diameter, 22 inches. Weight, 65 pounds.
PULLEY—8 inches in diameter, 4-inch face.
SHIPPING WEIGHT—550 pounds.
FLOOR SPACE REQUIRED—25x40 inches.
CRANK SHAFT—Drop forged, diameter 1½ inches.

4-Horse Power Stationary Engine

See picture of engine on opposite page.

For light farm work; it will take care of all machines usually r by hand, small grinders, corn shellers, shredders, light ensilage cu ters, wood saws from 20 to 24 inches in diameter; it will also r some of the larger machines, but will give a limited capacity. F shop work it will handle machines usually run by hand, together wi light lathes, drill presses, forges, planers, shapers, trip hammers, e Equal in every way to any 4-horse power engine on the mark Shipped on sixty days' trial; guaranteed for life. All ready to ru with gasoline tank in base, Stand-By Multiple Battery, spark co wire, pliers, monkey wrench, oil can, 1 quart of oil and one box grease, also a complete instruction book.

SPECIFICATIONS.

TYPE—Four-cycle, water cooled.
BORE—4½ inches.
STROKE—9 inches.
SPEED—400 revolutions per minute.
FLY WHEEL—Diameter, 26 inches. Weight, 135 pounds.
PULLEY—12 inches in diamete 6-inch face.
SHIPPING WEIGHT—775 pound
FLOOR SPACE REQUIRED—29x47 inches.
CRANK SHAFT—Drop forge diameter 1¾ inches.

6-Horse Power Stationary Engine

See picture of engine on opposite page.

Our 6-Horse Power Economy Gasoline Engine is our most popular size. It is just the right size to handle all machines usually found on the farm, and is not too large to handle the light work as well and do it economically. It is particularly adapted for heavy work, such as wood sawing, saws from 24 inches to 28 inches in diameter, burr mills, ensilage cutters, small threshers, large pumps for irrigating purposes, custom grinding and for line shaft work where a number of light machines are to be run at the same time. Equal in every way to any 6-horse power engine on the market. Shipped on sixty days' trial; guaranteed for life. All ready to run, with gasoline tank in the base, Stand-By Multiple Battery, spark coil, wire, pliers, monkey wrench, oil can, 1 quart of oil and one box of grease, al complete instruction book.

SPECIFICATIONS.

TYPE—Four-cycle, water cooled.
BORE—5½ inches.
STROKE—10 inches.
SPEED—375 revolutions per minute.
FLY WHEEL—Diameter, 30 inches. Weight, 185 pounds.
PULLEY—16 inches in diamete 8-inch face.
SHIPPING WEIGHT—1,200 pounds.
FLOOR SPACE REQUIRED—31x56 inches.
CRANK SHAFT—Drop forge diameter 2 inches.

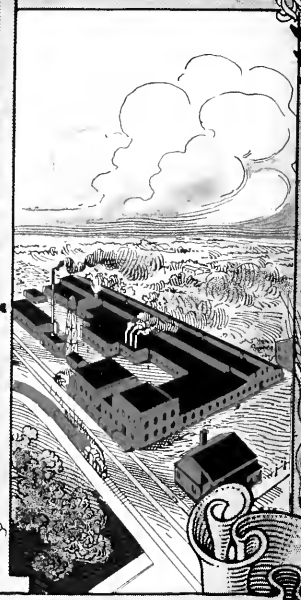
OUR MECHANICAL ENGINEER'S OFFICE



IT IS easier to order a gasoline engine from us than from an agent or dealer, as in selling thousands of gasoline engines a year our mechanical engineers and field experts have a greater opportunity to gain the experience necessary to tell you just what engine will do your work to the best advantage and at the least expense. Don't be afraid of making a mistake. Send us your order, telling us what you expect to do with the engine, and if what you order is not suitable for your work we will write you.

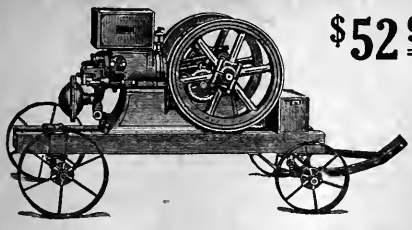
If you do not know how much power or the kind of an engine you need, and will address a letter to **DEPT. 11, MECHANICAL ENGINEERS, SEARS, ROEBUCK AND CO., CHICAGO, ILL.,** and tell us just what you want to do with the engine, what kind of machines you want to run, how much water you want to pump or anything else you have in mind, our mechanical engineers and practical experts will tell you just what engine will do your work to the best advantage and at the least expense. All information absolutely free.

OUTFIT FIGURED OUT FOR ONE OF OUR CUSTOMERS

Our Engineers Figure Out Power Propositions From All Parts of the Country.

Hand Portable Gasoline Engines

$52.95



A hand portable gasoline engine can be used in the barn to grind feed, cut fodder, shell corn, etc.; you can take it to the house to run the cream separator, washing machine, churn, or when the windmill is not running it will pump water. It will save you considerable time, money and labor. Outfits consist of our regular Economy Gasoline Engines (see page 1186), fitted with Stand-By Multiple Battery, mounted on solid wood channels 5 feet long, 2½ inches wide, 3¾ inches thick; metal axles, steel wheels, 14 inches front, 16 inches rear, 2-inch tires, 50-inch track. Each truck is fitted with substantial hand tongue, and we guarantee the outfit to be equal to any portable outfit that you can buy.

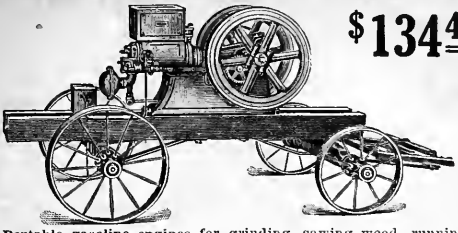
Shipped from our factory in Southern Michigan.

No. 11H4535 2-Horse Power Engine on Hand Truck. Price..... $52.95

No. 11H4536 4-Horse Power Engine on Hand Truck. Price..... 85.95

Horse Portable Gasoline Engines

$134.45



Portable gasoline engines for grinding, sawing wood, running the thresher, ensilage cutter, bean bullers, hay balers, for filling silos, etc. Consist of Economy Gasoline Engine, fitted with Stand-By Multiple Battery (description of 6-horse power engine on page 1186, 8 and 10-horse power on page 1190), mounted on solid wood channels with wood axles, steel wheels 24 inches front, 30 inches rear. The 6-horse power truck has a 3x9-inch skein, 3-inch tires; 8-horse power truck a 3½x10-inch skein, 4-inch tires; 10-horse power truck a 3½x10-inch skein, 4-inch tires; width of track, 4 feet 8 inches on all sizes. Shipped on sixty days' trial. Guaranteed for life. For general farm work we recommend the 6-horse power outfit. Can be used for stationary work.

Shipped from our factory in Southern Michigan.

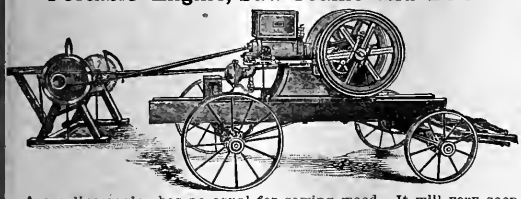
No. 11H4538 8-Horse Power Engine on 2-Horse Truck. Price..... 202.95

No. 11H4539 10-Horse Power Engine on 2-Horse Truck. Price..... 279.45

Portable Engine, Saw Frame and Belt



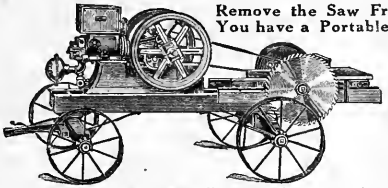
A gasoline engine has no equal for sawing wood. It will very soon pay for itself in sawing wood alone. You can also use the engine for stationary work. Outfit consists of Economy Engine on truck, with David Bradley saw frame and a 40-foot rubber belt. Trucks fitted with shafts for one horse or, if you prefer, we can furnish pole. Saw frame and belt can be loaded on the truck. These outfits are very easily set up and will saw as much wood and give as good results as the higher priced outfits on the market. Engine, truck and saw frame shipped from separate factories to save you extra freight and handling expense. Each engine fitted with Stand-By Multiple Battery.

No. 11H4516 4-Horse Power Engine on 1-Horse Truck, with 24-inch saw frame, 40 feet of 4-inch 4-ply rubber belting. Price $129.75

No. 11H4517 6-Horse Power Engine on 1-Horse Truck, with 28-inch saw frame, 40 feet of 6-inch 4-ply rubber belting. Price 164.45

Combination Wood Sawing Outfit

Remove the Saw Frame and You have a Portable Engine.



Complete wood sawing outfit, all mounted on one truck engine, truck with sliding saw table, balance wheel, saw and belt. For description of trucks see above. When not in use for sawing wood, sliding table can be removed and you have a portable engine or engine may be removed from truck for stationary work. Guaranteed equal to any wood sawing outfit on the market. Shipped on sixty days' trial. Engines are described on pages 1186 and 1190, and are fitted with Stand-By Multiple Battery. Engines shipped from factory in Southern Michigan; truck and saw outfit from factory in Illinois. You can put the outfit together without any trouble and by shipping from two different factories we are able to save you considerable in extra freight and handling expense.

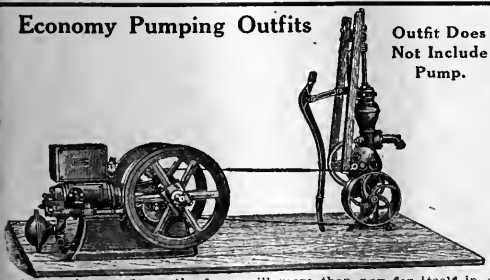
No. 11H4595 4-Horse Power Sawing Outfit, shafts, 24-inch saw, 16x6-inch pulley. Price..... $130.75

No. 11H4596 6-Horse Power Sawing Outfit, shafts, 28-inch saw, 16x8-inch pulley. Price..... 165.45

No. 11H4597 8-Horse Power Sawing Outfit, pole, 30-inch saw, 16x10-inch pulley. Price..... 225.65

Economy Pumping Outfits

Outfit Does Not Include Pump.



A pumping outfit on the farm will more than pay for itself in one season in pumping water alone. Don't depend on the wind for your water. Besides pumping, the engine will run the cream separator, feed grinder, grindstone, washing machine, churn, etc. If you want to pump water and don't know just what size to buy, write us. Outfits consist of Economy Engine (see page 1186), with Stand-By Multiple Battery; pump jack, back geared 4 to 1, three strokes, 5, 7½ and 10; tight and loose pulley; 11-foot 2-inch rubber belt, complete all ready to pump water.

Shipped from our factory in Southern Michigan.

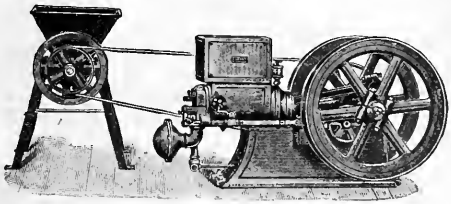
No. 11H4550 2-Horse Power Pumping Outfit, 4x4-inch pulley. Weight, 635 pounds. Price..... $ 46.95

No. 11H4551 4-Horse Power Pumping Outfit, 6x4-inch pulley. Weight, 835 pounds. Price..... 78.75

No. 11H4552 6-Horse Power Pumping Outfit, 8x4-inch pulley. Weight, 1,135 pounds. Price..... 108.45

No. 11H4553 Pump Jack Only. Weight, 85 pounds. Price 5.25

Economy Grinding Outfits



Do Your Own Grinding; Save the Long Haul to Town.

Outfit consists of Economy Gasoline Engine (see page 1186) with Stand-By Multiple Battery, 30 feet of 4-inch 4-ply rubber belting and No. 1 X-L-ALL Grinder with fly wheel. It will crush and grind corn on the cob or cobs alone, small corn, wheat, oats, rye, barley or any small grain.

The 4-horse power outfit will grind about 12 bushels of ear corn or 25 bushels of shelled corn per hour. The 6-horse power outfit will grind about 15 bushels of ear corn or 35 bushels of shelled corn per hour.

Engine and grinder shipped from separate factories to save you extra freight and handling expense.

Line Shafting, Pulleys, Hangers, Etc.

Shipped With Gasoline Engine From Our Factory in Southern Michigan.

Attachment For Barrel Churn.

To run a churn with a gasoline engine you must have a tight and loose pulley. The accompanying illustration represents pulley which can be attached to any barrel churn. With this pulley the engine need not be stopped to stop the churn; just run the belt over on the loose pulley.

No. 11H4605 Double Pulley, 12-inch diameter, 2-inch face. Weight, about 15 pounds. Price.....**$1.95**

Cold Rolled Steel Shafting.

We furnish one size of shafting only from our factory, 1¼ inches in diameter, and in the usual lengths are 8 and 12 feet, we show prices on these lengths only. For other sizes of shafting, see page 1060. All shafting guaranteed.

PRICES.

No. 11H4607 12-Foot 1¼-Inch Shaft. Price..... **1.80**

Safety Set Collar.

This is a collar for slipping on the shaft next to the hanger to prevent the shaft from working back and forth. It is made of cast iron with set screw for holding in place.

No. 11H4608 Safety Set Collar for 1¼ inch shaft only. Price..... **16c**

Run Your Machinery From a Line Shaft

It is more economical to run several machines at the same time than to run each one separate. By putting in a line shaft and connecting all your machinery you can run them all at the same time with one gasoline engine, which will mean not only economy in time, but a great saving in gasoline and oil.

If you are interested in an outfit of this kind, write and tell us just what machines you want to run. We will tell you just what you need and send you prices on the complete outfit, with a drawing showing just how to put it up.

The colored picture on page 1188 is a sample of an outfit we figured out for one of our customers, which has been a great saving to him. Our experts will figure out an outfit for you if you will write and tell us just what you want to do. Address your letter to

DEPT. 11, MECHANICAL ENGINEERS,
SEARS, ROEBUCK AND CO., CHICAGO, ILL.

Cast Iron Pulleys.

A cast iron pulley is perfectly satisfactory for the ordinary line shaft run with a 2 or 4-horse power engine, and it is a great deal cheaper than any other pulley you can buy. We guarantee these pulleys to giv you satisfactory service and will replace an that prove defective. They are bored fo 1¼-inch shaft only. Held in place with se screw.

No. 11H4542 PRICES.

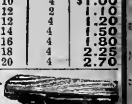
Line Shaft Hanger



Shaft hanger with removable bearings, made so that shaft can be taken down without changing the hanger. Guaranteed against defect in material or workmanship. Made in one size only, which will accommodate a pulley up to 12 inches in diameter. By fitting block underneath it will take care of larger diameter pulleys.

No. 11H4610 Shaft Hanger. Price.$1.00

Want a Carload of LUMBER? Let Us Save You $100.00. See Lumber Page

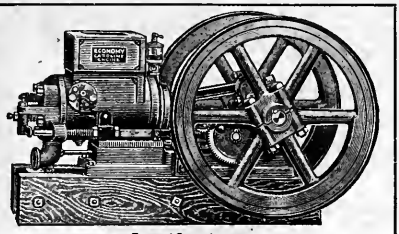
$29.95 THE LITTLE WONDER GASOLINE ENGINE $29.95

An Engine to Turn the Crank for You. Saves Time, Money and Muscle.

Will Run the Separator, Churn, Washing Machine, Fanning Mill, Feed Cutter, Grindstone, Pump Water and a Dozen Other Different Things. An Engine for the Home, Shop, Factory or on the Farm.

The Greatest Value Ever Offered.

In the Little Wonder Gasoline Engine we are giving you the greatest value ever offered, more horse power for less money than has ever before been offered by anyone. This exceptionally low price is made possible by our manufacturing these engines in large quantities, by selling a large number of them, shipping direct from factory to user and adding but our one small profit to the actual manufacturing cost. No handling expense, no profit to the agent or dealer; a high grade engine direct to you at one-half the price charged by other firms. We defy any manufacturer to produce as good an engine for even twice our price.



Specifications.

BORE—3¾ inches.
STROKE—5½ inches.
PULLEY—8x4 inches.
SPEED—450 revolutions per minute.
FLOOR SPACE—24x40 inches.
SHIPPING WEIGHT—About 480 pounds.
Shipped from factory in Southern Michigan.

A High Grade Engine Guaranteed for Life.

The Little Wonder is a high grade engine, complete with full equipment, all ready to run. It is built exactly like our larger engines; all you have to furnish when you receive it is the gasoline; it is made in our own gasoline engine factory from the same material, on the same high grade machines and by the same skilled mechanics as our higher priced engines. It is thoroughly tested and inspected and we guarantee it to give you as good results as any engine of equal horse power that you can buy, regardless of make or price.

Simple, Durable, Economical, Powerful and Easy to Start

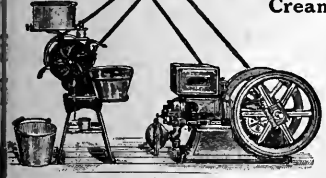
This engine was designed after our regular Economy Engines to supply the demand for a small gasoline engine. If 1½-horse power is all you need for your work, we will be glad to ship you one of these engines and give you sixty days to try it to prove to yourself that it is as good a gasoline engine as you could buy, regardless of price.

Don't make a mistake in buying a gasoline engine and get too little power, as you will find after you have the engine that it will do a great many things you never thought of before. By buying the proper size in the first place you save considerable money in the long run.

If you are not absolutely sure that this engine will do your work, write and tell us what you want to do, what machines you have to run, and we will tell you which engine will do your work most economically.

No. 11H4509 1½-Horse Power Stationary Engine fitted with six dry cells. Weight, 480 pounds. Price..... **$29.95**

No. 11H256B Stand-By Multiple Battery in place of the dry cells, add..... $3.00



A Gasoline Engine and Governor Pulley to Run Your Cream Separator.

A cream separator run by a gasoline engine will give you more cream than the hand driven machine, as the engine when used with our governor pulley runs the separator at a more even speed than it is possible to get by hand.

It is impossible to run the separator direct from the engine on account of the vibration, which would wear out your separator.

Our Governor Pulley entirely overcomes this. It runs the separator at just the right speed to give the best results and saves wear and tear on the separator.

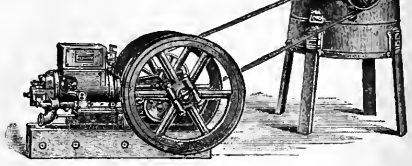
Governor Pulley shipped on 60 days' trial, guaranteed for life against defect. Can be used with any gasoline engine or any separator. Full instructions sent with each pulley.

No. 11H4501 Economy Governor Pulley with stand. Weight, 30 pounds. Price..... $6.75

No. 11H4502 Economy Governor Pulley without stand, for use on line shaft. Weight, 20 pounds. Price..... 5.75

No. 11H4503 14-Inch Separator Clutch Pulley, for Economy Chief Separators only. Weight, 20 pounds. Price..... 2.25

A Gasoline Engine to Run the Washing Machine.



This picture shows the Little Wonder Gasoline Engine connected by belt to our Wizard Power Washing Machine. The engine is as described above; the washing machine you will find described on page 1017. Outfit is complete, all ready to run, including the belt. The engine is shipped from our factory in Southern Michigan; the washing machine is shipped from Chicago.

An outfit of this kind will pay for itself in the time saved in washing clothes, besides it will lighten the household work, and the engine can be used for running any other light machines you may have, such as cream separator, churn, grindstone, small grinders for table meal, etc. We will ship this outfit on sixty days' trial and guarantee to replace at any time any parts that give out due to defect in material or workmanship.

PRICES.

No. 11H4504 Complete Outfit, Engine, Washing Machine and belt. Weight, 605 pounds. Price..... $40.65

No. 11H7537 Wizard Power Washer only. (See page 1017.) Price..... 9.70

Friction Clutch Pulleys.

Used in place of the regular pulley on a gasoline engine, so that you do not have to throw the belt on and off. You can start the engine independent of the machinery; after the engine is running, by simply pushing in on the hand wheel, which is stationary, you start the machinery, which saves wear and tear on the engine as well as the machinery and makes it much easier to start your engine.

NOTE—When clutch pulley is ordered with engine, the regular pulley is omitted. We furnish clutch pulleys for Economy Engines only.

The Remy Magneto.

A magneto is a small electrical generator to be used with a gasoline engine to furnish the spark. You use batteries to start the engine; after it is running you change to the magneto, which saves the battery and reduces your ignition expense.

The Remy Magneto is well known all over the country. It is acknowledged as being equal to the best magnetos made. We recommend its use with our gasoline engines, as it will give better results than if you use the batteries only. Shipped on sixty days' trial; fully guaranteed.

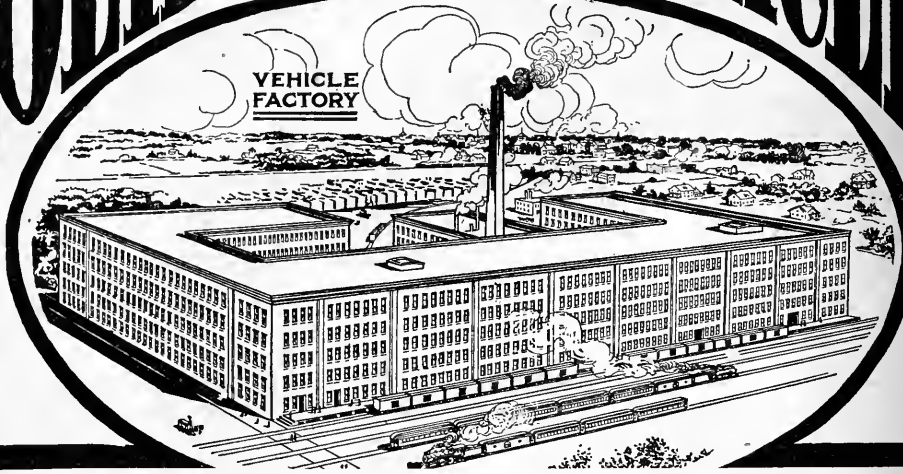
SOLID COMFORT VEHICLES



WHERE OUR VEHICLES ARE BUILT.

—

LARGEST IN THE WORLD.

61,000 VEHICLES BUILT IN THE FACTORY IN 1911

Big Price Reductions For 1912

Our prices on vehicles have been reduced through the entire line for 1912, as you will see in the following pages, except where we have made some change in the style of the vehicle, putting on a more expensive seat, etc., in which case the increased price simply covers the additional cost to manufacture.

We have offered some wonderful vehicle bargains during the 15 years we have been selling vehicles, but never before have we been able to offer our customers such sensational prices, such big values in high grade vehicles, as we are offering in the following pages.

How can we do it? This question will be asked many times: How can Sears, Roebuck and Co. afford to sell these vehicles at such low prices? The answer is simple. Look at the picture above where our vehicles are built. There were 61,000 vehicles built in this factory at Evansville, Indiana, last year. Everyone knows that the more vehicles you are able to build the lower will be the manufacturing cost of each one. Most factories built fewer vehicles in 1911 than they did in 1910 and their manufacturing cost increased accordingly, but this Evansville factory built 61,000 vehicles in 1911 as against 50,000 in 1910, an increase of 11,000. This year 75,000 will be built. The manufacturing cost of our vehicles has been reduced by increasing the output, while other factories have increased their cost because of their reduced output. The prices paid for our raw materials and fixtures are lower, while other manufacturers are compelled to pay more for theirs. Consequently, the manufacturing cost of our vehicles is less than ever, while other factories are building them at an increased cost. This, then, is the reason why we are reducing our prices to our customers while other factories are either advancing their prices or are leaving them the same and putting cheaper materials into their vehicles. We could leave our prices the same and make more profit, but it is our policy to always give our customers the benefit of any savings which we are able to make, because of larger sales and more scientific manufacturing, and you, therefore, see the results in the sensational reduced prices which we are quoting in this catalog.

READ THIS GUARANTEE

Satisfaction is what we guarantee. The thirty days' trial we offer, and which is offered by practically all concerns selling vehicles by mail, is a fair test for the vehicle, but this trial answers only the purpose of giving you an opportunity to inspect the style and finish and easy riding qualities of the vehicle. It does not afford you the opportunity of finding out for yourself of what materials it is made, how long it will last and what service it will give you. It is possible for a vehicle to give entire satisfaction for thirty days and be unsatisfactory afterward, and for this reason we guarantee to give you satisfaction always.

If we do not give you a good vehicle we know you will not be satisfied, and such being the case you will probably buy any other merchandise you need from some other concern. Primarily we want you to be satisfied; we want to retain you as a regular customer, and it is our intention that every vehicle we ship out shall give such service and be of such value that you will remain a satisfied customer.

We intend to accomplish this end by guaranteeing to keep you satisfied with your vehicle. We do not limit our responsibility to thirty days, or to one, two or three years. We know that our vehicles are being made in the largest and best equipped vehicle factory in the world; we know that the materials and workmanship are carefully inspected and we believe no better vehicles are being built today than those being turned out of the factory at Evansville, Indiana. They are honest vehicles, built according to the most improved methods, and we believe in them. If you have one of our vehicles and something goes wrong, it will not be because we did not use every effort to make it right at the factory. In buying one of our vehicles you are contracting to get good merchandise, just as we describe it, and if at any time something does give out, then it is not your fault, but our fault and the fault of the factory. We honestly believe that, allowing for natural wear and tear, our vehicles will last as long and give just as good satisfaction as any vehicle made, regardless of price, and we will obligate ourselves to replace free of expense any part which gives out because of defect in material or workmanship, and to make good at any time during the natural lifetime of the vehicle anything not absolutely right.

If you buy a vehicle from us and decide within thirty days that you do not want to keep it you will have no trouble in returning it to us. We will make it easy for you and will give you back all your money and any freight charges you paid. If you have a complaint to offer at any time during the natural lifetime of the vehicle we will use our best effort to make a most liberal, honest and fair adjustment for you.

We want you to be satisfied and if you buy a vehicle from us we are going to use every effort within our power to see that you are satisfied. We do not believe that there is any other concern in the country that is willing to offer you a proposition of this kind.

Our method of selling direct to the consumer from the factory enables the purchaser of one of our vehicles to save all dealers' and jobbers' commissions, and our big vehicle factory enables us to practice all economies in turning out vehicles and to produce them at the lowest possible cost. We honestly believe we are selling vehicles $15.00 to $20.00 cheaper than the same grade of vehicles can be bought anywhere else, either from a dealer or from other concerns selling vehicles by mail. We have investigated the situation thoroughly and this is our conclusion.

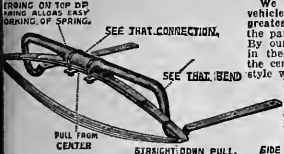
We guarantee a saving of from $15.00 to $20.00 on any vehicle we list and we agree to keep you satisfied during the natural lifetime of the vehicle. Give us a trial and we will use our very best efforts to make you a satisfied customer.

This Guarantee Applies on All Vehicles We Sell, Including Business Wagons and Farm Wagons.

NOTICE—We Wish to Call Your Especial Attention to the Wonderfully Popular Metal Seat Buggy on Pages 1203 to 1206.

FEATURES THAT COUNT

CENTER BEARING BODY LOOP.



We have used this style body loop on our vehicles for a great number of years with the greatest success. We wish you to note carefully the particular points we illustrate in this picture. By our construction the spring can be attached in the center, giving a perfect down pull from the center, which is much stronger than the old style weak construction shown in the picture below. Our construction gives a much easier action than the old style adjustment, is stronger and effects the perfect down pull all springs should have. There is no side pull, no twist nor strain in any weak

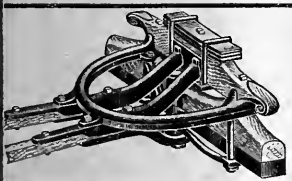
aces. You obtain the correct action id the efficiency of the spring is in- easd at least 50 per cent. This is te of the reasons why our Solid Com- rt Vehicles are considered the easiest ding and lightest running vehicles ade.

BRADLEY SHAFT COUPLERS.

Without a doubt the Bradley Shaft Couplers are the best shaft couplers made. You will find them on all high grade work. We furnish them on nearly all our vehicles without extra charge. Where they are not specified, we can furnish Bradley couplers in place of anti-rattlers for 60 cents extra.

V. S. SHULER'S PATENT ROLLER BEARING SPRING.

We can furnish this roller bearing spring in place f the regular end springs for 60 cents extra hen so ordered, with any of our buggies or run- bouts. This spring is easy riding and guaranteed s last as long as the buggy. Everybody knows hat a Shuler Roller Bearing Spring is. If wanted e sure to specify when you order that you want Shuler Patent Spring."



OUR LARGE FULL BEARING FIFTH WHEEL.

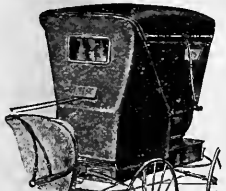
This illustration shows the fifth wheel we furnish with our Solid Comfort Vehicles. It is absolutely the strongest, most substantial and most graceful fifth wheel ever put on a buggy. It is noiseless and practically unbreakable. The king bolt is in the rear of the axle, which is a most desirable feature and which is found only on the highest grade vehicles made.

OUR ACME STORM SHIELD.

SHIPPED FROM CHICAGO OR FACTORY.

This storm shield is the best of its kind on the arket and cannot be duplicated anywhere at our ice. It is extremely popular with our trade and most every customer who orders a buggy pur- ases one of these storm shields to be used with . It will fit perfectly, is neat, and gives abso- te protection from cold biting winds as well as lins and blizzards. It can be easily attached or tached without the use of tools. It is fitted ith large celluloid window, permitting an unob- tructed view of the road. It is made of good ality rubber and can be attached or detached in ss than a minute and folded so that it can be rried under the seat. We can furnish this orm shield on any of our top buggies for $1.95 xtra. If you do not order a buggy at the same me, be sure to state width of dash and distance etween bow sockets. When you order be sure give this catalog number.

No. 11H21 Acme Storm Shield. Price $1.95



DIAMOND GUARANTEED RUBBER TIRES.

We are furnishing this year the Famous Diamond Solid Rubber Tires. The Diamond tire is recognized as being one of the best automobile tires, both in the solid and pneumatic styles. We consider it to be one of the very best rubber tires made, and place on it our strongest guarantee. We recommend solid rubber tires as they will give better service than the cushion rubber.

SOLID RUBBER TIRE

DIAMOND GUARANTEED RUBBER TIRES.

¾-inch solid rubber tires in place of steel tires. Price.. **$10.80**
⅞-inch solid rubber tires in place of steel tires. Price.. **12.10**
1-inch solid rubber tires in place of steel tires. Price.. **15.20**

CUSHION RUBBER TIRE

GUARANTEED CUSHION RUBBER TIRES.

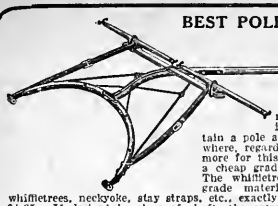
1-inch cushion rubber tires in place of steel tires. Price. **$15.20**
1⅛-inch cushion rubber tires in place of steel tires. Price. **18.90**

UNGUARANTEED SOLID RUBBER TIRES.

Some few of our customers desire to use a cheap tire, and for this reason we furnish an unguaranteed rubber tire at the prices quoted below. Our Diamond Guaranteed Rubber Tires will outwear three sets of unguaranteed tires.

⅞-inch unguaranteed tires..... **$ 9.15**
1-inch unguaranteed tires..... **12.70**

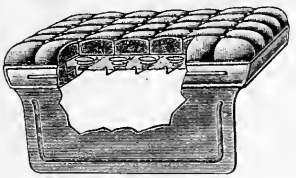
BEST POLE MADE.



We are particularly anxious that you should note the ironing of this pole. It is the best ironed pole made. You positively cannot obtain a pole as neat in appearance and as well ironed anywhere, regardless of the price you pay. We charge you no more for this high grade pole than other firms charge for a cheap grade. It is made of carefully selected material. The whiffletrees and neckyoke are made of the highest grade material. We furnish this pole complete with whiffletrees, neckyoke, stay straps, etc., exactly as shown in illustration, at an extra cost of $4.65. If desired in place of shafts the extra charge is $2.00. Not sold separately; furnished only when ordered with our buggies.

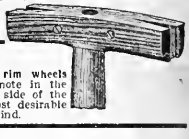
20TH CENTURY TRIPLE BRACED SHAFTS.

We are using the 20th Century Triple Brace Shafts this year, which are coosidered to be the best braced shafts on the market. They are made of the very best material, nothing but the selected hickory being used. They are ironed, as you will see by the illustration, with the 20th Century Patent Shaft Irons which make the connection between the crossbar and shaft arms as solid as though they were one piece. The heel brace, as shown in illustration, with a center brace in the middle of bend, takes all of the strain from the bend of shafts, which is naturally the weak point. We do not see how these shafts could be improved, and as we paint and trim our shafts in the best possible manner, we know we are furnishing shafts that will prove satisfactory.



STAPLE & HANFORD OPEN COIL SPRING CUSHION.

This illustration shows the box spring cushion used on our vehicles where described, which consists of a hardwood frame fitted with Staple & Hanford Resilient Coil Springs so arranged that they cannot become displaced, allowing the cushion to sink in any part. Our spring cushions are built to last and are fitted with more springs than the majority of cushions built.



SCREWED RIM WHEELS.

This illustration shows you the advantage of screwed rim wheels such as are furnished on all our vehicles, as you will note in the descriptions under the vehicles. There is a screw on each side of the spoke which prevents the rim from splitting, which is a most desirable feature; screwed rim wheels will easily outlast any other kind.

CHANGES THAT CAN BE MADE.

The changes as shown below are in addition to those shown under each illustration and can be made on any buggy or runabout when shipped from factory. We can make no changes on buggies when shipped from warehouse. We can, however, furnish the same style buggy as we ship from warehouse from our factory with any changes shown below. When shipment is made from factory, you pay the freight charges from Evansville, Ind.

AXLES—Arched or drop; your choice (on cut under vehicles only arch and bike axles can be furnished).....No extra charge

HOW TO ORDER.

Just give the catalog number of vehicle and price. If any changes are desired, state them in full, being sure to send us a remittance to cover the cost of any changes which are not made free of charge. Above you will see what changes we can make on any of our vehicles. Some, you will observe, can be made at no extra charge, while for others we are obliged to make a small charge to cover the actual factory cost. Be sure to allow this amount if you order the vehicle with any changes which are not free. We cannot cover all changes on this page, but under the illustration of each vehicle you will see any special changes that can be made.

Net weight, about 324 pounds. Shipping weight, crated under 34 inches, about 4 pounds. Shipped from factory at Evansville, Ind.

Twin Automobile Seat Runabout

This is a new 1912 design twin automobile seat. Our handsome sunken panel metal seat was so popular during last season that we have duplicated the design in a wood seat, which we are furnishing on this runabout. While in appearance it is equal to the metal seat runabout shown below, no wood seat made can give the service and last as long as a metal seat, and we therefore recommend No. 11H523 runabout shown below. We, however, guarantee this wood seat runabout to be a first class vehicle, one of the handsomest styles made, and equal in finish, workmanship and materials used to any wood twin auto seat runabout on the market. It is sold under our satisfaction guarantee, which means it must please you and give you satisfactory service always.

Wood Seat Sunken Panels

WRITE FOR CATALOG OF PONY VEHICLES

WE SHOW A FULL LINE OF PONY RUNABOUTS, CARTS AND TRAPS IN OUR SPECIAL VEHICLE CATALOG, WHICH WE WILL BE GLAD TO SEND YOU FREE.

Twin Automobile Metal Seat Runabout

This is the world's most popular runabout. We sold more of this one style runabout last year than was ever sold of any other one style runabout by any other concern. For 1912 we have changed the design of the dash and the lines of the seat, making it a little more graceful and handsome. We are using now a heavier gauge metal, the same weight as is being used by the automobile manufacturers, and we guarantee this seat to stand up for the life of the vehicle. It cannot open at the corners, and we are able to get a nicer and classier finish than on the ordinary wood seat. This is the runabout that we recommend, as it is strictly high grade throughout and one which we would be glad to have you compare with any other runabout on the market, regardless of price. It cannot be duplicated elsewhere for less than $65.00.

TWIN AUTO SEAT BUGGY

Heretofore twin auto seat buggies have been furnished only in the best grades and at prices ranging from $60.00 up. We have found that there is considerable demand for a cheaper buggy with this popular style seat, and we are therefore furnishing this season one of our medium grade buggies with a new design twin auto seat, at the heretofore unheard of price of $44.95. The twin auto seat which we use on this buggy is made of wood and is of a very handsome design; equal to any on the market, with the exception of our new 1912 sunken panel styles furnished on our higher priced buggies. While we strongly recommend that you buy one of the higher grade buggies listed in this catalog with twin auto seats, and especially recommend the Metal Seat Buggy No. 111T20, which is illustrated and described on pages 1203 to 1206, which we can ship immediately from any one of thirteen different cities throughout the United States, at the same time if you do not feel that you want to put as much as $59.90 in a buggy and you want to get a twin auto seat buggy which is strictly up to date, we can highly recommend the buggy shown on this page as being a first class job which will compare very favorably with buggies selling at $60.00 to $70.00. We will be glad to ship this buggy to you on thirty days' trial, with the understanding that you can return it and get your money and freight charges back if you do not find it satisfactory in every way.

912 Model Twin Auto Seat Buggy

Sunken Panels

This is one of our most popular twin auto seat buggies, of ich we have sold thousands. For 1912 we are equipping it h a new design sunken panel wood twin auto seat, which consider one of the handsomest twin auto seats ever gned. In appearance it is an exact duplicate of our Metal in Auto Seat furnished on No. 11H720, illustrated and cribed on pages 1203 to 1206. We strongly recommend that select the metal seat buggy, as there is no doubt but that metal seat is in every way superior to the wood seat, but you wish a wood seat twin auto buggy, you can make no stake in selecting this one, as we guarantee it to be equal any wood twin automobile seat buggy on the market, and t if you purchase it you will save anywhere from $15.00 to 00.

Freight Charges Are Very Small

IMMEDIATE SHIPMENT.

We can ship one of these buggies from a city near you and you will receive it within a very few days after you send us the order. You will only have to pay the freight charges from the city near you. This will be a very small amount indeed, as compared with what you will save by ordering the buggy from us.

~~$61.75~~ —Price Reduced— $59.90

Our new 1912 model of the Metal Twin Automobile Seat Buggy is better and a bigger value than ever. This buggy is the most remarkable vehicle ever marketed by any concern. There are more of this one style top buggy in use throughout the United States than any other buggy ever sold by any concern. Since featuring this Twin Auto Seat Buggy as our leader three years ago we have sold over 30,000 of them. Each year we have copied the latest Eastern styles and have improved the buggy wherever it was possible to do so. We wrote letters to our customers asking for suggestions as to where the buggy could be improved and received much valuable advice from them. This buggy is the result of three years of conscientious effort to turn out a buggy equal to the very best, equal to the highest priced vehicles on the market, one having all the latest features and right up to date in every respect.

Why We Are Able to Reduce the Price.

We sold nearly 12,000 of this one style buggy in the season of 1911, and are basing our prices this year on turning out 16,000. The factory has gone out and bought raw materials and fixtures for this number. Just think of it, buying 16,000 sets of axles all of one kind, 16,000 sets of bow sockets all of one kind, 16,000 sets of springs all of one kind, 16,000 sets of tires all of one kind, and so on. This was no doubt the biggest order ever placed for parts of just one style top buggy, and consequently they were able to secure very marked reductions in price over what they paid last year. They combined this order with their order for 50,000 parts for the other vehicles which they build, thus making an order twice as large as that given by any other concern. This is one of the reasons why we are able to make the remarkably low price on this high grade top buggy. The other reason is that by building so many of these buggies all of one kind, the factory is able to very materially reduce the manufacturing cost of labor. By close figuring we think that we will be able to save nearly $2.00 in the manufacture of this buggy for the season of 1912, and as it is always our policy to give our customers the benefit of any saving we can make, we are this year offering this buggy, the world's most popular style, at $59.90 instead of $61.75, the price obtained for it during the season of 1911.

Buy a Metal Seat Buggy.

The metal seat used on this buggy is without question the most durable seat ever built for a buggy. Out of 12,000 seats which we used last year we had less than one dozen rejected. Think what this means, that out of 12,000 seats less than twelve customers who received buggies equipped with these seats could find anything whatever wrong with them. Out of 12,000 ordinary wood seats any manufacturer would feel extremely lucky if he didn't have trouble with 100 seats, and by this we do not want to infer that wood seats do not give satisfactory service. Most of them do, but it is impossible to build a wood seat so that if it is subjected to the weather and at all abused, it will not come apart at the corners or loosen at the sills. It is impossible for such a thing to happen with the metal seat, as it is one solid piece of metal over a wood frame. Be sure to refer to the picture on page 1206, where we show just how this seat is made.

Look at the Colored Picture on Page 1205.

On page 1205 we reproduce a photograph of this buggy in colors, showing you just exactly how it looks when furnished with red gear. On page 1204 we give full specifications showing you just exactly how the vehicle is made and just how it is equipped as carried in stock in the different cities named throughout the country. You will note that we can furnish either black or red gear and either steel or solid rubber tires. If you want other changes made in the specifications, we can furnish them for you by shipping direct from the factory at Evansville, Ind., in which case you would pay the freight from that point.

Make the Comparison.

We would very much like to have you order one of these buggies and then compare it with similar buggies sold by your dealer. Compare our 37-inch French head springs with those on his buggies, compare the patent leather shaft point leathers, the Bradley couplers, the body loops, the dash, the quality of the upholstering, the quality of material used in the top, the painting and finish and the general appearance of the buggy, take a ride in this buggy of ours and then take a ride in your dealer's buggy. After you have made all the comparison that you possibly can make, if you do not think that we have sold you a better buggy than you can buy from your dealer at any price, if you do not think you have saved $20.00 to $30.00, if you are in any way dissatisfied with your purchase, we want you to send the buggy back to us, and we will send you back whatever you have paid for the buggy, also whatever you paid for freight. There will be no argument about it. You will be the sole judge. We satisfied 12,000 customers with this buggy last year and we have no doubt of our ability to satisfy you as well. Surely we would not make this open offer and ask you to compare it with any buggy sold by your dealer and give you the privilege of returning the buggy to us at our expense if not satisfied, if we did not know that we are furnishing a much better buggy at a big saving in price.

The Twin Auto Metal Seat Buggy Is Shipped From The Cities Named Below

Be sure to read over carefully the specifications given under the name of the city nearest you, and when sending your order be sure to state whether you want black or carmine gear, steel or rubber tires. General Description of Our 1912 Metal Auto Seat Buggy

Be Sure to Refer to the Detailed Specifications on Our Buggy in the Warehouse in the City Nearest You.

SEAT—Metal automobile seat, made of the same gauge metal and in the same manner as the high grade automobile seats used on Packard, Pierce-Arrow and other high grade automobiles. Back and sides have sunken panels, as shown in the small illustration on opposite page. The metal seat takes a much finer finish than the wood seat and is superior to it in every respect. The handsomest and most durable seat ever used by any manufacturer on a top buggy. Corners are clinched, clamped and brazed, making it impossible for them to open. We guarantee this seat to give absolute service and satisfaction in every respect or we will replace it without any charge whatever. This seat is especially comfortable, measuring full 32½ inches across top of cushion by 17 inches deep. You never saw an automobile with a narrow seat. An automobile is made for comfort. Why not so with a buggy? We are giving you a wide comfortable seat on this buggy.

UPHOLSTERING—High grade extra quality genuine leather; open box spring cushion; back padded and tufted over coil springs, making it very easy and comfortable; seat ends padded and lined; brass buttons.

BODY—Highest grade buggy body; guaranteed equal to the best bodies furnished on the highest priced top buggies; panels made of selected poplar and are convex, giving the swell effect so much admired in high grade top buggies. We build these bodies ourselves and know exactly what material is used; we guarantee them to give absolute satisfaction and will replace any one which gives out because of defective material or workmanship. The sills are made of hardwood stock with watershed bead; corner posts, bottom boards and seat house are of hardwood, glued and screwed; body panels are glued, screwed and plugged to frame; seat risers are concave; three-prong steps.

TOP—Auto style skeleton top, same design as is being used on all high grade automobiles. Entire top is covered with Chase automobile leather, which is a special fabric similar to genuine leather, extensively used in automobile tops; absolutely waterproof; bows are covered and top reinforced by straps on inside, as shown in small illustration. Top is extra long; has extra deep quarters, copied from the highest priced Eastern top buggies; extension joints; our own design shifting rail, which permits top being taken off in less than a minute's time; three or four-bow, with black enameled bow sockets, according to the warehouse from which shipment is made; special auto style back stays; brass rim oval back curtain light; four roll up straps; brass curtain fasteners; reinforced waterproof side curtains with large celluloid side lights.

GEAR—15-16-inch long distance true arched axles with wide washer bearing, fitted with full length hickory axle caps, sanded, cemented and clipped to axles with diamond clips; full wrought 12-inch fifth wheel, the best possible to buy; 37-inch French bead French point oil tempered elliptic end springs, easiest riding and best quality springs possible to buy, three-plate front and four-plate rear (these springs are the same as those used on the highest priced top buggies; note that other buggies are furnished with 35-inch and 36-inch springs); springs are clipped to our celebrated center bearing body loops, front and rear, guaranteed never to break; double selected hickory reaches, ironed full length; heavy wrought iron braces; strongest and most substantial gear possible to manufacture.

WHEELS—Selected second growth hickory. Our own manufacture. Guaranteed to be equal to wheels used on the best grade buggies. We will replace without expense to you any wheel which gives out or does not give perfect service. ⅞-inch or 1-inch screwed rims, according to warehouse from which shipment is made; ⅞-inch rims have 1x1¼-inch oval edge tires; 1-inch rims have 1⅛x5-16-inch oval edge tires; tires bolted to rims between spokes; boxes are set true to rims by hydraulic pressure; all wheels guaranteed to track and run true; 39 inches front and 43 inches rear.

SHAFTS—Highest grade selected second growth hickory; shafts trimmed with round straps; patches on shafts and crosshar; 36-inch patent leather points (note that other buggies are furnished with 22-inch or 30-inch patent leather points); the 36-inch points extend back to the holdback strap and protect the paint, and give the shafts a very fine appearance.

PAINTING—Body, black; gear, carmine red or black, striped. **Be sure to state which you want.** These buggies are painted in the best possible manner and the paint is guaranteed in every respect. Our finish is equal to that on the highest class top buggies.

TRACK—4 feet 8 inches narrow or 5 feet 2 inches wide, according to the warehouse from which shipment is made. See above.

SUNDRIES—Braced padded patent leather wing dash with brass line rail; boot; full length automobile rubber mat; extra large waterproof storm apron; Bradley quick shifting shaft couplers.

Net weight, about 360 pounds. Shipping weight, crated under 34 inches, about 500 pounds.

1912 Model Twin Automobile Seat Buggy

Metal Automobile Seat

The World's Most Popular Buggy Over 30,000 in Use

$59.90

THIS BUGGY SHIPPED IMMEDIATELY FROM

Kansas City, Mo.	Milwaukee, Wis.
Wichita Kan.	Grand Rapids, Mich.
Omaha, Neb.	Columbus, Ohio
Waterloo, Iowa	Buffalo, N. Y.
St. Paul, Minn.	Albany, N. Y.
Fargo, N. Dak.	Harrisburg, Penn.
Evansville, Ind.	

SEE THE TWO PRECEDING PAGES FOR DESCRIPTION AND PRICES.

This is a Two-In-One Buggy. By means of our own special pattern shifting rail the top can be removed in less than a minute's time, changing the buggy to a runabout and without leaving any unsightly top irons sticking out on the seat.

No. 11H720

This illustration shows the seat and top with one side curtain on it, to show the large mica light in the side curtain.

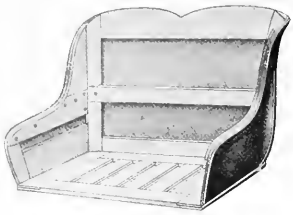
Be Sure to Read All About the Special Features of This Buggy on the Next Page.

This illustration shows the rear view of the sunken panel metal seat. It is by far the handsomest and best finished seat furnished on any top buggy. It is constructed the same as seats used on the highest priced automobiles.

Special Features Furnished on Our 1912 Twin Automobile Seat Buggy

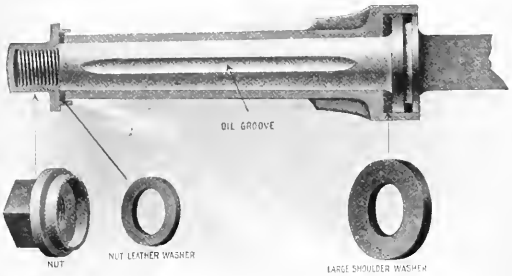
Every improvement known to modern buggy building has been incorporated in the construction of this remarkable buggy. We w to call your attention to a few of these features as illustrated and described below.

We guarantee this metal seat to be superior in appearance, finish and wearing qualities to any wood seat ever built.



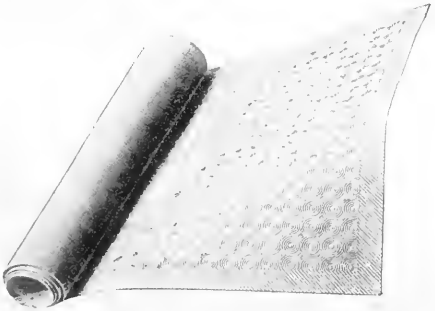
We will replace free any metal seat which does not give satisfaction for any reason whatsoever.

This illustration shows the inside construction of our metal seat. Please note the heavy wood frame. This frame is covered with extra heavy 20-gauge sheet metal, which is formed and pressed to shape under immense hydraulic presses. The metal on this seat is absolutely solid and there is no possible chance of the seat opening up at the corners or at the sills. It presents an absolutely smooth surface and takes a finish like that on a piano. It is by far the most handsome and substantial buggy seat ever built.

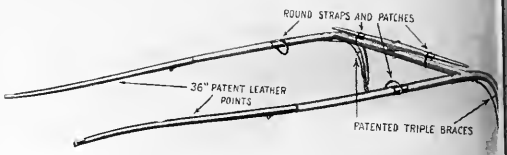


This illustration shows the long distance axle which we use on this 1912 model buggy. Note the wide washer bearing. This axle is made for us by the famous Sheldon Axle Co. and is the same as is used on the highest priced Eastern buggies.

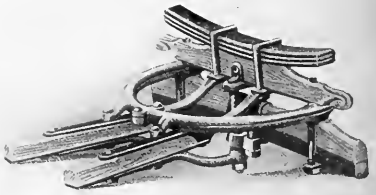
This illustration shows how the axle beds are clipped to the axles. Each bed is turned to exact shape and size and then is glued and clamped to the axle, as shown in the picture. When the glue has set absolutely tight, a clip is placed where each thumb-screw shows in the picture, and is firmly bolted on. The entire axle and bed is then carefully sanded and smoothed. When the axle is painted and finished it is impossible to tell where the axle bed and the axle meet, they look like one solid piece. Note this when you receive your buggy. It is just one indication of the fine workmanship which we use on this buggy all the way through.



This illustration shows the long automobile rubber mat which is furnished regularly with this buggy. This mat is much superior to the carpet used in ordinary buggies, and will last much longer. Can be easily washed. While it costs more than carpet, we believe it is much more desirable, and we are therefore furnishing it regularly with this buggy at no extra charge.



This illustration shows the new 1912 improved Twentieth Century shafts. We to call your special attention to the patented triple braces, to the 36-inch long pa leather points and to the round straps and patches. These shafts are XXX hickory. would not get a better pair of shafts if you paid $150.00 for a buggy.



This illustration shows our 12-inch wrought fifth wheel with wood head block is the best fifth wheel possible to buy. Guaranteed never to break.

This illustration shows our 37-inch French head French point springs, the best s possible to buy. The ordinary buggy has 35-inch open or button head springs. By these springs we assure you a very easy riding vehicle and an absolute guarantee a breakage.

OLD STYLE BODY LOOP.

OUR CENTER BEARING BODY LO

Bearing on Top of Spring. Allows Easy Sty That Bea Working of Spring. Connection.

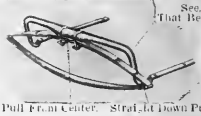


Illustration to the right shows one of the special features found on this buggy, a that is the center bearing body loop. Please follow the dotted lines as shown in illus tion, and read the notice made in small type. This center bearing body loop puts all strain on top of the spring where it belongs, and is the only body loop that does, and much more handsome body loop than the old style round kind. We originated this cen bearing body loop at our factory in Evansville, Ind., since which time it has been wi copied, and now the majority of the leading manufacturers use it. We consider it compliment to our originality and ingenuity.

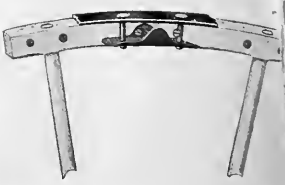
This illustration shows a section of our screwed rim wheels and how the tires are bolted to the rims with extra long bolts running through felloe plates. We use the best grade wheels on this buggy, equal to those used on the highest priced Eastern buggies. A letter or a number can no longer be taken as an indication of the quality of a wheel, because of some unscrupulous manufacturers grading as No. 1 or "A" grade, wheels which if properly graded would not be even "D" grade. What we want to impress upon you is that we guarantee the wheels on this buggy to be made of the best grade selected hickory stock, selected by our own lumber buyers, and that the wheels are made in our own wheel factory under our own super vision. If they are not absolutely right it is our fault and we will make them right We place a guarantee on these wheels which absolutely protects you. They are equa to the very best. Read the guarantee on page 1192.



ent Auto Seat Surreys

No. 11H1422

The seats which we use on these surreys are full bent, that is, there are no corners; each seat is made of one piece of wood, steam bent; they are practically indestructible. The design of these seats is new for 1912 and we consider them as handsome as anything on the market. These full bent seat surreys have always been very large sellers and very popular. They cannot be duplicated from any other source for less than $15.00 to $30.00 in advance of our price. They are guaranteed for life and shipped on thirty days' trial with a guarantee of satisfaction.

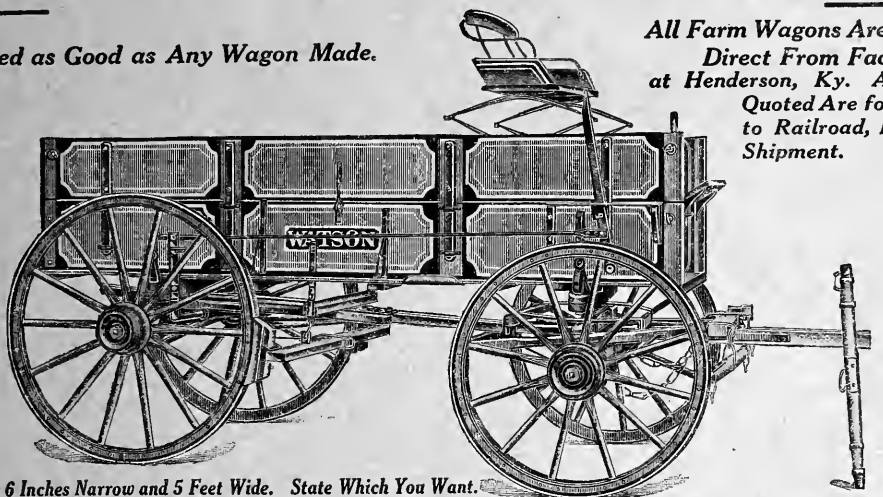
Watson Farm Wagons

aranteed as Good as Any Wagon Made.

All Farm Wagons Are Shipped Direct From Factory at Henderson, Ky. All Prices Quoted Are for Delivery to Railroad, Ready for Shipment.



ack, 4 Feet 6 Inches Narrow and 5 Feet Wide. State Which You Want.

OUR GUARANTEE

We guarantee the Watson Farm Wagon to be as good as any farm on made. We use nothing but the very best of material and allow thirty days' trial in which to decide whether our wagons are satisfactory. We will ship you any style wagon you may select and allow to use it under any conditions for thirty days; at the end of that if you do not feel perfectly satisfied with it, if it is not the style gon you need, you can return it to us and get back the purchase price the wagon together with any freight charges you may have paid.

Construction of Watson Wagons

WHEELS—All material used in our wheels has been thoroughly seasoned from three to five years; white oak spokes and rims; Pennsylvania black birch hubs. Tires are made of the best grade of steel and are standard width and thickness, properly set according to the most modern methods. Boxings are set in red lead under hydraulic pressure. Rims are riveted; tires are bolted to rims. Sectional rims furnished on all farm wagons unless otherwise specified. We will furnish two-piece bent rims if so desired. Wheels are dipped in boiled linseed oil before being ironed. Wheels guaranteed to be as good as wheels on any farm wagons. We regularly furnish wheels 44 inches front and 52 inches rear, but can furnish wheels measuring 40 inches front and 44 inches rear, if so specified.

AXLES—Second growth bone dry hickory, the best that money can buy. Each axle is shaped on automatic machinery to fit the skeins which are used on it, making an absolutely tight fit, preventing and insuring against moisture getting between the skein and axle. Watson steel skeins have a solid extension back of the collar, which keeps the grease from working out on the axle. All skeins have extra large bells and there is more of the wood axle left inside the skeins than in any other skeins on the market. They are set in red lead under hydraulic pressure and are guaranteed not to come loose. They are level bearing so that the weight of the load is distributed the entire length of the skein. All axles are dipped in boiling linseed oil before being ironed.

GEAR—All gear woods are thoroughly air seasoned and bone dry. Nothing but second growth oak is used in the construction of the gear. All wood parts are dipped in boiled linseed oil before being ironed. Very few bolts are used on the gears; we are using the clipped construction of gear, which not only does not weaken the gear woods but helps to support them. Square hound drop tongue front gear furnished on all wagons unless otherwise specified. Square hound gear is superior in every way to the old style bent wood hound and will last longer and give better service. We will furnish stiff tongue square hound front gear on any style wagon if so desired at no extra charge.

POLE—The pole used on our Watson Wagons is heavier than is generally furnished, heavily ironed and well braced; singletrees ironed full length and extra heavy irons used on neckyoke and doubletrees. Nothing but the best of hickory and oak used in these parts.

BOX—We are using nothing but "Old Hill Poplar" for our wagon box sides, thoroughly air seasoned and guaranteed not to warp, split or check; yellow pine floor, matched and grooved. Stake and strap plates on outside of box; double bottom over bolsters; box fastener on each side and an anti-spreader chain. Box is guaranteed to be the best wagon box made.

PAINTING—We paint our wagons in the best possible manner, using a coat of priming lead, color, color varnish and finish. Boxes are painted green with black and red trimming. Gear is painted bright red with black stripes.

HOW TO ORDER.

All that is necessary in ordering a wagon from us is to give us the catalog number, as shown below, and track and we will ship you a wagon just as described. If there are any changes to be made be sure to state them on your order and send us proper amount of money for any extras you may need. Be sure to give us the width of track used in your section of the country.

OUR GIANT HANDY WAGON

$22.80

REGULAR GUARANTEE. See Page 1192.

This metal wheel wagon is furnished on different heights of wheels, as shown in the table opposite. When on wheels 26 inches front and 32 inches rear, the top of bolsters are only 26 inches from the ground, making it a very handy wagon for loading. Axles are made of the best hickory; bolsters, coupling pole and tongue are made of the best oak; stakes are oak, bound with flat iron. Coupling pole is 9 feet 4 inches long and if wanted can be furnished 12 feet long at the same price. Front and rear hounds are of angle steel, almost indestructible, and the wheels are the best metal wheels made. Spokes and tires are made of the best wrought steel, guaranteed not to break on the rockiest roads. Hubs are made of superior cast iron, cast on to the spokes, making an almost one-piece construction, and we guarantee the spokes never to become loose in the hub. This wagon with its broad tires is handy in the field and over soft roads, and is guaranteed fully by us. Comes with either 4 feet 6 inches, narrow, or 5 feet, wide track. **Do not fail to state width of track desired.**

NOTE—4,000-pound capacity wagons have 3¼x10-inch skeins and tires ⅝ inch thick; 6,000-pound capacity wagons have 3½x11-inch skeins and tires ½ inch thick; 8,000-pound capacity wagons have 4x12-inch skeins and tires ⅝-inch thick. Shipped from Northern Illinois factory.

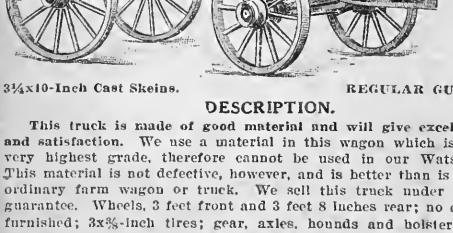
Low Wood Wheel Farm Truck

$31.50



3¼x10-Inch Cast Skeins. REGULAR GUARANTEE.

DESCRIPTION.

This truck is made of good material and will give excellent service and satisfaction. We use a material in this wagon which is not of the very highest grade, therefore cannot be used in our Watson Wagon. This material is not defective, however, and is better than is used in the ordinary farm wagon or truck. We sell this truck under our regular guarantee. Wheels, 3 feet front and 3 feet 8 inches rear; no other height furnished; 3x¾-inch tires; gear, axles, hounds and bolsters are made of good quality material, guaranteed against defect. Square hound drop tongue front gear furnished regularly. This truck is well painted and finished; painted deep red with black stripe; varnished. Track is 4 feet 6 inches narrow or 5 feet wide, measuring from center to center of tires. **State width of track wanted.** Capacity, 3,000 pounds. Weight, 650 pounds. Shipped from factory.

Extra Farm Wagon Boxes

$11.60

This is a REALLY GOOD BOX, not to be compared with other low priced boxes.

This is a good substantial Farm Wagon Box, made with yellow pine bottom, thoroughly seasoned Southern gum sides. Furnished complete with Comstock patent endgate, side box fasteners, grain cleats and spreader chain.

DESCRIPTION.

Hardwood cross and bolster cleats; double bottom bolted over rear bolster; double edge irons on top of sides and ends, ⅝-inch box straps, ⅓-inch side braces, 7-16-inch end rods. Painted two coats green paint, striped white, black and yellow; varnished. Top box fitted with hardwood cleats on each side. All outside cleats are securely nailed and riveted at both ends, thus avoiding any danger of cleats becoming loose from pressure of endgates. Shipped from factory.

PRICE.

ADDLES

We guarantee to furnish you a better saddle for less money than you can possibly get elsewhere. Our saddles are strictly high class, thoroughly well made, guaranteed in every way and our prices are lower than the wholesalers' or jobbers', very much lower than the retail

ers' prices. Our line of stock saddles is especially adapted for Western and Southwestern e and all parts of the United States where they use heavy stock saddles; they are the igest and handsomest saddles it is possible to produce.

R STOCK SADDLE TREES are guaranteed against breaking. If the tree should break in roping cattle or doing other t, you can send the saddle back to us and we will replace it with a new tree without expense to you and pay the transportation charges both ways, or we will send you a new he. We know that the trees we use in our stock saddles are built to last and stand any unt of hard usage and we therefore positively guarantee them against breaking.

HORSE COLLARS

No. 10H3694¼ 75c

No. 10H3677¼ 39c

No. 10H3693¼ 25c

HOW TO MEASURE HORSE COLLARS: Take a rule and measure inside of collar from top to bottom on the rim or front of the collar and the inside measure will be the size you want. Measure around the heaviest part of collar for size of draft. Our draft measurements are given on 20-inch size collars. Smaller sizes will not measure as much and larger sizes will measure more. **BE SURE TO STATE SIZE WANTED.** Sweat Pads should be one size larger than the collar. Lay the shoulder part of the collar in about 3 inches of water for 6 to 8 hours, then buckle on the horse and be sure the hames fit the collar well. Work the horse for half a day and the collar will never make the shoulders sore and will always fit the horse. If you want extra large collars, over 22 inches, order Nos. 10H3399¼, 10H3443¾, 10H3452¼, or 10H3453¾. We carry 23-inch and 24-inch of these four collars in stock.

No. 10H3399¼ A Southern Plow Collar, made of heavy cotton duck with leather chates on the side where the chain or trace attaches to the hame. Leather pad, heavy canvas weld. This collar is used throughout the South, a good plow collar. Sizes, 17 to 22 inches inside measurement. Draft, 14 inches. State size wanted. Weight of collar, about 5 pounds. Price, each..... **55c**

No. 10H3402¼ Our Cheap Farm Collar, made with a split rim and shoulder and heavy cotton duck face. One of the best heavy split leather and canvas collars we make, used largely throughout the South and Southwest for a cheap farm collar. Sizes, 17 to 22 inches. Draft, 13 inches. **Be sure to state size wanted.** Weight of collar, about 4½ pounds. Price, each..... **80c**

No. 10H3404¼ Our Baker Face Split Rim and Shoulder Collar. This style collar is very popular for around the farm collar. Extra good hame room, thong sewed, with patent collar fastener on top with good heavy leather pad. Sizes, 17 to 22 inches. Draft, 15 inches. **Be sure to state size wanted.** Weight of collar, about 4½ pounds. Price, each..... **$1.06**

No. 10H3407¼ Our Light Weight Buggy Collar, full top rim and shoulder, buckle top. Made in sizes 17 to 22 inches. Draft, 10¼ inches. Be sure to state size of collar wanted. Weight, about 3½ pounds. Price, each..... **$1.60**

No. 10H3409¼ Is Our Fine Turned Edge Gig Weight Buggy Collar, made of best kip leather, turned edge shoulder and large draft. Buckle top. Sizes, 17 to 22 inches. Draft, 11 inches. Be sure to state size of collar wanted. Weight, about 4 pounds. Price, each..... **$1.95**

No. 10H3413¼ Our Open Throat or Coupler Collar, made with buckle fastened on top, heavy sole leather pad and iron coupler at bottom. Collar is held together by the hame strap running through the loop on coupler. The best bark tanned collar leather, black shoulder and rim, and russet leather face. Heavy thong sewed shoulder and rim. Sweet pad is easily used on this style collar. Both metal pad and collar open at the throat. Sizes, 17 to 22 inches. Draft, 14½ inches. **State the size wanted.** Weight of collar, about 7 pounds. Price, each..... **$2.85**

No. 10H3417¼ Good heavy black split leather rim and shoulder collar russet leather face, thong sewed rim and shoulder, patent collar fastener on top, heavy collar pad. For common light farm work this collar will give as good service as higher priced collars. Sizes, 17 to 22 inches. Draft, 14½ inches. State size wanted. Weight, about 6 pounds. Price, each..... **$1.95**

Full Kip Leather Farm Collar or Light Weight Express Collar. Two sizes, 13½-inch draft and 14½-inch draft. Rim, shoulder and face bark tanned leather, full thong sewed rim and shoulder; wear leathers on the side of the collar to prevent hame tug from wearing the collar. Sizes, 17 to 22 inches. **Be sure to state size wanted.** Weight, about 5½ pounds.

No. 10H3421¼ 13½ inch draft. Price, each..... **$2.40**

No. 10H3422¼ 14½-inch draft. Price, each..... **2.54**

No. 10H3448¼ This collar is universally used in all parts of the country. Extra heavy Dundee bark tanned collar leather, buckle top, heavy sole leather collar pad. Heavy thong stitched rim, double thong ribbed laced throat, and wide ribbon thong laced shoulder. Half Sweeny pattern and just the style collar to use on horses with thick necks or large shoulder blades. Sizes, 17 to 22 inches. **State size wanted.** Collar is made extra heavy; 15½-inch draft in the widest part, and weighs about 7½ pounds. Price, each..... **$3.35**

No. 10H3449¼ Dundee bark tanned collar leather, thong stitched rim, wide ribbon thong laced shoulder, buckle top, heavy pad. Sizes, 17 to 22 inches. Draft, 13½ inches. **State size wanted.** Weight, about 6½ pounds. Price, each..... **$2.70**

Williams' Throatless Collar.

No. 10H3451¼ Heavy Dundee bark tanned collar leather, double thong sewed rim to the shoulder, and wide ribbon thong laced shoulder. The throat of the collar is built of leather, not stuffed, making a strong throatless collar. Buckle top, heavy pad. Sizes, 17 to 22 inches. Draft, 15½ inches. **Be sure to state size wanted.** Weight, about 7¾ pounds. Price, each..... **$3.40**

No. 10H3429¼ Wide, heavy top, heavy sole leather collar pad, wide flange, wide draft, half Sweeny pattern, so the hames will not hurt the horse's shoulder. Is just the kind of collar to use on horses with thick neck and heavy shoulders. Thong sewed rim and shoulder; the flange on the collar is double and stitched and makes it look like a full shoulder collar when looking at it from front of collar. Sizes, 17 to 22 inches. Draft, 15 inches. **Be sure to state size wanted.** Weight of collar, about 6 pounds. Price, each..... **$2.98**

No. 10H3439¼ Our Heavy Double Stitched Rim Draft Collar. Curled hair face shoulder. Made of extra heavy Dundee bark tanned leather, wide rim and heavy harness leather shoulder, double thong stitched rim and thong laced shoulder. Wide flange, shoulder extra heavy, wide draft, buckle top collar. Collar being made with curled hair face adjusts itself to the horse's shoulder. Horse will never have sore shoulders if this collar is used. Sizes, 18 to 24 inches. Draft, 16 inches. **State size wanted.** Weight, about 8½ pounds.

Price, each, 18 to 22 inches..... **$3.56**

No. 10H3677¼ "Triplex" Sweat Pad. Strong, dependable sweat collar pad for heavy work. Free circulation between the horse's shoulder and collar. When soiled wash or scrub with soap and water and dry in the sun. "Triplex" sweat pads do not chafe the horse. Cooling and smooth surface, less heat and friction. Sizes, 18 to 24 inches. Draft, 10 inches. State size. Weight, about 16 ounces. Price, each, for one horse..... **39c**

No. 10H3693¼ Our Special Sweat Pad, made of old gold drill, well stuffed with composite stuffing, four rows of quilting, four hooks, open at bottom, extra wide 12-inch draft; will fit large collars. Not as good as our Curled Hair Pad No. 10H3694¾. Sizes, 18 to 24 inches. **Be sure to state size wanted.** Shipping weight of pad, 58 ounces. Price, each..... **25c**

No. 10H3694¼ Curled hair goods are very healing to a horse with sore shoulders. The pad is springy and cool and the curled hair stuffing does not get hard, therefore prevents gall sores. With proper care the pad will outwear five ordinary cheap sweat pads. To get good service out of this curled hair pad it should be washed every two or three weeks, scrubbed with a brush and soap. Rinse thoroughly and, if possible, dry in the sun. This cleanses and makes the pad practically as good as new. Size, 12-inch draft. Blue top and white face; four rows stitching. Shipping weight, about 50 ounces.

Price, each..... **$0.75**

Price, per dozen..... **8.40**

Dundee Oak Williams' Special Made Two-Horse Lines. Three-Row Stitching in Each Lap.

$3.93 $4.17 $4.41 $4.64

These lines are made out of the very best selected Dundee bark tanned line leatbor. The straps are cut extra heavy, the laps are sewed with heavy thread and three-row stitching in each lap. Roller buckles and leather loops at billet, round center bar buckles will not catch in fly net. Positively the best team lines on the market. The weight of stock used in these lines and being made full length and not cut short as the ordinary lines are, make them the best lines you can buy. Made in two lengths only, 18 and 20 feet, 1 inch and 1¼ inches wide and measuring full length, not 8 or 10 inches short as most all lines are. Remember, these are not the cheap light lines, but are extra heavy and the best that can be made.

No. 10H2169	1	in. x 18 feet.	Weight, about 4½ pounds.	Price, per pair..	$3.93
No. 10H2171	1	in. x 20 feet.	Weight, about 4½ pounds.	Price, per pair..	4.17

Novelty Trimminge for Harness and Buggies.

The overcheck loop and check spring are very handy on the overcheck of bridles. They prevent the breaking of the overcheck when the horse stumbles. The whip holder can be fastened on the buggy top or nailed in the barn. The line guard fastens on the hip strap without punching a hole in the hip strap and keeps the lines from going under the horse's tail. The trace spring is fastened with a staple on the singletree and keeps the traces from falling off. This is the best trace fastener on the market. Shipping weight, about 2 ounces.

Illiams' Special Hand Braided Bars, Strings Braided in Bars.

The strings are braided in the bars so they will not slip or pull through the bars. The bars are hand braided, which makes them very strong, and they will lie down flat on the horse's back. The strings are close enough together to keep the flies off the horse's legs. Braided end bars on each side of the net. Braided breast plate with snap to snap around the horse's breast. This net has a 5-foot body with breast piece extra; fills the average size horse. This style of net, with hand braided cotton bars has one of the largest meshes of any team cord net on the market. Nets similar to this with strings not so long are generally sold for $5.00 to $6.00 per pair for two horses. The cords in this net are 6-ply fish cord, very strong, well made, twisted string. The hand braided bars are black and gold color, with gold and black strings. Weight, about 3 pounds.

Our Seventy-String Harvest Team Net.

Made with 9-foot cotton cord stripes and 5-foot solid leather bars. You buy this net with heavy solid leather bars as cheap as you can buy a net with pieced leather bars and short strings from your dealers. This net is worth 75 cents more than a pieced bar short string net for which you will have to pay from $1.75 to $2.00. The bars are double, with the cord strings placed between the bars and well fastened with wire staples. The top and bottom bars being solid throughout, not pieced, make it one of the best and strongest cord nets on the market. Weight, 4½ pounds.

No. 10H9113 Price, one net for one horse.....$1.95
No. 10H9114 Price, two nets for two horses..... 3.95

$500,000.00 Worth of Mill Work READY TO SHIP

We Guarantee the Quality—We Guarantee Safe Delivery
We Guarantee a Big Saving On Each Order

Read this announcement and then turn to pages 1148 to 1152 for the greatest building material bargains your money can buy. You can purchase doors, windows, door and window frames, moldings, porch materials, stair work, blinds, colonnades and grills from us at **manufacturers' prices**, with but one small profit added. The prices shown on this page will give you some idea of the saving we can make you, which is from 25 to 35 per cent on materials that are guaranteed to be the very best of their kind on the market.

You can get everything you need in the building material line from us in a few days after we receive your order. We can make 1,500 doors and 5,000 windows a day. We have always on hand 75,000 doors and 100,000 windows ready for immediate shipment. We carry everything in millwork in the same big quantities and as this big stock is constantly moving **from the factory to the consumer** our products are always **fresh, clean and perfect in every way.** More than 700 people at our great mill work factory are there to serve our customers. We can ship a complete house bill inside of forty-eight hours. By our method of packing, crating and boxing our mill work we insure its arrival at destination without a stain or scratch. If you do not find what you need on pages 1148 to 1152 write at once for our Special Building Material and Mill Work Catalog, which will be mailed to you free and postpaid upon request. It illustrates, describes and prices upwards of 5,000 building material bargains.

MILLIONS OF PEOPLE ORDER GOODS FROM THIS BIG CATALOG. PROBABLY YOU ARE ONE OF THEM. ARE YOU AWARE OF THE TREMENDOUS VALUES ON PAGES 1148 TO 1152.

If not you are not getting the full benefit of our great money saving catalog. We want you to know that it is easy to save $25.00, $50.00 or $100.00 if you have any repairing or remodeling to do on your buildings. You can make up your order from our building material pages in this catalog with the fullest confidence that everything will be entirely satisfactory if you will simply give us the correct sizes and catalog numbers. We guarantee to please you and to make everything just right; other you can ship back the goods and we will return your money, toge with any transportation charges you may have paid. If you are goin build a new house or barn write for our free Book of 110 Modern Ho described on page 1146 of this big catalog.

IF WE CAN SAVE YOU $10.00 ON A SUIT OF CLOTHES AND $25.00 ON A BUGGY WE CAN ALSO SA YOU $50.00 ON A FLIGHT OF STAIRS, $100.00 ON A CARLOAD OF LUMBER AND $500.00 TO $1,000.00 ON A HOUSE.

It is all owing to our method of merchandising. All of the middlemen's and retail dealers' profits remain in your own pocket. Read our announcement on the opposite page; make an investigation of this entire building question on your own account. Send for our Wholesale Lumber List and compare prices. The result will astonish you. Again we ask you to turn to pages 1148 to 1152. Note particularly the pictures of houses built according to our plans and with our material. Read what the builders have to say. Any one who has used our material is a satisfied customer because we supply only the finest quality of building material at a saving of at least 25 per cent—in many instances our prices are just half regular retail prices.

WE PAY THE FREIGHT

BUY DIRECT FROM MANUFACTURER AND *Save from $100.00 to $150.00* ON ENOUGH FOR THE AVERAGE HOUSE OR SMALL

A DOUBLE BARGAIN.

Every piece of lumber you buy from us is *a double bargain—a bargain in price* and a *bargain in quality.*

WE ARE MANUFACTURERS of high grade lumber in every size, width and thickness; in fact, we make everything needed for a building from the foundation up.

WE SHIP ALL LUMBER direct from our big mills in the South or from our 40-acre distributing yards in Illinois at prices that represent actual manufacturing cost, plus our one small profit.

YOU SAVE FROM 33⅓ TO 50 PER CENT, or from $100.00 to $150.00 per car by this method of buying direct from the manufacturer and thus eliminating the jobbers' profit and the retail dealers' profit. Retail dealers cannot buy lumber to any better advantage than you can buy from us and we give you a greater advantage in wide selection and low price than if you owned a lumber yard of your own.

WE SHIP LUMBER QUICK. On account of the enormous stock carried (a total stock of over 2,500 carloads always on hand), we are able to ship complete orders on a few days' notice from either our big mills in the South or from our yards in Illinois.

NOT A BAD BOARD IN THE LOT. SAVED $100.00 PER CAR.

Detroit, Ill.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I am well pleased with the two carloads of lumber I received from you. I never found a bad plank in the whole lot. I think I saved as much as $200.00 on the lot, besides getting a much better grade than I could have gotten here. You will sell more lumber here soon.

Respectfully yours,
N. SLOAN.

BE SURE TO WRITE FOR OUR LATEST LUMBER PRICE LIST, which quotes you the lowest wholesale prices, including freight charges to your station. Compare the prices shown in the lumber list with the prices you would have to pay locally and then remember that we **GUARANTEE THE QUALITY.** Read what Mr. N. Sloan of Detroit, Ill., says about the quality of our lumber and the saving he made. This is but one of the many letters we receive daily telling the same story.

If you contemplate building, be sure to send for our Wholesale Lumber Price List No. 16H. It quotes prices delivered to your station. It is FREE ON REQUEST.

SASH, DOORS, BLINDS, MOLDINGS,

and all kinds of interior and exterior trim shown on pages 1148 to 1152 inclusive. If you don't find what you want on the pages named above, then send for our Building Material and Mill Work Catalog No. 20H. It shows everything in the building line. It is FREE ON REQUEST.
